NuTone "IN·BUILT"

Mixer · Blender · Sharpener

EASY TO INSTALL IN ANY KITCHEN COUNTER

MIXER

BLENDER

SHARPENER

Most Exciting Kitchen Appliance in 20 Years

No need to waste valuable cabinet space for storage of separate motor units for many other kitchen appliances. NuTone's single, powerful "In-Built" Food Center does everything — It's recessed completely out of sight, leaving the kitchen counter top smooth and tidy.

The NuTone "In-Built" can be installed over a drawer, or cabinet fillers, or "dead" corners, above a door type cabinet and in other spaces.

U. S. & FOREIGN PATENTS PENDING

IT'S A LARGE MIXER — with a motor driven bowl — full 3½ quart size. Precision fit of single beater mixes better than 2 or 3 beaters.

IT'S A FOOD BLENDER — with 6 speeds, instead of 1 or 2. Stainless steel blades, sealed in for safety. Light weight plastic container.

IT'S A KNIFE SHARPENER — with flexible sharpening discs. No solid stone to destroy knife temper Removable cap catches grit.

FREE Catalogs and Installation Data. Write NUTONE, INC., Dept. AB-4, Cincinnati 27, Ohio

THE WORLD'S SAFEST HEATERS FOR "TOASTY-WARM" BATHROOMS

ANOTHER NEW FEATURE TO SPEED INSTALLATION OF

CLOUD'S Lockwood OAK FLOORING

SNAP SIDE MATCH

HERE'S HOW IT CUTS LABOR COSTS...

The tongue of each piece of Cloud's Lockwood Oak Flooring is now milled to slip easily into the groove of the adjoining piece . . . then "snap" or "lock" securely into position at precisely the right point in the laying operation.

New, specially-designed equipment makes it possible for Cloud plants to produce oak flooring with this labor-saving Snap Side Match feature.

The time once lost "forcing" fit of tongue and groove has been eliminated . . . and builders enjoy another reduction in laying-through-finishing costs, thanks to Cloud's constant improvement in the design and manufacture of Lockwood Oak Flooring!

AMERICAN BUILDER
NORTHERN EDITION

The Opportunity Page

(Keynote page of the AMERICAN BUILDER, which is opportunity cover to cover, advertising and editorial)

Use the shady method

With sales becoming more competitive, you may find buyers looking for homes in areas where trees have been saved. Try to get your local FHA office to go along with an announcement made by FHA in Detroit which gave assurance it will give definite credit on FHA appraisals to builders who save trees in good condition.

In case you didn't know

You're holding the best "helper" a builder ever had—American Builder's April directory issue. Whether you need technical information, lists of brand names, lists of products and equipment—it's all here to serve you throughout the year.

The good old days

It's time to explode the old myth, "they don't build them like they used to." If you've heard that tired cliche from home seekers, point to copper plumbing, modern heating, wall and ceiling insulation, just to mention a few advantages of the modern house. Unengineered construction methods of yesteryear simply do not compare with the technology applied to homes of today.

Full-package tie-ins

Take a tip from Charles Blanton, Houston builder at Sharpstown. He's arranging to sell furniture to homebuyers on a no-downpayment plan. Furnished model homes are open for inspection, and the prospective purchaser gets to see what his furniture will look like before making an investment. A buyer is privileged to make additions or changes according to his tastes.

Look to new horizons

If you want to reach that hitherto untapped market—the lower-income families—look for land in areas where new industry is moving or where new highways make travel more convenient. Arthur G. Pulis, Jr., president, Franklin Capital Corp. of Newark, reports on the rapid residential growth in central New Jersey due to these facts and the lower land costs in previously undeveloped areas. The latter point, particularly, he points out, has made home ownership possible for families who could not afford houses erected on upzoned plots.

OHI

Participation in OHI continues to be one of your best bets. Don't forget, Ed Gavin and other editors of American Builder have been visiting the country's most remodeling-conscious cities. Their report on organizational procedures at the local level will appear next month.

VA approves Lu-Re-Co

If you've been hesitating to use the Lu-Re-Co method of construction because you've been worried about whether loans could be arranged, you'll be glad to know VA has determined it acceptable. If your local VA office is not aware of this ruling, ask them to write to Office of Chief Benefits Director, Department of Veterans Benefits, VA, Washington 25, D. C.

American Builder is published by the SIMMONS-BOARDMAN PUBLISHING CORPORATION, Emmett St., Bristol, Conn., with editorial and executive offices at 30 Church St., New York 7, N.Y. James G. Lyne, President; Arthur J. McGinnis, Executive Vice President and Treasurer; Samuel O. Dunn, Chairman Emeritus; J. S. Crane, Vice President and Secretary; Fred A. Clark, Vice President and Business Manager; Edward G. Gavin, Vice President and Editor; Rayne Sparks, Vice President; Robert G. Lewis, Vice President.

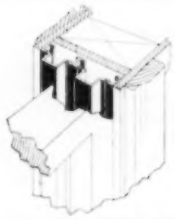

Another *Plus* of Progressive Research and Development!

NEW SEAL-FLEX Removable WINDOW OPERATIVE HARDWARE SERIES—

For use in standard double-hung window frames

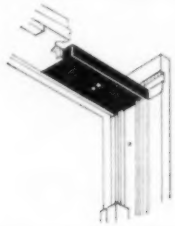

SEAL-FLEX LINE AVAILABLE IN 4 DIFFERENT FLEXTITE SERIES

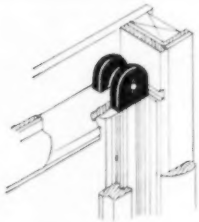

1 Flextite Friction Series

Born a Champion

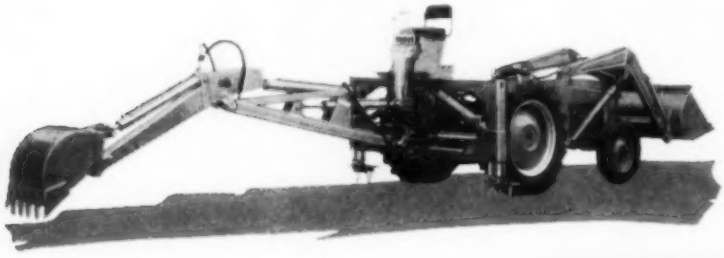

DAVIS BACK-HOE and DAVIS LOADER

With quality in every part and enthusiastic acceptance from everyone, the new Davis Back-hoe is truly a champion... a thoroughbred running mate to the Davis Loader, America's quality loader. With features you've dreamed of – at a price lower than the average – you get greater quality, versatility, comfort, and visibility. You can dig at right angles alongside roads and canals or in crowded areas. You always face your work, so at the end of the day you'll have done more work with less fatigue. You can see exactly where you're digging even at 13 feet, and you can dump your spoils all to one side with room between the pile and the hole. Individually controlled hydraulic stabilizers let you level-up on slopes, and keep you from ever upsetting. Detach the back-hoe in less than 5 minutes and use the tractor for other work. The Davis Loader and Davis Back-hoe are mass produced with modern machinery to give uniform quality at a price you can afford. See a demonstration and you'll believe it.

To The Editors:
American Builder
30 Church Street
New York 7, N. Y.

Personals

Dear Mr. Gavin: . . . my congratulations on your receipt of the Distinctive Service Award from NAHB. This is a well merited recognition of your help to home builders and home buying public.

Typical of such activities of yourself and American Builder magazine is your February 1956 issue featuring prefabrication. This issue should be most helpful in convincing forward-looking builders of the benefits and economies of prefabrication . . .

—F. J. Samerdyke, President, Harnischfeger Homes, Inc.
Port Washington, Wisconsin

Dear Mr. Gavin: . . . As the first non-builder ever to receive such an award from NAHB, you are to be congratulated for this unique distinction. Your genuine, constructive interest in the home building industry is reflected in the editorial and news pages of American Builder.

—Charles Tombras
Knoxville, Tenn.

And personal thanks from Ed Gavin for these and numerous similar messages.

More on Prefab Feature

Sirs: I want to thank you for your splendid feature article on Expan Homes in February. Your reporting was excellent, together with the general section on prefabrication.

—Alex Bruscino
Cleveland, O.

We wish there were space enough to print more of the reactions we have received, but these are fair samples.

Letters Are Rolling in, Too

Sirs:—The inquiries as a result of your article in the February issue about our houses are rolling in. The article and the illustrations concerning our house are very fine and in general we are extremely pleased. I should like to point out that ours is specifically *not* a truss-roof house.We use a cathedral ceiling which follows our 2.8 7/16 pitch. There are no joints to tape in our house because the joints in the ceiling, for instance, lie in mahogany beams, 3" by 4", as the same mahogany is used as trim in the entire house.

—Arthur Dahlman, Sales Manager, Home Building Corp.
Sedalia, Mo.

It was a gable-end being hoisted on the H.B.C. crane.

Double Honors

Sirs: I was very much surprised and delighted to see that you had selected our Parade of Homes "Starliner" plan as the western house of the month (February). I think the presentation and description are excellent. It was the promotion on this home which won for us the Honeywell Acapulco Derby for this region. As I watched the presentation of awards for American Builder's National Home Week merchandising effort, I was sorry that I had not made a similar entry in your contest.

—Edward P. Miller
Tacoma, Wash.

Watch for August issue and details of broadened contest this year: two divisions (under $18.000; under $40,-000), more awards; keep the contest in mind in preparing your promotions.

No Empty Honor

Sirs: We are planning to reprint the story in your publication (on Kinney Leonard's Award house) in numbers of about 25,000 and distribute them at the annual Seattle Home Show . . .

—Wm. H. Wurster, Taskett Agency
Seattle, Washington

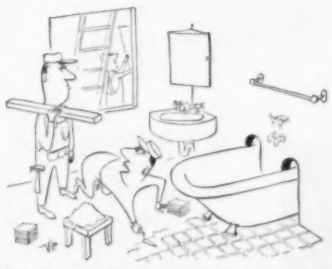

Need we repeat: start getting your 1956 entry ready now?

A Plea from the Heart

Sir: As a mail carrier I am appealing to you. The mail box or slot is regarded as an inconsequential item; while other items of builders' hardware have been redesigned for a streamlined age, mail receptacles seem to stay obsolete. The worst is the flat-bldg., push button flush wall type—just about big enough for a gas bill and a post card from Aunt Minnie. Magazines and bulkier matter have to be left on the floor. I came from the building trades after 30 years.

—William Absolon
Chicago, Ill.

Shall this appeal fall on deaf ears, gentlemen?

"Each duplex will have a half bath"

AMERICAN BUILDER WELCOMES YOUR IDEAS. We'll print them on this page if you write them in a letter. Include photographs or drawings if you have them. We'll not use your name if you feel strongly about it.

READERS GIVE EDITOR

A Big O.K.

CHICAGO, JAN. 24th—Said President Earl W. Smith at the 12th annual convention of the National Association of Home Builders:

"Over the years our Association has been fortunate in having the friendly counsel and support of a distinguished trade magazine—the *American Builder*—and its editor, Ed Gavin.

"You all know Ed Gavin. He has appeared before nearly all of our Local Associations. He has attended our conventions and our meetings. He has been a home builder's speaker on many occasions.

"I do not think I am exaggerating when I say that Ed Gavin has been one of our finest friends.

"He has been a constant supporter of the NAHB from the time it was a tiny organization struggling for existence. In our early days, when we numbered our membership in the hundreds, Ed Gavin crossed this country from one end to another, helping to create membership, urging support for the NAHB, advocating its cause and counselling with us on our problems. He has been a confidant, a supporter and a champion of home builders everywhere. With his cheerful manner and with his sharp mind he has advised us when we faced problems. He has helped us when things were difficult. He has supported us when we needed support and encouraged us when we might have faltered. During all this time he has become one of us.

"We have thought it fitting—and perhaps it is somewhat overdue—to recognize in a small way the tremendous contributions Ed Gavin and his *American Builder* have rendered to our business and our association.

"At this time we want to present him with a symbol of our feeling toward him by presenting him with one of our association's Distinguished Service Awards.

"Incidentally, this is the first time that such an award has been made by the NAHB to a non-builder member.

"But we feel it fitting and proper that we take this opportunity to make this award to him.

"Ed Gavin, will you please join me here at the rostrum?

"Ed, on behalf of the National Association of Home Builders and its membership throughout America, I am happy to present you with our Distinguished Service Award in recognition of everything you have done for home builders everywhere."

AB's Ed Gavin

STUDIES by publications can be timed or steered to prove the darndest things. But here's a "study" from *readers* —the National Association of Home Builders. We've printed it in full, because we think it tells a rather full story of the value and validity of the American Builder. Neither competitor is published to the same reader service specifications at all. We'd like to show you. Simmons-Boardman Publishing Corp., 30 Church Street, New York 7.

BUILDING COSTS

Wholesale Prices and Average Hourly Earnings Building Construction (1947-49 = 100)

2. Rising slowly but steadily to 129.7, building materials price index set a new record, largely due to increase in paint costs.

CONSTRUCTION ACTIVITY

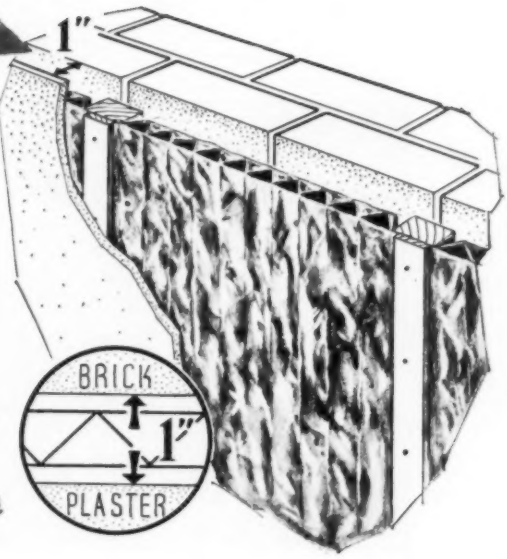

Source: U.S. Dept. of Labor (BLS) and U.S. Dept. of Commerce (BDSA)

3. February's $2.7 billion construction activity matched peak set in February, 1955. Residential outlays dropped to $1 billion.

HOW TO

Insulate Masonry Walls Get 2" Insulation Value Create 1" Wall Space

PROTECT WALLS OF BRICK, STONE, CONCRETE AND CINDER BLOCK AGAINST HEAT LOSS, HEAT INTRUSION, AND DAMPNESS AT ABOUT 8¢ SQ. FT. (Insulation with Labor)

Insulate economically and effectively against heat and vapor flow in masonry construction, with 2 sheets of tough aluminum separated ½" apart by a flame, mold, and insect retardant accordion fiber. They install easily in one operation to furring strips. Only ½" deep installed, this insulation fits into the shallow 1" spaces created by the furring.

Comfortable areas can also be created in basements and other places in existing buildings for playrooms, storage, laundries, workshops, even living quarters; by this scientific construction of multiple aluminum and reflective spaces.

A MUST FOR SHALLOW SPACES

Cellar Walls	Air Ducts	Cold storage bins
Floor panels	Floors	Heated trucks
Airplanes	Ships	Prefab buildings
R.R. trains	Trailers	Freight cars
	Refrigerated trucks	

HEAT AND VAPOR FLOW RETARDED

With respect to radiant heat flow, the aluminum surfaces of this insulation have 97% reflectivity, and only 3% absorptivity and emissivity. Conduction is slight through the air spaces of low density. The layers of aluminum and fiber retard inner and outer convection. These comprise ALL methods of heat flow.

Because they are METALLIC and CONTINUOUS, the aluminum sheets are almost impervious to vapor flow. Infiltration under the flat flanges is slight. The possibility of condensation formation on or within this kind of insulation is minimized by the scientific construction of multiple layers of aluminum, fiber and air spaces.

This scientific insulation is commercially available as Infra Type 4 Jr. It has 4 reflective spaces, 2 outer, and 2 inner rows; and 4 reflective surfaces. Made for 16" centers, it is packed 500 sq. ft. to a carton in one continuous strip. It is also available with an asbestos partition.

HOW TO INSTALL

Attach 1" furring strips to walls on 16" centers. Tack flange of unopened Type 4 Jr. to *face* of furring strip with an occasional staple, bottom (flat) surface facing room. Expand insulation and tack to face of adjacent furring strip. Lap and tack flange of next piece of insulation *over* previously tacked flange of adjacent installed insulation. Nail rough lattice strip *over* combined flanges, which will prevent contact with subsequently installed lath or wall board, and create an additional air space.

The U.S. NATIONAL BUREAU OF STANDARDS has published an informative booklet describing the destruction which condensation can cause and means of preventing it. It is entitled "Moisture Condensation in Building Walls." Send us coupon for a FREE copy.

Get a FREE SAMPLE of this unusual insulation. Check the box in the coupon.

The Building Outlook

SMALL TALK

TOMORROW'S HOMES

You may be surprised by the homes you'll be building in the future! One glimpse, offered by the Exposition of Modern Living in Dallas, pictured a functional house with movable walls. Meanwhile, Illinois University is conducting experiments on pneumatic bricks: triangular plastic pillows which can be built into almost any arch-shaped form.

UNION MEMBERSHIP

Look for a concentrated membership drive by the building trade unions. Details of the plan —with conversion of 1,000,000 non-union members as its goal— were mapped out at the Miami mid-winter meeting of AFL-CIO Building and Construction Trades department.

PLANE FACTS

If you've been worried about building near airports, especially those to be used by jets, happy news came out of a meeting of FHA Commissioner Mason and top airline and aircraft officials. Assurances were heard that noise from jets would eventually be muffled and aside from longer runways, they should not cut into values of housing or change community patterns.

THE GLOOMY SIDE

Main problems builders are facing and will continue to face seem to be land shortages and financing. For a look at these and other difficulties confronting the industry see American Builder's survey feature appearing on page 15.

NORTHERN EDITION

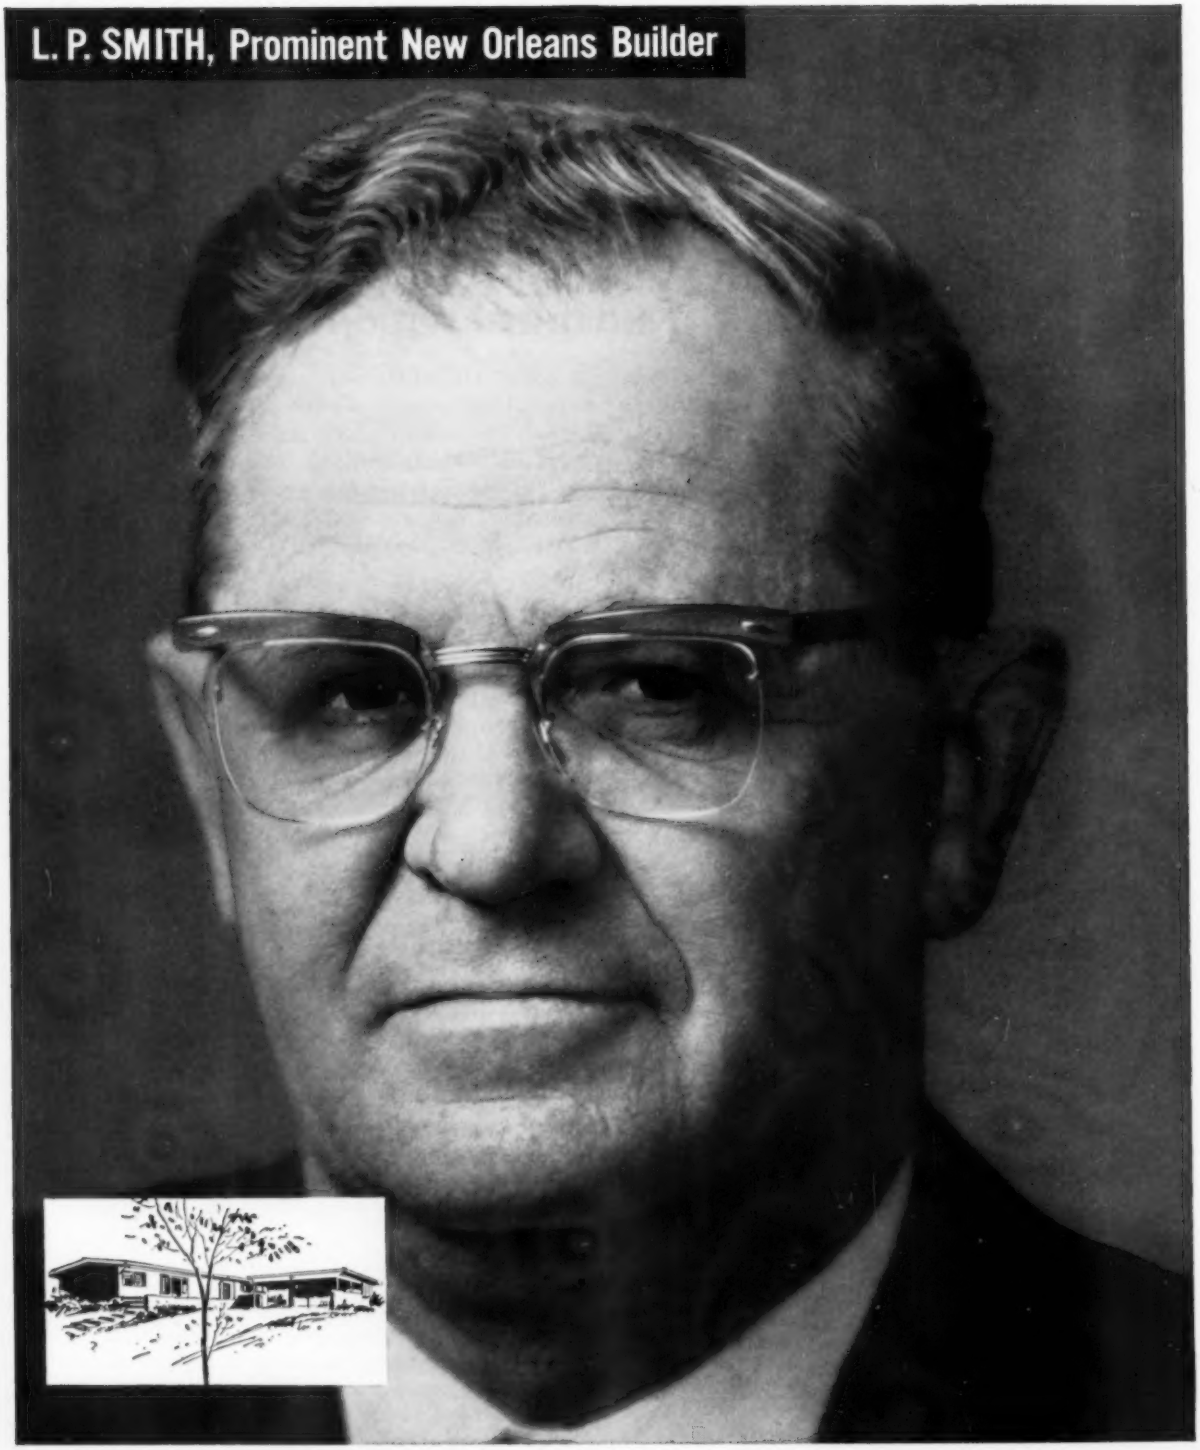

PLASTIC HOMES are in your future. A Toledo firm, which hopes to see them become a reality before the end of 1956, intends to fabricate the houses—to be built of 4-inch thick plastic panels. Special honeycomb paper will be sandwiched between 4 x 8 plastic sheets and sealed all around to form the basic product for the houses.

ADEQUATE WIRING is today's hot topic. If your community hasn't changed its building code to call for 100-ampere wiring, it soon may, following the lead of Washington State and many cities throughout the nation. Installing the 100-amp. system gives you an extra sales feature. American Builder will give you some pointers in August, September and October.

BRIGHTER MORTGAGE PICTURE is indicated by latest figures showing first upturn in five months in volume of applications for FHA home mortgages. A rise of 18 per cent caused Commissioner Norman P. Mason to remark: "It is very likely that this increase reflects an improvement in the availability of money for mortgage financing." VA says analysis of savings and mortgage repayment trends indicates sufficient funds probably will be available during 1956 to finance relatively high level of construction.

WAIT-AND-SEE ATTITUDE of builders worried over early pessimistic forecasts of starts is being replaced by optimism. January's high starts figures caused a revision in thinking, with predictions being made that residential building will equal that of 1955.

L. P. SMITH, Prominent New Orleans Builder

"THEIR MONEY'S WORTH, that's what today's families look for when they're out to buy a house. In materials, appliances, furnishings, they want the assurance of quality and value that they get from the brand names they know best. That's why we use 36 Post-advertised products in the homes we build. They tell *every one* they're getting their money's worth." (*Manufacturers of building materials, equipment and fixtures place more advertising in the Post than in any other consumer magazine.*)

The Saturday Evening
POST
—gets to the heart of America

PRESSTIME ROUNDUP

Summer sales: is the bloom off the rose?

The well-aired problems of financing, rising costs, increasing restrictions, shortages of materials and labor have caught up with the heavy output of the home building industry to cause many thinking builders to take a new look at their sales picture. In an American Builder country-wide spot check, one of the most prolific winners of national awards for good home designs, Joseph L. Eichler of Palo Alto, Calif., states the case:

"The biggest single problem that builders will have to face this summer is the problem of selling their houses, and along with this, one of the things that seems to be making that difficult at the present time, is the large number of misleading statements that are being published regarding financing.

"In the past few days, government agencies and others have been making statements to the effect that the mortgage situation is considerably easier. . . . Also recently the government removed the ban on 30-year loans. The general public, which is in a very tough buying mood at the present time, believes these statements when they read them in the papers and it further complicates the sales situation.

"I, myself, am particularly interested in placing 30-year FHA loans and I have not found a single source that is willing to make them. Most of the FHA loans in this area are made directly by banks, none of whom will touch a 30-year loan. It is possible to get future commitments for 30-year loans but at big discounts, just as it is possible to get VA financing at big discounts. At no time in the past six months was money unavailable at a price, but that is the sticker. The prices would be such that no legitimate builder could make a profit.

"Nevertheless, even if financing were readily available, I still think that the bloom is off the rose. I think that people will buy houses, but that they will have to be sold. Also, I think the factor of trade-ins will become increasingly important in the market."

Eichler rapped continual new regulations emanating from FHA, "each one of which burdens the builder and accomplishes nothing. I have never objected to a new regulation that actually improves the quality of a house, even if the cost is more. But I do object to many of the regulations . . . that merely cause hardship and increased costs, and accomplish nothing."

. . . here's how to keep the buyers coming

Several builders have definite ideas how to keep buyers coming their way. In highly competitive Long Island, Edward Strausman, vice president of the Strausman Construction Co. says sales will be of biggest concern, points out: "The potential is still here, but builders will have to concentrate on value. Sales will be made in all price ranges where the potential purchaser finds what he is looking for.

"Good location of land is a prime factor today, especially in and around the larger cities. Just as important will be to produce something new and desirable in layout and design of the house. The development should conform in every way with the community insofar as planning and price is concerned."

Ken Corrigan of Worthington, Ohio, 1955 president of the Columbus Home Builders Assn., observes "There are plenty of buyers left, if they can find what they want to buy. . . .

"The majority of home buyers now are second and third-time buyers and have their eyes wide open. They know where to look for shoddy workmanship and most of them know when a house is over-priced.

"Build every house as if it were for a discriminating buyer. Don't discount a buyer's intelligence. Employ an architect who is sharp in his designs and search magazines for plans and clever ideas. Use modern building methods, which are better and cost less. Research the market to find the buyers' needs and the potential market."

In the Kansas City area, Larry Winn Jr. of the Winn-Rau Corp. agrees sales will present the biggest problem but limits the difficulty to the $15,000 to $25,000 bracket.

. . . call for merchandising in all its forms

Looking westward to the nation's top home selling territory—Los Angeles county—Harry Griffith of Griffith Bros., Anaheim, Calif., calls for merchandising in all its facets, such as house locations priced to a particular market, sales program, advertising salesmen, well presented models. In his opinion, "it will take these basic ingredients extended to their fullest possibilities for a builder to stay abreast of today's market and meet competition in the home builder field, as well as automobile appliances, travel and all other appealing items which compete for the consuming dollar."

Frank D. Evans, president of the Portland (Ore.) Home Builders Assn., reports that "institutional advertising competition for the consumer dollar is becoming more competitive, with the housing industry, at present, losing out to the automotive industry and others." He finds it increasingly hard to pass rising construction costs to buyers.

WHICH WAY DISCOUNTS, RATES? ▶

Names make news

T. B. King, former assistant deputy administrator of the Veterans Administration and until recently vice president of National Homes Acceptance Corp., has opened law offices in Washington, D. C., to specialize in housing and mortgage finance matters. During his tenure as director of the VA Loan Guaranty Service, loans were arranged for more than 3,500,000 veterans' homes.

King

William Demarest has joined the National Assn. of Home Builders as an assistant director of its construction department and research institute, according to John M. Dickerman, executive director. For five years, Demarest had been modular coordinator for the American Institute of Architects at Washington.

Thomas P. Coogan, president, Housing Securities Inc., New York, and former NAHB president, was elected as chairman of the National Housing Center, Washington, at annual meeting of board of directors

NEW PRESIDENT of Ponderosa Pine Woodwork, James D. Rowland (left) receiving congratulations from FHA Commissioner Norman P. Mason.

March 1 in Miami. Richard G. Hughes of Pampa, Texas, another NAHB past president, was named vice chairman. Leonard L. Frank of Hicksville, N. Y., was elected to the board, replacing Edward R. Carr of Washington, D.C.

Earl W. Peterson, vice president of Ideal Stone Cement Co., Omaha, was elected president of the National Concrete Masonry Assn. at its 36th annual convention in New Orleans.

James M. Whelan of the Trane Co., La Crosse, Wis., has been elected president of the Convector Manufacturers' Assn.

NRLDA plans 14 convention clinics

The National Retail Lumber Dealers Assn., has planned 14 management clinics for dealers attending its third annual building products exposition next December in Chicago.

Action-type clinics involving demonstrations will be held in the International Amphitheatre, scene of the exhibits. Subjects are to include materials handling and warehousing, component construction techniques, retail store layout and display, use and sale of power tools.

The other ten sessions, at the Conrad Hilton Hotel, will deal with profit sharing-retirement and pension plans, land development and community facilities, building profits with job responsibility, how to cash in on Operation Home Improvement, how to deal with labor unions, advertising and merchandising techniques, profitable kitchen remodeling, how to estimate repair and modernization jobs, installment selling and mortgage credit, FHA's new minimum property requirements.

DEALER'S VIEWPOINT **By H. R. Northup, Executive Vice Pres., National Retail Lumber Dealers Assn.**

Permanent Title I program likely to pass

There now appears to be a good possibility that Congress will make a permanent program out of FHA's Title I repair and modernization program. The administration has given its official approval to the idea, and it should have unanimous industry support.

Northup

The fact that Title I has in the past been extended on a hand-to-mouth basis has created an air of uncertainty which undoubtedly had led many lenders and probably some dealers to regard the program as a temporary or makeshift measure. Certainly, its uncertain future has to some degree discouraged all-out promotion.

Putting Title I on a permanent basis is at least as important as the other proposals to increase the maximum amount of Title I loans and to increase the maximum term of home improvement and non-residential loans from three years up to five years, although Congressional approval of the latter proposals would make Title I a more useful tool for dealers.

Six-month rule scored

Another highly desirable change would be removal of the regulation which denies Title I assistance until a home has been occupied for six months. The purposes of that restriction, of course, are to prevent home buyers from using the proceeds of a Title I loan to help meet downpayment requirements and to prevent a home-owner from taking on too many financial obligations, but its effect is to deny help to new home-owners who need to make legitimate expenditures for items such as screens and storm windows and don't have the necessary cash.

It would seem entirely reasonable to let the lender determine whether the loan is to be used for legitimate purposes and whether the borrower's credit standing is good enough to justify the risk. The lenders are just as competent to make these decisions as they are to pass on any other loan applications.

Valuable sales aid

With home improvement work sure to assume a greater importance in the future, Title I promises to become an increasingly valuable sales tool. Lumber dealers as a group have only begun to take full advantage of this wholly self-supporting program but are certain to use it more generously in the future as more and more yards offer complete package deals, including time payment financing, in this field.

Land shortage called artificial

The severe land shortage current in the Detroit area is strictly a man-made operation which has raised cost of residential sites about 20 per cent in the past year, points out Sheldon Rose, vice president of Edward Rose & Sons, developers.

With virtual disappearance of improved city lots, Rose said, builders have been forced to take raw land, plat it and install utilities, after obtaining approval from ten or more agencies from federal to local level. This procedure, he declared, "has become so involved and time consuming that it has created an artificial shortage of land.

"As a result, land prices in this area are skyrocketing. This rising cost of land is forcing up the price of new homes and is costing the public millions of dollars yearly. Instead of helping the general public, this cumbersome system is acting in the exact reverse."

Rose charged that when any agency turns down a proposed plat, the builder must make changes and start over, with approval 18 months to three years away. He saw the situation especially discouraging to new and small builders who cannot afford to spend that kind of time.

Split-levels on solid ground

Split-level houses will continue in popularity as long as costs remain high and the need exists for a second living room, predicts Herman H. York, Long Island architect. He says:

"Split-level is not the only design in which a family room can be provided, but it is certainly the form which does it best at the price it costs. The secret behind split-level success is not based upon a buyer's preference for a house with multiple levels, as much as the buyer's awareness of a considerably greater floor area.

"However, should the nation's economy result in lower incomes, the trend will be toward houses without the second living room. Conversely, as greater numbers of American families can afford luxury homes on large plots, the need for splitting levels is diminished where cost is not a principal factor. The second living room can be provided in one-story homes. . . . Without a family room, the only justification for split-level design is a plot of sloping ground."

Milwaukee VA upgrading

VA officials of the Milwaukee regional office met with 200 Wisconsin builders recently to tell them that houses sold to veterans must have painted and fitted storm sash and furnaces built on platforms. Also, subdivision roads must have a dust seal while construction is under way and sharply sloped ground must be sodded, rather than planted with grass seed. Another requirement under consideration: that each buyer be furnished detailed plans of his house at contract-signing time.

International Home Building Exposition, scheduled May 12-20 at New York City's new Coliseum will present in "Hometown U.S.A." a 20x60-foot scale model of a completely planned and integrated community for 5,000 families. Howard J. Teas and Ernest Steinbrenner, the designers, say it will not only represent an ideal community of today but also will project its planning into the future.

AIRING THE PROBLEMS OF THE DEVELOPMENT BUILDER

How to switch from custom to multiple building when the trend to larger subdivisions demands it attracted many custom builders to recent meeting of Long Island (N. Y.) Home Builders Institute Eastern Division. Shown at speaker's table are (from left): Frederic D. Fuld, assistant secretary; Eugene Romano, vice president; William Hetzel, division president, attorney and VA-FHA mortgage consultant to the institute.

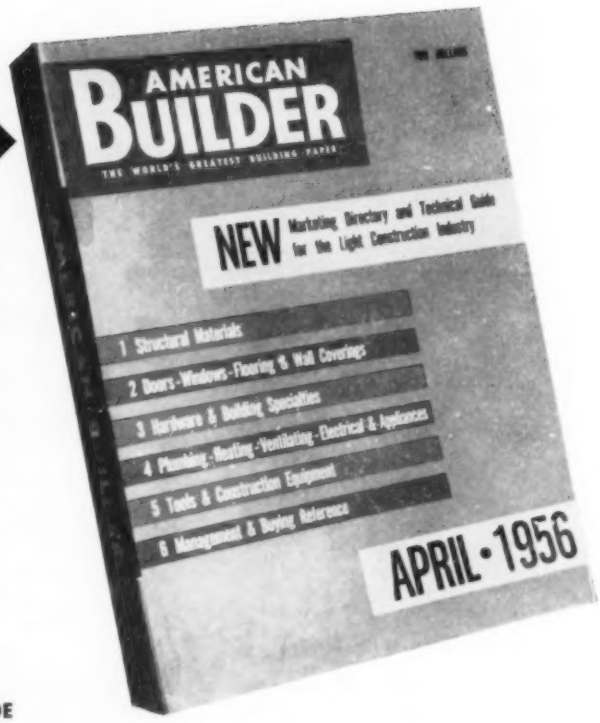

COLUMBUS CONTESTANTS OFF TO MEXICAN VACATIONLAND

Winners in drive pushing membership of Columbus, Ohio HBA to 469 board airliner for two-week vacation awards in Acapulco. Couples include, from left: Mr. and Mrs. W. Ed Bogen, Mr. and Mrs. F. M. Donelson, Jr., Mr. and Mrs. Roy Haddox, Jr., Mr. and Mrs. Don Morris, Mr. and Mrs. Jess Howard.

How to save time one of the next 12

1. Keep this book handy

MARKETING DIRECTORY and TECHNICAL GUIDE

You'll want to keep this big reference issue close by, within handy reach, for everyday use, as it provides you with the kind of reference material you have wanted, yet never have been able to collect for yourself. A veritable library of building knowledge that you will recognize as worth its weight in gold.

As you turn the pages of this DIRECTORY you will be aware that here is a book that meets a need and will be useful throughout the year because of the scores of editorial data pages, the catalog and specification type of advertising, and the most complete reference directories ever published for the building industry.

Become acquainted with this DIRECTORY and you will be sure to agree that it is a handy book to have around!

2. Use it this way

Every effort has been expended to make it easy for you to use this book. That is why it has been divided into six major sections each opening with a frontispiece which enumerates the subjects covered in that portion of the book.

Become familiar with these indexes—they are your guide—and here is where you will find them:

1. A general index to the sections of this book appears on page 5.
2. An alphabetical list of the manufacturers whose advertisements appear in this book is located on pages 6 and 7.
3. A general alphabetical index and cross-index of the editorial data pages may be found on page 22.
4. The frontispiece of each section contains an index of the editorial data as well as an alphabetical index of the advertisements.

You will note that each section is folioed within itself and the page numbers are prefixed by an alphabetical letter. Section 1 is A; 2 is B; 3 is C and etc.

Here's an example of how you will use this book:

If you are interested in flooring materials turn to Section 2. In the editorial pages are the estimating and specification data on this subject, while in the index to advertisements you will note the names and page numbers of the manufacturer's advertisements of the various types of flooring materials for your selection. Here you can see them all—and make your own comparisons. And, should you want more information on the particular type of flooring you select, just write these manufacturers.

and money in every months . . .

3. Build up your reference file

In each section are reviews of the catalogs and technical literature available from manufacturers. They are yours for the asking and to make it convenient for you to receive this literature, a postpaid reply card appears on the page facing the yellow pages. All manufacturers whose products are described, are keyed by number on this card. Just circle the code number of the product that interests you and drop the card in the mail. You will be pleased to see how easily this service can help you build your personal file of product information.

4. Work the advertising hard

To supplement the technical material offered in the editorial pages of this DIRECTORY you will find that most of the advertisements have been designed to give you the specifications and buying information you will want as reference throughout the year. Get the most value from the advertisements by investigating them carefully, for in these pages you will find the latest developments in building industry products.

The manufacturers who advertise in American Builder want to help you at all times, and they welcome your inquiries. Write to them for literature, prices, or the name of your nearest supply source.

ACKNOWLEDGEMENT

This DIRECTORY issue of American Builder contains material secured from hundreds of different sources. We want to acknowledge here our deep appreciation to the associations, manufacturers and individuals whose cooperation has made it possible to bring together this vast collection of building knowledge.

Already plans are being laid for the 1957 April Directory. We sincerely wish to improve on past performances, therefore your suggestions will be most welcome and will help us to serve you better in the future.

The Editors

5. Use the yellow page section

The yellow pages in the back of this book contain three important directories each performing a specific purpose for you. You'll want to become acquainted with these for here is what you will find:

First: Associations and Societies of the Building Industry.

Here is your authoritative source of information on construction problems. Associations disseminate the knowledge compiled by the experts in their particular phase of the building business. Consult them when you have a problem, that is their job. You will find them most helpful and cooperative.

Second: Brand Names of Building Products and Equipment.

Have you often associated a product by its brand name yet could not recall the name of the manufacturer? Starting on page G6 you will find a complete directory of brand names with the name and address of the manufacturer.

Third: Building Products and Equipment Manufacturers.

Starting on page G30 is your buying guide of products and equipment you need and use in your every day work. The names of the manufacturers who advertise in American Builder are listed in bold type. They are particularly anxious to help you, so do not hesitate to contact them for more specific information.

ESTIMATING BRICK MASONRY

TABLE 1
FOUR-INCH MODULAR BRICK FACING WALLS RUNNING BOND

(Full Bed and Head Joints)

Nominal Size of Brick*	Number of Brick per Sq. Ft. of Wall	Cu. Ft. of Mortar per Sq. Ft. of Wall**		Cu. Ft. of Mortar per 1000 Brick**	
		3/8" Joint	1/2" Joint	3/8" Joint	1/2" Joint
2-2/3x4x8	6.75	0.0608	0.0765	8.90	11.30
2-2/3x4x12	4.50	0.0535	0.071	11.90	15.80
2x4x12	6.00	0.0676	0.09	11.30	15.00
4x4x8	4.50	0.0432	0.0575	9.60	12.80
4x4x12	3.00	0.039	0.052	13.00	17.30

* Actual size plus thickness of one joint
** 10% added for waste

MODULAR BRICK

In Table 1 are the quantities of units and mortar required to construct a 4-in. wall using 5 sizes of modular brick with two joint thicknesses. The mortar quantities shown are for the bed and head joints only. If this facing is to be applied to a backup wall, the quantity of mortar required for the interior vertical or collar joint must be added. These quantities are as follows:

.0313 cu. ft. for 1 sq. ft. mortar joint 3/8-in. thick.

.0365 cu. ft. for 1 sq. ft. mortar joint 7/16-in. thick.

.0417 cu. ft. for 1 sq. ft. mortar joint 1/2-in. thick.

The brick quantities shown are for brick laid in running bond. For other bonds in which full headers are used, the correction factors in Table 4 must be added. The 2-2/3x4x8-in. size brick is commonly referred to as the "Standard Modular" size.

TABLE 2
EIGHT- AND TWELVE-INCH BRICK BACKUP WALLS IN RUNNING BOND

(Full Bed, Head and Collar Joints)

Nominal Size of Brick*	Number of Brick	8" Wall Cu. Ft. of Mortar**		Number of Brick	12" Wall Cu. Ft. of Mortar**	
		3/8" Joint	1/2" Joint		3/8" Joint	1/2" Joint
2-2/3x4x8	13.50	0.1544	0.1988	20.25	0.2489	0.3211
4x4x8	9.00	0.1210	0.1610	13.50	0.1984	0.2641

* Actual size plus thickness of one joint

** 10% added for waste

Mortar for interior vertical joints (parging or plastering) per 100 sq. ft. of joint.

3/8" joint.....3.13 cu. ft.

7/16" joint.....3.65 cu. ft.

1/2" joint.....4.17 cu. ft.

TABLE 3
NON-MODULAR SOLID BRICK WALLS IN RUNNING BOND

(No headers, or pattern made with blind headers)

WALL AREA SQ. FT.	4-IN. WALL		8-IN. WALL		12-IN. WALL		16-IN. WALL	
	No. OF BRICK	MORTAR CU. FT.	No. OF BRICK	CU. FT. MORTAR	No. OF BRICK	CU. FT. MORTAR	No. OF BRICK	CU. FT. MORTAR
1	6.16	.0721	12.32	.19	18.48	.3	24.64	.4132
10	62	.721	124	1.86	185	3	247	4.2

30	185	2.2	370	5.6	555	9	740	12.4
40	247	2.9	493	7.5	740	12	986	16.6
50	308	3.6	616	9.3	924	15	1232	20.7
60	370	4.4	740	11.15	1109	18	1479	24.8
70	432	5.1	863	13	1294	21	1725	29
80	493	5.8	986	14.9	1479	24	1972	33.1
90	555	6.5	1109	16.75	1664	27	2218	37.2
100	616	7.25	1232	18.6	1848	30	2464	41.4
200	1232	14.5	2464	37.2	3696	60	4928	82.7
300	1848	21.7	3696	55.75	5544	90	7392	124
400	2464	29	4928	74.33	7392	120	9856	165.3
500	3080	36	6160	92.90	9240	150	12320	207
1000	6160	72.1	12320	185.8	18480	300	24640	413.2

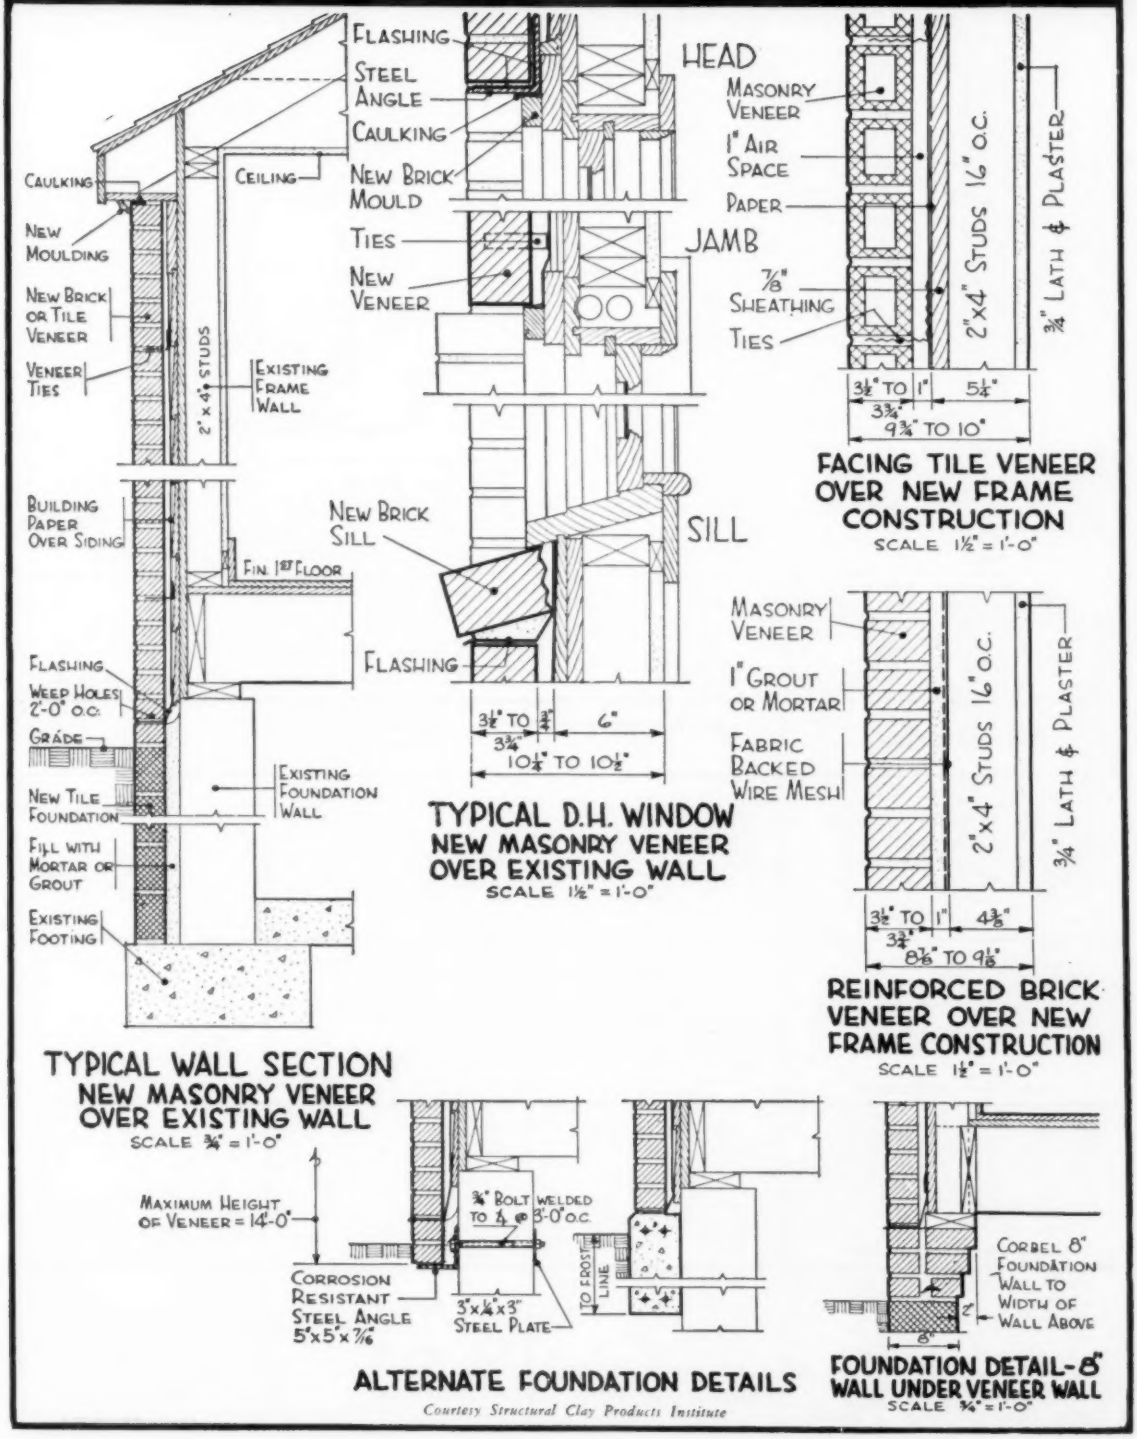

NOTE: 1/2" joints completely filled, including vertical interior joints of 8-in., 12-in. and 16-in. walls. For estimating number of facing and backup brick in any particular type of bonds use correction factor Table 4.

TABLE 4
CORRECTION FACTORS TO BE APPLIED TO 4-INCH WALL QUANTITIES FOR ESTIMATING THE REQUIRED NUMBER OF FACING BRICK IN VARIOUS BONDS

TYPE OF BOND	CORRECTION FACTOR
Common bond with full header every 5th course	20% or 1/5
Common bond with full header every 6th course	16.7% or 1/6
Common bond with full header every 7th course	14.3% or 1/7
English bond, alternate courses full headers	50% or 1/2
English or Dutch bond with full headers every 6th course and blind headers in intermediate courses	16.7% or 1/6
Flemish bond, alternate stretchers and full headers every course	33.3% or 1/3
Flemish bond, with stretchers and full headers every 6th course, intermediate courses with blind headers	5.6% or 1/8
Flemish cross bond, alternate courses with stretchers and headers	16.7% or 1/6
Double header and stretcher every 6th course	8.3% or 1/12
Double header and stretcher every 5th course	10% or 1/10

STANDARD FIREPLACE DESIGN

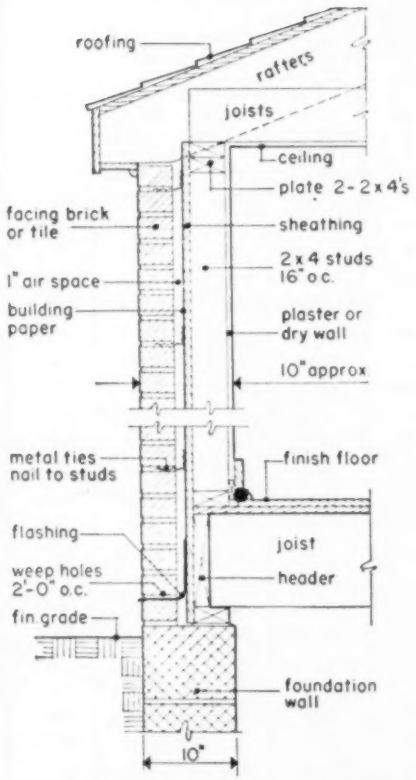

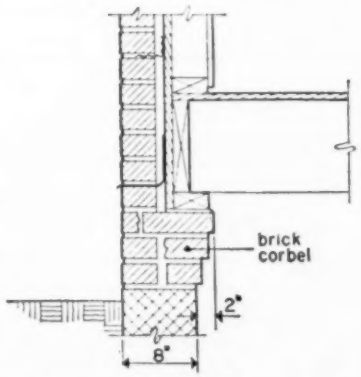

The detail drawing at the left is a cross-section of conventional fireplace construction of brick masonry. The table below gives the working dimensions and should result in satisfactory service. Other sizes may be used, but approximately the same numerical relationship should exist. Dampers should be selected on the basis of the opening width and height. The detail above is typical of fireplace construction using a metal unit. Manufacturers of these units furnish detailed design data which will insure satisfactory performance.

FIREPLACE TYPE	OPENING HEIGHT h	HEARTH SIZE w x d	FLUE SIZE
 Single Face	30″	26″ x 16″	8″ x 12″
	33″	36″ x 16″	12″ x 12″
	36″	36″ x 18″	12″ x 16″
 Two Face (adjacent)	30″	34″ x 20″	12″ x 16″
	36″	30″ x 30″	16″ x 16″
	42″	42″ x 24″	16″ x 20″
 Two Face (opposite)	30″	34″ x 28″	16″ x 16″
	36″	38″ x 28″	16″ x 20″
	42″	30″ x 24″	16″ x 20″
 Three Face (2 long, 1 short)	24″	34″ x 24″	16″ x 16″
	30″	38″ x 28″	16″ x 20″
	36″	38″ x 28″	20″ x 24″

HOW TO USE THESE TABLES

The tables on this page are an aid to estimating and designing with standard concrete masonry units. The following are examples of how they can be used to advantage.

Example:

Estimate the number of units required for a wall 76′ long and 12′ high.

From table: 76′ = 57 units

12′ = 18 courses

57 x 18 = 1026 = No. masonry units required.

Example:

Estimate the number of units required for a foundation 24′ x 30′ — 11 courses high.

2 x 24—30 = 108′ = distance around foundation.

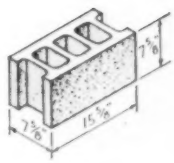

From table: 108′ = 81 units

81 x 11 = 891 = No. masonry units required.

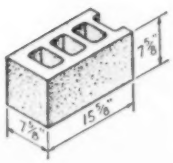

This table can also be useful in the layout of a building on a modular basis to eliminate cutting of units. Example: If design calls for a wall 41′ long it can be found from the table that making this wall 41′-4" will eliminate cutting units and consequent waste. Example: If the distance between two openings has been tentatively established at 2′9", consulting the table will show that 2′-8" dimension would eliminate cutting of units.

TYPICAL SHAPES AND SIZES OF CONCRETE MASONRY UNITS

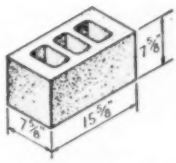

Dimensions shown are actual unit sizes. A 7⅝" x 7⅝" x 15⅝" unit is commonly known as an 8" x 8" x 16" concrete block. Half length units are usually available for most of the units shown below. See concrete products manufacturer for shapes and sizes of units locally available.

Flashing Structural Clay Masonry

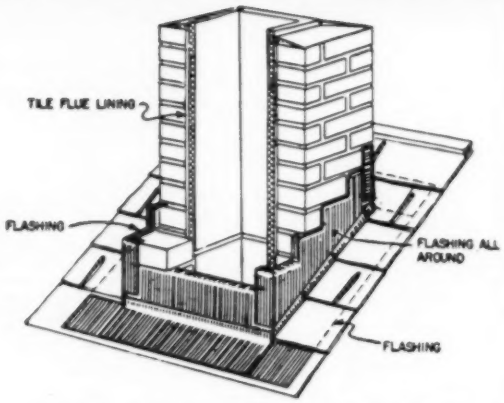

Damp checks should be placed about 6" above grade to prevent moisture, absorbed from the ground by exterior foundations, from traveling upward by capillary action into the wall above.

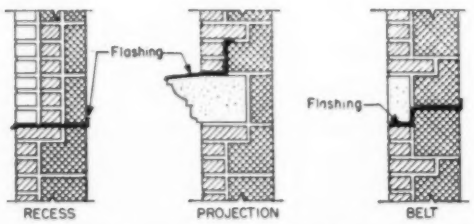

Flashing should be placed under and behind both masonry and wood sills. All heads of openings, except those protected by projecting eaves or hoods, should have through flashing.

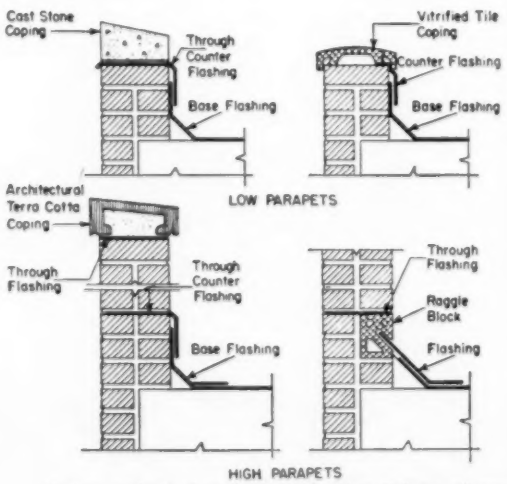

Spandrel beams should be flashed continuously throughout their length. Where columns occur above the beam, the flashing shoud be turned up approximately 6".

Base flashing of chimneys should extend well back under the roof covering. Counter flashing should be imbedded securely in the mortar joints of the chimney wall.

Projections and recesses from the exposed face of the wall tend to hold water or snow and should be flashed, preferably over the top with the outer edge of the flashing bent down and folded as a drip.

Various methods of parapet wall flashing. Unless wall coping is of an impervious material with watertight joints, through flashing should be placed in the mortar bed under the coping.

HOW TO USE THIS TABLE

This table gives the cubic yard factors to use in estimating quantities of concrete required for walls, slabs, walks or drives when the square footage is known.

Example: Find the number of cubic yards of concrete required for the walls of a foundation 24' x 30' x 8' — 10" thick.

2 x (24 + 30) x 8 = 864 sq. ft.

Use factors from table for 10" wall thickness:

800 sq. ft. = 24.64 cu. yds.
60 sq. ft. = 1.848 cu. yds.
4 sq. ft. = .123 cu. yds.
26.611 cu. yds. of concrete required.

Where concrete thickness is an odd number of inches use factors for double the thickness and divide result by 2. Example: For 9" walls use 18" factors and divide final quantity in half.

CONCRETE FOOTING QUANTITY FACTORS

(Cu. Yd. per 10 Lin. Ft.)

HOW TO USE THIS TABLE

This table gives the cubic yard factors to use in estimating quantities of concrete required for footings when the total lineal feet is known.

Example: Find the number of cubic yards of concrete required for a footing 18" wide, 10" thick for a foundation wall 24' x 30'

2 x (24 + 30) = 108 lin. ft.

From the table it is found that 10 lin. ft. of 18" x 10" footing contains .462 cu. yds. (or .0462 for 1 lin. ft.)

Multiply .0462 x 108 = 4.989 cu. yds. concrete required
or .462 x 10.8 = 4.989 cu. yds.

NOTE: This table is also useful in estimating the quantity of earth to be removed from footing excavations. Follow the same procedure as outlined above.

GRADING STANDARDS OF DOUGLAS FIR PLYWOOD

To preserve the high standards of quality set forth by the Douglas Fir Plywood Association the following sets forth the grade marking and certification symbols recommended. Not only do the grade-mark symbols on the plywood insure the builder that he will receive the kind of plywood specified but will facilitate procurement of the grade best suited to his needs.

INTERIOR GRADES

To identify the various grades within the Interior type Douglas fir plywood, these grade-marks are stamped or branded on all standard size panels:

Grade A-A, interior panels are stamped on the edge:

Ⓡ INTERIOR · A-A · DFPA

Grade A-B, interior panels are stamped on the edge:

Ⓡ INTERIOR · A-B · DFPA

"Plypanel," grade A-D, interior panels are stamped on the back:

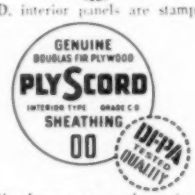

Grade B-D, interior panels are stamped, usually on the edge:

Ⓡ INTERIOR · B-D · DFPA

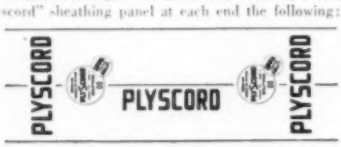

"Plybase" Underlayment, grade C (rep'd) -D, interior panels are stamped on the back:

"Plyscord," grade C-D, interior panels are stamped either on the face or back:

Many Association mills also use across the entire face of a 4-ft. by 8-ft. "Plyscord" sheathing panel at each end the following:

Lines in the above label represent scorings for nailing to framing members at 16, 24, 32, or 48 in. centers.

"Plyform," grade B-B, interior panels are stamped on one face:

Natural Finish One Side, grade N-D, interior panels are stamped on the edge:

Ⓡ INTERIOR · N-D · DFPA

Natural Finish Two Sides, grade N-N, interior panels are stamped on the edge:

Ⓡ INTERIOR · N-N · DFPA

EXTERIOR GRADES

To identify the Exterior type of Douglas fir plywood, the symbol "EXT-DFPA" is branded or stamped on the edge of each standard size panel. The various grades within the Exterior type are additionally identified by the following grade marks branded or stamped on the edge of each standard size panel.

Grade A-A, exterior panels are stamped on the edge:

Ⓡ EXT-DFPA · A-A

Grade A-B, exterior panels are stamped on the edge:

Ⓡ EXT-DFPA · A-B

"Plyshield," grade A-C, exterior panels are stamped on the edge and may also be stamped on the back.

Ⓡ EXT-DFPA · PLYSHIELD · A-C

Grade C (rep'd) -C Underlayment, exterior panels are stamped on the edge:

Ⓡ EXT-DFPA · UNDERLAYMENT

Sheathing, grade C-C, exterior panels are stamped on the edge:

Ⓡ EXT-DFPA · SHEATHING · C-C

Utility, grade B-C, exterior panels are stamped on the edge:

Ⓡ EXT-DFPA · UTILITY · B-C

Concrete Form, grade B-B, exterior panels are stamped on the edge and may also be stamped on the back:

Ⓡ EXT-DFPA · PLYFORM · B-B

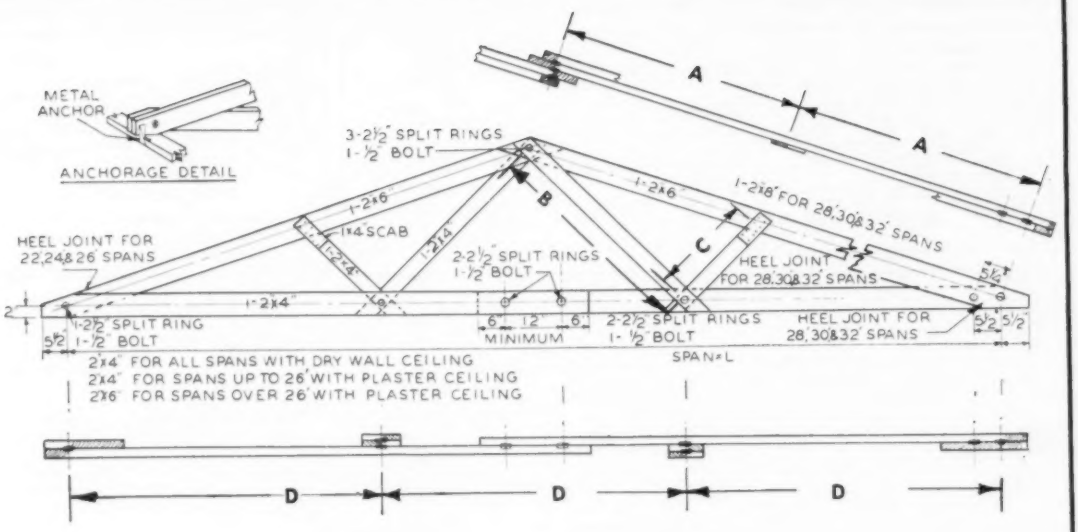

Each standard size overlaid panel also carries the symbol "EXT-DFPA" branded on the edge to indicate it is of Exterior type:

INSTALLATION OF MINERAL WOOL BATTS & BLANKETS

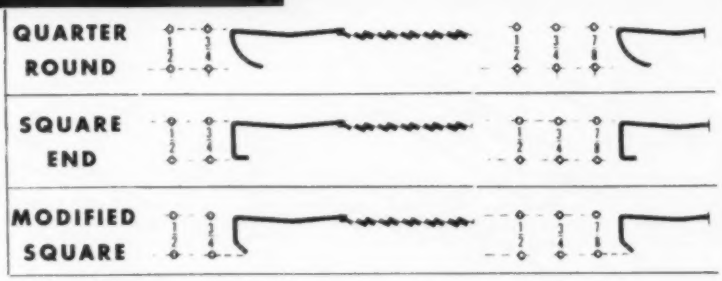

VAPOR BARRIERS: Vapor barriers are relatively vapor-impermeable materials used to keep inside water vapor from passing into the spaces within the walls, ceilings and floors of the structure. Their permeance should not exceed 1 perm, and they should always be installed toward the room (or heated) side of the construction. The outside (cold) wall should have a permeance of at least 5 times that of the vapor barrier, so that any vapor in the wall may escape harmlessly to the outdoors. It is important that all tears and holes that may be made in the barriers be repaired while they are installed.

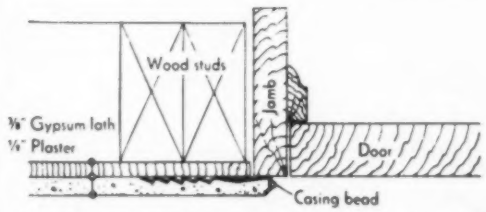

METHOD OF INSTALLATION: Batts or blankets should be butted closely together in the stud or rafter space. Both should be trimmed to exactly fit the space to be insulated, with enough of the vapor barrier left over for stapling at the top and bottom. Batts and blankets with attached vapor barriers have flanges which are fastened to the framing member to hold the insulation in place and to make the vapor barrier moisture-tight. Flanges may be fastened to the framing member face, or to the inside of the member to hold the insulation in the middle of the space to be insulated. Both are acceptable practices. Staples should not be more than 6 inches apart, and should attach the flange to the framing down both sides, and across the bottom and top of sills, plates, and headers. Failure to use enough fastenings is the most common cause of poor installation. When insulating a pitched roof, the insulation should be extended up the rafters to the collar beams, and then across them. Never carry the insulation up to the peak of a pitched roof. It is extremely important to insulate behind water pipes in wall spaces.

Courtesy of National Mineral Wool Association

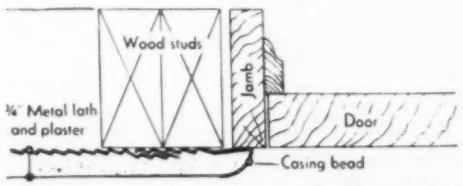

CASING BEADS

Casing beads of different manufacturers may vary slightly, but the illustrations and dimensions shown here are typical and represent Simplified Practice Recommendation 3-52 promulgated by the U.S.Department of Commerce. They are fabricated from not less than 24 gage galvanized steel and are generally available in lengths of 7 and 10 feet.

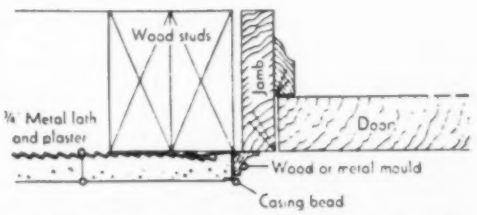

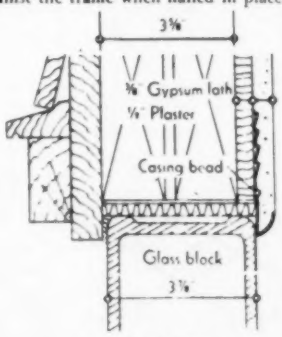

Here, ½" casing bead is used over the face of gypsum lath. If gypsum lath laps the bead, a ⅞" depth (with short flange) is used. With metal lath the depth is ¾".

In this detail, the casing bead laps the door frame. Nailing flanges of casing beads have a slight bend to give a spring-tight fit against the frame when nailed in place.

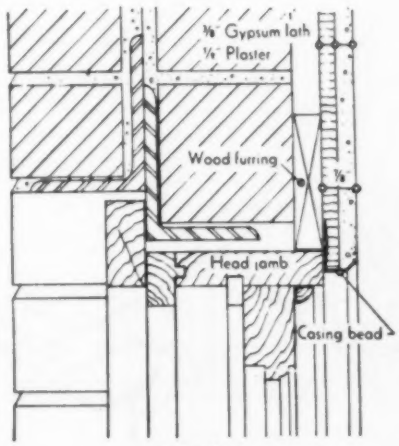

If the door frame is erected after plastering, the casing bead is installed flush with the buck. A small molding closes the joint between buck and frame.

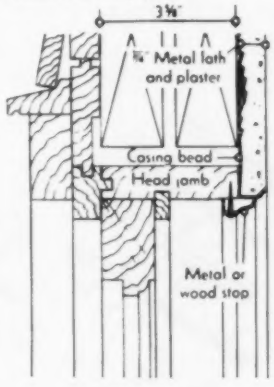

Jamb is Similar

Glass blocks are wider than wood studs, requiring a ½" casing bead to be placed over the gypsum lath. Expanded flange on bead reinforces the plaster.

Jamb is Similar

This ⅞" casing bead provides for ½" of plaster over ⅜" gypsum lath as required by FHA. Casings are mitered or coped to form neat corners at head of opening.

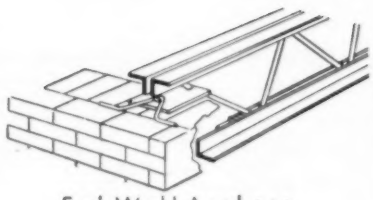

Jamb is Similar

Casing beads around a window are modern in appearance, and not subject to warping or shrinkage. They assure full plaster thickness and sharp straight edges.

STEEL JOIST LOADING TABLES

The following table gives the total safe uniformly-distributed load-carrying capacities, in pounds per linear foot, of Open Web Steel Joists and Nailer Joists, adopted by the Steel Joist Institute. The weight of dead loads must in all cases be deducted to determine the live load-carrying capacities of the joists. When Nailer Joists (those with suffix W) are used, they should not be spaced farther apart than the safe span of the wood deck or other material used over them.

	The prefix letters "SJ" should precede Joist Designations given below, i.e. SJ81, SJ81W, SJ82, SJ82W, etc.																
Joist Designation SJ	**81 81W**	**82 82W**	**102 102W**	**103 103W**	**104 104W**	**123 123W**	**124 124W**	**125 125W**	**126 126W**	**145 145W**	**146 146W**	**147 147W**	**166 166W**	**167 167W**	**186 186W**	**187 187W**	**207 207W**

* The loads are given in kips, a kip being 1,000 lbs.

EXAMPLES

To find correct I beam size:

1. Determine uniformly distributed load.
2. Locate this load figure in column under span in feet.
3. Read size and weight of required beam in column at extreme left.

To find pipe column size:

1. Determine load in kips. If column is to support center of beam supported at ends divide load in half.
2. Locate nearest load figure in column under required length.
3. Read size of pipe required in column at extreme left.

To find I beam column size:

Follow same procedure as outlined for pipe columns.

STANDARD STYLES OF WELDED WIRE FABRIC

Showing Styles, Weights, Spacing and Gauges of Wires, and Sectional Areas

For convenience in listing styles the spacing of the wires is shown to the left of the dash and the gauge of the wires, to the right.

APPLICATION OF ASBESTOS-CEMENT SIDING OR SHINGLES

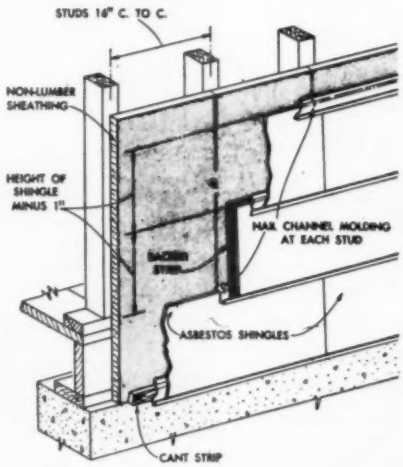

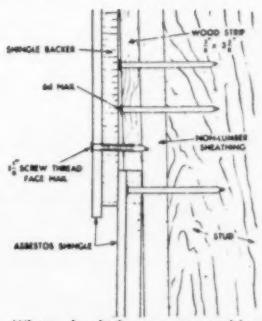

Use of shingle backer where shingles are applied over solid wood sheathing. Shingle backer should be nailed to studs while shingles may be nailed to sheathing.

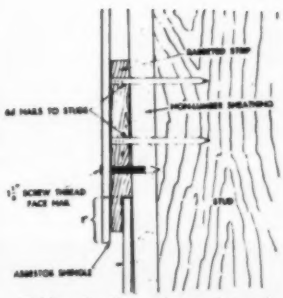

Use of channel molding for application of asbestos-cement siding or shingles. Siding should not be punched for nail holes and should be ordered specially.

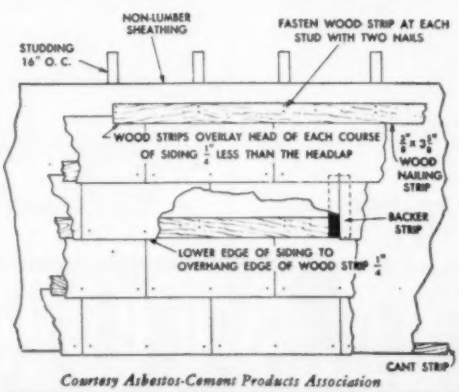

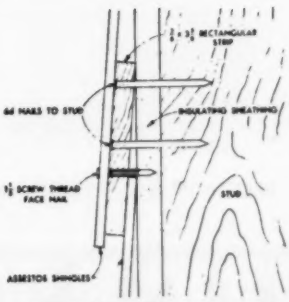

Where insulating or composition sheathing is used wood furring strips provide anchorage for shingles or siding. The latter is face nailed at the bottom only.

Rabbeted nailing strip may be used over any type of sheathing. It should be nailed through the sheathing with two 6d nails at each stud location.

Courtesy Asbestos-Cement Products Association

Square-edge wood nailing strips overlay the head of the lower course of shingles or siding an amount equal to the desired headlap less ¼ inch.

AMERICA'S LEADING FIREPLACE

is preferred by builders and home owners 3 to 1!

A smokeless, heat circulating fireplace that will last as long as the house—that's what builders and owners look for when they are planning a home. And 3 out of 4 look to Heatilator for the fireplace unit that never fails them. That's why there are more Heatilator Fireplaces in use today *than all other makes combined!*

The Heatilator Fireplace Unit . . .

. . . has kept in step with progress over the years. It has been steadily improved for more efficient operation. It is the only unit specifically designed for today's modern homes.

. . . the only fireplace unit with a positive Pressure-Seal Damper. By sealing the chimney air-tight, it eliminates loss of heat in winter and costly summer air-conditioning.

. . . sturdily constructed with fully welded seams throughout—a one-piece boiler plate firebox designed for trouble-free service.

Write for folder giving full details and specifications.

HEATILATOR INC., 624 E. Brighton Ave., Syracuse, N.Y.

Heatilator Unit Sizes

Heatilator units are available in a wide range of sizes with openings from 28" to 60" in width and fuel capacities up to 48" to meet every requirement.

Unit No.	Finished Width	Opening Height	Fuel Capacity	Shipping Weight
30	28"	24"	up to 24"	165 lbs.
34	32"	26"	up to 28"	190 lbs.
38	36"	28"	up to 32"	240 lbs.
42	40"	30"	up to 36"	300 lbs.
50	48"	32"	up to 42"	390 lbs.

You Get 3 Plus Values with ARKANSAS SOFT PINE no. 2 Dimension

1. Superior Nail-holding Power
2. Ample Structural Strength
3. Costs Less Than No. 1

Here's adequate strength at definite savings for all loads and stresses to be expected in construction of residences, apartments and commercial buildings of moderate size.

Cost Economies with No. 2 Dimension

Substantial savings can be effected and are recommended by using the lower priced No. 2 framing illustrated here. This is an example of the increased stress value (1100F) recently assigned to No. 2 Grade, 2x4's and up, by the Southern Pine Inspection Bureau, the official grading authority.

This No. 2 Grade, now of closer grain than formerly, provides superior nail-holding power and ample strength with adequate safety factors for the construction classifications named above, at a worth-while saving below the cost of No. 1 Grade.

ARKANSAS Soft Pine BUREAU

356 Boyle Building, Little Rock, Arkansas

WILLIAM E. NEUMANN HOUSE

Du Page County, Ill.

Architects: GEORGE FRED KECK—WILLIAM KECK
Gen. Cont.: TELANDER BROS. CONTRACTORS, INC.
Sheet Metal Cont.: SUNDBERG ENGINEERING COMPANY
Revere Dist.: CENTRAL STEEL & WIRE COMPANY
All of Chicago, Ill.

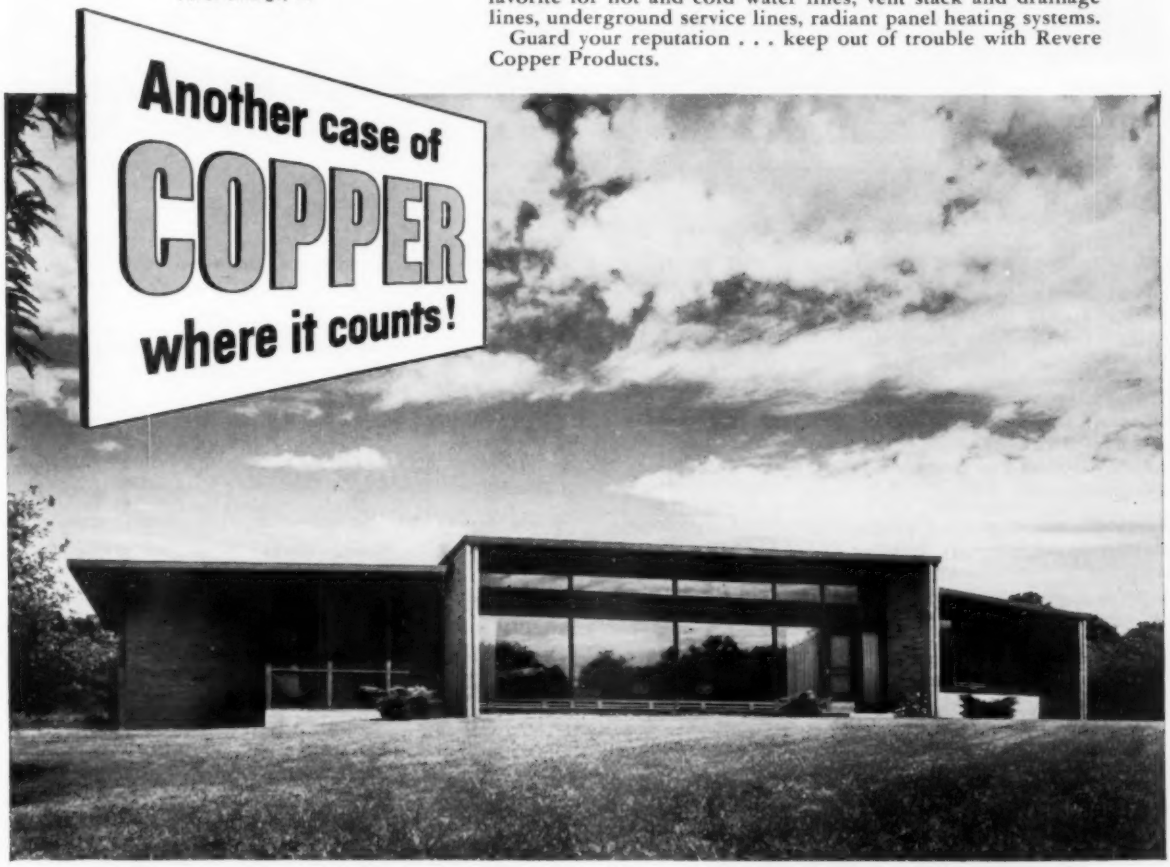

TRADITIONAL, functional, modern . . . name your type of architecture and you'll find copper in there protecting the vital spots, as it has been for centuries. On the Neumann residence shown 750 lbs. of Revere Sheet Copper were used for gravel stops and for flashing louvers and windows.

In spite of the introduction of other materials through the years there are many reasons why copper continues to be used by architects and builders. First off, the enduring qualities of sheet copper have been proved for centuries. It cannot rust, rot or deteriorate. So you know in advance that it will last. Second, sheet copper is easy to work, form and solder, is readily prefabricated. This flexibility makes it practical and economical to use in every conceivable shape and form to fit any design.

Third, because of its many qualities both Revere Sheet Copper and Revere Copper Water Tube have been accepted by the public as being indicative of a quality house. You do not have to justify its use. And that goes for a prospect for a $12,000 home or a board member on a $1,000,000 municipal project. Loan sources, too, are partial to the many attributes of copper in building construction.

And, in the case of Revere Copper Water Tube, contractors and builders tell us that, because it requires fewer fittings and is readily bent and soldered, it costs less to install than rustable materials. That's why Revere Copper Water Tube is the builders' favorite for hot and cold water lines, vent stack and drainage lines, underground service lines, radiant panel heating systems.

Guard your reputation . . . keep out of trouble with Revere Copper Products.

BRIXMENT MAKES

BRIXMENT is a waterproofed masonry cement for every kind of brick, tile, concrete block or stone masonry, and also for stucco and plaster. Brixment complies with the requirements of the American Society for Testing Materials Specification C91 and the Federal Specification SSC-181 for Masonry Cement (both Type I and II). Specify one part Brixment, three parts damp sand.

BRIXMENT MAKES SOUND MORTAR

The autoclave test requires the use of a high pressure steam chest (left). Neat cement bars are exposed to 295 lbs. steam pressure, 420°F, for 3 hours.

Above: The two bars above the ruler are both Brixment, one before and one after autoclaving. The Brixment is sound — it has not expanded.

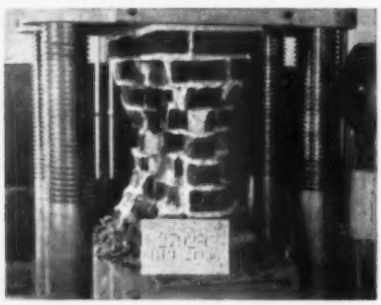

The two bars below the ruler are portland cement and lime, one before and one after autoclaving. They are made of one part portland and one part of a lime which does not meet the autoclave test. Note the expansion—proof of unsoundness.

Sound mortar is essential for strong, durable brickwork. To be sound, mortar must be free of constituents which may cause abnormal expansion after long exposure to weather.

Unsoundness in mortar material is readily detected by the autoclave test. This severe test rapidly accelerates the chemical reaction of mortar materials, and the slightest unsoundness is immediately revealed by excessive expansion.

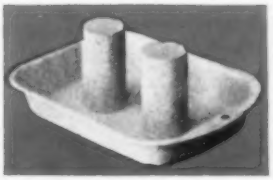

Brixment easily meets the requirements of the autoclave tests included in Federal and ASTM Specifications for Masonry Cement. Therefore, when Brixment is used, sound mortar and strong, durable brickwork are assured.

BRIXMENT MORTAR ASSURES STRONG WALLS

The strength of Brixment mortar is more than adequate for any type of brickwork. The strength of brick piers laid with Brixment mortar is equivalent to the strength of piers laid with 1-1-6 cement and lime mortar. Brixment is therefore recommended for any kind of masonry — for foundations, load-bearing and parapet walls, for free-standing stacks — for every use where strength is required.

BRIXMENT MORTAR IS MORE DURABLE

To compare the durability of Brixment with that of ordinary cement-and-lime mortar, make a cylinder or block of each, let both cure for a month or so, then freeze and thaw them about 15 times in your deep-freeze with a little water in the pan.

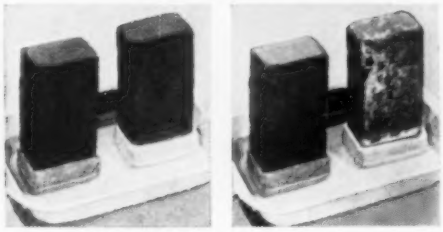

After a number of freezings and thawings, you will note that the cylinder of Brixment mortar retains its original condition, while the cylinder of non-waterproofed materials has badly crumbled and scaled.

For permanent strength and beauty, mortar must be *durable* — must be able to withstand the alternate freezing and thawing to which it is subjected many times each winter.

Brixment mortar *is durable*. This durability is due partly to the strength and soundness of Brixment mortar, and partly to the fact that an air-entraining water-repelling agent is incorporated into Brixment during manufacture. This helps prevent the mortar from becoming saturated — therefore helps protect it from the destructive action of freezing and thawing.

Walls built with Brixment mortar therefore *retain* their original strength and appearance.

BRIXMENT MORTAR HELPS PREVENT EFFLORESCENCE

To test Brixment and ordinary cement-and-lime mortar for resistance to efflorescence, "cap" two brick heavily with the mortars — let harden, and keep both brick for a few weeks in a shallow pan of water, as shown. See the difference with Brixment mortar!

Efflorescence is an outcropping of minute white crystals on brickwork. It is caused by soluble salts which are present in almost all masonry materials. When reached by water, these salts dissolve and may

BETTER MORTAR!

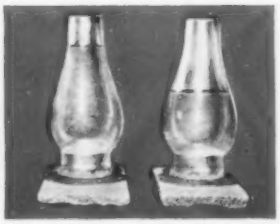

be drawn, by evaporation, to the surface of the wall.

Brixment helps prevent efflorescence. The air-entraining water-repelling agent in Brixment helps to prevent water from saturating the mortar and dissolving the small amount of salts that it may contain. Moreover, Brixment mortar prevents water from percolating down through the wall, dissolving the salts which may be in the brick, and carrying them to the surface.

BRIXMENT MORTAR IS MORE IMPERMEABLE

Prepare two slabs of mortar, one with Brixment and one with ordinary cement-and-lime mortar. After mortars have hardened, seal a lamp chimney to each of the mortar slabs, and fill with water.

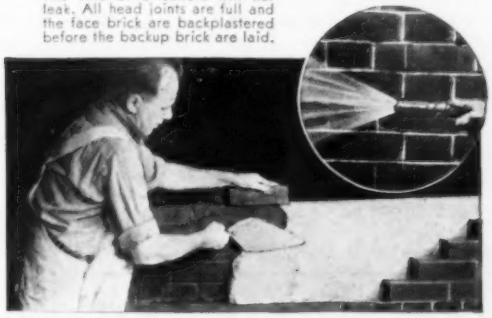

After 24 hours, note how much water has gone into and through the ordinary cement-and-lime mortar and how little water has gone into or through the Brixment mortar.

Impermeability is the ability of a mortar to withstand the passage of water. It improves the durability of the structure because it helps prevent the mortar from becoming saturated, and thereby helps protect it from freezing and thawing. It helps prevent efflorescence, because it checks the passage of water, and keeps it from percolating down through the wall. It helps prevent the absorption of harmful moisture up from the foundation and into the wall.

Brixment mortar is more impermeable. It contains an effective air-entraining water-repelling agent, so that even under pressure, water will not readily penetrate Brixment mortar. Brixment meets the special requirements of the Federal Specifications for water-repelling masonry cements.

BRIXMENT MORTAR HELPS PREVENT LEAKY WALLS

This kind of brickwork will not leak. All head joints are full and the face brick are backplastered before the backup brick are laid.

Dry brick walls are much more a matter of good design and good workmanship than a result of the mortar materials used. When a wall leaks, water almost never passes through the brick or through the mortar. It works its way through cracks or openings between the brick and mortar. Even when full joints are secured, all cracks may not be eliminated. The best precaution, therefore, is to parge or backplaster the face brick with water-proofed mortar before the backup units are laid. Brixment is waterproofed during manufacture. Therefore, if the face brick are backplastered with Brixment mortar, a water-repelling barrier is set up against the further penetration of any water which may have worked its way through cracks or voids in the outside four inches of the wall.

BRIXMENT MORTAR HAS GREATER PLASTICITY AND BETTER WATER-RETENTION

Place a dab of Brixment mortar and a dab of ordinary cement-and-lime mortar on a brick. Wait a minute, then feel each mortar. The one that stays plastic longer will be the one having the highest water-retention. Feel the difference with Brixment mortar!

Brixment's exceptional plasticity has made it the most widely-used masonry cement in the field. It is as plastic as 1-2-9 cement and lime mortar. Brixment mortar makes it easy for the bricklayer to secure neat, economical brickwork.

Brixment mortar also has high water-retaining capacity (the ability of a mortar to retain its moisture when spread out on porous brick). Brixment strongly resists the sucking action of the brick and stays smooth and plastic longer when spread out on the wall. *This permits a more thorough bedding of the brick and a more complete contact between the brick and the mortar.* The result is better bond and hence a stronger and more watertight wall.

With Brixment, you lay brick instead of temper mortar.

PROTECT IT FROM MOISTURE NOW...

with durable G-E SILICONE *"defense in depth"*

Water cracked this concrete—by getting into the masonry pores, freezing and expanding. Keeping water out of masonry makes it last longer. A simple, inexpensive treatment of above-grade masonry, with water repellents containing General Electric DRI-FILM® silicones, retards cracking and spalling . . . preserves masonry beauty by checking unsightly efflorescent stains. Your masonry stays cleaner, too, for water can't carry dirt or stains into the pores. And, of course, a water-repelling *exterior* means a dry *interior.*

PROVIDES *"defense in depth"*

A water-repellent treatment with DRI-FILM silicones is the *most durable known*—because it provides "defense in depth." Silicones actually *penetrate masonry pores*—get deep inside—where they cannot be eroded away. *Durable* silicone protection *lasts for years!*

Why not ask your supplier of water repellents about *silicone* protection for *your* masonry? For the names of suppliers using G-E DRI-FILM in their products, write to:

Silicone Products Department
General Electric Company
Section 64-1B, Waterford, New York
(IN CANADA, write to Canadian General Electric Co., Ltd., Toronto.)

Paint and Chemical Manufacturers!

DRI-FILM silicones offer you a profitable opportunity to add a superior water repellent to your product line. Ask us about them!

Available in standard sizes and thicknesses and as lap siding.

It's the new Crezon plywood — with plastic's smoothness and plywood's strength

Here's siding that is velvet-smooth, flawless, *and* "perma-paintable". It eliminates paint checking and blistering . . . holds paint years longer than ordinary painted wood siding.

Made from exterior type plywood with a weather-proof, protective overlay, Crezon plywood siding resists cracking and warping even under extreme temperature changes. Builders are using it successfully in homes, industrial and commercial buildings as panel siding, lap siding, board and batten, gable ends, door panels.

You work Crezon plywood with standard tools and techniques. It doesn't split, chip or splinter. Goes up much faster. Saves on painting costs. *And, FHA accepts Crezon siding with or without sheathing, depending on local conditions.*

The permanent protective overlay for plywood.

For driveways . . .

YOU CAN'T BEAT REINFORCED CONCRETE!

America is buying bigger homes, better homes. You will be building some of them. You'll want to see that every last detail spells economy and "quality."

That goes for concrete surfaces, too. For strength and durability—*long-lasting* good looks—be sure to reinforce every concrete surface with American Welded Wire Fabric. Not only driveways, but porches, patios, sidewalks, slab floors, curbs, foundation walls as well.

American Welded Wire Fabric adds the strength of steel to your concrete . . . binds the whole slab tightly together . . . stops bad cracks. It costs less to build a reinforced concrete slab because concrete ground slabs reinforced with American Welded Wire Fabric are approximately 30% stronger than an unreinforced slab of equal thickness. There's a type and size of American Welded Wire Fabric for every job.

IT COSTS LESS to reinforce the interior concrete. Use American Welded Wire Fabric for an extra guarantee of permanence in concrete foundation walls and slab floors. It is approximately 30% stronger than an unreinforced slab of equal thickness.

8 BASIC BUILDING MATERIALS

FROM 1 LEADING SOURCE—CERTAIN-TEED

SHINGLES

Certain-teed Asphalt Shingles come in a wide range of beautiful colors and blends, including pastels. For distinctive homes use Woodtex,® the extra-rugged asphalt shingle with attractive built-up graining.

SIDING

For lasting beauty, use Certain-teed Asbestos Cement Siding Shingles. Handsome range of colors and styles—never need repainting. Certain-teed Asphalt Shingle and Roll Sidings available in a choice of designs and colors.

WALLBOARD

Certain-teed Bestwall® Gypsum Wallboard comes with plain or predecorated woodgrain finishes. For fire-rated construction with single layer application, use Firestop Bestwall.® 5/8" thickness gives 1-hour fire resistance.

INSULATION

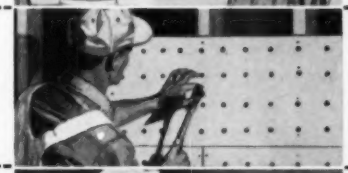

Certain-teed Fiberglas* Insulation—in batts, blankets, pouring wool, and in perimeter insulation—cuts heating costs up to 40%. Foil-enclosed batts and blankets for air-conditioned homes permit smaller units, help keep sales prices attractive.

PAINTS

For the perfect *finishing* touch to walls and ceilings: new Certain-teed Bestwall Paints, including popular alkyd flats and latex. Decorator colors—quick drying—easy to clean.

LATH

For smooth, fast plastering, specify Certain-teed Beaver® Gypsum Lath. Both plain and perforated. Strong—fireproof. Beaver Insulating Gypsum Lath with aluminum foil back provides insulation and an effective vapor barrier.

PLASTER

All Certain-teed Plasters are "Plastisized"® for easy working. Use these famous brands: Acme,® Agatite,® Beaver,® Certain-teed,® Pure-Wite,® and Lite-Mix® for basecoat, finishing, gauging and molding plasters. Also Kalite® acoustical plaster.

SHEATHING

Your homes will have greater structural strength and fire resistance with Certain-teed Weather-Shield® Gypsum Sheathing. Tongue and groove V-edges—water-repellent core and paper. Actually costs less than most other sheathings.

now your top value...

OLYMPIC

PRE-STAINED CEDAR

boards and battens

Olympic Boards and Battens—pre-stained and back-primed for *enduring* beauty—have become the "hottest" sidewall product on the market. For now these choice Olympic pre-stained woods cost *less* than competitive *unstained* products!

Olympic Boards and Battens are made from select Western Red Cedar—the *permanent* wood—prepared exclusively by the company that pioneered the pre-stained wood-products field. Wherever Olympic Boards and Battens have been used throughout the nation...for sidewalls, fences, and windscreens...their very presence is positive proof of *lasting* beauty!

The continued trend to sweeping, ranch-style homes make the strong vertical lines of Olympic Pre-Stained Boards and Battens *especially* desirable. Remember—it's the *premium* sidewall wood product—popularly priced!

Homes finished with the distinctive beauty of Olympic Western Red Cedar Boards and Battens sell *faster!* Your profits are higher, too, when you use the sidewall product or "finishing touches." Size: 1″ x 12″ rough sawn boards; 1″ x 3″ rough sawn battens.

FEATURED COLORS: Pilgrim Red, California Rustic, Russet, Cactus.

Seattle 7, Washington

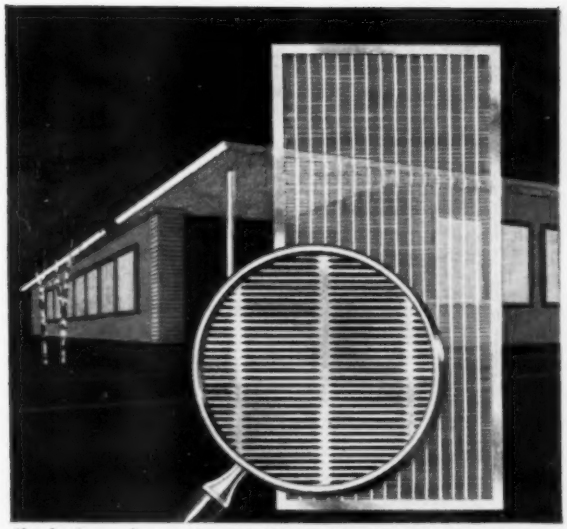

Facades and Marquees made with strong Kaiser Aluminum have an ideal variety of texture finishes . . . may be painted, anodized, embossed, enameled, lacquered, and porcelainized by standard methods. They weather uniformly, never rust, never stain—require minimum maintenance. Lightness lowers erection costs. Available in flat, corrugated or specially designed panels. Their application provides a distinctive quality to any building . . . and helps assure client satisfaction.

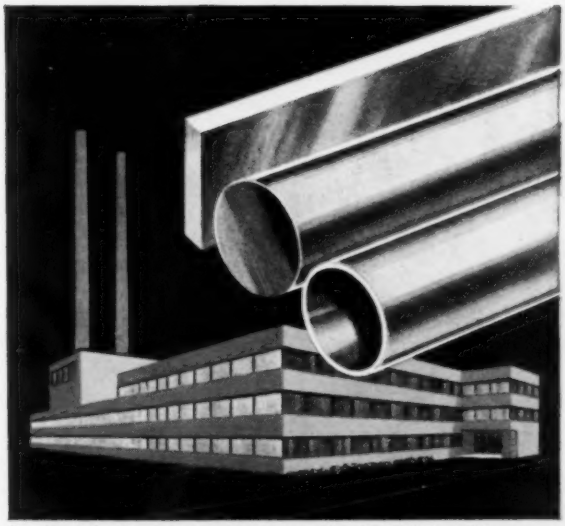

To improve your construction . . .

PROFIT FROM ALUMINUM'S "BUILT-IN" VALUES

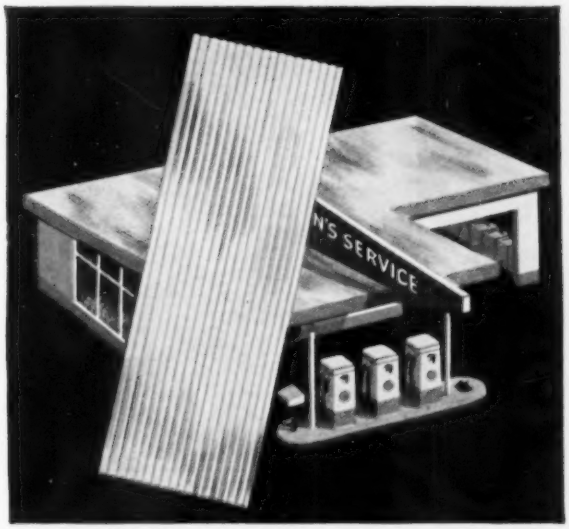

- Lightness with strength
- Heat and electrical conductivity
- Beauty
- Heat and light reflectivity
- Corrosion resistance
- Workability
- Economy

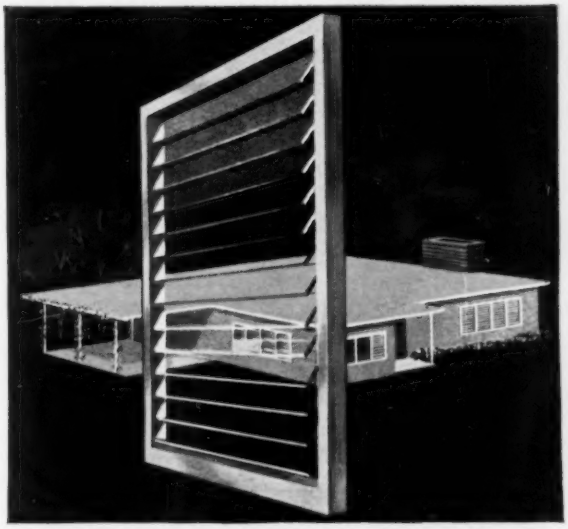

Shade Screening made with Kaiser Aluminum keeps rooms up to 15° cooler. Tiny louvers set at an angle block hot sun rays. Protects furnishings from sun fading. Clean, modern design gives window exteriors new, fresh beauty.

Bus Duct Systems made with high conductivity Kaiser Aluminum cost less than copper. Light weight results in easier, faster installation—another saving. High strength yet workable. Available in rectangular, solid round bar and tubular conductor.

Corrugated Roofing made with Kaiser Aluminum reflects heat . . . helps provide winter warmth, summer coolness. Light reflectivity brightens interiors. Needs no paint—requires minimum maintenance. Ideal for industrial or commercial buildings.

Window Jalousies made with Kaiser Aluminum resist corrosion—defy time and weather. Handsome, natural finish enhances building's appearance, complements any design. Easy to install. Simple to operate.

think of Kaiser Aluminum

SINCE World War II, aluminum has been used more extensively in the building industry than in any other civilian application.

This spectacular conversion is the result of aluminum's *combination* of "built-in" advantages—advantages that make possible new patterns of design, usually with substantial overall savings.

As a basic producer of aluminum our efforts are dedicated to the job of serving manufacturers—helping to improve their products and to reduce their costs.

Engineering assistance is available from our qualified aluminum engineers. Or for names of building products manufacturers who will be glad to work with you, contact the Kaiser Aluminum sales office listed in your telephone directory. Kaiser Aluminum & Chemical Sales, Inc. *General Sales Office,* Palmolive Bldg., Chicago 11, Illinois; *Executive Office,* Kaiser Bldg., Oakland 12, California.

PROTECTS AGAINST HEAT, COLD & CONDENSATION

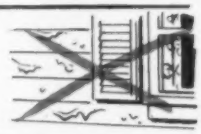

here's why pace-setting builders demand

ALFOL ALUMINUM FOIL BLANKET INSULATION

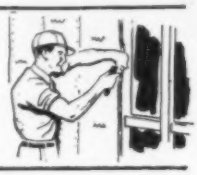

best winter-summer insulation Alfol reflective insulation is unsurpassed for all-year efficiency. Stops 95% of radiation and checks the other forms of heat transfer. Has a proved record of cutting winter heating costs 30% or more, keeping rooms 15° cooler in summer. Millions of feet time-tested in all types of buildings.

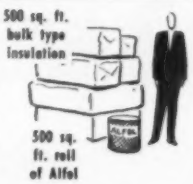

ideal protection from moisture damage Alfol is the best vapor barrier. Its continuous length and stud to stud coverage bar water vapor from cold wall areas, prevents harmful condensation.

easy, fast application Alfol is the easiest full-protection reflective insulation to apply—goes up without special care to prevent tearing. Alfol has *every* application advantage over bulk-type insulations—no muss or irritating dust: "takes the itch out of insulation."

low applied cost A 500-foot roll of Alfol takes 1/20 as much storage space and weighs 1/12 as much as its bulk type equivalent. Add this to the ease and speed of application, and you slash handling and installation costs!

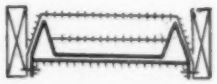

ALFOL
ALUMINUM FOIL INSULATION

REFLECTAL CORPORATION
310 South Michigan Ave., Dept. A-11
Chicago 4, Ill.

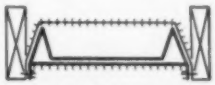

ALFOL TYPES
for every all-year need

TYPE 4

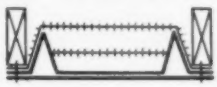

Highest efficiency . . . 2 layers of foil within expanding panel, plus 1 layer laminated to duplex vapor-proof backing . . . 4 reflective air spaces.

TYPE 3

Excellent for sidewalls, crawl spaces, unfinished ceilings. Similar to Type 4, but provides 3 reflective air spaces.

TYPE 2

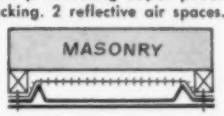

High efficiency at low cost . . . 2 inner layers of foil, plus vapor-proof duplex backing. 3 reflective air spaces.

TYPE 1

Efficient full protection at minimum cost. 1 layer foil plus strong vapor-proof duplex backing. 2 reflective air spaces.

TYPE 1A

Special to fit 1"x2" wood furring strips on masonry work . . . 1 layer foil plus vapor-proof duplex backing . . . 2 reflective air spaces.

ALFOL ROLLS
compact . . . range of sizes

Alfol comes in compact roll, automatically expands to provide up to 4 reflective air spaces when applied. Rolls give either 500 or 250 sq. ft. continuous coverage. Available in widths to accommodate 12", 16", 20", 24" framing centers.

ALFOL APPLICATION
simple and positive

Alfol is easily stapled across face of framing members or "dished in". Tough kraft and duplex backing bears all stress of application, prevents sagging. Exposed ceiling applications are efficient, durable. Improve lighting.

Shakertown Sidewalls *give you so much more*

. . . cut cost of air-conditioning, too!

Right off, home buyers are quick to recognize the colorful, custom look of a Shakertown Sidewall. A closer look reveals the *extra values* built into every home with these authentic, factory-stained cedar shakes.

Made of natural wood — nature's best insulating material — Shakertown's permit the walls to "live and breathe," provide an ideal exterior for year 'round air-conditioned homes. Priced at the lowest cost per year of service, Shakertowns' long list of plus-features including colored nails and metal Jiffy Corners — *all* available in rich, enduring colors — assure the utmost for the building dollar.

Whether it's building or restyling, one house or a thousand, be sure *you* gain every *Shakertown* advantage! See the Yellow Pages under "Shingles" for name of your nearby dealer or distributor. The Perma Products Company, Cleveland 22, Ohio.

GLUMAC UNITS build "double-coursed" sidewalls up to *3 times faster,* fit tighter and more uniformly. Can be applied in any weather. Look better, too.

FOR NEARLY HALF A CENTURY

BUILDING PRODUCTS WHOLESALE DIVISION

Majestic CIRCULATOR FIREPLACE

A heat-circulating fireplace that includes all necessary components, properly engineered, and serves as a masonry form. New extended size range! New super-tight, rigid damper valve holds positively in any degree of opening. Full smoke dome. "Radiant Blades" assure greater heat circulation and add to strength of firebox walls.

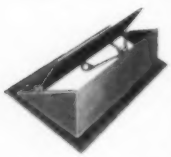

Send for Catalog SCC-56

Majestic INCINERATORS

Complete indoor disposal convenience for both burnable trash and garbage. Models for every market—economical basement models in which the waste itself is the only fuel needed, and handsome gas-fired utility room models, using either natural or bottled gas, approved by A.G.A. Unique, patented downdraft action!

Send for Catalog SIC-56

Majestic FIREPLACE DAMPERS

Cast iron or formed steel, with breakproof steel valve plate operated by a patented, foolproof poker control. Properly engineered for full throat opening, close tightly to seal flue when fireplace is not in use.

Send for Catalog SCC-56

UNDERGROUND RECEIVERS

An "extra" that home buyers appreciate . . . this neat, sanitary way to keep refuse out of sight. Only the lid, with toe-tip lift, shows above ground. Cans and bottles, or garbage, are kept pest-free and odor-tight. Durable steel—easy to install.

Send for Catalog SOF-56

Majestic CLEANOUT DOORS — ASH DUMPS

Majestic's formed steel and cast iron cleanout doors answer the builder's need. Model 80-R is typical—integral hinge on tight-fitting recessed door, handy latch, wide frame for neatness, die-flanged edges for strength. Ash dumps are available in steel or cast iron.

Send for Catalog SCC-56

Majestic BUILDING PRODUCTS

Quality-constructed products to help build better homes at lower cost—steel coal chutes; steel window wells with grating; cast iron and steel fireplace baskets; cast foundation grates; and others.

Send for Catalog J-16

HEATING AND AIR CONDITIONING DIVISION

Majestic WINTER AIR CONDITIONERS

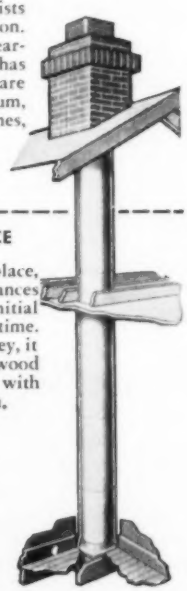

Gas-or-oil fired, forced-air furnaces for complete winter home comfort. Units for closet, alcove, utility room or basement installation, in up, down, or horizontal flow design. Capacities range from 76,000 to 400,000 BTU output. In addition, Majestic also furnishes a complete line of pipe, fittings, and accessories for forced-air heating and cooling.

Send for Specification Sheets

Majestic THULMAN CHIMNEY

The all-metal chimney that hangs on joists for economical, time-saving installation. UL-listed for all fuels and for zero clearance from combustibles because it has ample clearance built in. Chimney tops are realistic wire-cut-brick embossed aluminum, painted brick-red with gray mortar lines, with tile-like rain cap.

Send for Form 5-H

SUMMER AIR CONDITIONING

With Majestic Air Conditioning, system-matching is made extremely easy. The 2, 3, and 5-ton capacity units are available as self-contained, water-cooled companion units, or as evaporator units with remote air-cooled compressor-condenser. Unique system-switching and dampering!

Send for Specification Sheets

THULMAN FIREPLACE

A UL-approved fireplace, with required clearances built in to save on initial cost and installation time. Complete with chimney, it can be installed on a wood floor and framed in with ordinary construction.

Send for Form TF-2

"COLORFUL ASBESTOS SIDING ADDS INTEREST TO THIS SPLIT-LEVEL"

Yes, those siding shingles *are* asbestos, smartly textured, smartly styled, and applied with accentuated shadow lines to add interest to the entire exterior. This house has real sales appeal. Notice how well the asbestos shingles harmonize with the brick wall. Gray siding, yellow trim for accent, and a white asbestos roof blend in perfect color styling. A minimum of upkeep expense for this homeowner! His asbestos exterior is fireproof, rotproof and never needs paint to preserve it. For more information on the new beauty and design possibilities with asbestos cement products, write for your copy of "Advanced Designing – 1956".

ASBESTOS CEMENT PRODUCTS ASSOCIATION • 509 MADISON AVENUE, NEW YORK 22, N. Y.

This brand name also means...

Kiln-dried Lumber

Seasoned lumber delivers sound building values— and gives builders an important sales point

● If your business is building and selling homes, here is a fact worth considering: a home is easier to sell if it is framed and sheathed with Weyerhaeuser 4-Square Kiln-dried Lumber.

There are several reasons for this increased salability.

For example, Kiln-dried Framing is an important sales feature because the public has learned that seasoned lumber is strong . . . that it has dimensional stability . . . that it contributes to sound, reliable construction.

Kiln-dried Lumber Sheathing on a new home is a feature that helps close many sales. Lumber is strong . . . it holds nails firmly. Also, lumber sheathing permits the use of shingles, vertical siding, and other special coverings without furring strips. These are a few of the reasons why lumber sheathing has been the accepted standard for generations . . . and is still a mark of high quality construction in homes, farm buildings and commercial structures.

The Weyerhaeuser 4-Square brand name, nationally advertised, is well-known to the public . . . a mark of quality that helps builders close sales.

All lumber bearing the brand name Weyerhaeuser 4-Square is scientifically kiln-dried, precision-manufactured, properly graded and carefully loaded for shipment. It is available in a wide range of species and grades, in commons and clears. There are Weyerhaeuser 4-Square Lumber products, from dimension to moldings, to meet every need in light construction.

Weyerhaeuser Sales Company

ST. PAUL 1, MINNESOTA

OPERATION 56 the year to FIX HOME IMPROVEMENT

1. Building . . . to help you build

The new Armstrong Building Products Plant in Macon, Georgia, is nearing completion. This huge manufacturing center can help make 1956 one of your best years because it will make available a full line of Armstrong building products to help you build profitably. Now is the time to specify Armstrong Products—Temlok Roof Deck, Temlok Sheathing, and Cushiontone—for your 1956 homes. On the next pages, you'll find full information on the newest of these building products. . . .

2. TEMLOK ROOF DECK SOON TO LEAVE "SCARCE LIST"

Like many builders, you've probably been waiting to get enough Temlok Roof Deck to take full advantage of its cost-cutting benefits. The new Armstrong plant will soon make this modern building material available for your 1956 homes. Temlok Roof Deck is a material that not only cuts your construction costs but builds more beauty, comfort, and value into your houses.

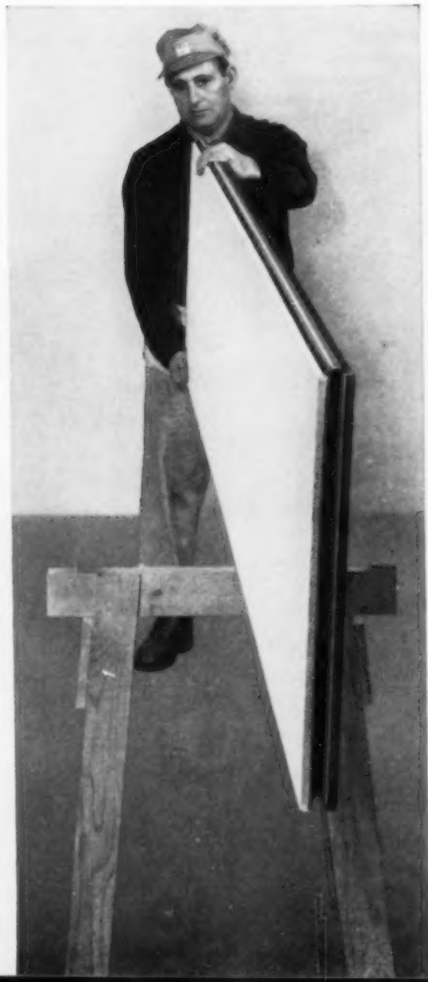

3. FOUR BUILDING MATERIALS IN ONE

The carpenter below shows how Temlok Roof Deck works as a 4-in-1 building material. "Dark side" up, (1) Temlok is a strong roof deck that withstands heavy roof loads up to 300 pounds per square foot . . . lasts the life of the house. Turn Temlok on its edge and you can see the multiple layers of asphalt-impregnated fiberboard which provide (2) complete roof insulation. You'll also see the laminating cement between each layer that serves as (3) an efficient vapor barrier. Turn Temlok over, and (4) you'll find a beautifully finished ceiling —smoothly coated with two applications of light ivory paint.

(1) Strong Roof Deck

(2) Complete roof insulation and (3) effective vapor barrier

(4) Factory-finished ceiling

4. CUTS LABOR TIME IN HALF

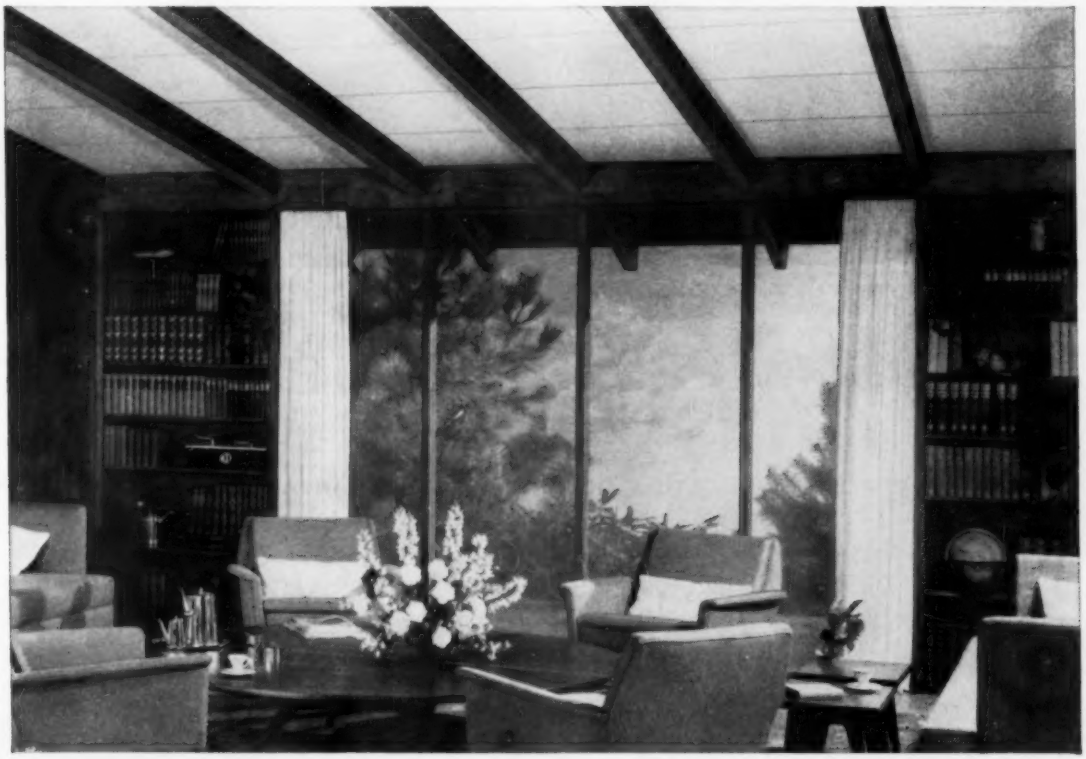

Each time your men nail a 2′ x 8′ piece of Armstrong Temlok Roof Deck to beams, they are installing 16 sq. ft. of roof deck, insulation, vapor barrier, and finished ceiling. Only built-up roofing is needed for complete weatherproofing. Four men can cover a 30′ x 40′ roof in 7 hours, compared to 14 hours with conventional materials. Total savings often run as high as $250 per house.

5. BEAUTY SELLS PROSPECTS

An open beam ceiling appeals to contemporary and traditional tastes alike. It's a beautiful and permanent ceiling that won't crack. A low pitch Temlok roof also gives the house a more spacious appearance. Temlok provides complete roof insulation for any climate, cuts heating and air-conditioning costs.

Plan your 1956 homes with

For free booklet on Temlok Roof Deck, write Armstrong Cork Co., 3704 Rider Avenue, Lancaster, Pa.

Angier LŪMASKIN

reflective insulation
and
moisture vapor barrier

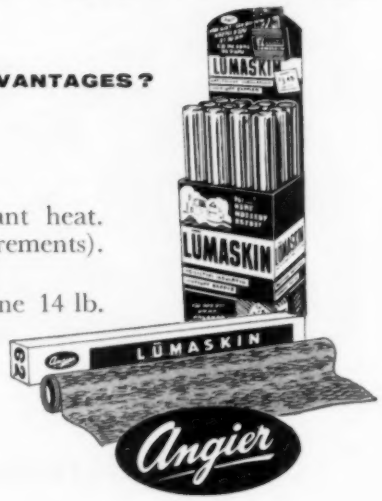

Lumaskin conforms best to studs because it's the only low cost aluminum sheet that's creped-to-stretch.

less cost...less bulk...less work

WHAT OTHER INSULATION OFFERS THESE ADVANTAGES?

Low cost. Compare price with any other type!
Quick to apply with staple hammer or tacker.
Creped for moldability and ease of installation.
Top winter-summer performance: Reflects 95% radiant heat. U Factor .12 (exceeds new FHA sidewall requirements). Perm rating as low as .0144.
Compact. Convenient in storing and handling. One 14 lb. roll covers two outer walls of average room.

See your dealer or write Angier Corporation, Framingham 24, Mass.

Other fine quality Angier building papers: COPPERSKIN for flashing and damp-proofing; GLASS MAT reinforced protective paper; PROTECT-O-MATS reinforced concrete curing blankets; BROWNSKIN creped waterproof building paper; RFD farm paper.

"Here's the greatest advance in building materials that I've seen yet!"

. . . states Mr. Robert S. Arnold, AIA Architect, Highland Park, Illinois (letter on request)

SEALTIGHT PREMOULDED MEMBRANE

the industry's only TRUE VAPOR SEAL

Sealtight Premoulded Membrane provides a positive protection against the ravages of destructive moisture in all types of construction . . . residential, commercial and industrial. Ideal for slab-on-grade, basement, and crawl-space installations.

When purchasing any vapor seal material be sure it meets these Sealtight standards of quality: permeance rating of only .0066 grains per square foot . . . resistant to rot, mold and termites . . . strong enough to resist tearing and puncturing . . . expandable . . . quickly and easily installed—Premoulded Membrane has them all.

The installation of Premoulded Membrane allows you to safely use the full range of floor finish applications. You not only have a warm, dry, more liveable home but one that's also more saleable in the future. We sincerely advise and invite your comparison of Premoulded Membrane against all other vapor seal products . . . we're sure that once you do you'll also agree that there's only one **true** vapor seal on the market . . . Premoulded Membrane.

BUILDERS, HOMEOWNERS, DEALERS . . .

. . . WRITE TODAY for complete information that tells you where, why, and how to use Sealtight Premoulded Membrane.

SEE OUR CATALOG IN SWEETS

"Guardian of the Home"

MANUFACTURED BY . . .

W. R. MEADOWS, inc.

8 KIMBALL STREET • ELGIN, ILLINOIS

IDEAL FOR ALL CONSTRUCTION APPLICATIONS . . . Premoulded Membrane, supplied in 4' x 8' sheets, is laid directly over the hard tamped* grade with a 6" overlap. This overlap is then sealed with Sealtight Catalytic (non-setting) Bonding Asphalt—giving you a monolithic vapor seal that will expand and contract with the slab above . . . without breaking the seal. You actually form a vapor proof "saucer" into which the concrete is poured.

***You can eliminate expensive gravel fill when using Sealtight Premoulded Membrane.**

QUICK, EASY INSTALLATION . . . Premoulded Membrane is a strong, permanent vapor seal that will resist the trundling of wheelbarrows and the impact of aggregate during the pouring operation . . . best of all, with Premoulded Membrane you don't need an expensive underlayment of sand to absorb shock. This strength to resist tearing and puncturing is very important . . . as a vapor seal is much like a child's balloon, for only a small hole renders it useless.

These exterior designs help sell homes...

the most nearly perfect lap siding ever offered!

MASONITE SHADOWVENT SIDING

Gable ends are easier... for garage walls, too!

Prepackaged panels are ¼" thick, 10" and 12" wide, up to 12' long. Aluminum mounting strips are 10' long, packaged 480' to the tube. Specially designed interlocking metal corners and joint fasteners.

- All nails hidden—no "freckling" of surfaces.
- Slashes application time as much as 50%
- Primed—just add one or two finish coats*
- Paint goes on quicker; stays new-looking longer
- Straight, true courses without dips or waves
- Enduring, year-around weather protection
- Courses vented to let siding breathe
- No dimensional loss. Less lap and cutting losses

its textured surface will highlight featured areas!

MASONITE RIDGELINE

Comes in panels, lap siding or shingles

Ridgeline panels are 4' wide, ¼" thick and up to 16' long. Ridgeline siding, with or without Shadowline wood strips, is 12" and 16" wide, ¼" thick, up to 12' long. Ridgeline shingles are ¼" thick, 4' long and 12", 16" or 24" wide.

- Adds texture interest to exterior walls
- Ideal for short runs, between windows and other "interest areas"
- Combed ridge pattern takes paint or stain beautifully
- A distinctive panel to use with batten strips
- Available in panels, shingles and as lap siding

choose them from Masonite Presdwood products!

for unbroken vertical accents, choose distinctive... !

MASONITE PANELGROOVE

- Handsome vertical grooves give personality to any home
- Attractive application to homes and commercial exteriors
- Effective on gables, end walls, sill course and accent areas
- Impervious to wind and rain; resists heat and cold
- No visible joints
- Large panels are easy to apply
- Quickly, easily painted

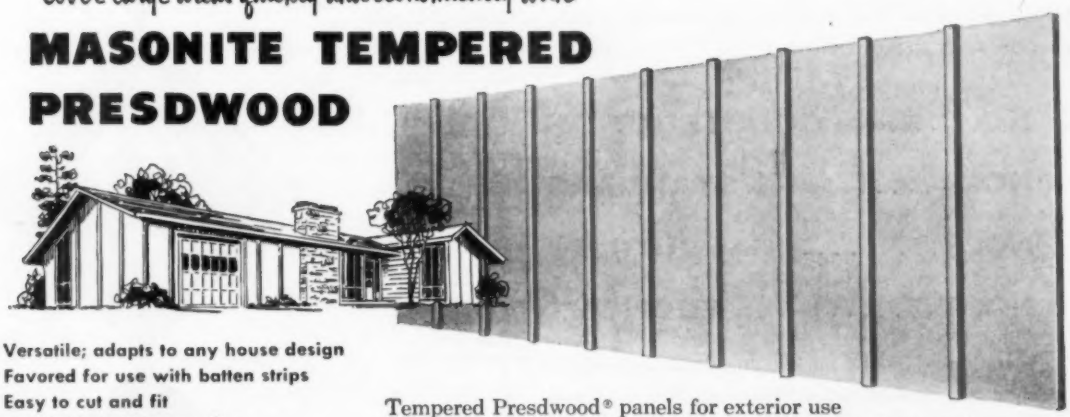

An attention-getter outside and inside, too!

Panelgroove panels cover full 48″ in width, length to 16′, 5/16″ thick. Grooves 3/8″ wide on 4″ centers. Shiplap edges create one groove, and form an attractive, continuous design.

cover large areas quickly and economically with

MASONITE TEMPERED PRESDWOOD

- Versatile; adapts to any house design
- Favored for use with batten strips
- Easy to cut and fit
- Available in Primecote*— only finish coat needed
- Large panels—easy to apply
- Resists bumps and scrapes of all kinds

Tempered Presdwood® panels for exterior use are 4′ wide and up to 12′ long, 1/4″ and 5/16″ thick. Tempered Presdwood with Primecote* now available east of the Rockies.

Lester Robbins,
president of the Robbins Co.,
builders of the
Mountainside Park project.

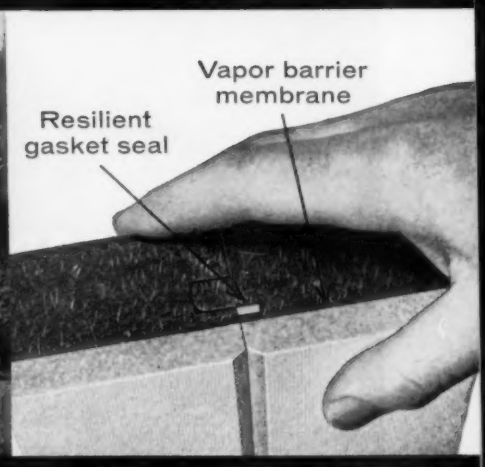

3 to 1 best seller in New Jersey project features Insulite Roof Deck

Mr. Lester Robbins, president of the Robbins Co., Union, N.J.—builders of the successful Mountainside Park project says, "I'm more than pleased at the reception of our cathedral ceiling model. This Insulite Roof Deck home (shown) is moving three times as fast as all our other models combined!"

All over the country builders report Insulite Roof Deck saves money and does a big selling job, too! While reducing costs $80 to $300 per home, Roof Deck adds to the free and open look that today's home buyers find so appealing. The white, pre-finished underside contributes both quality and beauty to exposed beam ceilings.

Send for actual on-the-job pictures and construction details now. Write Insulite, Minneapolis 2, Minnesota.

It's roof deck—2′ x 8′ units cut application time as much as 45%. Only one material to handle. Insulite Roof Deck eliminates need for separate roof boards, insulation, lath and plaster and ceiling finishing. Roof Deck can save 12 man hours per 1000 sq. ft. of surface compared with 2″ x 6″ D&M roof sheathing.

It's finished ceiling—The underside of Insulite Roof Deck is finished with flame-resistant surface. Lay Roof Deck over pre-finished beams . . . and ceiling is done. No need to plaster, paint, stain, wax. Cuts labor and material costs. In 2′ x 8′ units, 1½″, 2″ or 3″ thick—with or without vapor barrier membrane (depending on climate).

And insulation with vapor barrier. No need for other insulation. 2″ Roof Deck is comparable to 2″ wood deck plus 1″ fiberboard insulation. Available in 3 thicknesses to meet insulation requirements in any climate. Exclusive resilient gasket seal and vapor barrier membrane protect against condensation within the unit.

Johns-Manville Seal-O-Matic Shingles

stay flat and weathertight even in highest winds!

Proved in Hurricane "Connie." These photographs were taken at Wrightsville Beach, N. C., right after Hurricane Connie in August, 1955. Ordinary shingles were ruined, Seal-O-Matics suffered no damage.

Seal-O-Matics offer you the greatest opportunity for shingle sales in 25 years!

Developed by Johns-Manville laboratories after years of research, Seal-O-Matic® Shingles have proved themselves on thousands of homes all over the country. They stay tight and flat when it blows because they automatically seal themselves down. Wind and rain can't get under the edges. Seal-O-Matics won't blow up or blow off. Possibility of leaks is reduced to a minimum. And there's no weakening of shingles from fluttering.

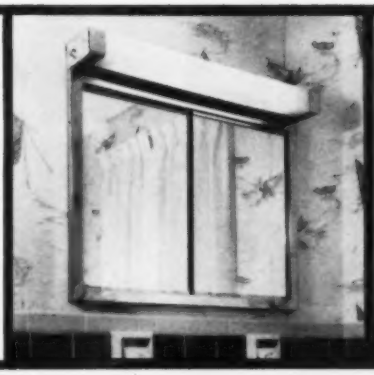

Seal-O-Matics offer you the greatest sales opportunity in building materials today both for new work and re-roofing. Take advantage of it and get in touch with your nearest Johns-Manville office now. For free literature write us direct at Johns-Manville, Box 111, New York 16, New York.

JOHNS-MANVILLE JM PRODUCTS **Johns-Manville**

"For unequalled beauty and protection, too... **We chose Carey**

From foundation to roof, Carey Products help build Hi-Tor Homes better ... for less money!

Miami-Carey Duette Cabinets are featured in both bathrooms of A. C. Schwotzer's own split-level home in Hi-Tor Woods. The Duette has twin-mirrored sliding doors, 2 full-sized compartments and full-length fluorescent lighting.

Last word in whisper-quiet ventilation, this ten-inch Miami-Carey Ceiling Fan is unsurpassed for beauty and performance, even by higher-priced fans. "We like their snap-in assembly, too. Saves time for the electrician."

The Philip Carey Mfg. Company, Better Products for Building

Fire-Chex Asbestos Plastic Roofs"

Says Arthur C. Schwotzer, President of
A. C. Schwotzer, Inc., builders of
HI-TOR WOODS, Pleasant Hills, Pa.

Carey Fire-Chex weigh a husky 325 lbs. to the square, in 11 different colors and shadow blends. They resist time, weather and hurricane winds, give beauty and protection years longer. They are the only shingles ever rated Class A, without asbestos underlay, by Underwriters' Laboratories, Inc.

"When it comes to beauty, you just can't beat Carey Fire-Chex Asbestos Plastic Shingles. This, and their Class A rating for fire safety convinced us that Fire-Chex was the best investment we could make for Hi-Tor Woods homes."

Says Mr. Schwotzer, "We build with Carey products from foundation to roof—Carey Foundation Mastic, Carey Fire-Guard Insulation, Miami-Carey Bathroom Cabinets and Fans . . . they give us features we can't match in any other products.

"We get real service from our Carey dealer, too. We get the materials, plus plenty of information and help on installation—and we get them on time! I'd advise any builder who wants to maintain his reputation for quality, while he cuts his building costs, to call in his Carey representative."

Carey Fire-Guard Rock Wool Insulation and Carey Rockwool Blankets were used exclusively in Hi-Tor Woods homes. Carey insulation was chosen for quality, low cost and the "complete cooperation we got from our Carey dealer."

"We tried many waterproofings," Mr. Schwotzer said, "and still our foundations leaked. Then we turned to Carey Foundation Mastic for six homes in our Hi-Tor Woods development. It's the first waterproofing that does what it's supposed to do."

Since 1873

Announcing—

the new "TRIANGLE" BEAM

newest . . . most economical idea in steel beam construction

Actual job-site photograph of Triangle Beam showing this improved method.

TRIANGLE Quick Installation Method

Saves 5 Ways . . .

1. No beam nailer.
2. Set joists at modular spacing; no measuring.
3. Eliminates squaring of floor joists as well as paying for excessive lengths of beams.
4. Open spaces of Triangle Beams are accessible for plumbing or heating ducts.
5. Fewer posts are required for relatively long spans. Home buyers appreciate getting more unobstructed basement floor space.

Available NOW at regular prices . . .

Several Choice Dealer Franchises Are Available

FIREPLACE IDEAS
A completely illustrated, 4-color folder on fireplace ideas and construction.—Clay Flue Lining Institute.
Circle No. 15 on reply card Section 6

FRAMING ANCHORS
Here are three separate brochures which detail the use of "Trip-L-Grip" framing anchors. While only three basic anchors will suffice for any framing job these brochures show a multitude of uses and every job problem in framing.—Timber Engineering Co.
Circle No. 16 on reply card Section 6

FRAMING SPECIALTIES
Descriptive literature available on Split-Ring timber connectors, framing anchors, screen and sash hangers and fasteners, siding corners, screen door hardware.—F. D. Kees Mfg. Co.
Circle No. 17 on reply card Section 6

FOIL INSULATION
"The Story of Reflective Insulation" is told in handy 24-page aluminum foil booklet. Covers heat transfer, thermal efficiency, "Alfol" properties and installation techniques.—Reflectal Corp.
Circle No. 18 on reply card Section 6

INDOOR & OUTDOOR FIREPLACES
Two books offer full coverage of fireplace construction: "Successful Fireplaces" contains 80 pages, 300 illustrations on indoor units; "Outdoor Fireplaces—How to Build Them" is a 32-page volume with drawings and measurements for a wide variety of design types.—Donley Bros. Co.
Circle No. 19 on reply card Section 6

INSULATION
Armstrong insulating wool comes in 7 convenient forms and specifications are given for each type in this 8-page booklet.—Armstrong Cork Co.
Circle No. 20 on reply card Section 6

REFLECTIVE INSULATION
New pamphlet on reflective insulation and vapor barrier applications is available. Illustrated by photographs and sketches.—Angier Corp.
Circle No. 21 on reply card Section 6

REFLECTIVE INSULATION
New 48-page manual describes complete line of reflective insulation and their specialized uses. Offers newest installation techniques.—Infra Insulation, Inc.
Circle No. 22 on reply card Section 6

REFLECTIVE INSULATION
Tough reinforced building paper is coated with aluminum to provide insulation and vapor barrier in one operation. Folder describes uses and specifications.—The Richkraft Co.
Circle No. 23 on reply card Section 6

ROOFING
A series of booklets each describing one of this firm's roofing products. All are printed in colors showing the variety of asphalt roofing products available.—Certainteed Products Corp.
Circle No. 24 on reply card Section 6

Why every piece of PALCO* Architectural Quality Resawn Redwood Siding is VERTICAL GRAIN

On flat grain, only the surface toward the bark is resistant to splintering "shell-out" after long exposure. If siding is *resawn* from flat grain blanks, every other piece necessarily faces the heart, providing an inferior surface.

That's why The Pacific Lumber Company insists that all *Palco** Architectural Quality *resawn* redwood siding must be cut from *vertical grain* blanks, assuring that every piece will provide the full measure of lasting beauty and resistance to weather. This is but one of many extra premiums in value provided by *Palco**... at no extra premium in cost. For a free guide to more effective specification of the best in redwood, fill out and mail the coupon below, or write for Bulletin No. L-501.

When you specify *Palco** Architectural Quality Redwood for exterior or interior design . . . you can be sure that it is

- **Certified Dry**
- **All Clear Heart or A Grade**
- **Highest uniformity of grade**
- **Vertical grain on all resawn patterns**
- **Where flat grain is specified, pattern is always cut from the bark side**

Your Prospects will know it's good if it's advertised in April **AMERICAN BUILDER DIRECTORY**

the rich beauty of Philippine Mahogany plus a low price SELLS FOR YOU!

Builders will welcome Ven-O-Wood, its beauty, its low price. It is a rigid, highly dent-resistant Philippine Mahogany Panelling for residential, commercial and office building applications.

It is a satin-smooth veneer, permanently bonded to durable pressed-wood panels. Ven-O-Wood's fine-grained Philippine Mahogany surface requires no sanding and is ready for staining, varnishing or lacquering.

Ven-O-Wood is ¼" thick and is available in standard size panels, tiles and planks—with butt joint eased edges or T&G V-joints to permit blind nailing.

Here's how Ven-O-Wood Sells *for* you—

- Builders prefer Ven-O-Wood's quick, easy installation features.
- Home buyers and owners like its rich, real Philippine Mahogany beauty.
- Ven-O-Wood's low price (much lower than conventional ribbon-grain Philippine Mahogany) appeals to both builders and their customers.

FILL IN THIS COUPON TODAY—and find out how Long-Bell's Ven-O-Wood can bring increased volume and profit to you.

PREFABRICATED CHIMNEYS

Eight-page fact book on "packaged masonry chimney" covers applications, product information, erection data, specifications and typical installations. —Van-Packer Corp.

Circle No. 33 on reply card Section 6

PLYWOOD

Basic catalog covers Douglas Fir plywood grades and application data. Minimum FHA requirements, fundamentals of finishing and application. —Douglas Fir Plywood Assoc.

Circle No. 34 on reply card Section 6

SIDING

Many different styles, patterns and colors are available in the line of asphalt and asbestos cement siding products described in this series of booklets. Actual colors are shown of all products.—Certainteed Products Corp.

Circle No. 35 on reply card Section 6

PLYWOOD WEATHERPROOFING

First specification sheet on "CreZon," plastic plywood overlay, includes data on available sizes, color, strength, water absorption, resistance to hot water, steam, weathering, chemicals and fungus; working and painting properties.—Crown Zellerbach Corp.

Circle No. 36 on reply card Section 6

SHINGLE SHAKES

Literature available on "Shakertown" stained red cedar shakes. Also information on the "Glumac" unit which are cedar shakes mounted on a backing board for faster job application. —The Perma Products Co.

Circle No. 37 on reply card Section 6

STONE

Booklet contains descriptive and specification data on "Tennquartz" a variegated colored stone. Also gives list of applications.—Tennessee Stone Co.

Circle No. 38 on reply card Section 6

STEEL BEAMS

New type of steel beam especially adaptable for residential use is described in this literature. Has greater strength and advantages over the conventional I beam, in that it can be used for relatively long spans without posts or columns for center supports. —Triangle Beam Co.

Circle No. 39 on reply card Section 6

TIMBER BEAMS

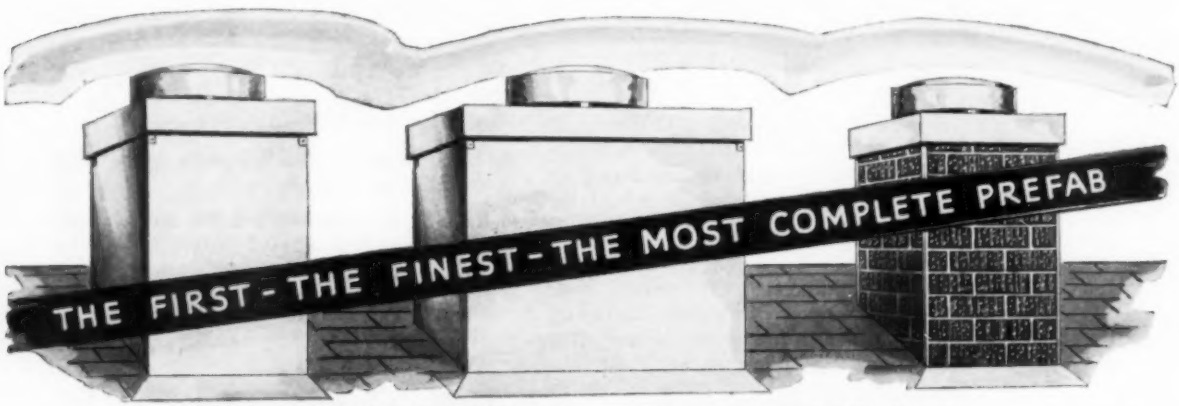

Two informative booklets—one on the description and details of the "Rilco" tongue and groove deck timber and the other a 24-page catalog on their laminated arches, beams, and trusses. Each containing data and illustrations. —Rilco Laminated Products, Inc.

Circle No. 40 on reply card Section 6

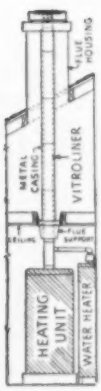

TRUSSES

Clear span wood trusses for homes as well as commercial buildings are described in photographs and detailed drawing form in this 16-page book. A condensed manual on truss construction.—Timber Engineering Co.

Circle No. 41 on reply card Section 6

VITROLINER CHIMNEYS — The Logical Choice!

Vitroliner is not only the first and Pioneer Chimney but still the finest quality-built class "A" Chimney on the market for one and two story homes and buildings using all fuels.

The Architect has flexibility and choice. He can specify 2 types, "E" and "L" for basement or ceiling installations—3 Designs, as illustrated above—5 Diameters, for correct size—UL listed for 4 Fuels—oil, gas, coal and wood.

The Builder prefers lightweight Vitroliner (10 to 15 lbs. per ft.) which is easy to handle and quick to assemble.

The Home Owner enjoys a good looking modern design. His Vitroliner adds distinction to the appearance of his home. He also enjoys the safety and long life VITROLINER provides.

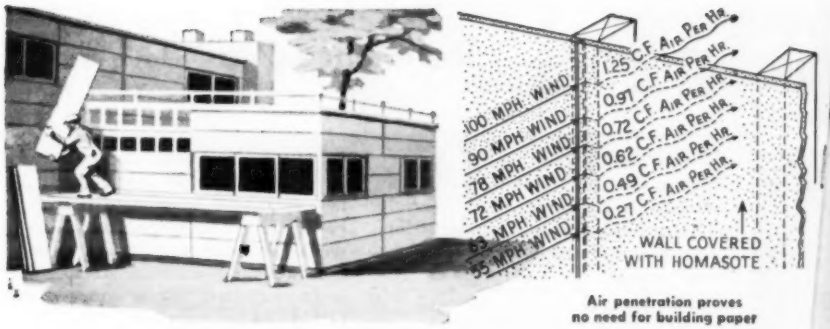

For quotations supply "X, Y" dimensions and roof pitch.

"Vitroliner provides complete Chimney Functions"

Air penetration proves no need for building paper

For basic economy in Sheathing

It's different!

When a builder eliminates a dozen costly details — *with better end results* — he is getting basic economy. This is Homasote economy. The Homasote Handbook — Page 28 —says:

"For real economy the $^{15}/_{32}$" (Homasote) is the right material for all types of finished exteriors — such as brick veneer, siding, clapboard, or stucco. If the builder uses the Big Sheets in the proportion of one-third 8′ x 14′s and two-thirds 8′ x 12′s, he will find that he comes out with no waste at all. The cutouts from windows or doors may be used as closet ceilings, plaques, soffits of stairwells, as well as exterior soffits."

With the Big Sheets, racking tests by independent laboratories show there is no need for corner bracing. Weatherproof Homasote needs no building paper, as the air penetration tests above demonstrate. Homasote **know-how** reduces material and labor costs.

The famous One-Man Sheathing, in V-grooved 2′ x 8′ panels, is another Homasote sound building value.

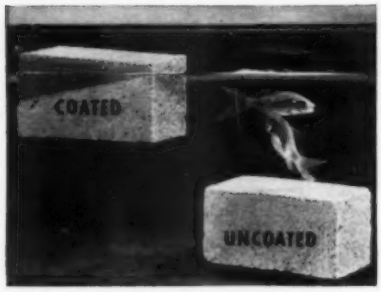

The Homasote Handbook gives you the right answers to 100 construction problems. We have confidence in its basic value. Homasote *is* different — in both product *and* **know-how**.

May we send you a copy — without cost or obligation? Kindly address your inquiry to Department D-12.

HOMASOTE COMPANY
TRENTON 3, NEW JERSEY

OFFER PROTECTION AGAINST MOISTURE —you'll sell more!

Actual photo shows how a porous block—treated with Medusa Masonry Paints—holds out water so well that it actually floats. Photo shows how uncoated block, without this protection, soaks up water instantly and sinks.

Whether you're contracting a new home or renovating an old one, it will pay you in added volume and satisfied customers if you'll sell "protection against moisture."

Special Paints Needed for Masonry Surfaces

Too many times, a finished house is turned over to its owner with either no protective coating on the masonry surfaces, or insufficient protection through the use of ordinary paints. Home-owners become irritated when driving rains soak their walls and damage and repair bills mount. You can avoid this customer irritation and increase your contract volume by pointing out, at the very beginning, that Special Paints are needed for Masonry.

MEDUSA MASONRY PAINTS

You can solve every masonry paint problem with Medusa. We offer you Portland Cement paints for prime coats, or for exterior and interior finishes, in many attractive pastels; and Rubber Base paints, flat or gloss, for exterior or interior use, both in many beautiful colors. With Medusa clear Silicone, you can offer the new, modern way to make masonry water-repellent. All 5 products are tested and proven.

More Profit for You

You're losing extra dollar volume when you fail to include the coating of masonry surfaces in all your bids. Brick • Stucco • Concrete • Block • Asbestos • Cement Shingles—you'll boost volume *and* profits by coating these surfaces with Medusa's specialized paints.

Send For Helpful Free Book

Illustrated, colorful 28-page Book, plus elaborate Color Charts and other Aids, sent to you on request. Excellent material for sales work with your customers. Send for free copy now.

MEDUSA
MASONRY PAINTS
Court Square Building, Baltimore 2, Md.

WATERPROOFING

Applications of "Water Seal" described and illustrated in several pieces of firm's literature include paint finishes, wood protection, concrete form sealing and curing.—E. A. Thompson Co., Inc.

Circle No. 42 on reply card Section 6

WOOD SIDING

Literature describes "Olympic Boards and Battens"—a pre-stained and back-primed siding in Western Red Cedar. —Olympic Stained Products Co.

Circle No. 43 on reply card Section 6

WOOD TRUSSES

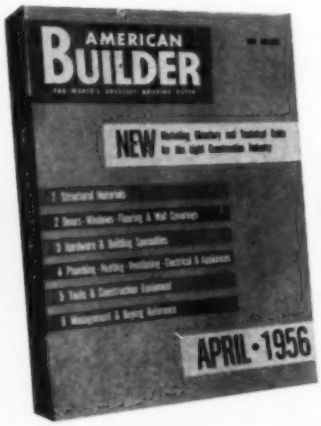

Several booklets are available on the new laminated wood bowstring truss giving full description, design data, dimensions, and specifications. Detail drawings and recommendations are given for best construction.—Rilco Laminated Products, Inc.

Circle No. 44 on reply card Section 6

VAPOR BARRIER

Richkraft 65 is a fungi resistant vapor barrier paper. Available in rolls up to 10 ft. wide. Literature describes uses and merits.—The Richkraft Co.

Circle No. 45 on reply card Section 6

METAL CASING FOR DRYWALL CONSTRUCTION

Metal casings are made in sizes for 3/8", 1/2" and 5/8" boards

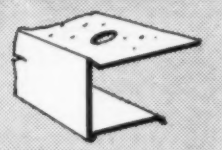

Two types of square edge metal casings which are used to finish edge of wallboard at door jamb or window. Corners are butted and casing is nailed through board into stud. Knurled side affords good spackle adhesion.

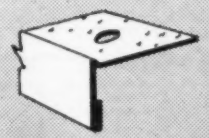

Corner guard for protection to exterior corners applied directly over wallboard and nailed through flange. Nose is undercut to provide grip for spackle finish.

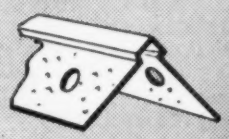

Round or square edge casings are nailed in place before board is applied. Corners are mitered. Inclined plane creates tension that draws board snugly into position.

CARPET APPLICATION DATA

Continuous nailer in concrete slab

Nailing plugs anchor wood strip

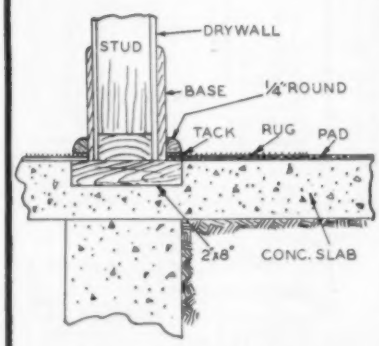

Continuous beveled screed

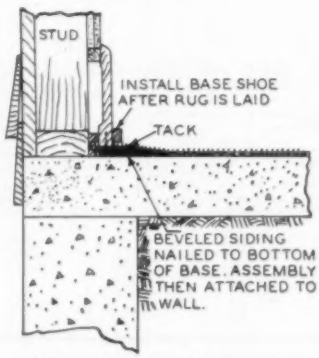

NOTES

Where carpeting is laid over a concrete slab a moisture-proof sealer should be applied to the concrete after it has dried thoroughly. Building paper should be added for extra protection.

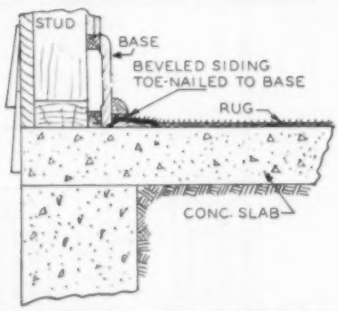

In addition to the methods for applying nailing strip shown here these may also be anchored adequately with a mastic made for that purpose.

Continuous plate for partitions

Siding strip anchored to baseboard

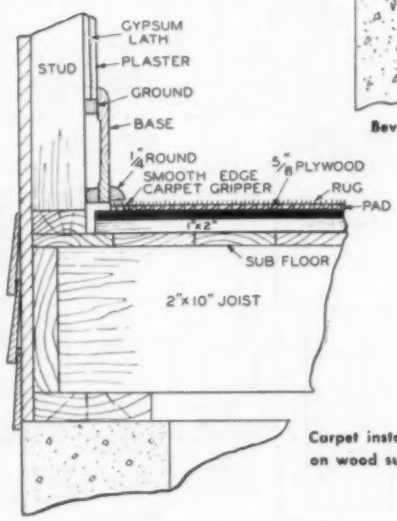

Beveled siding strip toenailed to base

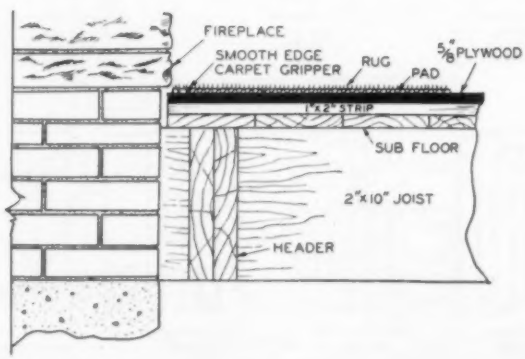

Carpet gripper for concealed nailing

Series of nails at angle provide anchor for carpet

Carpet installation on wood sub floor

Courtesy Carpet Institute, Inc.

FORMULAS FOR TINTING PAINT

Tints should be made with white paint as a base. Since definite color standards do not exist, the colors-in-oil recommended will produce the tints usually identified by the names shown.

Tint desired:	Add to white
BLUES	**TINTING COLORS IN OIL**
Delft	8 Ultramarine Blue, 1 Ivory Black
Robin's Egg	Chrome Green Medium
Sky	Prussian Blue
Slate	3 Ultramarine Blue, 1 Lamp Black
Turquoise	4 Ultramarine Blue, 1 Chrome Green Medium or Light
GRAYS	
Blue Gray	Lamp Black
French	Raw Sienna, Ultramarine Blue
Pearl	Burnt Umber
Putty	Raw Umber, touch of Burnt Umber
Rose Taupe	3 Burn Umber, 1 Lamp Black, touch of Venetian Red
Taupe	3 Burnt Umber, 1 Lamp Black
GREENS	
Apple	Chrome Green Light, touch of Chrome Green Medium and Raw Sienna
Green Tint	Chrome Green Light
Jade	1 Chrome Green Light, 1 Chrome Green Medium
Nile	Chrome Green Light, touch of Chrome Yellow Light
Pea	Chrome Green Light, touch of Chrome Green Medium
PINKS	
Baby Pink	Venetian Red
Coral	Venetian Red, touch of Chrome Yellow Dark
Flesh	6 Yellow Ochre, 1 Venetian Red, touch of Lamp Black
Old Rose	1 American Scarlet Vermilion, 1 Indian Red
Pink	American Scarlet Vermilion, touch of Venetian Red
Salmon	Venetian Red
VIOLETS	
Lavender	1 Ultramarine Blue, 1 American Scarlet Vermilion
Lilac	1 Ultramarine Blue, 1 American Scarlet Vermilion
Orchid	3 Ultramarine Blue, 1 Indian Red, touch of Alizarin Crimson
Orchid Pink	American Scarlet Vermilion, touch of Ultramarine Blue
Wistaria	1 Ultramarine Blue, 1 American Scarlet Vermilion
WHITES	
Bone White	Ivory Black, touch of Yellow Ochre or Raw Sienna or Burnt Sienna
Off White	Raw Umber
Oyster White	Chrome Yellow Light, touch of Ultramarine Blue
YELLOWS & ORANGES	
Apricot	Chrome Yellow Dark; touch of Chrome Yellow Medium
Beige	1 Raw Sienna, 1 Burnt Umber
Buff	Raw Sienna, touch of Burnt Umber
Chamois	3 Raw Sienna, 3 Yellow Ochre, 2 Raw Umber
Champagne	3 Yellow Ochre, 1 Burnt Umber
Chartreuse	Chrome Yellow Light, touch of Chrome Green Medium and Burnt Umber
Coffee	8 Raw Sienna, 4 Burnt Sienna, 1 Lamp Black
Colonial Yellow	2 Yellow Ochre, 1 Chrome Yellow Medium
Cream	Raw Sienna
Ecru	2 Yellow Ochre, 1 Burnt Umber, touch of Ivory Black
Fawn	3 Yellow Ochre, 1 Burnt Umber, touch of Indian Red
Honey	Raw Sienna
Ivory	Yellow Ochre
Lemon	Chrome Yellow Light, touch of Chrome Yellow Medium
Maize	1 Yellow Ochre, 1 Chrome Yellow Medium
Maple	Raw Sienna
Old Gold	2 Chrome Yellow, Medium, 1 Burnt Umber, touch of Venetian Red
Old Ivory	Yellow Ochre, touch of Raw Umber
Peach	Chrome Yellow Dark
Straw	4 Chrome Yellow Light, 1 Raw Umber, touch of Chrome Green Light
Tan	Raw Sienna, touch of Burnt Umber

TIPS ON COLOR

If you have	And you want	Do this
Blue	Dark Blue	Add Black
Blue	Light Blue	Add White
Green	Deep Green	Add Blue or Black
Green	Light Green	Add Yellow or White
Green	Olive	Add Blue and Red
Orange	Brown	Add Blue
Red	Dark Red	Add Black
Red	Light Red (not Pink)	Add Orange
Red	Brown	Add Green

PRIMARY & SECONDARY MIXTURES

Red plus Yellow makes Orange

Yellow plus Blue makes Green

Blue plus Red makes Purple

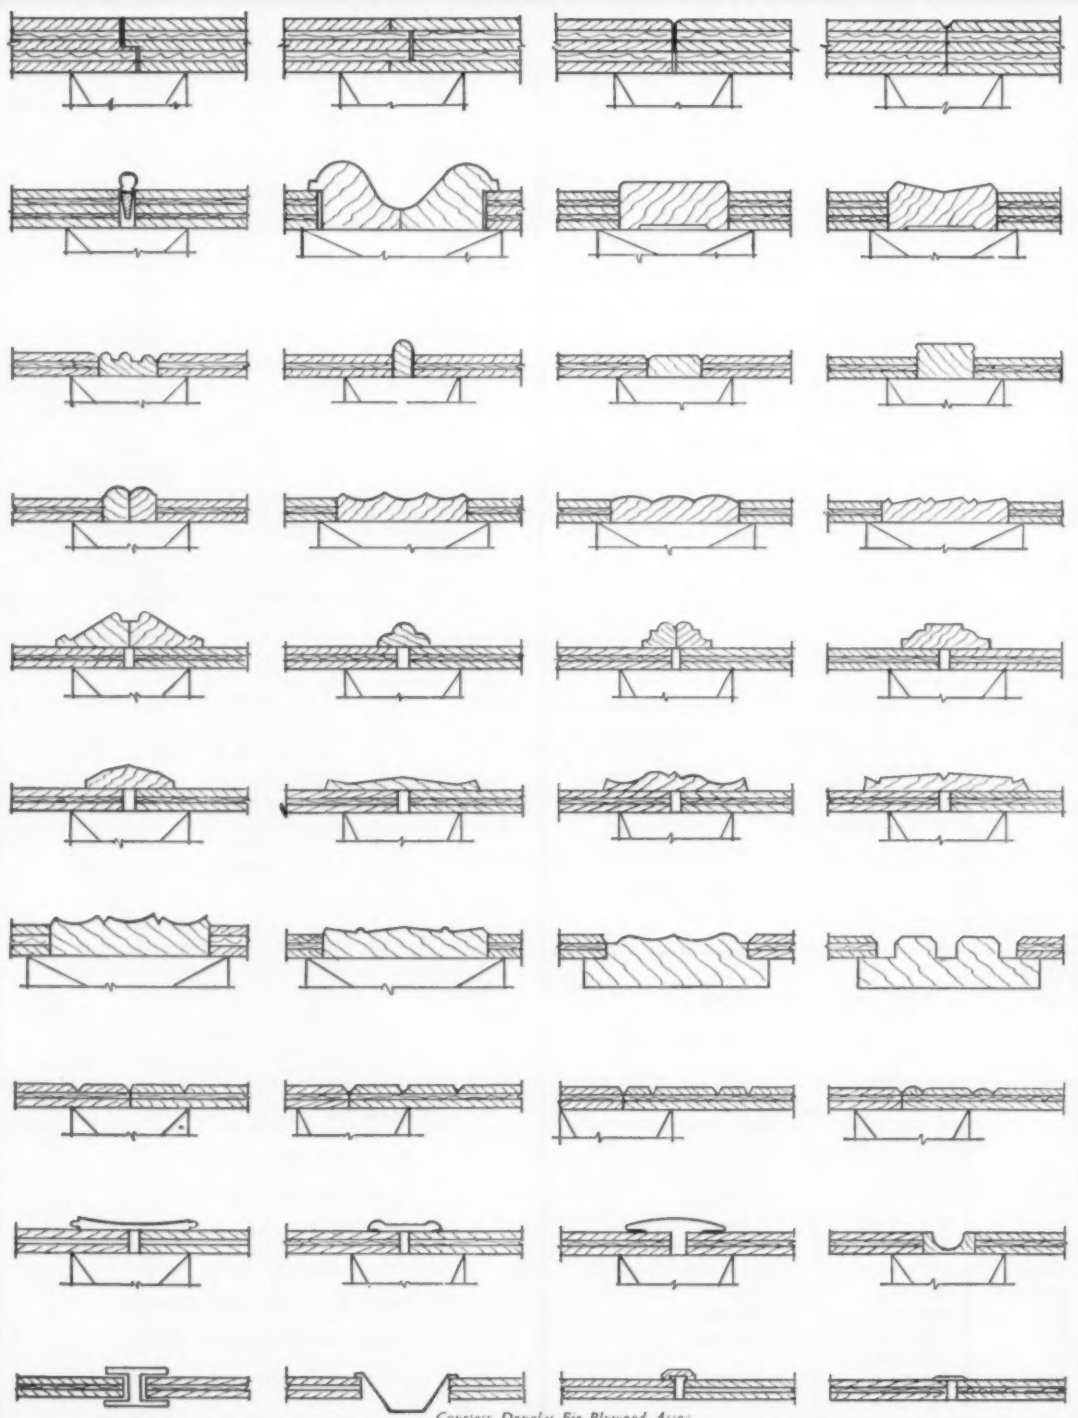

Orange plus Green makes Citron

Green plus Purple makes Olive

Purple plus Orange makes Russet

(Try a small sample first for desired color)

HARDWOOD FLOORING DATA

STANDARD SIZES, COUNTS and WEIGHTS

"Nominal" is the size designation used by the *trade*, but it is not always the actual size. Sometimes the actual thickness of hardwood flooring is 1/32-inch less than the so-called nominal size.

"Actual" is the *mill* size for thickness and face width, excluding tongue width. "Counted" size determines the board feet in a shipment. Pieces less than 1 inch in thickness are considered to be 1 inch.

OAK

Nominal	Actual	Counted	Weights M Ft.

17/16 x 2½ in.	33/32 x 2½ in.	5/4 x 3¼ in.	2500 lbs.
17/16 x 3½ in.	33/32 x 3½ in.	5/4 x 4¼ in.	2600 lbs.

NOTE: Oak, Beech, Birch, Hard Maple ad Pecan Flooring are bundled by averaging the lengths. A bundle may include pieces from 6 in. under to 6 in. over the nominal length of the bundle. No piece shorter than 9 in. admitted.

The percentages under 4 ft. referred to in the grading rules on this page apply on total footage in any one shipment of the item.

¾-in. allowance shall be added to the face length when measuring the length of each piece.

Flooring shall not be considered of standard grade unless the lumber from which the flooring is manufactured has been properly kiln-dried.

ESTIMATING FLOORING

Figures below are board feet of various sizes of flooring required to cover square feet of floor space shown at left.

Square Feet Floor Space	25/32 x 3¼	25/32 x 2¾	25/32 x 2¼	25/32 x 1½	½ x 2½	½ x 2	⅜ x 2	⅜ x 1½

To obtain BM from Bdl. feet multiply by	2½	3½	3	2¼	4	3¼	3	4

COMPUTING FLOORING NEEDS

To ascertain the amount of hardwood flooring required for a room, first determine the area of the room by multiplying the width by the length. Then add one of the following percentages to that figure, depending upon the size of flooring you intend to use.

25/32 x 1½ inch.....50%
25/32 x 2 inch.....37½%
25/32 x 2¼ inch.....33⅓%
3/8 x 1½ inch.....33⅓%
1/2 x 1½ inch.....33⅓%
3/8 x 2 inch.....25%
1/2 x 2 inch.....25%
25/32 x 3¼ inch.....24%

The above figures are based on laying flooring straight across the room. Where there are bay windows or other projections, allowance should be made for additional flooring. It is well to order 5% additional flooring to take care of floor layer's cutting and possible damage if carelessly handled.

NAIL SCHEDULE — OAK FLOORING

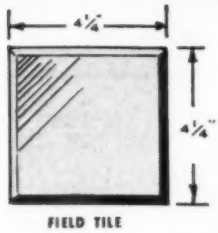

Tongued-and-grooved flooring. To be blind-nailed.

Flooring Dimen., In.	Type, Size, Spacing of Nails
3/8 x 2 3/8 x 1-1/2	Bright casing nail — 4d wire or cut nail, or screw nail. 8 in. apart. Wood subfloor required.
25/32 x 3-1/4 25/32 x 2-1/4 25/32 x 1-1/2	7d or 8d screw type or cut steel nail.* 10-12 in. apart.
1/2 x 2 1/2 x 1-1/2	5d screw type or cut steel or wire nail. 10 in. apart. Wood subfloor required.
Square-edge flooring. Face-nailed.	
5/16 x 2 5/16 x 1-1/2	1-in. 15 gauge fully barbed flooring brad, preferably cement coated. 2 nails every 5 in. Wood subfloor required.

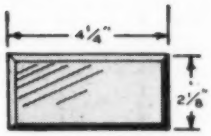

*If steel wire flooring nails is used, it should be 8d, preferably cement coated.

FEATURE CORNER TILE

HALLMARK

Polystyrene plastic wall tile which carry this hallmark indicate compliance with Commercial Standard 168-50 which includes the following conditions:

DIMENSIONAL TOLERANCES—The face sizes of tiles shall not vary one from the other, in any comparable dimension, more than by a negative tolerance of 1/10 of 1% or 0.005 in., whichever is greater, and by a positive tolerance of 2/10 of 1% or 0.010 in., whichever is greater.

THICKNESS—The thickness of the plastic in tile shall be greater than 0.062 in. The lip on the tile shall extend at least 0.033 in. beyond the back of the tile.

ESTIMATING AND DESIGNING FACTORS

HOW TO USE THIS TABLE

This table can be valuable to the designer and estimator in several ways.

1. In designing or layout, the number of courses of tile can be ascertained, for any required height or length of wall.

Example: Assume that a wainscot height of 4'-6" is desired and it is required to know the number of tiles necessary to approach this dimension. Checking the table it will be found that 13 tiles give a course height of 4'-7¼". If desirable to hold close to the 54" dimension 12 full tiles may be finished with a half tile or cap of 2⅛" giving a total height of 4'-5⅛".

2. Estimating tile quantities for a given area.

Example: Length of wall in lineal feet—17'-0"
Height of wall—5'-8"
Number of tile in 17'-0"=48
Number of tile in 5'-8"=16
48 x 16=768 tiles required.

3. Estimating the number of pieces of 4¼" cap, base or feature strip required for lineal feet of wall.

Example: Assume total lineal feet of wall to be tiled to be 48 feet.
Consulting the table it will be found that 34 pieces are needed for 12 feet. Therefore: 34 x 3=102 the total number of pieces required.

Courtesy The Society of Plastics Industry, Inc.

CERAMIC TILE USES & SPECIFICATIONS

	TYPES OF TILE	DESCRIPTION		BASIC SHAPES AND NOMINAL SIZES IN INCHES	APPROX. THICK.	TYPICAL USES
GLAZED	GLAZED INTERIOR	Has an impervious finish composed of ceramic materials fused on the surface of a fired clay body. The surface will not absorb stains or change color.	Durable Tile with a glass-like finish on a body that is usually non-vitreous.	Square { 4¼ / 6	⅜	Suitable for all uses except surfaces subject to abrasion, impact, freezing, or excessive changes in temperature. Typical uses are in: Corridors, Lunch Rooms, Closets, Washrooms, Locker Rooms, Kitchens, Bathrooms, Showers, Powder Rooms, Operating Rooms
	EXTRA DUTY		More durable than the Glazed Interior Tile. Thicknesses vary with sizes and shapes. For exterior use in freezing climates the Tile should be of such density and body strength as to pass the Standard Weather Test.	Square 4¼	⅜ to ⅝	Can be used on any surface where Glazed Interior Tile is suitable and ordinarily for exterior surfaces when passing the Standard Weather Test. Exterior Decoration, Vestibules, Fountains, Drainboards, Bulkheads, Store Fronts, Subway Entrances, Light Traffic Floors
	FAIENCE			Square { 4¼ / 6	½ to ⅝	
	CERAMIC MOSAIC			Some of the sizes in the unglazed ceramic series are available in glazed ceramic mosaics.	¼	
	SPECIAL PURPOSE	Should be specified subject to properties and appearance requirements for the particular use intended.				
UNGLAZED	CERAMIC MOSAIC	A hard, dense Tile of homogeneous composition that derives color and texture from the materials of which it is made. Has no glaze on the surface. May be produced by either the dust-pressed or plastic method. Unglazed Tile for exterior use in freezing climates should be of such density and body strength as to pass the Standard Weather Test.		Square { ¾ (1 5/16), 1 (1 1/16), 1½ (2 5/16)	¼	Generally suitable for any use. Especially adapted to floors and other heavy duty purposes—both indoors and outdoors. Drainboards, Working Surfaces, Bathrooms, Kitchens, Toilet Rooms, Corridors, Operating Rooms, Entrances, Delivery Rooms, Grease Rooms, Recreation Rooms, Stairs and Landings, Porches, Dairies, Stables, Packing Houses, Power Plants, Industrial Plants, Swimming Pools, Showers, Stove Backs, Snack Bars
	PAVER			Square { 3, 4, 4¼, 6 } Oblong 6 x 3	⅜ to ⅝	
	QUARRY			Square { 2¾, 4, 6, 8, 9 } Oblong { 6 x 2¾, 6 x 9, 8 x 3¾ }	½ to ¾	
				Oblong 8 x 4	1¼ to 1⅝	
	SHIP OR GALLEY	A special quarry Tile having an indented pattern on the surface.		Square 6	⅝ to ¾	Used on ship decks and galley floors.

The dimensions given in the table are nominal for the basic flat Tile units. All Tile may vary slightly from these nominal sizes.

Fractional pieces of flat Tile such as oblongs, diagonals, and squares, together with shaped or molded pieces known as trimmers, are made to integrate with the basic shapes listed. There is some variation among Tile manufacturers in the number of these complementary units that they manufacture, and the manufacturer or Tile contractor should be consulted on questions.

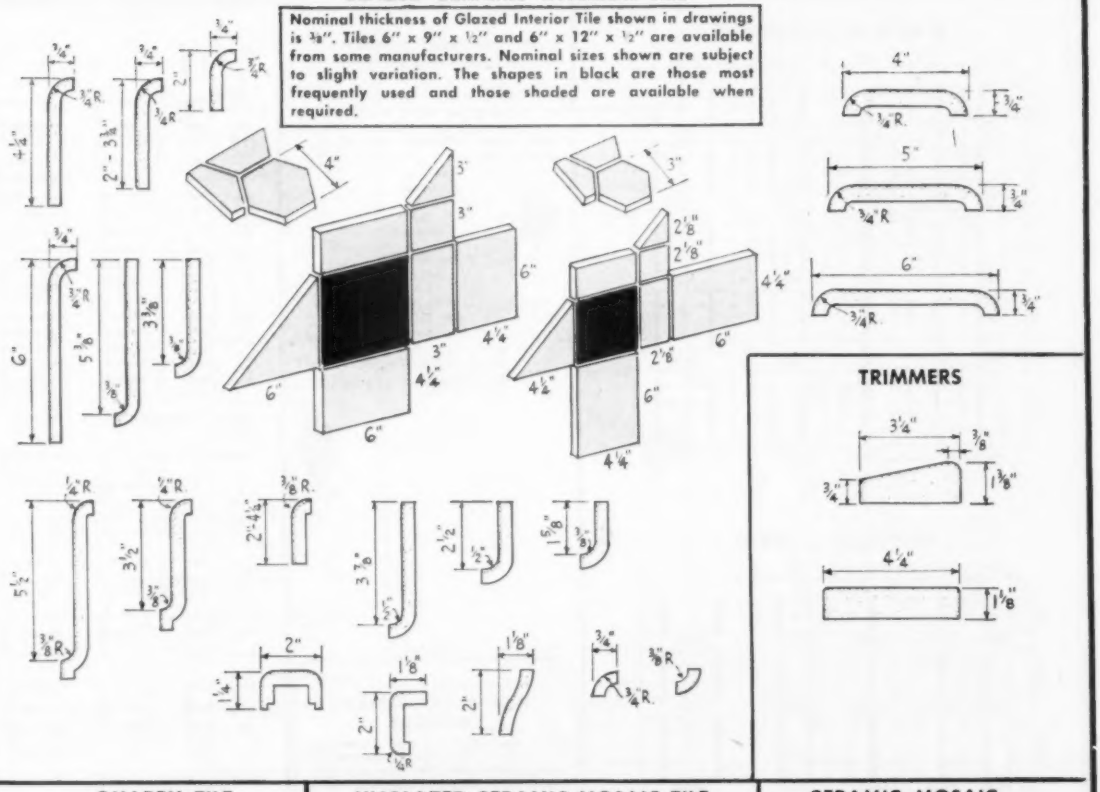

Tiles are made in a wide range of colors and the individual Tile manufacturer's color charts should be consulted in making selections. The firing of the clay results in harmonious deviations from any selected sample.

Courtesy Tile Council of America

CERAMIC TILE STANDARDS

GLAZED CERAMIC INTERIOR TILE

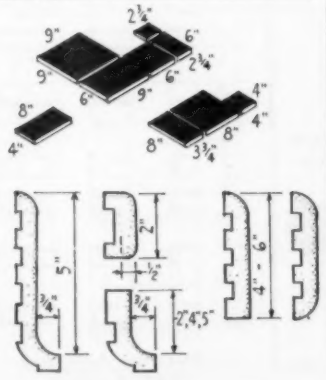

Nominal thickness of Glazed Interior Tile shown in drawings is ⅜". Tiles 6" x 9" x ½" and 6" x 12" x ½" are available from some manufacturers. Nominal sizes shown are subject to slight variation. The shapes in black are those most frequently used and those shaded are available when required.

TRIMMERS

QUARRY TILE

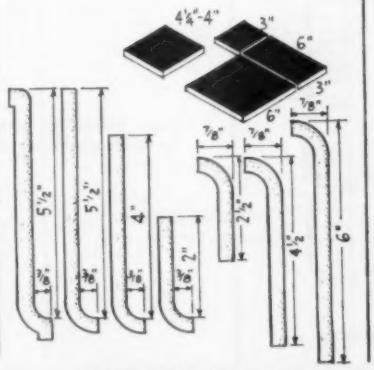

Basic shapes for flat Quarries are shown in black. For the trimmer shapes shown there are complementary corner pieces available. Consult the Tile Contractor if other shapes than those illustrated are required for special conditions. Dimensions shown on the drawings are nominal . . . some slight variation is to be expected in actual measurements. Other than the basic shapes shown are available from some manufacturers.

UNGLAZED CERAMIC MOSAIC TILE

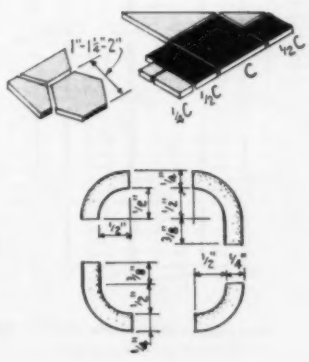

PAVER TILE

The basic shapes for flat Paver Tile are shown in black. For the coves and caps there are the complementary corner pieces available. Consult the Tile Contractor if other shapes are required for special conditions. The sizes shown are nominal dimensions and will have a slight tolerance.

CERAMIC MOSAIC

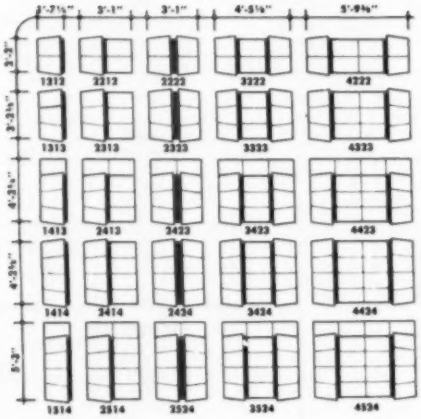

The series of sizes of Ceramic Mosaic is usually referred to as the 2" or the 1-9/16" series. Actually there are slight variations, according to the practice of manufacturers as follows: C = 2", 2-3/16", 1-9/16" or 1-15/16". Basic shapes are shown in black on the drawing. Pentagon and Octagon shapes are made by some manufacturers. For both Coves and Caps there are complementary corner pieces available.

ALUMINUM WINDOW STANDARDS (COMMERCIAL)

Dimensions shown are window opening dimensions

C-A2 and C-A3 CASEMENT WINDOWS
for commercial and monumental-type buildings

Horizontal and/or vertical muntins may be added if desired, provided they are based on 20" or 24" bar centers for width and 16" bar centers for height. Fixed light may be provided at sill in place of sill vents.

Fixed types furnished for all sizes shown.

P-A2 PROJECTED WINDOWS
for commercial and monumental-type buildings

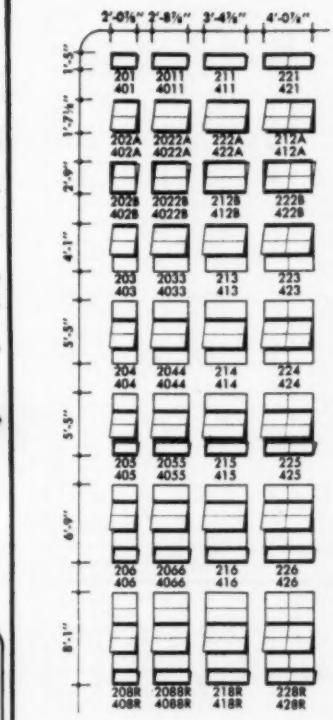

All vents shown to project out may be made to project in, provided all vents in the same unit project in.

200 series indicates architectural projected.

400 series indicates intermediate projected.

Vertical muntins may be added to 200 and 400 series windows if desired, provided they are based on 20" or 24" bar centers.

Fixed types furnished for all sizes shown.

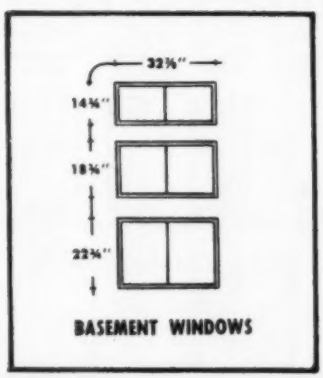

Dimensions shown are window opening dimensions

DOUBLE-HUNG WINDOWS
(DH-A1, DH-A2, DH-A3)
for commercial and monumental-type buildings are also available. Consult manufacturers' catalogs for available sizes.

DH-A1 are double-hung (and single-hung) for residential-type buildings.

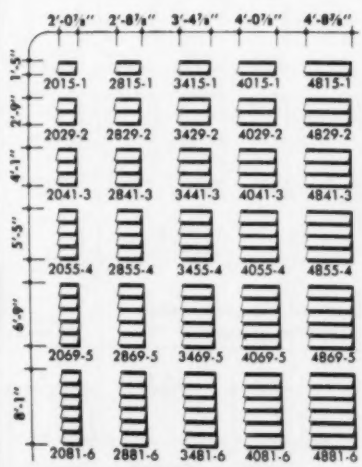

DH-A2 are double-hung (and single- and triple-hung) windows for commerical-type buildings.

DH-A3 are double-hung (and single- and triple-hung) windows for monumental-type buildings.

456 ROMPEL STREET • KEWANEE, ILLINOIS

Think what you can do for dressers, built-in desks, kitchen units, and other functional storage space. Channels in all sides of these drawers allow for easy compartmenting.

Drawers are shipped completely finished, no sanding, no cutting. While handles and pulls can be easily added, in this installation the frame of the cabinet was notched to provide a finger hold.

• ***Molded phenolic drawers, ready to use, give you***

More for your money!

...so you can offer your customers more for theirs. More in appeal, convenience and performance. And, for you—at *actual savings in cost* over quality drawers of conventional construction! It holds true for new homes and remodeling just as much as it did for this drugstore installation pictured here.

Drawers molded of BAKELITE Phenolic Plastic are rigid and warp-free. The one-piece construction features rounded corners for easy cleaning, built-in runners and center guides to assure smooth, non-sticking operation. Durable phenolic is unaffected by moisture, water, most chemicals or cleansers. The glossy surfaces clean easily with the wipe of a damp cloth.

Your own imagination is the only limit to the number of ways you can put these drawers to work pleasing customers. Send the coupon today for further information and names of manufacturers.

PROVEN SIGNS OF QUALITY

And Proven Profit Makers for Dealer and Builder

Builders have found that it pays to stick with nationally known, quality products. Homes with such products (like R·O·W windows) sell faster—with a better margin of profit—and they "stay sold" longer.

All three R·O·W windows are easy to clean from inside the home. All three types are available in a range of conventional and contemporary styles and sizes to provide either privacy or full view, depending upon requirements. R·O·W Double-Hung and Gliding sash lift out entirely for easy cleaning or painting.

AWNING

This new SURE-LOK unit is now being manufactured by several R·O·W distributors. Styling blends particularly well with the long, low lines of contemporary design.

By Popular Demand!
Announcing...
REPEAT PERFORMANCE! BILT-WELL
You asked for it! The response to the BILT-WELL Builders' Contest conducted throughout the year 1955 was so gratifying (over 2,000 entries), we have decided to repeat the contest in 1956.
SAME SIMPLE RULES APPLY
Nothing to Design...
Nothing to Write...
Nothing Special to Do...
Entries containing the most unique and practical applications of BILT-WELL CABINETS and/or WINDOW UNITS will win.
It can be an entire house...
a room in a house...
or any remodeling job!
Entries containing the most unique and practical applications of a BILT-WELL product, or products will win.
All entries must be postmarked on, or before, midnight, November 30, 1956.
YOU HAVE AN EXCELLENT CHANCE OF WINNING ONE OF THESE

BUILDERS' CONTEST FOR '56
Plus 24 additional prizes of $100 U.S. Government Savings Bonds
NATIONAL GRAND WINNER— 26-day, all-expense trip to EUROPE (for two)
TWO MID-WESTERN REGIONAL WINNERS— 7-day, all-expense Fiesta in MEXICO (for two)
TWO EASTERN REGIONAL WINNERS— 7-day, all-expense Holiday in BERMUDA (for two)
WESTERN REGIONAL WINNER— 7 days in romantic HAWAII (for two)
WONDERFUL PRIZES
MAIL THIS COUPON FOR COMPLETE CONTEST KIT

Sell more "built-in" value with **MALTA wood windows**

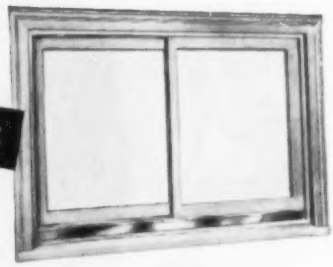

Quality in design and construction features . . . beauty and charm in styling . . . economy in installation . . . all yours when you choose MALTA wood window units.

MALT-A-VENT

Now . . . the newest, most versatile and flexible window unit ever designed. Self aligning, these new MALT-A-VENTS easily combine into stacks, window walls or ribbon windows to achieve exciting window styles. Engineered for 3 positions — install as outswinging awning-type, inswinging hopper-type or outswinging casement type . . . without alterations to frame or sash. Metal weatherstripping contacts sash at all points. Fully glazed — plate or insulated glass. Choice of 4 types of optional hardware, including easy-to-use bar operator, available. Packed 2 units to carton . . . ready to install.

MALT-A-GLIDE

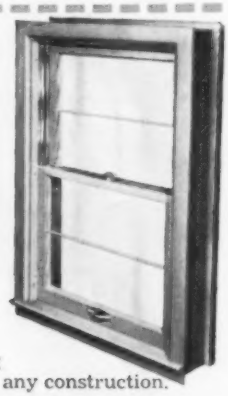

For glamorous "walls of light" or high ribbon windows install horizontal sliding MALT-A-GLIDES. Sash removes easily for cleaning or painting. Watertight sill seal eliminates drafts and moisture. Removable jamb liners permit quick installation in every type of wall construction.

MALT-A-MATIC

Popular, double-hung beauty and dependability with a modern touch. Sash removes easily, rustproof spring loaded metal weatherstripping permits adjustment for finger-tip operation without sticking or rattling. Invisible balance optional on larger sizes.

MALT-A-MASTER

Fully balanced, double-hung unit with removable sash . . . new combination aluminum weatherstrip with invisible parting stop balance. Adaptable to any construction.

MALTA JAMB LINERS

Provide quick, easy installation in frame, brick and masonry construction. MALTA Jamb Liners let you install all MALTA units except the new MALTA-A-VENT into walls of varying thicknesses. Liners are easily removed. Vary jamb width from 5¼" to 4½". Require no further working after installation into wall.

UNIFORMITY

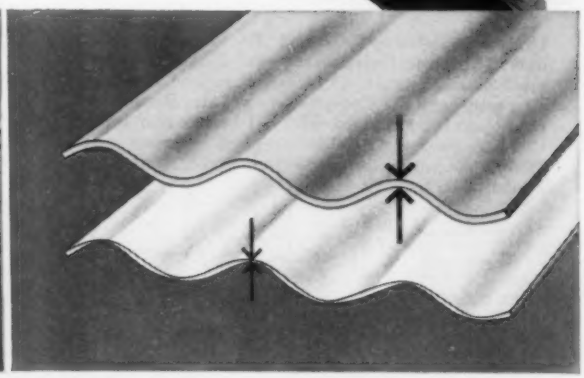

makes a big difference in Fiberglas-Plastic Panels

FILON PANELS ARE BY FAR THE MOST UNIFORM . . . WITH GREATER STRENGTH AND DURABILITY. The parallel nylon strands (as shown in the magnified circle) are an exclusive FILON feature to control a uniform dispersion of Fiberglas and to add considerably to the strength and rigidity of FILON panels.

FILON'S UNIQUE MANUFACTURING PROCESS. High standards of quality are the result of extensive research for better raw materials and methods of production. FILON is produced in continuous lengths by a fully automatic electronically controlled system in the world's largest plant devoted exclusively to the manufacture of Fiberglas-Plastic panels.

UNIFORM THICKNESS FOR MAXIMUM DURABILITY. FILON'S uniform thickness prevents premature failures at fastening points. Moreover, the uniform density in color will create the most even lighting effects. FILON'S uniformity of thickness and color dispersion assures greater durability and better diffusion of light.

UNIFORM CORRUGATIONS FOR BETTER FIT. A good nesting overlap is obviously essential for a tight, waterproof fit. Rigid standards of corrugation tolerances for FILON panels give maximum assurance of satisfactory nesting and overlaps.

FILON HAS MUCH HIGHER LOAD CAPACITY THAN REQUIRED BY STANDARDS OF THE INDUSTRY. Shown above is a 26" wide FILON type 250 panel over a 4' span supporting a static load of 1820 lbs.—equivalent to 210 lbs. per sq. ft. Compare this with the 100 lbs. per sq. ft. required by industry standards.

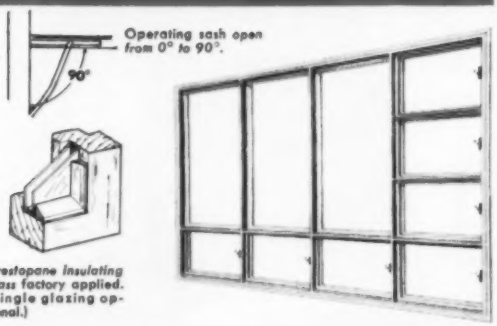

FOR FREE ILLUSTRATED BROCHURES containing all technical data, ideas and detailed drawings, write to Architectural Dept. of our Regional Sales Offices or consult the "Yellow Pages" under the heading "Plastic Materials" for nearest Distributor.

WATER REPELLENT PRESERVATIVE APPROVED

For Hardwood Floors of Traditional Beauty *At Their Best*

One reason 85 per cent of all home owners prefer oak floors, is oak's unique adaptability to favored decorative schemes. This versatility is strikingly evident in modern motifs which employ liberal expanses of bare floors set off by accent rugs.

For these exposed surfaces, Royal Oak Flooring provides the paramount essential . . . original fine texture, retained and protected by skillful seasoning that assures complete affinity for penetrating finishes so important in bringing out the full beauty, flower and dignity of oak.

With these qualities matched by refinements in design and manufacture that assure mirror smoothness, Royal Oak Flooring affords you dependable, premium quality for every specification.

Endorsed by Crossett's registered Trade-Mark and clearly labeled for grade, Royal Oak Flooring supplies you with the best for the best. For further information, address:

Constant betterment through research.

ARB WOOD WINDOWS

that's all it takes to adjust against Rattles, Sticking, and Drafts

WHY GIVE YOUR CUSTOMERS LESS?

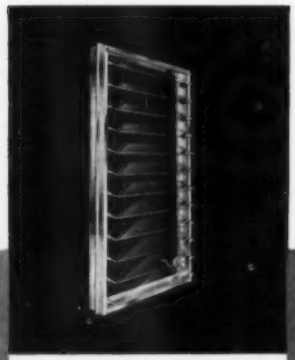

The adjusting device in A.R.B. Wood Windows operates so easily because the "micrometer" adjustment *floats* in its own housing. The adjusting screws turn in *metal* threads — so the easy adjustment stays easy.

With A.R.B. metals, you can supply modular wood windows (double-hung and glider) that are quick-lift-out, fully adjustable against rattles, sticking, and drafts, and "Finger Lift" balanced (double-hung only). What's more, they are priced so they win buyers. More than a million and a half have been installed, in just 5 years.

new Andersen Flexivent® Bar-Lock insures tight closing in low-cost underscreen operation

Strong, spring steel operator arm moves through housing, attaches to deflection bar anchored to sash bottom rail. Note arm is hinged in two places (a & b), permitting three open sash positions without extending into the room.

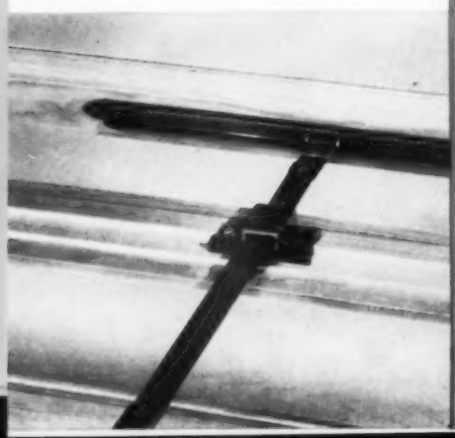

For the first time, the Andersen Bar-Lock Operator* brings to the market a bar-type operator combining exceptional strength, weathertight sash closure, and operating convenience at low cost.

The secret of the Andersen operation lies in the exclusive deflection bar attached to the bottom rail of the sash, providing a favorable bow that causes the corners to close first. The operator arm is attached at the center of the deflection bar. Cam and lever action closes sash tightly with little effort and ejects it for easy opening.

Special aluminum screen furnished for use with Bar-Lock Operator is fitted snugly around housing, which has a flange to hold screen at the bottom.

*Patent pending.

12-inch Deflection Bar in place on sash bottom rail. Curve in bar deflects sash so corners close before center of sash.

Operating arm is instantly detachable from deflection bar to permit wide opening of sash—an important safety feature—also makes it easy to clean glass from the inside.

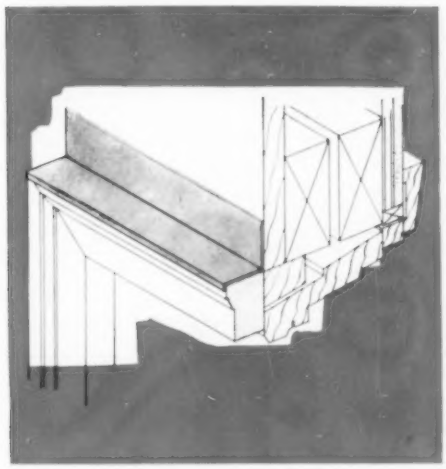

Strong zinc die cast housing is securely fastened to frame. Moulded nylon bushing with spring leaf provides smooth, quiet operation and protects against insects.

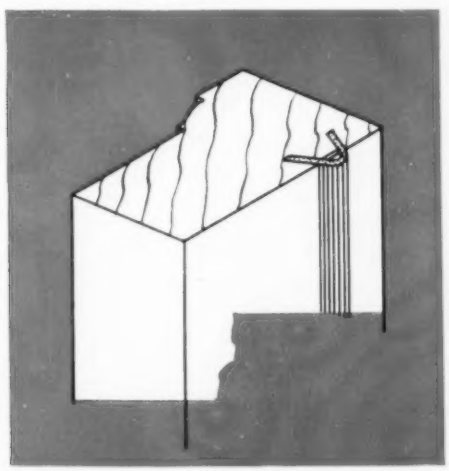

new **Seal-Trim** provides easier, tighter installation of Andersen Flexivent® Window groups

Andersen Seal-Trim* is a complete exterior trim package with casings, subsill, and flashing plus a vinyl sealing gasket. All parts are pre-cut and pre-fitted at the factory to assure exact fit for most standard Flexivent group installations. Pre-formed aluminum flashing at the head, resilient vinyl gasket at the sides, and specially horned and milled subsill provide an easy-to-install, highly weathertight joining with any type of wall. Treatment of wood parts with Andersen toxic, water repellent preservative assures long life.

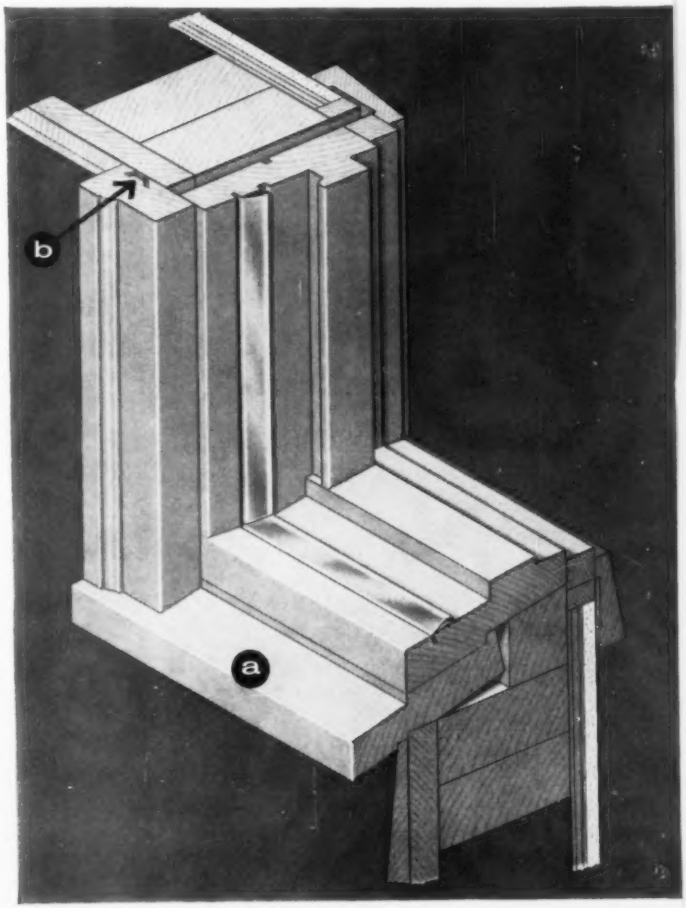

*Patent Pending

Aluminum flashing, shown in shaded area is formed and cut to length at factory.

Vinyl gasket, shown in drawing dovetails into back face of exterior casing.

(a) Seal-Trim subsill is milled and horned for exact fit.

(b) Vinyl gasket compressed against sheathing forms weathertight seal.

2 new improvements boost sales appeal of versatile Andersen Flexivent® Windows

NEW...Bar-Lock operator

NEW...Seal-Trim pre-cut exterior trim

Turn page for full story on improvements to Flexivent . . .
the window that's sold over 4 million units in 4 years!

builders say Flexivents® help sell homes...eliminate call-backs, speed building schedules

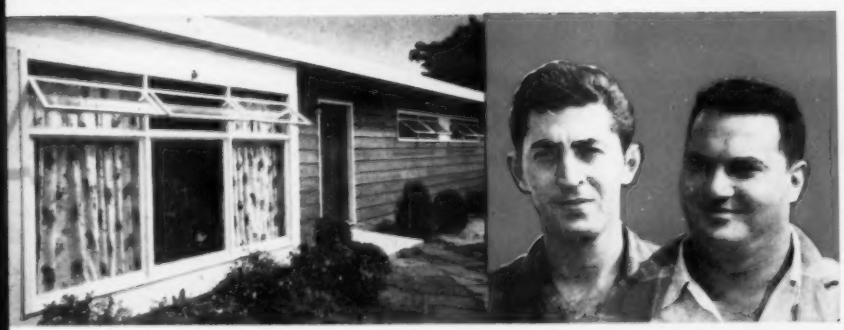

All over the country successful builders are now using Andersen Flexivent Units in homes they build for sale. Customer sales appeal combined with low cost, high quality and economy of installation has made the versatile Flexivent their first choice. Now, with the new Bar-Lock Operator and new Seal-Trim, Andersen Flexivent Windows are a better window value and have more sales appeal than ever before!

Here are a few of the builders who say Andersen Flexivent Windows help sell homes.

"With Flexivent Windows, sales appeal is greater in our homes,"

says F. A. Archer, president of F. A. Archer Company in Troy, Ohio. "We feel Andersen Flexivent Windows benefit us many ways. Ease of assembly speeds our building schedules. Our call-back problem has been eliminated. Appearance of homes is improved and sales appeal is greater."

"One of the reasons our homes sold so fast,"

say Eugene Farrow and Phillip Kallenberg, builders of Selden Country Estates, Selden, L. I., "Flexivent's top quality and low cost allowed us to give home-buyers added light and ventilation. We're sure this is one of the reasons our development sold so fast."

"Our salesmen report customer acceptance is excellent with Flexivents,"

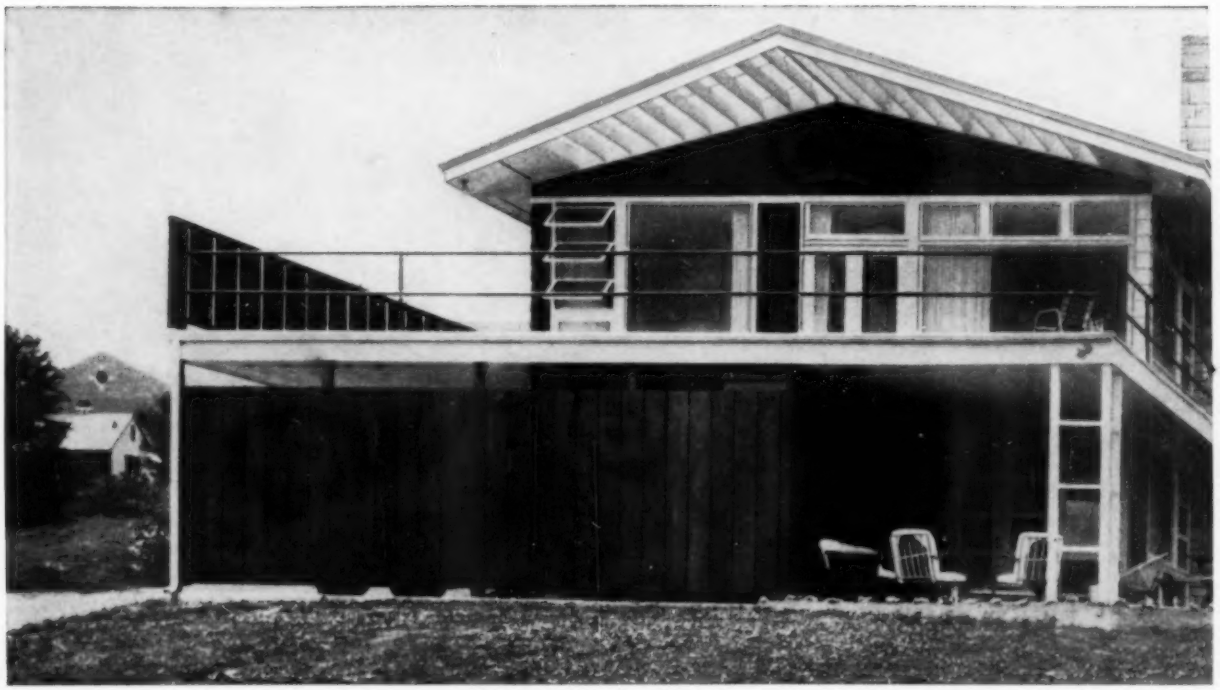

says Gus J. Cozza, builder of Northwood Village in Spokane, Washington. "We have found use of Flexivents minimizes installation costs. In over 2500 units installed over the past two years, we have had to service only four units."

How to put "visible value" in your

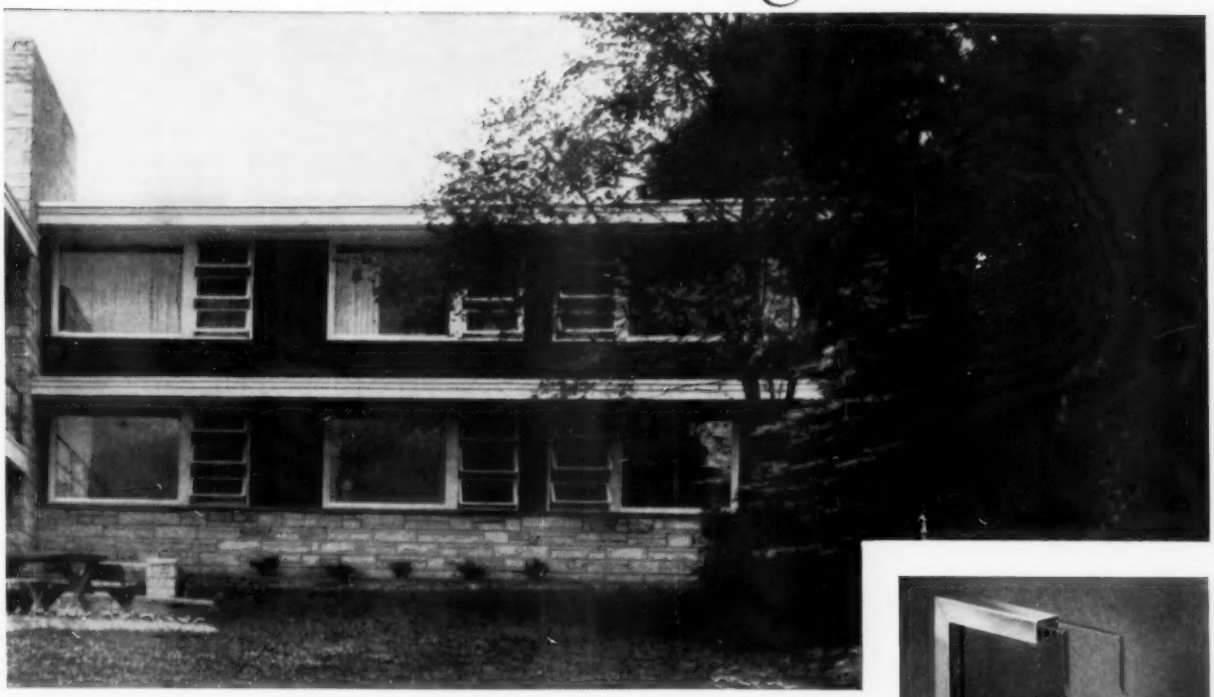

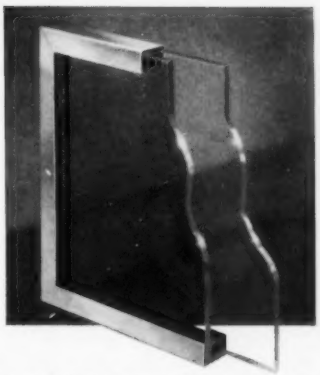

STRUCTURAL WALL MIRRORS of Pittsburgh Plate Glass are another feature which will do wonders in helping you sell your homes faster. A "wall of mirrors," like the one installed in this room, adds a luxury touch. Wall mirrors have the ability of making a small room look big. A narrow room, for example, will assume greater width. And anywhere in the home—in the living room, bedroom, entrance hall—the magic of mirrors gives a "worth more" feeling.

Build it better with **Pittsburgh Glass**

homes with Pittsburgh Glass

BUILDERS ALL OVER THE COUNTRY have proved that the installation of Pittsburgh's Twindow®—*the window-pane with insulation built in*—helps to make their selling job much easier . . . more profitable. In fact, more and more home buyers are demanding this "world's finest insulating glass" in every room. They know that Twindow keeps rooms warmer in winter, cooler in summer . . . cuts heating and cooling costs . . . reduces window fogging and icing . . . provides the most convenient form of storm window insulation. In this home, Twindow was utilized effectively for all window openings. As shown in the cutaway here, Twindow units consist of two panes of Pittsburgh Plate Glass, with a sealed-in air-space between, giving them their high insulating properties. The entire unit has a stainless steel frame—an exclusive Pittsburgh feature—which protects the seal and glass edges and makes handling quick, safe and easy. Architect: Charles E. Tilton, New York City, N.Y.

Every nickel you spend on glass shows.
And the results far outweigh the cost.

PITTSBURGH FULL-LENGTH DOOR MIRRORS—in bedrooms, bathrooms, and entrance halls—impress prospective buyers. They spell real value. You'll find, as hundreds of other builders have discovered, that a few door mirrors in the homes you build help to get buyers' names on the dotted line. Here's a much-in-demand feature that's easy to put up and adds very little to the total cost. These door mirrors are available in five widths—16, 18, 20, 22, and 24"—and a full 68" tall. They fit more than 90% of all interior millwork doors.

See Sweet's Builders Catalog for detailed information on Pittsburgh Plate Glass products.

HOPE'S *Since 1818*

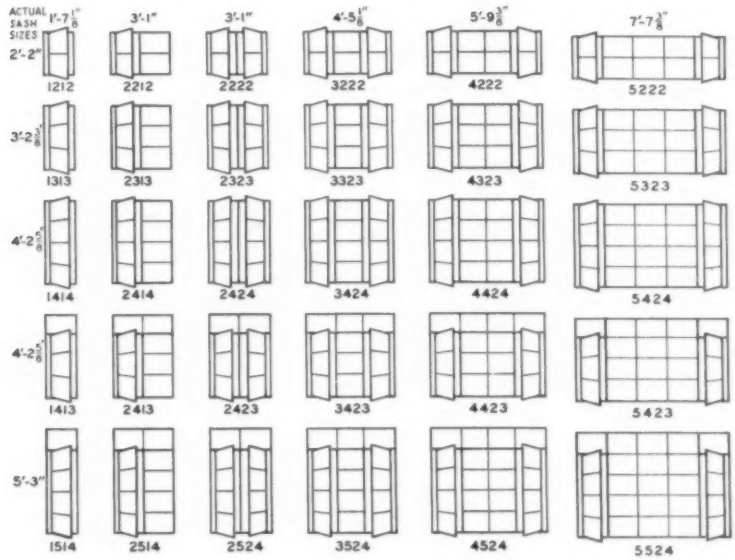

STEEL WINDOWS HAVE THE STRENGTH AND RIGIDITY THAT NO OTHER WINDOW CAN MATCH

Hope's Combination Inside-Outside Metal Trim is installed as in the illustration below.

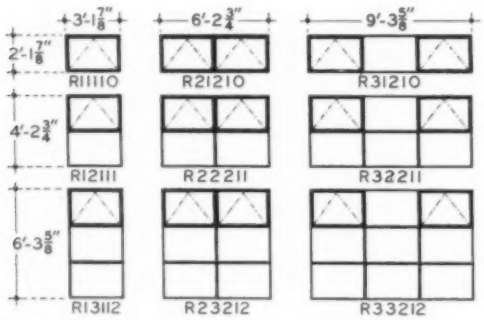

RESIDENCE *(Holford)* CASEMENTS

HOPE'S COMBINATION INSIDE-OUTSIDE METAL TRIM is easily and quickly installed with all standard sizes of Hope's Steel Casements. Trim fits into rough openings; no finished carpentry is required, either inside or out. Only a few minutes are needed for assembling at the warehouse or on the job.

HOPE'S STEEL CASEMENTS (standard sizes shown in above diagram) provide a variety of sizes and ventilator combinations that complement any type of architecture; readily fit any kind of construction. No other window can equal the strength and durability of steel.

HOPE'S ROTO TYPE RANCH WINDOWS

Hope's New Roto Ranch Windows have wide (1¼") muntins in proper proportion to panes. They provide great rigidity and harmonize with residential construction. Awning type ventilators open and close easily, quickly. Die-cast underscreen roto operator has extension arm of stainless steel fitted with a bronze shoe.

New flat-type fixed screens need never be touched. No fussing with wickets. Glazing may be standard units of "Thermopane", "Twindow" (to eliminate storm sash) or single panes, sheet or plate glass. No other Ranch Window in the same price range possesses all these features . . . and Hope's prices are low.

more THAN A floor!

HIGGINS OAK BLOCK FLOORING MAKES ITSELF AT HOME ANYWHERE!

People are using Higgins Oak Block on walls and in many other decorative applications—when you see the unusual warm beauty of its graining and color you just can't help thinking of other ways to use it than as flooring.

It's still the *most durable wood flooring you can buy*, bonded under great pressure and intense heat, with a thicker, tougher, wax-treated wearing surface that can withstand many times the impact and abrasion it will ever receive in a home.

On the floor, on the ceiling, on the wall, *anywhere* — it's easy to install over any structural base, and the factory prefinish means it's ready for use as soon as it's in place. (Also available unfinished for custom finishing after installation.) Easy to care for and sensibly priced, it will wear a lifetime.

Furniture—Orleans Town Associates

IN THIS modern room the cheery golden welcome of the Higgins Block floor has been carried up into wainscoting whose blocks are set diagonally for added textural interest. The upper part of the wall is Higgins Gnarled Oak paneling. AT LEFT, Higgins Block flooring shows its versatility by harmonizing handsomely with traditional furnishings and accessories—the floor, as attractive as it is, is practical in any interior, in any climate.

THE TREND IS TO HIGGINS BLOCK BECAUSE:

- New precision tongue and groove assures rapid installation
- The ONLY Hardwood floor completely practical on concrete
- 9" x 9" oak hardwood blocks—easy to install
- Extra thick selected oak face—quiet and comfortable
- Toxic treated—vermin resistant, termite resistant, rot resistant

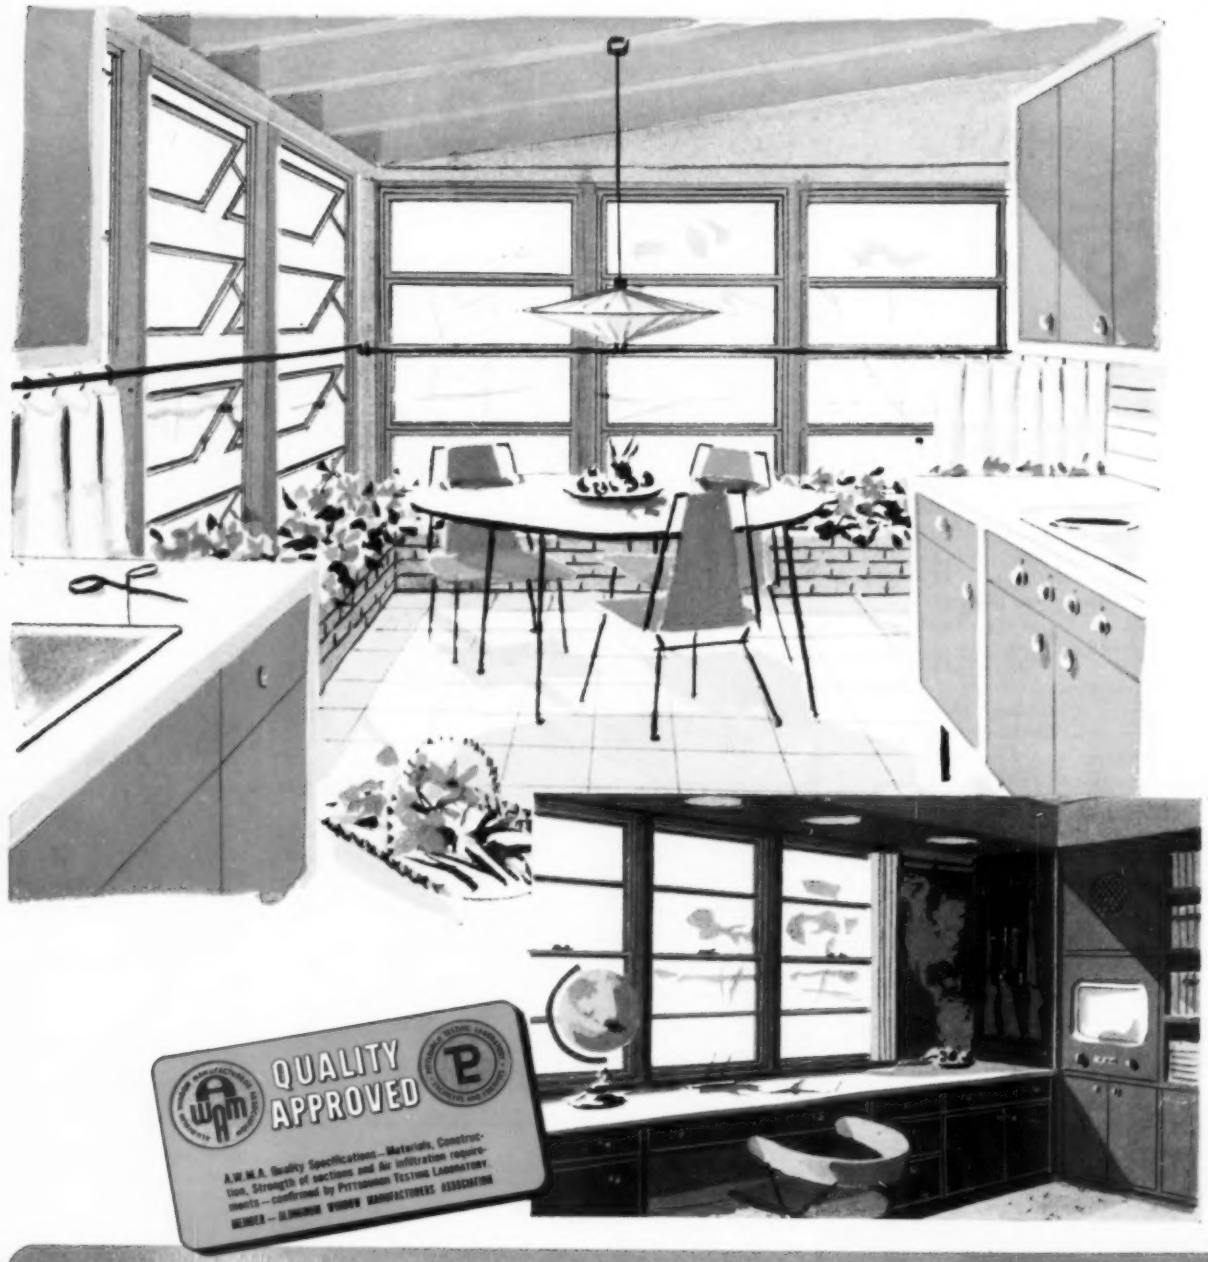

Can be nailed over subflooring laid in adhesive on concrete slab or applied over any subfloor

where home buyers can see it!

Nothing indicates quality construction to a home buyer as quickly and as surely as do "Quality-Approved" aluminum windows.

Whether your prospect first sees the aluminum windows from the outside as he is passing by, or from the inside as he looks around, here is visible evidence that quality building products have been used.

Customer surveys show that home buyers prefer these modern aluminum windows that cannot *rot* or *rust* . . . that *never* need painting . . . that always operate easily, effortlessly, efficiently...that remain up-to-date and beautiful for the life of the home.

You can cash in on this growing demand for quality products by featuring "Quality-Approved" aluminum windows in all your new houses. Your customers, as well as your mortgage financing agency, will appreciate it too if you include screens and storm sash as part of a complete single package mortgage.

To make sure you get good quality aluminum windows—designed and constructed in accordance with recognized quality standards—insist on windows with the "Quality-Approved" Seal. They are available through many manufacturers in all sizes and styles (double-hung, casement, awning, projected, sliding and jalousie). All are tested against rigid performance standards. All are APPROVED for quality of materials, for strength of sections, for sound construction, and for low air infiltration.

For additional information consult Sweet's or any of the manufacturers listed below, or write direct to Dept. AB-564.

For eye appeal plus sales appeal...

Gold Seal

INLAID LINOLEUM

in new decorator colors

T730
BEIGE,
accented with coral, green and brown

Popularity of the famous "Sequin" design grows by leaps and bounds. It can help you sell your homes faster. Home buyers are drawn to its full range of 16 beautiful colors—appreciate such "Sequin" advantages as...design inlaid clear through to the exclusive Gold Seal SuperFlex* backing...colors remain fresh and clear through years of wear...it stays smooth and resists indentations, unusually easy to clean!

With 18,000,000 magazine readers currently seeing the newest "Sequin" colors shown here, it will pay you to call your Gold Seal dealer today for the complete facts on "Sequin" Inlaid Linoleum.

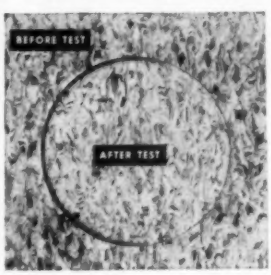

T718
YELLOW,
accented with white and yellow

T720
PINK,
accented with rose and white

SPECIFICATIONS: Standard Gauge and 1/8" "Sequin"—
Install over suspended concrete or suspended wood subfloors—standard gauge—16 colors.
1/8" "Sequin"—burlap backed—7 colors.

ABRASIVE WHEEL TEST PROVES SEQUIN* "LOOKS LIKE NEW" THROUGH LONG SERVICE LIFE!

The circular "After Test" area is the result of applying the abrasive wheel to the "Sequin" sample. See how it *has worn well through the linoleum*—and yet the pattern is still there, as clear and sharp as ever! Compare it with the "Before Test" area. You can't tell the difference! Write to Customers' Service Department, Congoleum-Nairn Inc., Kearny, N. J. for further information.

Aluminum Casements

Fixed multi-pane picture window, with ventilating casements at each end.

Lupton Windows for quality and price

Price *is* important, and you *can* meet it with a Lupton Window . . . but it's hard to put a dollar and cents value on all you and your buyers get when you install Lupton Metal Windows.

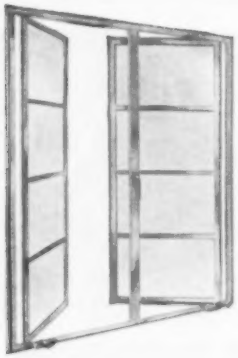

There's visual quality in construction and finish. There's beauty. There's sound design and rugged construction. There's variety — casements, double-hung, ranch and jalousie windows — to make it easy to select the "right" windows for the house. There's saving in time and money through quick, simple installation. There's prompt delivery from East and West Coast warehouses. There's satisfaction in buying, and selling a "name" respected for fifty years.

Ask your dealer, or nearest Lupton representative for prices, styles and sizes.

SEE FOLLOWING PAGES FOR DETAILS AND LIST OF DISTRIBUTORS AND REPRESENTATIVES ▸

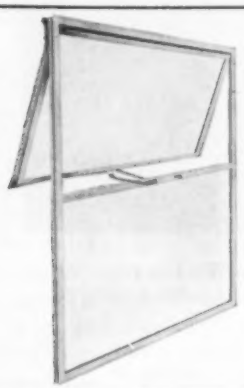

LUPTON RESIDENTIAL METAL CASEMENT . . .

The age-old beauty and charm of the casement in sturdy metal. Available in steel or never-needs-paint aluminum. Worm gear operator insures tight closing, easy operation. Extended hinges help provide ventilation regardless of the direction of the breeze, and permits all glass cleaning from within the room. All standard sizes. Screens and storm panels, that clip on the inside, are optional at extra cost.

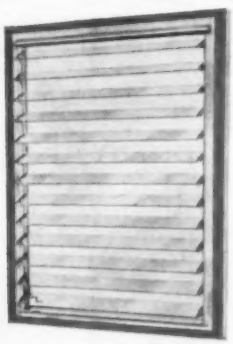

LUPTON ALUMINUM DOUBLE-HUNG WINDOW . . .

A modern window with all the old advantages of double-hung, plus additional features that only aluminum could give. Designed for quick, easy installation. Frames interlock at mullions, no extra pieces required. Completely concealed, easily adjustable balances. Stainless steel weather-stripping. Available in all standard sizes, with screens and storm panels optional at extra cost.

LUPTON ALUMINUM RANCH WINDOWS . . .

Emphasize the horizontal look. Shed rain, make it possible to keep window open in all weather. Offered in a variety of sizes, from a single ventilator to large windows in combination of fixed and ventilating sash. Window operation is extremely simple, locking tight. Screens and storm panels, to fasten on the inside, are available at extra cost.

M·F ALUMINUM JALOUSIE WINDOW . . .

Makes porches into rooms without loss of any air. Screens and storm panels, fastened on the inside, are available at extra cost . . . make Lupton Jalousies practical for any climate, 20 stock sizes, or Jalousies can be made any width up to 37″ and from 4 to 26 louvres in height. Wider windows are made by joining two or more units together. Installation is simple and easy. Shipped knocked-down, without glass. Glass louvres clip into place easily.

Pella® WOOD FOLDING DOORS

Ideal for room dividers . . . closet closures . . . storage walls

CONCEALED TRACK—Track at the top is concealed. Beveled matching wood mould, drilled and complete with screws, is furnished with each PELLA WOOD FOLDING DOOR. There is no exposed hardware to mar the beauty of PELLA DOORS, when open or closed.

HANGERS—Free-riding nylon rollers and hangers attached to every other panel provide easy gliding action to PELLA DOORS. No adjustment is required to insure proper fit and good operation even in slightly out-of-plumb door frames.

LATCH IS STANDARD EQUIPMENT—Patented spring-type latch and matching wood handle are standard equipment supplied on all PELLA DOORS at no extra cost.

HINGE DESIGN—Instead of ordinary hinges, PELLA DOORS have exclusive steel *spring* hinging. So doors open and close easily, smoothly.

FLOOR STOP ASSURES "TIGHT STACK"—A simple spring-leaf catch on the bottom of the end post engages the floor plate to insure a "tight stack." The catch is suitable for installation on all type floors or floor coverings.

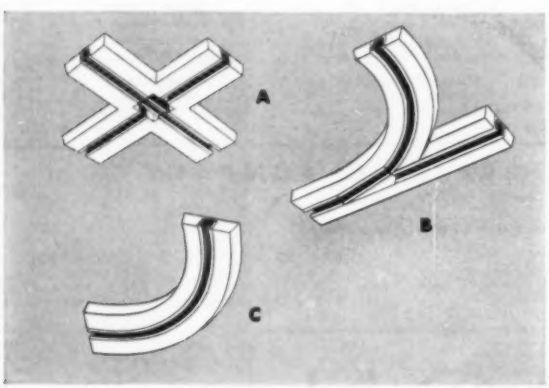

LAMINATED DOOR PANEL—Core blocks of PELLA DOOR panels are *solid* wood laminated with waterproof, plastic glue. PELLA's special design and processing of panels assure vertical alignment. Panels are 3⅝" wide and ⅜" thick.

VENEERS—are beautiful birch, oak, pine and Philippine mahogany —finished or unfinished.

QUICK, EASY INSTALLATION—PELLA WOOD FOLDING DOORS are assembled at the factory and come ready for quick, easy installation. The complete package contains door, hardware, latch, fittings and illustrated instructions.

SIZES—both stock and custom. Opening heights to 12′ 1″ in mahogany; 10′ 1″ in other veneers. Single door widths to 30′ 2¼″. Joining door widths to 60′ 4½″.

END POSTS—2, 3 and 4 way end posts are available.

SPECIAL TRACKS—PELLA Track Switches and Radial Track enable PELLA DOOR sections to be moved for use or for storage practically anywhere in a room.

A. CROSS OVER SWITCH

B. CURVE SWITCH

C. RADIAL TRACK—PELLA Curved Track and Track Mould are available in the following radii: 1, 1½, 2, 3, 4, 6, 8, and 10 feet.

Send for more information. Or see our complete catalog in Sweet's Light Construction File.

the LUXURY LOOK

Guaranteed Styron Plastic Wall Tile adds the modern touch of luxury your prospects look for

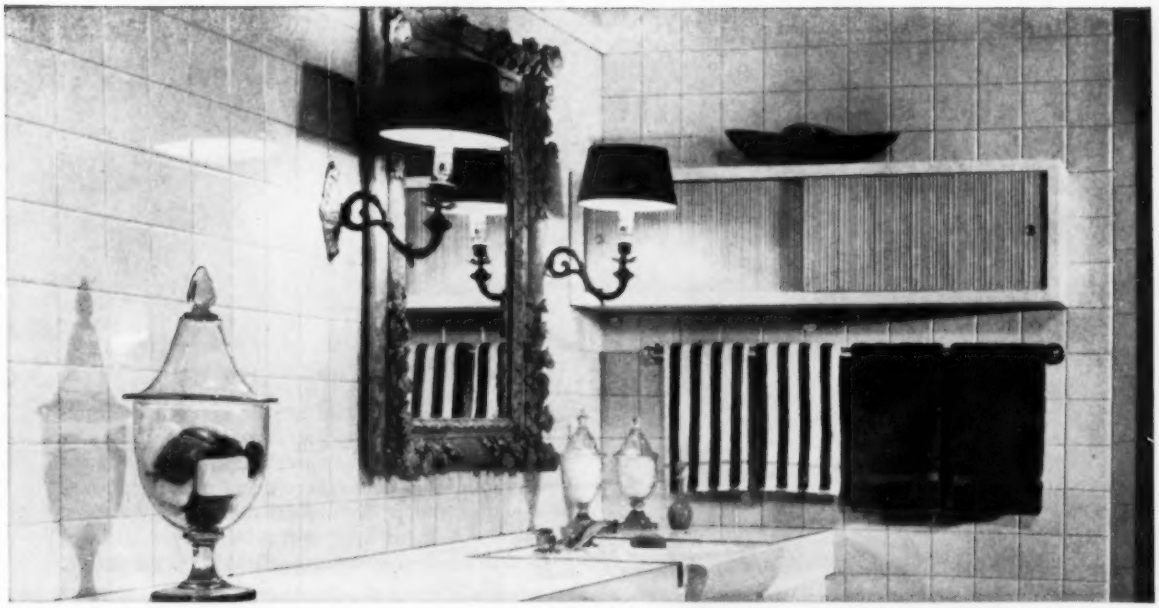

FIRST THING you notice about plastic wall tile made of Styron® is that it has unlimited design possibilities. Over 50 modern decorator colors in three exciting shapes tell you that.

Then when you start bringing these possibilities to reality, you come to the pleasant realization that these handsome Styron tile and trim pieces are real money savers. Quick and easy to install, they eliminate costly wire lath preparation, cut down crew time by plenty.

Best thing of all about Styron wall tile is this: The certified dealer you buy it from guarantees its quality in writing. Prospects know this guarantee, and they'll react favorably to your good judgment in having chosen the wall tile that carries it.

We call the growing trend to permanent plastic wall beauty The Luxury Look. You'll call it sound building practice.

See how the luxury look of Styron wall tile enhances this lovely bathroom setting. Might easily be the most talked about room in the house! Practical, too. Colors won't chip or peel—tiles stay luxuriously smooth and beautiful. Styron tiles are the soul of simplicity in maintenance—fingerprints or splash marks wipe clean in a jiffy with a damp cloth.

You'll find dozens of different ways to add permanent color and beauty to your homes and small buildings with Styron wall tile. Kitchens, baths, laundry rooms, utility rooms, recreation rooms, vestibules, lobbies, hallways—anywhere you choose, guaranteed plastic wall tile made of Styron is your most practical wall covering choice.

Here are your guides to the right choice in Guaranteed Plastic Wall Tile

First thing to do is get in touch with a certified dealer of guaranteed plastic wall tile. You can identify him by the emblem at the left. He is a progressive businessman who will give you a written guarantee (center) that the plastic wall tile and mastic he sells you conform to quality standards established with the National Bureau of Standards. He can guarantee that tile, adhesives and installation meet minimum property requirements for F. H. A. loans. The famous Styron label (right) identifies tiles made of dependable Dow polystyrene. When you install Styron plastic wall tile in any building, you're getting the benefit of the best-established prestige name in the industry. There's the package: THE LUXURY LOOK, guaranteed Styron plastic wall tile—and more building profits for you! For further information, write THE DOW CHEMICAL COMPANY, Midland, Michigan, Plastics Sales Dept. PL459M.

you can depend on DOW PLASTICS

DOW

There's a Marlite Panel for every O. H. I. project!

Marlite Plank and Block

Exclusive tongue and groove joint speeds installation, lowers "in place" costs. Planks are 16″ x 8′; Blocks are 16″ square. Soilproof baked melamine plastic finish never needs painting; cleans with a damp cloth. Available in "Companion Colors" styled by Raymond Loewy Associates, plus distinctive wood patterns . . . all in soft lustre finish.

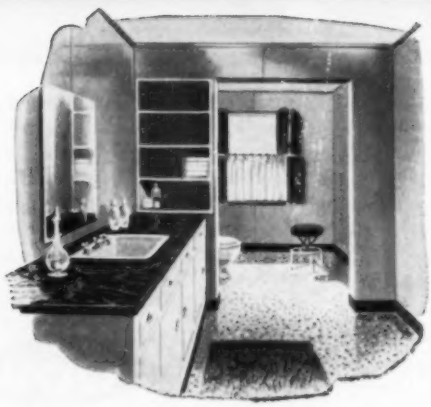

Marlite Woodpanel and Marble Panel

Authentic reproductions of fine, fully-finished hardwoods and rare, imported marble. Woodpanels are 4′ x 6′ and 4′ x 8′. Marble Panels are 32″ x 48″, 64″ x 48″ and 96″ x 48″ (grain runs in direction of second dimension). Baked melamine plastic finish resists heat, moisture, smudges, and stains. In addition to large sheets, most wood patterns are available in Planks and Blocks.

that's the beauty of **Marlite®**

PLASTIC-FINISHED WALL AND CEILING PANELING

ANOTHER QUALITY PRODUCT OF MASONITE® RESEARCH

Marlite Deluxe Hi-Gloss Panels

High lustre, mirror-like finish for easy maintenance. Plain and tile patterns available in a wide range of decorator colors. Large panels are 4′ wide and in lengths to 8′. Baked melamine plastic finish seals in the colorful beauty; stays like new for years. To get complete information on all Marlite products for your O.H.I. projects, see your building materials dealer, refer to Sweet's File, or write Marsh Wall Products, Inc., Dept. 403, Dover, Ohio.

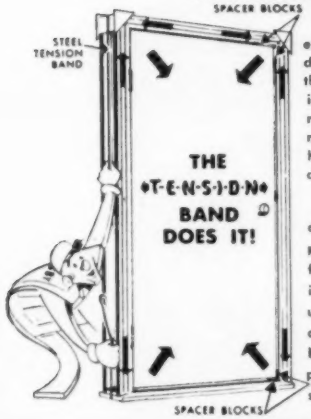

PAT. NO. 2489029

SIMPLY SLIP THE HALVES TOGETHER
IN THE OPENING AND NAIL IT TO THE WALL
IT'S DONE IN 20 MINUTES!

REDUCES FINISH CARPENTRY COST 65%!

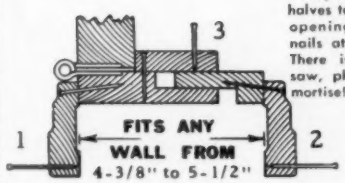

CRATED* FOR DELIVERY IN PERFECT CONDITION

Tension in the steel band exerts equalized pressure (indicated by the arrows) at the corners to draw the frame in tight contact with the rigid door. Frame joints and mitres are therefore rigidly held square and tight by the door itself.

Spacer blocks between the door and frame serve a dual purpose: (1) They block the frame around the door during shipment, and, (2) Are used to maintain proper door clearances while the door is being installed. Faces are protected by cardboard when shipped by common carrier.

* PAT. NO. 2489029

Simply slip the halves together in the opening and drive nails at 1, 2 and 3! There is nothing to saw, plane, bore or mortise!

- Fasteners on mitre joints in the trim keep mitres tight indefinitely.
- Doors conform to the Commercial Standard for the style used. Units are furnished left and right with 1⅜" inside doors in all standard sizes.
- Butts or hinges are 3½ x 3½, full mortise type. READY HUNG DOOR units are completely assembled with all hardware installed except door knobs.
- The READY HUNG DOOR manufacturer in your territory carries in stock standard units with the trim pattern specie and hardware popular in your area.
- Looks identical to conventional doors when installed.

LEFT HAND DOOR RIGHT HAND DOOR

WHEN ORDERING specify the following: (Write as shown in sample order below)

Quan.	Hand*	Size	Door Style	Specie & Grade	Trim Pattern	Finish & Style** of Lock
2	RH	2-0x6-8 RHD	Flush	Birch "A"	#XXX Trim	Brass Pass. Lock

*When the door opens TO YOU and the KNOB is on the RIGHT hand side, it's a right hand door.

**Locks are furnished in Passage, Bath, Closet and Bedroom Styles.

AGAIN . . .
Something New Has Been Added!

Continental

Continental Combination Storm and Screen Doors Now feature:

NEW NARROW-LINE STYLING
Finest Insert-Fastener Available!

The *new narrow-line look,* so important in contemporary design, has now been added to all Continental combination door patterns. Wood parts are narrower; glass inserts give more vision and light; screen panels provide more ventilation in warm weather. And, yet, this added beauty of line and functional efficiency have been achieved with no sacrifice of overall strength.

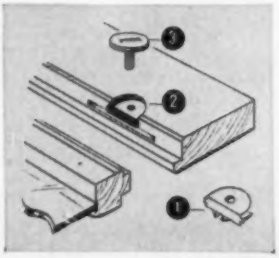

And, Continental's new *Speed Nut Insert-Fastener* has these advantages to offer: simple to operate . . . improved appearance —no metal showing on outside face of door . . . lifetime service . . . completely in open—no hidden parts to engage, no loosening of inserts through vibration . . . foolproof trouble-free operation.

How Fastener Operates

1 Arched prongs — providing spring tension — lock themselves to screw threads.

2 Speed Nut as it appears in door stile.

3 Large head screw clamps insert securely to door frame.

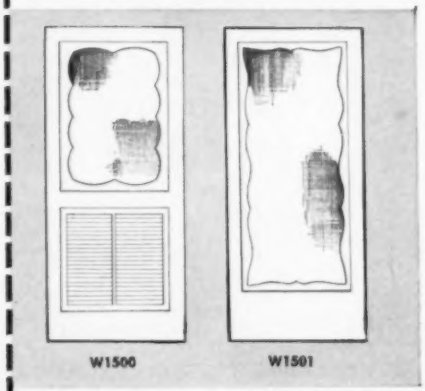

Push the Full Continental Line For GREATER PROFITS!

1 Combination Screen and Storm Doors
2 Screen Doors . . . Decorator Screen Doors and Louver Inserts
3 Full Size Window Screens
4 Storm Sash
5 Combination Screen and Storm Sash Units
6 Extension Window Screens

Made of *Ponderosa Pine*
For Warmth, Beauty and Durability

And . . .
DON'T OVERLOOK THESE NEW DECORATOR SCREEN DOORS . . .

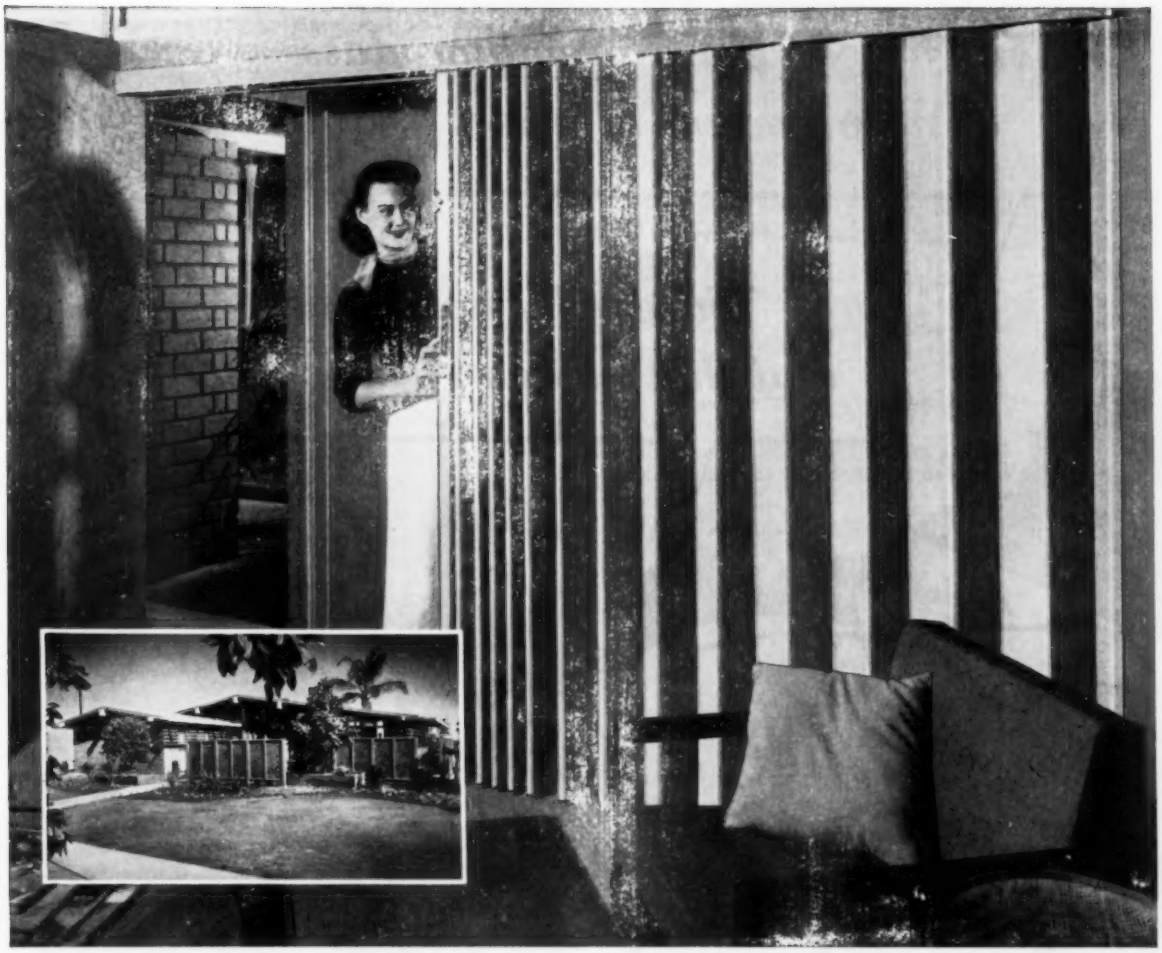

For entrances, porches or breezeways, these new Continental Screen Doors give a home added beauty, privacy and protection. They are sure to be tremendously popular with architects, builders and homeowners.

L

"When you can get a premium glass at no premium in price..."

"Sure, why not use it— and that means AMERICAN!"

AMERICAN PRODUCT LINE

American manufactures sheet glass with the least distortion and the greatest clarity, whiteness and luster.

LUSTRAGLASS—single and double strength for ordinary glazing.

LUSTRACRYSTAL—economical heavy sheet glass for larger openings and special applications.

LUSTRAWHITE—a picture glass of exceptional clarity and flatness.

LUSTRAGRAY—for better television viewing.

BULB EDGE GLASS—for use as counter dividers, wind deflectors and shelves.

THIN GLASS—for microscope slides and covers. Extremely flat and true to tolerance.

SUPRATEST—a laminated safety glass.

PANAL—a fiberglass-reinforced plastic structural panel.

WATCH OUR PRODUCT FAMILY GROW

The man-with-the-pipe is right! The more glassed-in areas there are on your projects, the more important it becomes to use the whitest, clearest, most lustrous glass you can find. And that *does* mean American LUSTRAGLASS or LUSTRACRYSTAL—for top quality at no extra cost.

• Prove it for yourself on your next job. Ask your American distributor how LUSTRAGLASS can give your client the benefit of more light transmission, and afford the least amount of distortion over large areas . . . how LUSTRACRYSTAL can save you as much as 35% in many applications. *Look in your Phone Directory for the name of the American distributor in your territory.*

residential steel windows

Fenestra

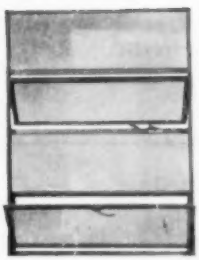

CASEMENT WINDOWS

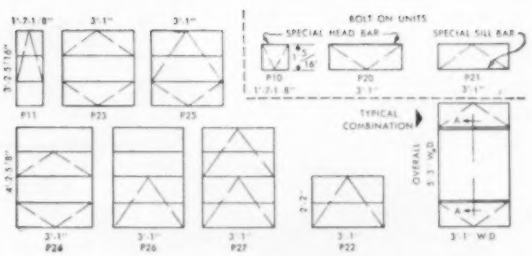

These slim, modern windows harmonize with almost all types of architecture. They give your customers extra advantages of better ventilation, easy opening, larger glass areas and safe, easy cleaning. Inside screens and storm sash. Bonderized and prime-paint finish or Fenestra® Galvanized-Bonderized finish. Wide selection of standard sizes for fast delivery. Available with muntin bars omitted for full glass area. Combination inside-outside trim reduces installation costs.

PROJECTED (AWNING) WINDOWS

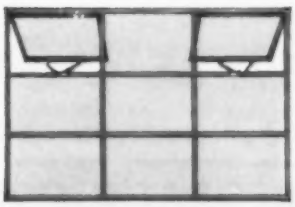

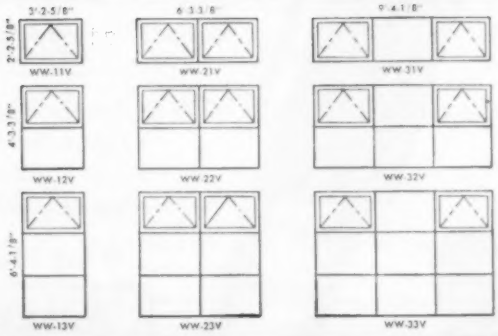

Here is the beauty of slender, horizontal lines plus the convenience of awning-type, rain-shedding ventilators. Easy to operate. Easy to clean from inside. Metal screens. Furnished complete with inside-outside metal trim for low-cost installation. Same finishes as Fenestra Casement Windows.

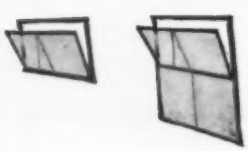

WINDOWALL WINDOWS

A complete line of modern picture windows with maximum view and daylighting plus draft-free ventilation. Can be glazed with stock sizes of ½″ insulating glass, or with double-strength window glass or plate. Inside metal screens. Same finishes as Fenestra Casement and Projected Windows.

BASEMENT AND UTILITY WINDOWS

Fenestra Basement and Utility Windows are available as complete package units—Window, Screen and Storm Panel (basement); Window and Screen (utility). Can be used with all types of construction. Forms available for poured concrete construction. Double-contact weathering assures leakproof performance for life. Ask for list of sizes and finishes.

Fenestra

residential hollow metal doors

1⅜" FLUSH-TYPE SWING DOOR

A maintenance-free door for homes, apartments and other light-construction buildings. A complete package unit—door, frame and hardware—for quick, easy installation. No drilling, tapping or mortising on the job. A man with a screw driver can install in *a few minutes*. Standard types and sizes assure fast delivery, low cost. Prime-paint or Birch finish.

NEW! FOLDING CLOSET DOOR

The Hit of the Home Builder's Show in Chicago! A New Idea in Closet Doors that gives full opening with a gentle pull. Made of 24-gauge steel with sound-deadening insulation. Complete unit with all hardware shipped in one carton. Can be assembled and installed with a screw driver. Available in 3′0″, 4′0″, and 5′0″ widths (or any combination) and 6′8″ or 8′0″ heights. Prime-paint or Birch finish. Also available with pierced louvers.

More and more builders demand the "Quality Plus" of genuine

Bayley PROJECTED WINDOWS

stocked in commodity sizes for quick shipment

—STEEL OR ALUMINUM

Awning-type ventilator for weather protection

Indirect ventilation with projected ventilators

Permit use of draperies, curtains and awnings

Glazing outside—flat surfaces inside

Screens removable from inside

Easily washed from inside—economy and safety

Extra deep sections—accommodate "Thermopane" or "Twindow" glazing

FOR 77 YEARS—
BAYLEY has meant *extra value* to BUILDERS

That's why you'll find Bayley Windows in so many of today's biggest, best and most beautiful industrial, commercial, institutional and dwelling buildings. And in many of the most *important* buildings, too.

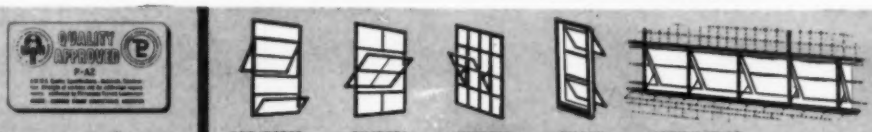

YOU CAN SEE THE EXTRA QUALITY of Bayley Windows in their sturdier, heavier cross-sectional construction.

YOU CAN SEE THE BETTER COMBINATION of unimpeded light, full vision, indirect and awning-type ventilation, and ruggedness of Bayley Projected Windows.

YOU CAN APPRECIATE THE OPERATING SIMPLICITY of Bayley Projected Windows the minute you try them. There's no complicated mechanism. Easy one-hand operation is quickly self-evident.

YOU CAN CHECK THE ADVANTAGES of using Bayley Windows by talking with architects and builders who learned through years of experience, that Bayley's 77 years of reliability puts real meaning behind the words, "Where the extra services *also* count, it's always BAYLEY Windows."

Projected Windows are only one of the standard Bayley Window types available from stock, in commodity sizes, and in both steel and aluminum. Check your nearby sources for Bayley Windows, or write us today.

77 *Years of* RELIABILITY

No decorating troubles

A 138-equipped house is a house with a built-in sale. Women prospects have decorating ideas in mind the minute they enter your room. Truscon Double-Hung Steel Windows have a light gray prime coat that's ideal as a base for painting to match room decorations or drapes. No shiny clash or glare. This window can match the home, indoors and out.

No operating troubles

All-steel construction means no warp, no swell, no shrink. Finger-tip operation. No sticking, no rattling. Stainless steel weather stripping and motor-type spring balances with stainless steel tapes are built-in. Hardware is factory-attached. Nothing to go wrong. Given normal maintenance, this window will last for the life of the house.

TRUSCON "138"

is the trouble-free window

Freedom from installation, operating and maintenance troubles has made Truscon's Series 138 the largest selling steel double-hung window on the market.

From every angle, this window is trouble-free!

You get it completely assembled as one unit. Simple anchors for any type of wall construction allow easy erection. All bronze hardware is attached at the factory. Your only field work is glazing and decorating to match your own color styling.

Being steel, the 138 can't possibly warp, swell or shrink. Finger-tip operation stays that way. No call-backs. No adjustments.

It's a weathertight window. Stainless steel weather stripping is built-in. It is ideal for use in air-conditioned homes, or with room air conditioners. It is prepared at the factory to receive standard Truscon full or half screens, storm sash or Koolshade® Screens.

A wide range of types and sizes is quickly available through Truscon dealers backed by all the facilities of Truscon's nation-wide warehouse service.

For low first cost, low maintenance cost, weathertightness and simplicity of operation, standardize on Truscon® Series 139 Double-Hung Steel Window—the trouble-free window. Send coupon for complete catalog.

take a good look at INCENSE CEDAR

one of 10 woods from the WESTERN PINE region

Great resistance to decay, fine dimensional stability, high insulation quality make Incense Cedar a superior wood for all weather-exposed jobs. Lightweight, workable, paintable, it is an economical wood. Its reddish-brown color, silky surface, delicate grain and spicy fragrance suit it for fine woodwork and closet linings.

Incense Cedar comes in **3 select and 5 common grades.** You can order it in mixed cars—together with the other woods of the Western Pine region—from most Western Pine Association member mills.

Make your slab homes more salable!

USE STRIP OAK FLOORS...
LAID THIS EASY, LOW-COST WAY

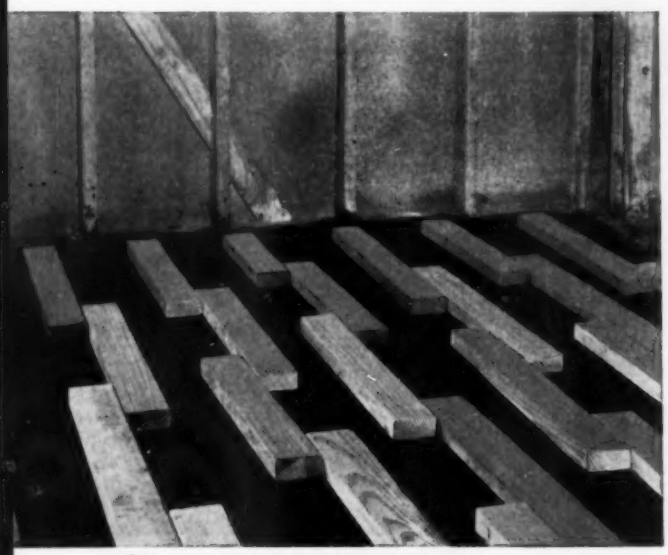

Why take chances on flooring materials prospective home buyers may not like? Now you can have the sure sales appeal of Oak Floors in your slab-on-ground houses... and save time and construction costs.

The proven-effective "screeds-in-mastic" method of providing a sound nailing surface for Strip Oak Floors over concrete is used by builders throughout the country. It's as simple as the 1-2-3 steps shown here, and is fully approved by lending agencies.

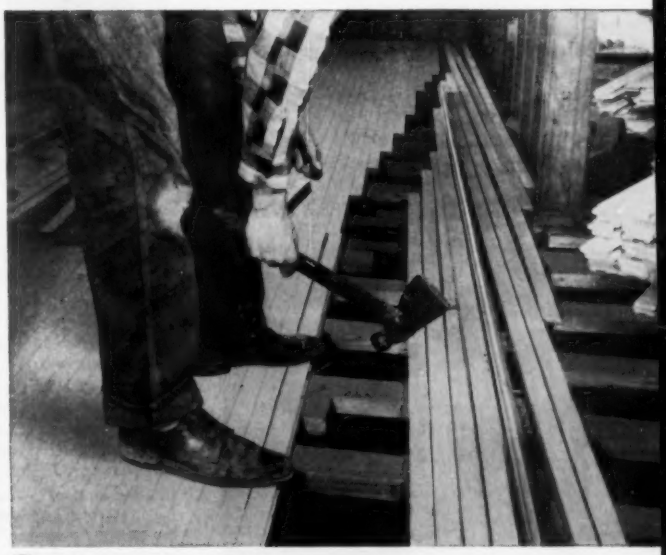

Oak Floors give slab homes more warmth and comfort, plus exceptional beauty and durability. The "screeds-in-mastic" installation method makes them economically practical for even lowest-cost homes. Start using this system now. Mail the coupon below for your free copy of simple step-by-step instructions.

❶ **Spread mastic over waterproofed slab.**

❷ **Lay 2x4 screeds in staggered pattern.**

❸ **Nail Oak Flooring strips to screeds.**

A handy reference guide to Weldwood Products— the most complete line in the building industry

ADHESIVES

Contact Cement—nonstaining, instant bonding; for laminates, installing plywood without nailing—no clamps or presses needed.

Glue, Waterproof—easy to mix and apply; 100% true waterproof bond.

Glue, Water-Resistant—plastic resin glue; unaffected by moisture, mold or fungus.

Presto-Set Glue*—ready-to-use; in tubes or jars; for plastic, paper, cloth or wood.

ARMORPLY®—plywood faced with any metal; strong, light and rigid; has metal's toughness, wood's easy workability; made to specification. Booklet-1032.

CHALKBOARD — porcelain-surfaced steel*** bonded to plywood—metal backing; surface defies abrasion, chipping or cracking; pleasing green color easy on eyes. Booklet-1403.

Aluminum Chalkboard Trim—for all Weldwood Chalkboard installations.

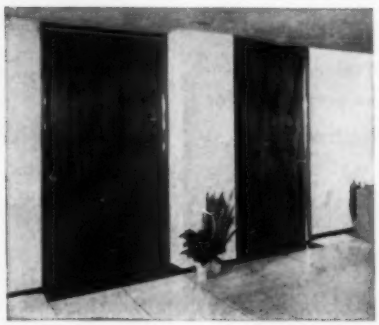

CONCRETE FORMS—see "Fir Plywoods—Plyform."

CORE STOCK—see "Paneling—Novoply."

COUNTERFRONTS—¾", 5-ply; hardwood or fir veneer; lumber or Novoply cores; expansion or contraction almost never occurs; in a variety of handsome surfaces.

COUNTERTOPS—see "Micarta."

DOORS, FIR AND PINE—low cost, top performance; wide variety of interior and exterior stock designs; fast delivery on all.

DOORS, FIRE†—combine positive protection and rich wood beauty; have exclusive Weldrok® incombustible mineral core; UL labeled for Class "B" and "C" openings. Guarantee covers replacement cost including hanging and refinishing. Booklet-1489.

DOORS, FLUSH

Hollow Core Door—1⅜" or 1¾" thick; all sizes; proven stability in exhaustive tests; may be painted or finished natural; interior use only.

Solid Core Door—exterior or interior; hardwood or pine core; thicknesses from 1⅜" to 2¼"; all sizes; crossbanded and laminated with waterproof glue; best of its type.

Stay-Strate Door® — incombustible Weldrok core; lifetime guarantee against manufacturing defects, warping or twisting; covers replacement cost including hanging and refinishing; fine hardwood surfaces; full variety of sizes; 1¾" thick. Booklet-1489.

DOOR STOCK, CUPBOARD—wide variety of sizes, thicknesses, including door or core of nonwarping Novoply; good one or two sides; birch-faced; requires no finishing; won't warp, sag or bind. Booklet-1323.

DOORS, METAL-FACED—Weldwood Fire or Stay-Strate Doors with Armorply facing; on special order; send your requirements for all details.

DOORS, MICARTA-FACED — Lumber, hollow and mineral core flush doors with Westinghouse Micarta faces available on special order.

FINISHING MATERIALS

Firzite®—for fir plywoods or soft woods; seals pores, minimizes wild grain, reduces checking and grain rise; in white or clear; may be tinted; White Firzite easy way to popular blond finish.

Satinlac®—brings out natural beauty of any wood; quick to apply and dry; satin finish.

FIR PLYWOOD

Duraply®—exterior grade fir plywood faced with special overlay sheet: for siding, soffits, gable ends, cabinets, boats, paneling; indoor or outdoor; takes paint well; resists wear, acids, alkali, moisture. Booklet-1413.

Weldtex®—striated; butt seams don't show; won't check; made in both interior and exterior grades; easy to finish.

Exterior Douglas Fir—superior plywood for any purpose, including:

Plyform®—exterior—for concrete forms; produces smooth surface; multiple re-use.

Plyshield®—"A" face, "C" back; all sizes.

Sheathing—"C" face and back, all sizes.

Underlayment—lies flat; resists warping and twisting; all sizes.

Texture One-Eleven®—deep-grooved every 2" to 4"; splitproof and punctureproof; shiplapped edges; ⅜" thick; 16", 32", 48" width; 96", 120" length. Booklet 54-10.

Interior Douglas Fir—all grades and sizes including:

L-1R—Plyform made with new L-1R adhesive; gives many of the advantages of exterior-type plywood yet sells at interior grade price.

Lebanex®—5-ply, hardboard faced; tough and smooth to resist wear and denting; for concrete forms, table tops, sliding doors, etc.

Plybase®—base for linoleum, carpeting; backing for wall panels.

Plyform (interior)—"B" face and back, all sizes.

Plypanel®—3 grades; for wall and ceiling paneling, built-ins, counters, backing; sanded both sides.

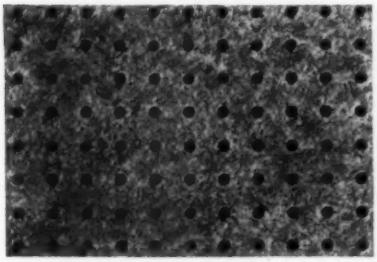

Plyscord®—C.-D. grade; unsanded; low cost; for sheathing and underlayment; all standard thicknesses.

Marine Grade Plywood—see "Marine."

FIRZITE—see "Finishing Materials."

FLEXIBLE MATERIALS—see "Flexwood," "Kalistron."

FLEXWOOD®—genuine wood 1/85" thick glued to cotton backing; 12" to 24" widths, 8' to 12' lengths; for any smooth, dry surface; 40 wood surfaces, wide choice of grain, figure; applied by hand. Booklet-28.

HARDBOARD—Weldwood offers a complete line of standard, tempered, textured and perforated hardboards. Special fast delivery service on any of the 276 types, varieties, sizes.

KALISTRON®—clear, wear-resistant sheeting; color permanently fused to underside (pattern and color never show wear); 33 standard colors; ideal wall covering or upholstery fabric; less expensive utility grade, too. Booklet-147.

LUMBER—Weldwood is currently producing all common western species of lumber in our own sawmills.

MARINE—Duraply, Douglas Fir, Philippine Mahogany and Samara with 100% waterproof adhesive; will never rot or delaminate. Booklet-1446 for more details.

METAL-FACED PLYWOODS—see "Armorply."

MICARTA®—made by Westinghouse, distributed by Weldwood; highly durable and beautiful plastic laminate; resists chipping, denting, burning, grease or fruit staining; easy to clean; needs no refinishing; for table tops, countertops, etc. Booklet-1415.

MOLDINGS

Metal—aluminum, faced with hardwood veneers; matches popular Weldwood veneers; 8' strips for corners, caps, dividers; easily installed.

Wood—all-plywood Cove Moldings for cabinets, trim, etc. Booklet-1397.

NOVOPLY®—see "Paneling."

PANELING

Algoma Grade Hardwoods—carefully selected, matched veneers; uniform color and appearance; many beautiful hardwoods. Booklet-1457.

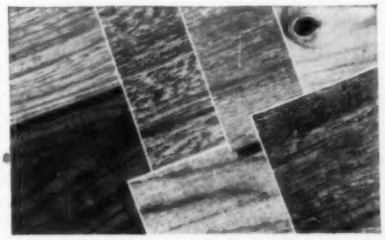

Architectural Grade Hardwoods—finest obtainable; superlative veneers, perfectly matched; in all fine woods, plus exotic imports. Booklet-1034.

Korina®—from the Belgian Congo; blond; complements modern or traditional furnishings.

Limba—from Africa; blond, mahogany-style; fine grained figure.

Nakora®—blond; low-cost Japanese hardwood; highly figured grain pattern.

Samara*—low-cost African hardwood; interesting grain pattern; light reddish color.

Pre-Finished—completely and expertly factory-finished; just install. Panels include:

Plankweld**—7 woods; put on old walls or new studs—no furring; edge-grooved for neat joints; special clips eliminate nail holes.

V-Plank*—random "v-grooved" for interesting effect; 6 beautiful woods.

Colonial V-Plank—like V-Plank but specially "pegged" for plank appearance.

Specialty Paneling

Novoply—unique wood-plastic product; wood chips and flakes give mosaiclike effect; amazingly flat, easily fabricated; ideal for cores, sliding doors, wall paneling, partitions; pine only.

Planktex*—6" bands of striations alternating with the smooth Philippine Mahogany grain pattern; comes finished or unfinished; 48" x 96" panels.

Sea Swirl®—low-cost panel with weathered, textured look; grain stands out from etched-out background; free of knots.

Surfwood®—similar to Sea Swirl but with occasional knots; very low cost.

**Reg. & Pat. †U. S. Pat. No. 2,593,050
*Trademark ***Porcelain faces by the Bettinger Corp.

Surfplank®—shiplapped, solid lumber paneling with Surfwood appearance.

V-Plank—same as V-Plank above, but unfinished.

Weldtex—the original striated paneling; interior or exterior grades; easy to install and finish; 3 woods; blends with modern or traditional.

Weldtex Squares—Weldtex in 3 sizes of squares, from 11 7/8" to 24"; 5/16" thick.

PARTITIONS, MOVABLE—real wood beauty; panels have incombustible Weldrok core; units interchangeable; accessible concealed wiring. Booklet-1405.

PEW SEATS—5 fine hardwoods; for churches, terminals, etc.

PLANKTEX—see "Paneling."

PLASTIC MATERIALS—see "Kalistron," "Micarta."

PORC-LIN-PLY®—weatherproof porcelain panel for building fronts, or interior paneling; hardwood core—durable porcelain face—steel back. Booklet-1469.

PRE-FINISHED PANELS—see "Paneling."

SAMARA—see "Paneling."

SATINLAC—see "Finishing Materials."

SHEATHING—see "Fir Plywood."

SIDING—see "Fir Plywood"—Exterior Weldtex, Duraply, Texture 1-11, Hardboard.

STORE-FRONT MATERIALS—see "Armorply," "Porc-lin-ply."

VINYL PLASTIC—see "Kalistron."

WELDTEX—see "Paneling."

RUSCO

WHITE BEAUTY
WINDOWS and DOORS

Rusco windows and doors are also available in Silvertone Grey, or natural or painted aluminum.

"Here are eight reasons why I prefer **STEEL WINDOWS,"**

SAYS SIDNEY FAXON, PRESIDENT, FAXON CONSTRUCTION COMPANY CINCINNATI, OHIO

1. Steel windows are easier and more economical for me to install. They will take more punishment on a building site than other types of windows.

2. Because of their trim line sections, steel windows afford maximum light area.

3. Outswinging vents provide full ventilation and deflect parallel air currents into the room.

4. Steel windows are easy and safe to clean—from inside the house.

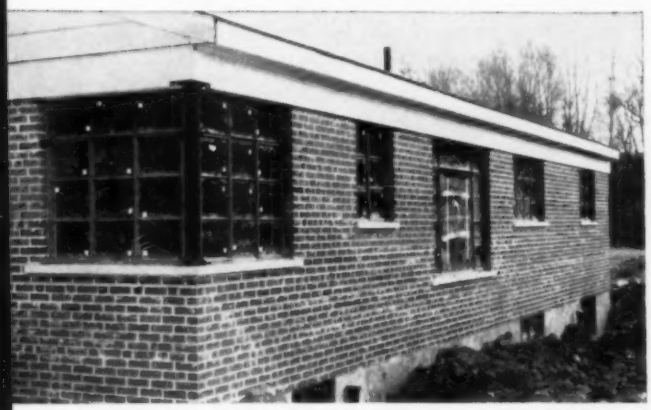

5. Screens and storm windows are readily put in place—from inside the house.

6. Steel windows open and close easily.

7. Each steel window has a secure locking device.

8. Steel windows have fewer moving parts to wear out, reducing maintenance and replacement.

"A number of years ago," explains Mr. Faxon, "I put steel windows to a popularity test. I gave prospective home owners a choice between steel windows and windows made from other materials. The steel windows were quickly selected. This, plus the facts that steel windows are economical in initial price, are easier to handle, store and install, convinced me that I should use steel windows exclusively."

This modern brick home, now under construction in the lovely Faxon Hills subdivision in Cincinnati, features steel casement windows. Each home in this subdivision averages fifteen windows which vary in size from 2 feet-9 inches by 1 foot-6 inches, to 8 feet-5 inches by 5 feet-3 inches. In the larger windows a maximum of 30 panes of glass has been used, putting a deadweight load of 50 pounds on the steel window frame. Most of the glass is standard single lite; however, some of the windows are double-glazed picture windows.

A Faxon workman, James Pitcher, is shown here installing one of the big window frames. Actual installation has proved to be no problem on this job. It has been found that bricklayers can install the windows easily and efficiently. They make sure the window is in place, plumb and level. Then it's simply a matter of laying the brick around the window. Because steel window frames have greater dimensional stability and won't warp out of shape, the glass worker also has an easier time glazing the sash.

For more than forty years, United States Steel has been supplying window manufacturers with special rolled sections of high-grade, open-hearth steel.

Look for this label—it is your assurance that the windows are made from quality steel.

USS STEEL FOR WINDOWS

UNITED STATES STEEL

Thermopane®
INSULATING GLASS

the most-wanted double glazing

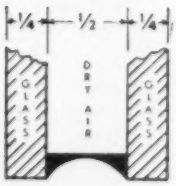

AVAILABLE FROM L·O·F GLASS DISTRIBUTORS & DEALERS in these types for home use

1/2-inch DSA Thermopane—Two lights of ⅛″ DSA Glass with ¼″ air space—54 standard sizes. *Thermopane* made with DSA Glass is economical double glazing. While made with the finest quality window glass, it does not provide the clarity of vision and good exterior appearance attained with Polished Plate Glass.

1/2-inch Plate Glass Thermopane—Two lights of ⅛″ Plate Glass with ¼″ air space—49 standard sizes. *Thermopane* made with ⅛″ Polished Plate Glass provides better vision and gives the home a finer quality appearance.

1-inch Plate Glass Thermopane—Two lights of ¼″ Plate Glass with ½″ air space—57 standard sizes. This *Thermopane* provides excellent thermal insulation, combined with the clarity of vision that you get with Plate Glass. Ideal for picture windows and window walls.

THERMOPANE made with special glasses

Thermopane can be made with four types of glass for reduction of glare and solar energy transmission: 1/4″ or 1/8″ Heat Absorbing Plate Glass—blue-green, transparent. Also 1/4″ or 1/8″ *Aklo** Hammered Glass—blue-green, translucent.

For diffusion of light and for decoration, it can be fabricated with any one of several Blue Ridge Glass patterns.

For extra resistance to thermal shock or impact, it can be fabricated with *Tuf-flex** tempered plate glass.

What Makes *Thermopane* Such a Powerful Sales Feature?

It gives home buyers benefits that are really important to them. They want big windows—and *Thermopane* makes them practical in any climate. People want comfort. They want heating and air-conditioning economy. And they want all these benefits without the bother of storm sash.

Many builders have found the appeal of *Thermopane* so great that they are using it in every window of moderately priced homes. They use simple methods of fenestration and glazing to achieve on-the-site economies. Your L·O·F Glass Distributor or Dealer can tell you about these methods. Many builders have found that *Thermopane's* insulation helps reduce the size of heating and air-conditioning equipment required. *®

Thermopane

Standard Sizes for All Types of Windows

Standard sizes save time—cost less. There are more than 90 standard sizes of *Thermopane* insulating glass. Demand has made these sizes mass-production items. Naturally, they cost less than special sizes. And L·O·F Distributors and Dealers are able to give you better delivery service on standard sizes.

Many types of stock windows, shown at the right, take *Thermopane*. Your L·O·F Glass Distributor or Dealer can give you an up-to-date list of standard sizes. Or write to us.

HELPFUL INFORMATION AVAILABLE

To assist you and your sales staff in using *Thermopane*, we offer a number of sales and merchandising items. See your L·O·F Glass Distributor or Dealer for this material—or write to us.

- List of standard sizes
- Simple framing methods (complete details)
- *Thermopane* booklet—to assist you in using *Thermopane* as a sales feature.

The new Ceco-Sterling Aluminum Fin-Trim Casement . . . fin and outside trim are made a part of the window frame for quicker installation and extra strength, too.

A SIMPLE LESSON IN Magic

Make Dollars Out of Windows

BUILD WITH CECO-STERLING ALUMINUM *FIN-TRIM* CASEMENTS

Product improvement is something that has the constant attention of Ceco research and engineering. Out of it comes many developments that make for better building. Builders everywhere will want this new Ceco Window because it offers these big advantages:

Installation costs are less than for any other window:

1. There are no fins or outside trim to attach, for at last they are built into the casement, all in one piece.

2. Rough openings are easy to figure—no complicated mathematics.

Saves in any kind of construction:

1. In frame construction, siding material can be easily applied up to the trim, without other finishing. Fin portions are punched for quick anchoring with screws or nails.

2. In veneer or masonry construction, trim can be used as a convenient masonry guide.

3. In solid masonry, fin gives ideal anchorage in standard openings.

4. In stucco construction, trim is proper depth for framing.

So in the homes you build, use the new Ceco-Sterling Aluminum Fin-Trim Casement. You will be sure of simplified installation and savings in labor costs. Wherever you are, plan now to profit by reducing window installation costs. Write for details.

CECO STEEL

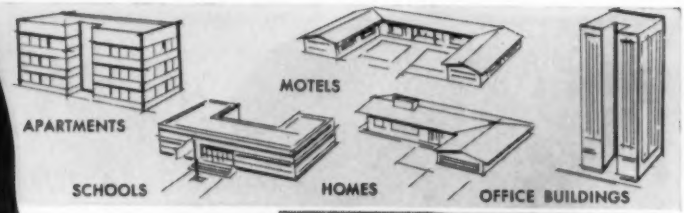

CECO STEEL PRODUCTS CORPORATION

General Offices: 5601 West 26th Street, Chicago 50, Illinois

IN CONSTRUCTION PRODUCTS CECO ENGINEERING MAKES THE BIG DIFFERENCE

AMWELD®

THE LINE DESIGNED WITH THE BUILDER IN MIND

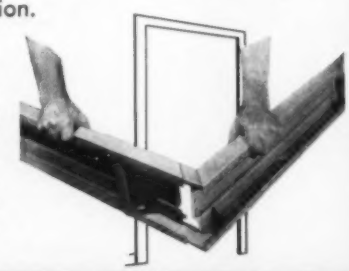

AMWELD STEEL DOORS AND FRAMES

A smartly styled interior door and frame combination for use in homes and apartments—commercial buildings, offices, clinics, and stores, in fact, anywhere that low cost, appearance and durability are important. These modern, flush steel doors and frames go well with either contemporary or traditional design. Doors and frames delivered prime coated and require only finish painting after erection.

EASY TO INSTALL!

The Amweld Inter-Lok Frame and Steel Door combination are quick and easy to install, require no field drilling, mortising, or fitting. Builders report up to 60% saving on installation. Elimination of warping, sagging or shrinking minimizes builder call-backs.

AMWELD FIRE DOOR

A handsome, rugged, flush steel door and frame combination for interior use to provide extra fire protection. Furnished with Underwriters' Laboratories "B" label, in standard 1⅜" and 1¾" sizes.

AMWELD AIR CONDITIONING DOOR

This steel door with large grille area is designed to provide flow of air between rooms for central air conditioning. Available in 1⅜" size from 2'0" to 3'0".

AMWELD STEEL FOLDING DOOR UNIT

Now a door that offers the advantages of folding and the sturdiness of steel—the Amweld Folding Door Unit. This door provides full access to any closet, cupboard or wardrobe, without sacrificing valuable floor space. The door consists of four panels. These panels are hinged in pairs and the doors fold to each side. The 4' unit projects only 7" into the room when opened, the 3' unit about 5" and the 5' unit only 9". The unit is sound deadened and operates smoothly on nylon pivots to provide the easiest operation ever.

EASY TO INSTALL

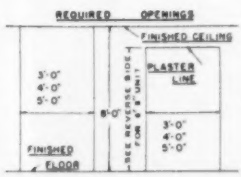

The Amweld Steel Folding Door Unit can be installed by any workman in a matter of minutes.

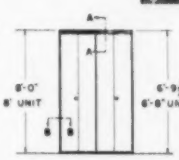

FITS ANY DECOR

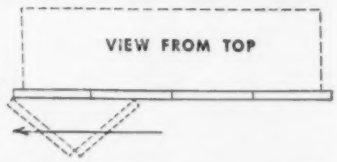

The Amweld Folding Door Unit is basically modern and efficient in appearance. The panels are finished with baked-on enamel, ready for the color of your choice or can be supplied with birch grain finish in all sizes. Opening can be trimmed in any of several optional methods to match other trim or woodwork in the room. The Amweld Folding Door is available in 6'8" standard height or in the floor-to-ceiling king-size 8'0" height.

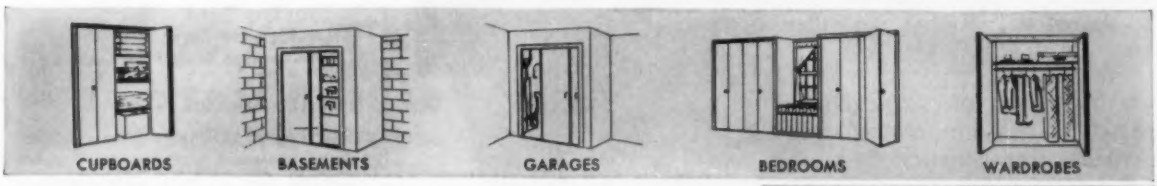

SIZES AVAILABLE

STANDARD 6'8" PRIME AND BIRCH	KING-SIZE 8'0" PRIME AND BIRCH
3'0"	3'0"
4'0"	4'0"
5'0"	5'0"

AMWELD "KD" STEEL SLIDING CLOSET DOOR UNIT

Add glamour and practicability to any home—put a double set of Amweld Sliding Closet Door Units in the master bedroom—single closet units in each of the other bedrooms. Ideal, too, for hall closets, pantries, storage space in attic, basement or garage. Attractive and designed to complement contemporary or tradional interiors, Amweld Sliding Closet Units make entire closet interior usable—eliminate waste door swing space—save 6 to 9 square feet per closet.

EASY TO INSTALL

The Amweld Sliding Closet Door Unit is complete in one carton and can be installed in a matter of minutes. All hardware snaps in place. Rollers and guides made of long-life nylon for smooth, easy operation.

FITS ANY DECOR

Panels finished in baked-on, prime coat, ready for the color of your choice. In the 6'8" size can be furnished in natural birch grain finish, ready for installation. Opening can be trimmed in several optional methods to match existing woodwork and frames. Unit is ideal for modernizing, as well as for original construction.

SIZES AVAILABLE

PRIME FINISH OR BIRCH		"KING-SIZE" FLOOR-TO-CEILING UNIT GREY PRIME FINISH ONLY	
WIDTH	HEIGHT	WIDTH	HEIGHT
3'0"	6'8"		
4'0"	6'8"	4'0"	8'0"
5'0"	6'8"	5'0"	8'0"
6'0"	6'8"	6'0"	8'0"

All units have two by-passing panels.

THE GENERAL * SAYS:

YOU'LL APPRECIATE

THE *Big Difference* IN

ALWINTITE ALUMINUM WINDOWS

Don't let anyone tell you "all aluminum windows are alike." With ALWINTITE there is not only a difference in product design and quality, but also a difference in the company behind the product as well as in the distributor organization handling the product.

Once you use ALWINTITE aluminum windows and doors—made by General Bronze Corporation—you'll quickly appreciate what this "BIG DIFFERENCE" can mean to you.

General Bronze leads the way in advanced product design with the latest, up-to-the-minute improvements. Their fine quality ALWINTITE products have been engineered for continuous trouble-free operation and the elimination of costly complaints.

You'll also find there's a big difference in the General Bronze-ALWINTITE distributor set-up. ALWINTITE distributors, located in every area, have been selected for their ability to give you unexcelled service. They enjoy a reputation for reliability and integrity, and they also (1) carry complete warehouse stocks; (2) give fast, dependable delivery service; (3) have factory-trained personnel ready to help you with your window problems at any time.

On the pages that follow you will find a brief description of the ALWINTITE line of products. For complete catalog showing details, sizes, etc. and for name of nearest distributor, write to ALWINTITE DIVISION, GENERAL BRONZE CORPORATION, Garden City, N. Y., *Attn. Dept.* 56-INS.

Meet

ALWINTITE DIVISION—GARDEN CITY, NEW YORK

ALWINTITE WINDOWS AND DOORS

Alwintite DOUBLE-HUNG windows

Every home buyer goes for the money-saving features of ALWINTITE double-hung windows—quality standard of the industry. No painting or other maintenance expense, sturdy construction, built-in weatherstripping, easy finger tip operation. A real selling asset for any house. 35 standard stock sizes with Fin Trim for easy, time-saving installation. Home buyers will appreciate it if you include ALWINTITE screens and storm sash under the single package mortgage.

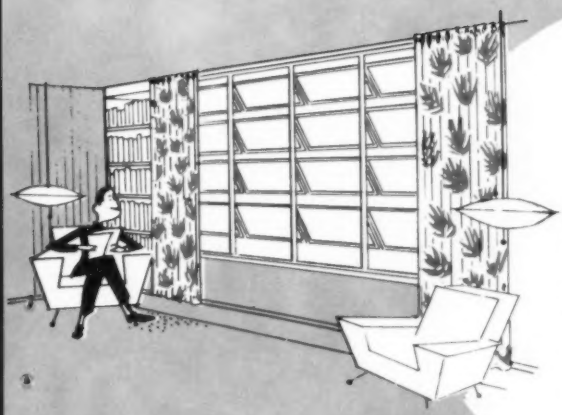

Alwintite SLIDING windows

You can add a "touch of tomorrow" with these new ALWINTITE sliding windows, first introduced by General Bronze and today America's most popular window. A real quality product with many new design and construction improvements. Women love them because they give more light, better ventilation, and more usable wall space. Can be used in many interesting multiple arrangements. 18 stock sizes easily installed in all types of construction. Include ALWINTITE screens and storm sash as an extra sales feature.

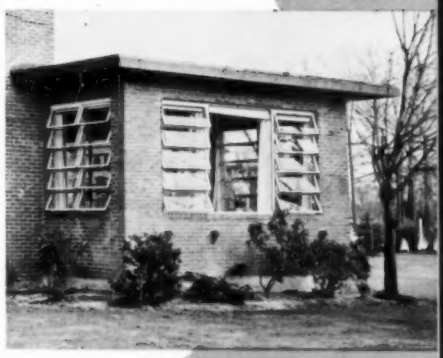

will add **EXTRA SALES APPEAL** *to any house!*

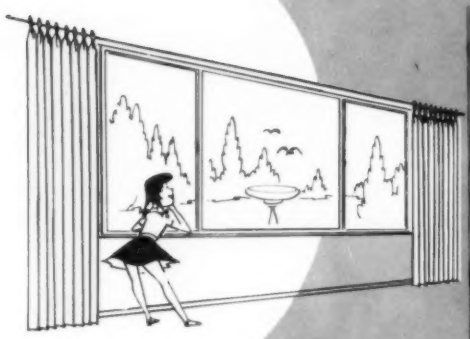

Alwintite
AWNING
windows

These glamorous, modern new awning windows are ideal for a few rooms or a whole house. Strong and sturdy enough for use in schools and hospitals, yet priced low enough for low-cost residences. Features include "Balanced Power" center-sill operator for smooth, easy operation, low-cost maintenance and weathertight seal. In 15 standard and 24 modular sizes with inside screens and storm sash.

Alwintite
PICTURE-SLIDING
windows

Add interest and charm to your new houses with large picture windows in most every room. Today's home buyers love these large glass areas. Picture-slide windows have a large fixed unit in center and sliding sash units on each side, all in a single frame. Fin Trim simplifies installation. 12 standard sizes.

Alwintite
VIEWall
windows

Right in keeping with today's trend to larger window areas, this large floor-to-ceiling picture window unit brings outdoor beauty indoors—adds interest and beauty to any house. Fixed lights and sliding window vents available in various arrangements. Simple, easy installation. Available in 1, 2, or 3 unit (3′, 6′ or 9′) widths.

Add Glamour and Excitement with

ALWINTITE PICTURE SLIDING DOORS

Regency SERIES

ALWINTITE Regency aluminum-glass sliding doors will add tremendous sales appeal to any house. Everybody goes for this top quality door. Constructed from strong extruded aluminum, they are completely weatherstripped and glide easily on ball bearing rollers with screen unit in separate channel. Ideal for rooms opening onto porch, patio or terrace. In widths from 6′ to 24′ and in height of 7′ and 8′.

Coronet SERIES

ALWINTITE Coronet sliding doors are designed to give you unusually fine quality at an economical low price. Made from strong extruded aluminum, these doors are completely weatherstripped and operate smoothly on ball bearing rollers. Available in 1, 2, 3 or 4 track arrangements with screen units operating on separate tracks. Doors may slide into pocket within walls. In width from 6′ to 20′ and in standard 6′ 10″ height.

To save your home buyers added financing problems and to give added appeal to your houses, be sure that you include screens and storm sash in your selling price, under a single package mortgage. Buyers appreciate it. Mortgage bankers and FHA offices endorse it.

For complete details on any ALWINTITE product see your local ALWINTITE distributor, or write direct for our latest catalogs. Address Dept. 56-INS.

Webster defines:

tĕn'sion

as
strain, intensity
of striving

Durall takes the tension out of the job and puts it in the screens.

Durall Tension Screens are so easy to order and install. You get a perfect fit every time—top to bottom—side to side, and the Multi-Strand edge (*in all sizes*) makes certain a trap-tight fit. But that's only the beginning of the big advantages of Durall Screens. Here are some more . . .

NEW CLAMP BRACKET

It makes Duralls so easy to install, that a novice looks like a professional. Tap it in the sill, drive one screw, "*snap-in*" the screen. It adjusts automatically for perfect tension.

COST LESS TO INSTALL

It takes only 5 screws to install each Durall. A man can easily install one in five minutes from inside the building. And there are sizes for all stock frames so they fit perfectly, with no expensive and time-consuming fitting on the job.

LESS EXPENSIVE TO BUY

They have no all-around frames, just top and bottom rails that hold the screen in the window under tension. They're all aluminum and top quality throughout.

LOOK SO GOOD

Fit in the window so taut and trim . . . they "look like a million." Made of "Alclad" aluminum, Duralls never rust, stain nor streak the house. Buyers appreciate that.

NO CALL BACKS

Duralls put up nine years ago are still going strong . . . tight and secure against insects. And they're made so perfectly there are no "call backs."

They're perfect for porches and breezeways too—widths up to six feet—any height. Ask your dealer about them, or write to...

ANNOUNCING

a giant stride

IN REINFORCED PLASTIC PANELS

ONLY

structoglas® "A"

molded from a special new resin

GIVES YOU THESE ADVANTAGES . . .

- MORE THAN DOUBLE SERVICE LIFE
- TWICE THE COLOR STABILITY
- GREATER STRENGTH
- BETTER INFRA-RED FILTRATION

. . . AND YET IT COSTS NOT A CENT MORE!

Structoglas now is molded exclusively from a new PARAPLEX® modified acrylic resin just developed in conjunction with ROHM & HAAS COMPANY.

Tests prove Structoglas "A" reinforced panels have more than double the weather resistance . . . 46.4% less color change . . . and support 100% more weight per square foot than panels made to accepted industry standards from light-stabilized polyester resins. Another exclusive new additive filters up to 50% more infra-red rays . . . reduces heat as well as glare of direct sunlight.

WRITE TODAY FOR BULLETIN SL-53 FOR DETAILS.

for the cost-conscious builder

and his brand-conscious customer . . .

Columbia-matic TENSION SCREENS

CUT INSTALLATION COSTS across the board!

The Columbia-matic aluminum Tension Screen not only costs less than old fashioned types . . . it's not only heavier constructed for longer service than competitive makes . . . it also cuts builder installation costs across the board. Here's why millions are now in use from coast to coast.

- Require no template, or special tools to install.
- Installed from inside for easy access to all windows.
- Precision-made to your specifications, fit exactly without adjustment of any kind.
- Aluminum, require no painting or finishing . . . will not warp, swell or stick, rust stain your homes.
- Hardware can be preset in regular production schedule. Leave screens in cartons, safe from damage, for later installation.
- Sturdily packaged 6 of a size per fibreboard carton to protect against loss on the job or in warehousing.
- Easy to store, accurately labeled for quick identification.
- Cannot be taken down from outside . . . your protection against loss or theft on the job.
- Once installed, Columbia-matic TENSION SCREENS require no further adjustment —remaining drum-tight under all conditions . . . completely eliminate expensive "service callbacks."

CUSTOMERS RESPECT THE NAME . . . and love the performance!

Consistent, year-in-and-year-out advertising in leading national publications, plus word of mouth endorsement, have made Columbia-matic TENSION SCREENS a household word with home-buying and home-owning Americans. And like most famous brand names, Columbia-matic adds stature to the user and his project.

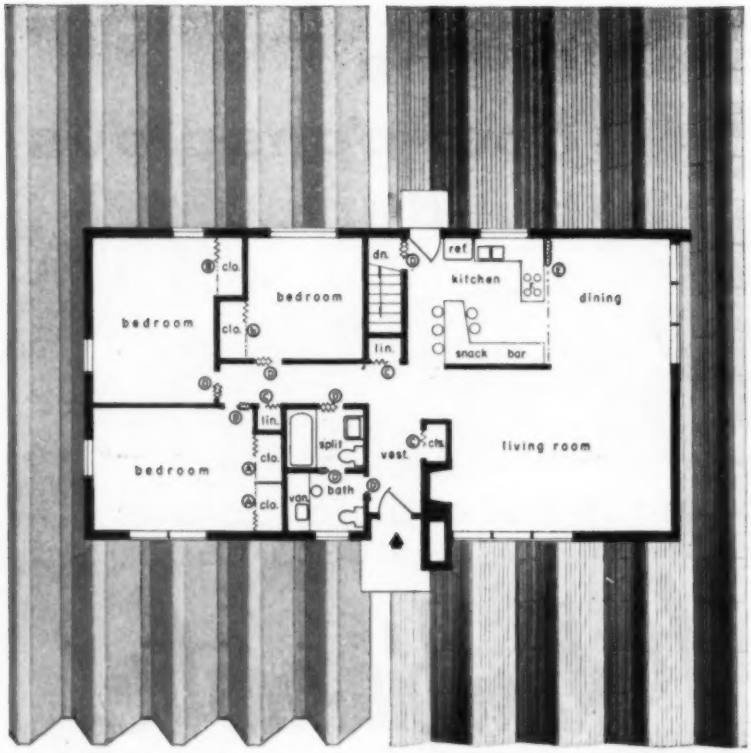

Equally important, the unusual quality of the Columbia-matic, its ease of use, dependability and many time, money and labor saving features are a constant reminder to your customers that he made a good purchase . . . an economical purchase . . . and a wise purchase.

LOOK FOR THIS SIGN OF SUPER SERVICE!

The sign of the FACTORY SERVICE DEALER for Columbia-matic TENSION SCREENS is your assurance of two important building plusses: (1) He will help you "buy right". To do this he carries a complete stock of wanted sizes and can provide emergency service on special sizes. (2) He will help you "cut costs". An expert on builder screening needs, he will show you installation short cuts that will save you time and money.

For complete details on the Columbia-matic TENSION SCREEN, consult your Factory Service Dealer, who is your local lumber or building material dealer, or write:

Hufcor Laminated Accordion Door

Fashionfold Basswood Folding Door

How to Save Over $200 per House

New Hough Door Construction System Saves and Sells

Actual on-the-job cost comparisons including paint, trim, labor, etc. prove that you can save hundreds of dollars with the Hough Door Construction System. The secret; using both Hufcor and Ra-Tox Fashionfold doors instead of space-consuming swinging and sliding doors. The floor plan above is an actual illustration of the system. Seven Hufcor doors, one Hufcor room divider and seven Fashionfold doors were used for a net saving of $323.79. Find out now how this system works. Ask the Hough distributor in your area to help you make a cost analysis of your own floor plans, or—

Write today on your letterhead for details of the Hough folding door Construction System

Hufcor accordion doors with 5-ply semi-rigid laminated covers are built on the vertical pantograph principle. Designed to assure more sound reduction, these doors also have a trim-line architectural beauty and an inborn toughness that makes them the ideal folding wall or closure for kitchen, bedroom, bathroom and other openings.

Ra-Tox Fashionfold basswood slat doors are distinctively designed to add "plusses" to the decor of your homes. They save wall and floor space, provide full accessibility, provide needed closet ventilation, are easy to operate and withstand a tremendous amount of abuse. Ideal for closets, utility areas, room dividers.

WINDOWS by VENTO

(STEEL OR ALUMINUM)

Exclusive Features in

VENTO Aluminum Awning Windows

AUTOMATIC LOCKING... No gadgets to turn, no gimmicks to operate, nothing to get out of order.

WEATHER TIGHT... VENTO alone keeps metal to metal contact plus metal to weatherstrip.

UNLIMITED ADJUSTMENT... Unique in ability to be quickly returned to proper adjustment.

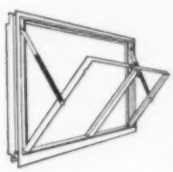

POWER PLUS CPERATOR... Screw — not worm geared — operator working in self-lubricating nylon journals.

EFFORTLESS OPERATION... Nylon roller blocks at all friction points permit finger tip operation.

VENTO Steel Casement Windows

All casements drilled and tapped to receive storm sash and screens, operator arm guide channels attached with screws for easy removal and replacement, if necessary; ventilator frames constructed from the same heavy sections as the outside frame to provide greater rigidity and stronger ventilators.

VENTO Bonderized "Champion" Steel Basement Windows

Effortless operation gives any of three ventilation openings, or sash removal. Sturdy 14 gauge jamb fins for easy installation in block or poured concrete walls. An improved cam latch and slotted opening allow greater tolerance, insuring positive operation and latching under all conditions. Basement sash also made in Thrifty style in three standard sizes and in special sizes. Both Champion and Thrifty styles available in putty or puttyless glazing. For poured basement walls, window forms available for both Champion and Thrifty styles to suit individual specifications.

More Living Area In Every Home You Build

...AT LESS COST!

WARREN FOLDING DOORS

as much as $1,000

worth of floor space saved in every home by eliminating space wasted for storing doors . . . as high as 90 square feet made useful . . . with Warren Folding Doors.

Compare the Sales Appeal

The style and beauty of Warren Folding Doors will help sell your homes. Smart buyers will love the way two rooms can be made into one . . . the way a wardrobe closet is "wide-open" with the swish of a Warren Folding Door . . . and they'll love, too, the way corners are left clear for completing their decorating and furnishing schemes.

Compare the Cost

No precise fitting — no mouldings or hinges are needed. Warren Folding Doors glide on an overhead track that can be installed in minutes. Both ends can be left unattached for "Free-Swinging" doors. Warren Doors come complete with screws ready for installation.

Compare the Quality

Warren Folding Doors are fashioned from ⅞" wide basswood slats tightly woven with heavy Seine Cord. Sturdy moulding members are attached to the ends. Ten high-gloss special enamel finishes, plus natural, are available. There's a color that's right for every interior decor. Warren Folding Doors are perfect for wardrobes, closets, room dividers at almost all inside entrances.

WINDOW IDEAS

New window ideas are well illustrated in three booklets. The 20 page booklet "A Treasury of Ideas" deals with remodeling, "32 Ideas for Window Beauty"—36 pages—suggests the type of window to use, and a 20 page booklet entitled "Only the Rich Can Afford Poor Windows" suggests that quality is economy—and tells why.—Andersen Corporation.

Circle No. 106 on reply card Section 6

engineered for
Lifetime durability

How many times have you noticed your prospects looking at the windows as you point out your new home features . . . and then check those windows for ease of operation? Custom home buyers are becoming more discriminating about windows. To many such buyers, the quality and appeal of the windows are indications of home quality. YOU MAY MAKE OR LOSE A SALE AT THIS EARLY STAGE.

Peterson Windows have the looks and engineering which create customer appeal and confidence. Completely integrated units with self-storing storms and screens, they're clean-cut in line, with no frills or projections. Rigid box-type construction lends strength and durability. When double-glazed, full 1" sealed unit insulation value is attained. Hi-pile weatherstripping, supplemented by vinyl, seals windows to commercial air infiltration limits. The sash rides effortlessly on ball-bearing rollers. Add modest cost, ready availability, adaptability to all types of construction, ease of installation and lack of maintenance problems.

Re-check These Features:

- √ Customer-Appeal
- √ Modest Cost
- √ Quick Delivery
- √ Less Job-Site Problems
- √ No maintenance factors

Send for technical data and name of your nearest Peterson Window representative.

MISSISSIPPI Glass COMPANY

88 ANGELICA ST. SAINT LOUIS 7, MO.

NEW YORK • CHICAGO • FULLERTON, CALIF.

WORLD'S LARGEST MANUFACTURER OF ROLLED, FIGURED AND WIRED GLASS

One of a group of homes in the $12-16,000 bracket by Designer Cliff May and Architect Chris Choate – built in San Clemente, California by the J. C. Douglass Construction Company.

Here's how Cliff May Increased sales 100% with carpet in the package

"My experience is that carpeting in any home, regardless of price or size, gives it a more finished look and a more luxurious look," says Cliff May of the Cliff May-Chris Choate System in California.

Reliable consumer surveys bear this out. Women prefer carpet 13 to 1. But when they're buying a new house, their cash and credit are tied up. They feel they can't afford carpet for their new home. And that's where Cliff May's franchised builders all over California cash in. They include carpet in the purchase price and the home moves 100% faster.

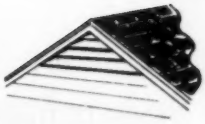

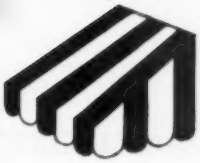

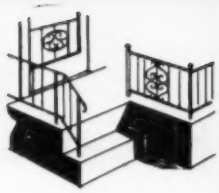

Working with a local carpet retailer, the builder is able to offer his customers the widest possible selection of colors and patterns – no inventory necessary, no installation problems. The customer gets her new house complete with the carpet she's always wanted. And the builder has made another sale.

Many builders all over the country are using carpet to sell their homes faster. How about you? Get together with your local carpet retailer to work out all the details. And contact your local lending organizations for the best way to set up financing arrangements. Sell your homes with carpet and sell them faster.

Home means more with carpet on the floor—more comfort • quiet • safety • beauty • easier care

Offer carpets designed and made for the American way of life by these American manufacturers Artloom • Beattie Bigelow • Cabin Crafts-Needletuft • Downs • Firth • Gulistan • Hardwick & Magee • Hightstown • Holmes • Karastan Lees • Magee • Masland • Mohawk • Nye-Wait • Philadelphia Carpet • Roxbury • Sanford • Alexander Smith

		30	15	20	44	14	102			108			114
132	29	40	13	16	40	18	98	46	12	104			110
		50	12	13	37	21	95	43	15	101			107
		60	11	11	35	23	93	41	17	99			105
		20	33	33			115			121			127
		30	24	24			106			112			118
144	32	40	19	19	43	15	101			107			113
		50	16	16	40	18	98	46	12	104			110
		60	13	13	37	21	95	43	15	101			107
		20	37	37			119			125			131
		30	28	28			110			116			122
154	33	40	22	22			104			110			116
		50	18	18	42	16	100			106			112
		60	15	15	39	19	97	45	13	103			109

The above table is for drives curving left. For drives curving right, add 6 in. to obtain widths and over-all surface widths

FOR STRAIGHT DRIVES

Dimensions of straight drives are the same for all lengths of wheelbase.

18	40	76	24	34	82	30	28	88

Ribbon widths of 46 in. are considered to be the maximum that it is practical to build; therefore, no larger widths are shown.

A WEISER LOCK ON THE DOOR TELLS THE WORLD "HERE'S A BUILDER WHO USES THE FINEST MATERIALS"...

You couldn't say it better if you hung a sign on the front door. For the high quality of Weiser Locks is readily recognized by prospective buyers and the conclusion is obvious..."if this builder uses the finest locks, he has no doubt used other quality materials throughout the house."

And prospective buyers will be impressed with the rich, good-looking finishes of brass, bronze, chrome or two-tone – finishes that add dollars to the value of the house in any buyer's eyes.

Yes, when a builder uses Weiser Locks he adds a powerful sales feature to his home...a feature that will provide years of guaranteed trouble-free service. There are no regrets when you buy quality, so next time – specify WEISER.

WEISER

WEISER LOCKS

WEISER COMPANY • SOUTH GATE, CALIFORNIA

Builders! add Sellability to your homes...with NATIONAL LOCK hardware

These Beautiful Now Available in ...

M-D MACKLANBURG-DUNCAN CO.

FITS-ALL No. 5

Gracefully designed, yet fully adjustable for nearly all standard size screen doors. Easily installed on wood or metal combination doors. Each grille packed in attractive individual carton with complete instructions for installing and suggestions on how to arrange scrolls. Available in three finishes.

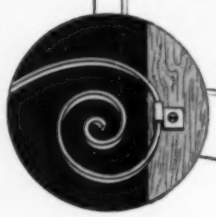

FITS-ALL No. 8

Another new grille that is selling like hot cakes. Features M-D's patented "flower-pot" style holder which makes it easy to install and adjust this popular grille on nearly all standard size screen doors. Individually packed in colorful carton with complete instructions and screws. Available in three finishes.

Surface Clamps Included

Surface clamps are furnished FREE with Grilles No. 5, FS, 8 and 9. These clamps make it easy to install grilles on the surface rather than between stiles. Simply place clamp over each scroll as shown at right.

FITS-ALL No. S6

This striking grille is an All-American favorite. Graceful in design and available in three finishes. Easily installed and fully adjustable on standard size screen doors. Packed in individual colorful carton with full instructions and necessary screws.

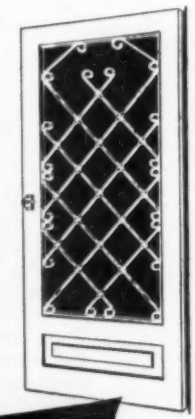

FITS-ALL NO. 9

This graceful grille adds beauty to any screen door, designed to fit all standard doors and adjustable to many others. Packed in individual, colorful display carton with full instructions and necessary screws. Available in 3 finishes.

FITS-ALL No. FS

Here is a popular grille that provides full protection for full-size panel screen doors. Fits-All No. FS can be adjusted to fit doors from 22" to 30" wide, and from 75" to 55" high between stiles. Available in Anodized Brass, Anodized Chrome and Alachrome finishes. Packed 6 grilles to a carton.

DEALERS ORDER TODAY — your order will receive prompt shipment.

DOESN'T COST YOU

TO INCLUDE THE MOST OVERDUE IMPROVEMENT

The builder's world is full of things which are simply irresistible to home buyers; things like atomic shingle nails and ultrasonic basement waterproofing, which draw buyers like a magnet. You've read about them.

Delco-matic is different. It won't persuade a four-bedroom family to settle for three and it isn't an adequate substitute for an extra bathroom.

But, it IS the *most overdue improvement* in any fine home because it mechanizes the LARGEST PIECE OF MOVING EQUIPMENT in *any* home — the garage door — and that makes a lot of sense to most people.

Delco-matic will make a lot of sense to you, too, when we tell you that it is nationally advertised in magazines such as Better Homes, U. S. News, House & Garden, House Beautiful, etc. and, further, that you can include it (and that potent name G.M.-Delco) in your new homes without one red cent of cost to you.

Just call your local Crawford Door Sales Co., listed in your classified phone book under DOORS. Call now, it's worth while.

DURA*flex*® thresholds are a powerful selling aid!

Buyers appreciate their modern design which positively seals out rain, dust, insects, snow, draft. They like its ease of cleaning — dirt sweeps right over, stains wipe off.

DURAflex thresholds are convincing evidence that you have overlooked no detail in making your homes the finest of their class!

Installs faster—saves 50% or more on labor! Self-sealing: 3-way seal hugs floor and door. No hooks or clips on bottom of door! Installs rapidly with just a screwdriver! No call-backs—DURAflex is permanently trouble-free, automatically adjusts to swelling or warping of door.

Rosenbaum *Chanen*

Builders go for DURAflex Nate Rosenbaum and Herman Chanen, Associated Builders Inc., builders of the winning home for Phoenix Parade of Homes, say, "DURAflex definitely adds to sales appeal, saves substantial money on installation"

"Color-Accent"

A NEW FASHION FEATURE FOR THE ENTRANCE OF EACH HOME

Continental design open-back escutcheon, 11" x 3". Colored background is paint applied to door. Shown with Saturn design lock.

Manhattan design open-back escutcheon, 3" x 4⅞". Colored background is paint applied to door. Shown with Tulip design lock.

The modern accent's on color . . . and now with Schlage's new open-back lock escutcheons you can give the entrance of your homes a personalized "Color-Accent" as current as today's colorful interiors. Behind the rectangular symmetry of the Manhattan or the circular simplicity of the Continental, an infinite variety of colors can be used to contribute to the individuality of the home behind the door. Free to select from thousands of paints, you can combine striking lock designs with attractive colors to help give your homes fashionable variety — or you can achieve entirely different effects by using these distinctive designs on natural or solid color doors. Low in cost, yet rich in appearance, the new open-back escutcheons (available in brass, bronze or aluminum) can be combined with a wide assortment of original Schlage lock designs to lend further decorative versatility to your doorways. From Schlage, the originators of the cylindrical lock, comes another original . . . "Color-Accent" locks!

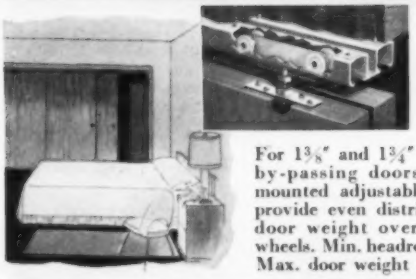

Send for New "Lock Fashions" Brochure #651 -Y-4. For illustrated applications of the new "Color-Accent" concept, attractive suggestions in doorway decoration, and complete information on Schlage residential lock and escutcheon designs, write today for this handsome 4-color, 12-page brochure . . . or consult your local hardware supplier.

Fawsco Products mean faster Sales

This is the year of decision. It's the year of the big "Gimick" . . . COUPONS to sell more groceries . . . RAFFLES and LOTTERIES to sell soap, automobiles, sewing machines. People are LOOKING for "extras," no matter what they buy, and that goes double in the home-buying market. A couple of hundred dollars spent on Fawsco Products may mean the difference between a fast sale and tying your building money up for months on a home that just won't sell. FAWSCO Products are EASY to install — labor costs are LOW! Attractive awnings, canopies, shutters, ornamental iron, and now, a terrace canopy — add distinction, color and beauty to the homes YOU build. Try the LOW COST FAWSCO WAY to GLAMORIZE! . . . Send today for free 4-color catalogue and prices.

"Look!" she said . . . so they did

They were browsing around in the new homes section.
Then it caught her eye. She pointed. So they stopped to look.

That gloved hand set up a chain of events.

She was attracted by the distinctive beauty of the Ro-Way garage door inviting inspection of the entire home.

He was impressed by the fine quality details. Noted Ro-Way's Taper-Tite track and Seal-A-Matic hinges for all-weather protection. Tested Ro-Way's ball bearing rollers for smooth, easy operation. Liked the nice balance of Ro-Way's Power-Metered springs.

They both figured (logically) that the builder hadn't skimped—anywhere!

They're the kind of people who like to get their money's worth . . . today's smart buyers . . . your new home prospects.

We think maybe a Ro-Way door helped sell the home they finally bought.

Only a GARAGE offers:
- COMPLETE PROTECTION
- FINISHED APPEARANCE
- EXTRA STORAGE SPACE
- EXTRA ROOM

NEW! LOW COST!
7-SECTION
GARAGE DOOR

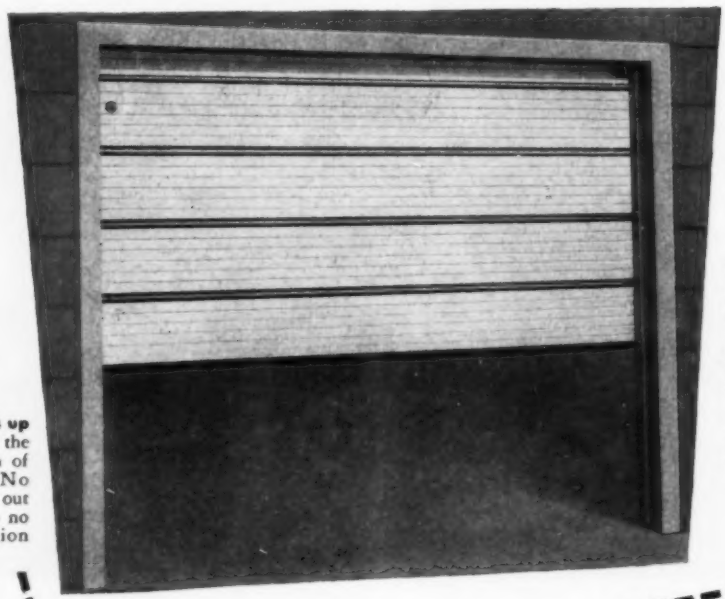

the "NIAGARA" model

. . . PRICED FOR MULTIPLE-HOUSE PROJECTS AND LOW BUDGET INSTALLATIONS

MORRISON
Roly-Door
STEEL SECTIONAL OVERHEAD DOORS

The NIAGARA is a quality garage door, designed and priced specifically for modest priced homes of every type. It allows you to offer your feature-conscious prospects all the advantages of an all-steel *sectional* garage door — not as an "extra" — but for the same cost to you as an ordinary wood or one-piece metal door. The NIAGARA's unbelievably low price is the result of expert design and modern mass production methods. There has been no compromise with materials or workmanship . . . the NIAGARA is fully guaranteed for one year.

The NIAGARA rolls up completely inside the garage at the touch of your fingertips. No awkward swinging out motion to avoid — no dangerous projection outside the garage.

Here is a garage door that adds both value and saleability to your houses. Once your prospects test the NIAGARA's amazing fingertip operation — consider the lifetime durability of its all-steel construction — and learn about its many other exclusive advantages from you — they're one step closer to signing on the dotted line.

If the garage door you're now buying does nothing more than close an opening in the garage, change to the NIAGARA. It comes in two popular widths — 8 and 9 feet — and two heights — 6 feet 6 inches and 7 feet. For complete information on the NIAGARA and other Morrison Roly-Door Models, look for the name of the nearest Morrison Roly-Door Distributor or Dealer-Installer in the Yellow Pages of your Telephone directory or write directly to Roly-Door Division, Morrison Steel Products, Inc., 644 Amherst Street, Buffalo 7, New York.

No. 1 ON THE HOME IMPROVEMENT PARADE!

Leigh

KNOCKED-DOWN

Imperial AWNINGS and CANOPIES

VENTILATED

Easily installed without cutting or fitting.

PACKAGED

IN 4 STYLES
3 COLOR COMBINATIONS

Require No Cutting or Fitting — Easily Installed On The Job — Pay You Top Profit

All things considered, Leigh Imperial Awnings and Products are one of the best home improvement lines you can handle this year or any year. They're easy to sell — every home-owner appreciates their beauty and protection. They're low-cost, another point home-owners like. And they're easy to install right from the package to the doorway or window — no cutting or fitting is necessary.

Leigh Imperial Awnings and Canopies are really rugged. Once in place they stay for keeps — winds, sleet, or driving rains can't budge them. They're made of double-protected steel (zinc coated and bonderized) in red and white, green and white, or blue and white enamel finishes. Sizes for every residential or commercial need. Sell the tremendous market that's waiting — order now!

Bel-Air DOOR CANOPIES

The ideal shelter over a doorway — a real beauty in looks and construction. One-piece, ready to install. Costs less than wood, looks much smarter. Made of double-protected steel. "Install the Basement Entry Home-Buyers want . . .

SERVICE-WAY adds SALES APPEAL to any house!"

✓ **Check these Service-way features!**

ALL-WELDED CONSTRUCTION—Heavy-gauge steel, electrically welded for maximum strength and durability.

STRUCTURALLY REINFORCED—Underside of one-piece door is reinforced by welded members for extra rigidity. Door can be walked on without danger or damage.

DOUBLE ACTION SPRINGS—Specially designed spring suspension counterbalances weight of door in all positions for finger-tip operation.

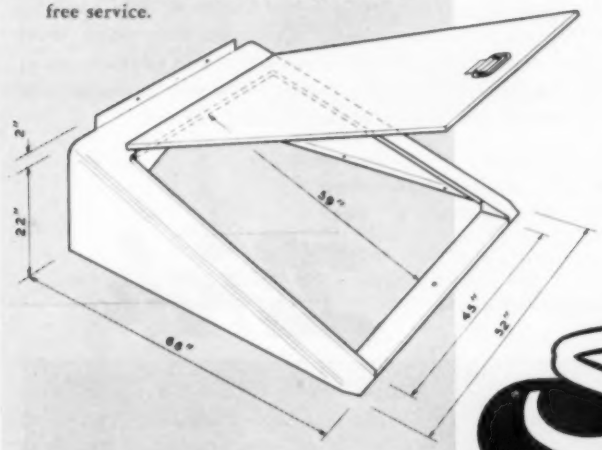

WEATHER-TIGHT—Frame and door flanges overlap for snug fit—keep out rain, snow, wind.

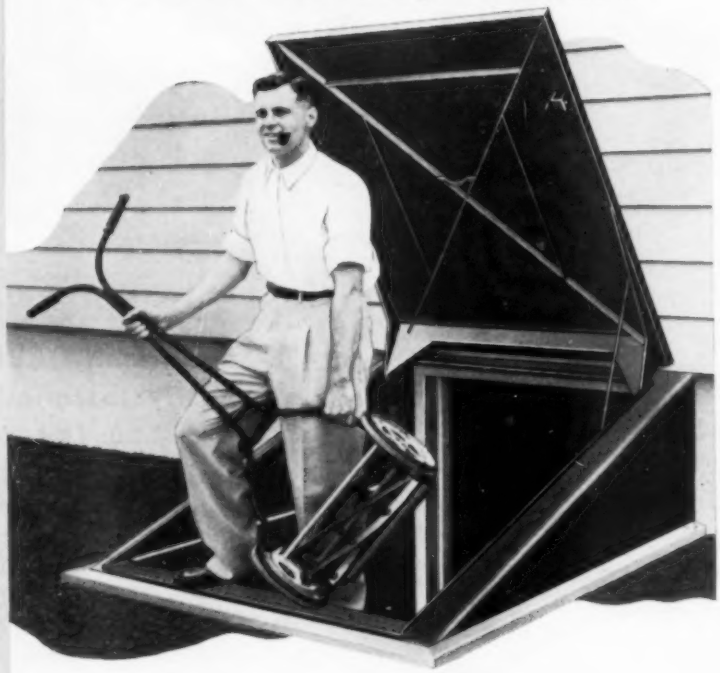

QUICK-RELEASE SAFETY ROD—Door locks easily in full open position—remains in place even in strong wind.

BURGLAR-PROOF—Two slide bolts on inside lock door securely against intruders and animals.

READY TO INSTALL—The Service-way comes completely assembled and prime coated to save time and labor on the job.

EASY TO MAINTAIN—No wood to rot, no hardware to break. An occasional coat of paint assures a lifetime of trouble-free service.

● The Service-way is an extra that builders go for—because *their* customers go for it, too! It is the only practical way for the average homeowner to get *full* use of his basement.

The Service-way gives him quick, easy access for storage of bicycles, outdoor furniture, bulky lawn and garden tools. There's wide clearance for home freezers, hobby shop equipment. The route from laundry to clothesline is shortened. It saves tracking dirt through the house.

The Service-way is durably built to last as long as the house. Made by the makers of the famous Heatilator Fireplace.

For folder and specifications, write: Heatilator, Inc., 564 E. Brighton Ave., Syracuse 5, N.Y.

Nationally known laboratory, of leading university, testing Miracle Dri-Wal Adhesive for racking strength.

TESTING LABORATORY OF LEADING UNIVERSITY REPORTS:

"Miracle Dri-Wal Adhesive and Miracle Method increases racking strength 76% stronger than normal method of application"

Sensational New Miracle Dri-Wal Adhesive for bonding gypsum board to studs speeds dry wall installation, substantially reduces cost, increases racking strength 76%.

You speed your dry wall installations, save substantially in your time and costs. Further, these University laboratory tests prove that Miracle Dri-Wal Adhesive in no way increases fire hazard.

You use 50% less nails, eliminate nail popping, and appreciably lessen racking. With so many less nail holes to fill, taping and concealing time and costs are minimized.

With Miracle Dri-Wal Adhesive formulated and developed specifically for installations of gypsum board to studs you do a better than ever dry wall job in every way.

Here's the easy cost-cutting Miracle Method: Before erecting gypsum board, Miracle Dri-Wal Adhesive is applied to each stud full length, using a 2½ quart caulking gun with ⅜" nozzle.

Builder Andy Place, South Bend, Indiana, uses Miracle Dri-Wal Adhesive and Miracle Method to speed dry wall installation, substantially reduce costs.

Gypsum board is put up and nailed 16" o.c., with one or two nails on center of intermediate studs.

FREE: Colorful, illustrated brochure describes dry wall method, details time and cost saving. Write for your free copy without obligation today. Dept. AB-4

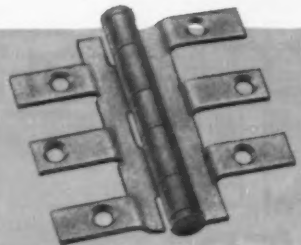

MIRACLE ADHESIVES CORPORATION

214 EAST 53rd STREET • NEW YORK 22, N. Y.

McKINNEY HARDWARE

THE QUALITY LINE SINCE 1865

means dependable service— promotes customer good will

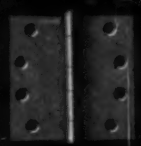

THE NEW McKINNEY NON-MORTISE HINGE

Eliminates mortising of doors and jambs . . . speeds door hanging . . . saves time and money. Precision made of heavy gauge steel in the popular 3½ inch size. Three finishes: dull brass, bright nickel and bonderized prime coat.

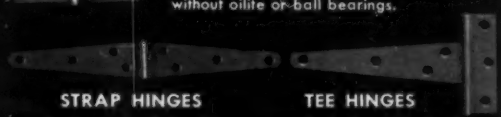

Look for this counter display at your Hardware or Building Supply Dealer.

BUTTS AND HINGES

FULL MORTISE WROUGHT STEEL BUTTS

Available in all standard sizes and finishes . . . light, regular or heavy weight for every application. Available for use on wood or metal doors, and with or without oilite or ball bearings.

STRAP HINGES

Wrought steel, light and heavy gauge . . . complete range of sizes for farm, home and industrial use.

TEE HINGES

Light, heavy and extra heavy wrought steel. The McKinney name means quality and completeness of line.

McKINNEY FORGED IRON HARDWARE

CABINET HARDWARE

For Dens, Kitchens, Game Rooms . . . for every room in the house. For natural wood or painted surfaces. Three distinctive finishes: Dull Black, Swedish Iron and Olde Copper.

MAIL BOXES

A complete quality line . . . artistically designed to harmonize with McKinney front door hardware. Heavy gauge steel with rust-resisting finish. Five quality finishes.

McKINNEY

BUILDING SPECIALTIES

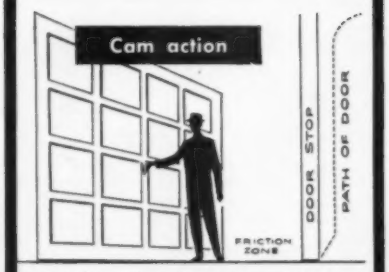

Attractively bound, this 84 page catalog gives technical and specification data on firm's full line of wire products. Includes reinforcing steel, fencing, nails, hardware cloth and screen. —Colorado Fuel & Iron Corp.

Circle No. 116 on reply card Section 6

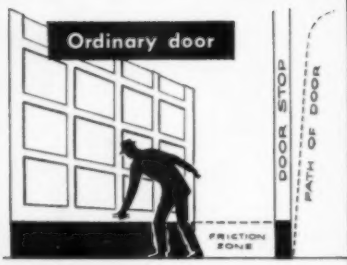

BARBER COLMAN

Barcol® OVERdoors

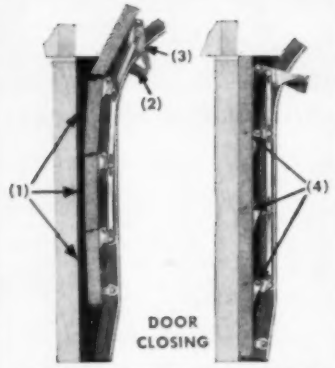

close tighter, yet open easier!

Cam Levers *immediately* free entire door from stops—friction zone is less than ½"!

Door moves *gradually* away from stops—drags through long friction zone.

SEE HOW CAM ACTION WORKS! (1) Uniform ⅜" clearance assures all-weather friction-free opening and closing. Stop (2) engages cam lever (3) linked to other cam levers (4) pushing all door sections simultaneously against stop strips.

CAM ACTION OVERdoors close tighter because door rolls easily down with ⅜" clearance and then is pushed forward by cam levers and held firmly and evenly against door stops. No dragging . . . no scraping.

CAM ACTION OVERdoors open easier, at a turn of the latch handle, because *extra* Cam Springs at bottom pull entire door ⅜" *back* from stops—overhead springs then lift friction-free door upward. Friction zone is reduced, allowing wood to swell in damp weather without sticking, binding, or wedging. Call your Barber-Colman distributor (under "Doors" in phone book) or write:

Barber-Colman Company

Circle No. 146 on reply card Section 6

After it rains

will your homes be selling you?

Rain-carrying equipment costs *little* but makes a *big* difference!

Will the homes you build today help you sell more homes a few months from now — or will they begin to take on a run-down look—paint-streaked and discolored, siding rotting, foundations undermined?

Rain-carrying equipment protects your reputation. It keeps roof-contaminated rain water from streaming down the siding and eroding the soil at the foundations. It guards your home in a hundred ways against the insidious inroads of moisture.

Rain-carrying equipment is not a *luxury*, not an "extra" which home owners can do without. It is as important to a house as a windshield is to an automobile.

Milcor Galvanized Gutter and Conductor Pipe cost so little that you can't afford to jeopardize your reputation by leaving them out. Besides, Milcor rain-carrying equipment has the *extra strength of galvanized steel*, is long-lasting and trouble-free.

Ask your building supply dealer — or write for Milcor Catalog No. 306.

KEY-WALL

here's how you get **greater value:**

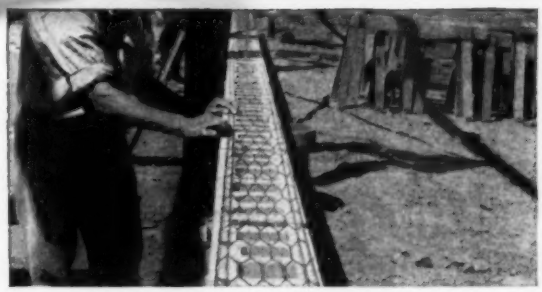

- *You get* effective *resistance to cracks.*
- *You increase lateral wall strength because you get the most efficient distribution of steel.*

These are facts developed in tests by the Research Foundation, University of Toledo.

here's how you get **lower cost:**

- *You save on material cost.*
- *You save on handling and storage (it's galvanized).*
- *You save on installation.*

Key-wall is made for the following wall thicknesses: 4″, 6″, 8″, 10″, and 12″.

Key-wall is lapped at corners without adding thickness to the joint. Quick and easy to do. Provides exceptionally effective reinforcement of corner.

It is easy to build up reinforced corners with KEY-WALL. Short lengths may be cut and used without reducing effectiveness of reinforcement.

For long walls, KEY-WALL rolls out entire wall length without joints.

Mortar flows readily around KEY-WALL to give full embedment. Tests show an exceptional bond.

Masons like the ease with which block can be laid when they use KEY-WALL as reinforcement. The mesh helps hold the mortar in place.

a new type of masonry reinforcement that gives **greater value at lower cost**

FREE test report

AT LAST, tests reveal basic facts about reinforcement of concrete masonry.

These tests reveal that one layer of KEY-WALL in every joint will enable a wall to resist approximately 85% as much load before initial cracking as could be resisted if 4 times as much steel (two 3/16″ rods) was used.

What's more . . . you get better bonding with KEY-WALL.

There are many other advantages you get when you specify and use this revolutionary new product. It will pay to get all the facts.

KEYSTONE STEEL & WIRE CO.
Peoria 7, Illinois

10 Reasons Why the BIG Demand is for

Kinnear RōL-TOP Doors

Wood or All-Steel

1. Kinnear all-steel Rol-TOP Doors feature rugged 16-gauge sections that interlock *from end to end*, for smooth hinging action.
2. Steel door sections are hot-galvanized (1.75 ounces of pure zinc per square foot, A.S.T.M. Standards.)
3. Kinnear's special Paint Bond gives field-applied paint an *immediate, firm, lasting* grip on the galvanized surfaces.
4. Rol-TOP Doors open easily on ball-bearing rollers, "boosted" by Kinnear's famous *single-shaft torsion spring* that assures uniform operation.
5. Whether Rol-TOP sections are of high-quality steel or finest kiln-dried lumber, any number of panels in each section can be prepared for glass.
6. Kinnear's own "Keystone Seal" design and adjustable sealing strips assure snug, weather-tight closure for both wood and all-steel Rol-TOP Doors.
7. Kinnear Motor Operators, with push-button controls wherever desired, are easily added for maximum savings in time, steps, and effort.
8. Kinnear doors are *registered* —detailed drawings are kept in fire-proof vaults, assuring quick, accurate availability of parts even after many years of service.
9. Kinnear manufactures *doors exclusively!* Through more than half a century, Kinnear has proved the many advantages of using doors designed and built by door specialists.
10. Complete range of sizes offers correct answer to any door need.

Write for the new catalog on Kinnear Rōl-TOP Doors for industrial, commercial, and residential needs.

"washington"

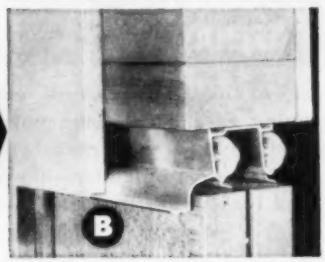

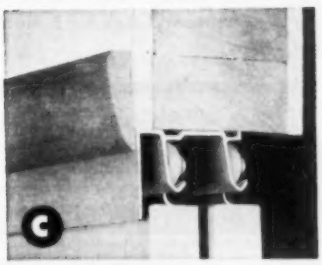

the complete line of

RESIDENTIAL ROLLING DOOR HARDWARE

fills any residential function in several cost and quality ranges

ALUMINUM TRACK

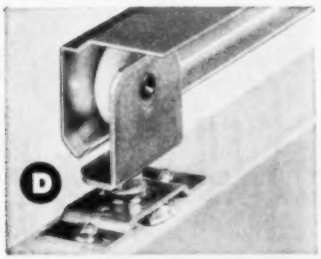

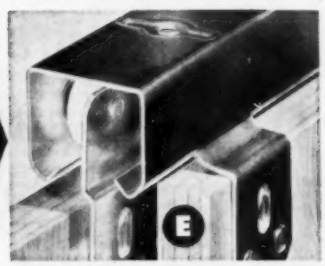

A For 1" to 1⅜" wall pocket doors. No. 646 aluminum single track used with No. 650 on 652 adjustable hangers, or No. 660 non-adjustable. Track has anti-jump feature and the hangers are available with either axle-bearing or ball-bearing nylon wheels.

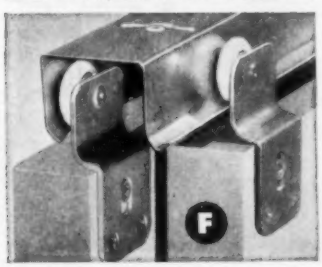

B Here's a new aluminum track for by-passing wardrobe doors. Washington "plaster-ground"* track eliminates wood trim—the plaster or wallboard is applied right down to the bead of the track, making it an integral part of the door frame and cutting installation costs. Track is anti-jump and is available for ⅜" to ¾" doors (No. 642), and 1" to 1⅜" doors (No. 643).

C Aluminum track with a "built-in" valance. Can be used with or without wood trim. Track is caustic-etched for beauty and durability and is anti-jump. Available for ⅜" to ¾" doors (No. 640), and 1" to 1⅜" doors (No. 641).

STEEL TRACK

D This single steel track (No. 600), is for 1" to 1⅜" wall pocket doors and can be used with double (No. 652) or single wheel (No. 650) adjustable, or single wheel non-adjustable (No. 660) Hangers. It is anti-jump and is easy and quick to install.

E Steel double track for by-passing wardrobe doors ⅜" to ¼" thick. Easy to install, and is anti-jump when used with a track lock which is furnished.

F Steel double track for 1" to 1⅜" by-passing wardrobe doors. Easy to install, and is anti-jump when used with a track lock which is furnished.

NOTE: Double wheeled hangers with pivoted-cross arms may be used with either the aluminum or steel wardrobe track. When used with steel track they will carry doors up to 60 lbs., when used with aluminum track, doors up to 100 lbs. All installations shown at left are available in bulk or complete packaged sets.

a **big plus** factor that sells houses . . . **HABITANT** factory fabricated **wood fence**

The attractive "extra touch", the air of privacy and luxury that adds so much to the salability of any house, can be achieved easily with handsome Habitant Fence. You can use Habitant Fence in any manner you wish . . . for surrounding whole yards, or in limited segments as outdoor room-dividers. It's an ideal means of setting off patios, breezeways, house fronts. Habitant Fence is factory-fabricated to the exact ground plan and comes complete with gates and all hardware.

Habitant Fence around industrial buildings looks friendly and attractive . . . improves public relations. Surely too, the fence serves an important protective purpose ...a firm barrier against intruders.

Shown here with extension arms and barbed wire, Habitant Fence is both a great landscaping and utilitarian asset.

Shown here is a highly successful Habitant installation around an outdoor exhibition. Drive-in theatres, shopping centers, schools, airports, municipal properties, and many other sites can also make excellent use of cut-to-fit Habitant Fence.

In some selected areas, Habitant Fence dealer representation is still available . . . if you are interested, write for details.

FOR BUILDING— AND RE-MODELING

INSTALL *Pin-Point* ADJUSTABLE SHELVING

with

E-Z SHELVING
(BRACKETS & STANDARDS)

Provides These Advantages:

(1) Helps Solve Uneven Floor Problem. Upper Shelves Adjust Level without shimming.
(2) Helps Solve Odd Package Sizes. Permits vertical spacing to fraction of inch.
(3) Rugged "back-bone" for many shelving requirements.
(4) Individualized Displays. Wide variety of sizes permits tailored precision fabrication.

FIXTURE FABRICATORS — GET THE "E-Z" STORY

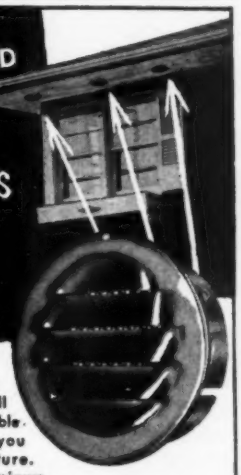

NO keyholes or slots. Brackets slide up and down in Standard groove and lock at any point on Standard. Fits most shelving and fixture needs.

HANDLES ALL NORMAL DISPLAY LOADS

WRITE FOR FREE FOLDER

Standard Steel Works
Dept. AB-4, NORTH KANSAS CITY, MISSOURI

HOW TO PROTECT THE HOMES YOU BUILD FOR LIFE . . . against the DESTRUCTIVE DANGERS of CONDENSATION and DAMPNESS!

In just a few minutes, at negligible cost, you can install Midget Louvers on soffits, gable ends, dormers, eaves or you face the menace of moisture. These inexpensive all-aluminum ventilating units are your fastest, cheapest, surest *permanent* protection. They will prevent the accumulation of heat and condensation . . . virtually eliminate paint blistering . . . combat rot . . . maintain the efficiency of insulation. Made in 7 sizes (1" to 6") and 2 styles (with and without rain deflectors — both with insect screens).

WRITE for full information.

Quick and easy to install. Just drill a hole and push in place. No nails or screws needed.

"A House That Breathes is a Better House"
The *aluminum* louver is the original louver.
Don't accept "second best" substitutes!

MIDGET LOUVER CO.
6 WALL STREET • NORWALK, CONN.

SAGER *Proudly Announces* ITS REVOLUTIONARY *NEW* VINYL & ALUMINUM WEATHERSTRIPS & THRESHOLDS

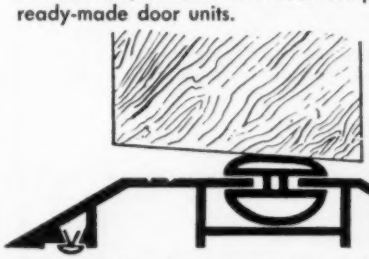

FOR BUILDERS
They put "eye-catcher" sales appeal in new houses.

FOR MODERNIZING CONTRACTORS
A "natural" for *Operation Home Improvement* sales.

FOR DEALERS
They sell fast to the trade and over the counter to do-it-yourself buyers.

FOR DISTRIBUTORS
A "hot" new item for manufacturers of sash and doors, millwork houses, pre-fab home manufacturers.

Sager offers an entirely new design with aluminum and vinyl combined, making it today's most successful selling weatherstrip and threshold. Easy to install, in use by homeowners, builders and door companies manufacturing ready-made door units.

SAGER #8SS THRESHOLD

Smartly designed with a resilient vinyl tubing that actually hugs the bottom of a door. Vinyl tube has two sides; when one side becomes worn . . . reverse it. Girder construction gives maximum load bearing capability and is easy to sweep over as there are no sharp edges to trap dirt or trip on. Individually packaged in all popular lengths, complete with screws and instructions for installing.

SAGER #9VW WEATHERSTRIP

For top and sides of doors, also has a double vinyl tube that absorbs any irregularities in the door, assuring a perfect seal. Vinyl tube can be reversed when one side wears. A hammer and snips are the only tools needed to install. Sold in sets for doors and windows or in bulk. Door thresholds are packed separately. *Pat. Pending

SAGER . . . a name famous for more than 36 years in the weatherstrip industry.

CALDWELL SASH BALANCES

TAPE AND SPIRAL TYPES FOR ALL WINDOWS

TAPE BALANCES

FOR RESIDENTIAL WINDOWS

(4 to 26 lb. sash: type 242)

Popular residential size adopted by most large manufacturers of unit windows. Same high quality clock steel springs, high tensile tapes and heavy gauge housing used in our largest types. Volume production permits use in low-cost housing. Can be used singly with one equalizer spring per sash at very low cost.

FOR COMMERCIAL AND INSTITUTIONAL WINDOWS

(4 to 35 lb. sash: type 150; 23 to 50 lb. sash: type 154)

Ideal for schools, hospitals, institutional and commercial buildings. Exclusive, patented screwdriver adjustment feature. Every coiled power clock spring tested for accuracy before shipment. Compact design reduces head room under lintels and mullions to a minimum.

FOR HEAVY WINDOWS

(50 to 75 lb. sash: type CX; 59 to 100 lb. sash: type D)

Carefully engineered to meet exacting requirements of heavy windows, sliding panels and doors, dumb waiters and other counter-balancing applications. Types CX, CXT, CXAT, D and DO are adjustable.

FOR SPECIAL CONDITIONS

Special face plates, loops, long tapes and even special balances can be furnished for unusual window conditions where standard balances will not suffice.

(Refer to size table when ordering tape balances.)

SPIRAL BALANCES

SPIREX... for residential windows

The only spiral balance on the market offering *all* of these advantages . . .

- ADJUSTABLE FOR PRECISE TENSION—Can be adjusted *after* installation to save time in precision balancing.
- SMOOTH, QUIET OPERATION—Special coating insulates Spirex springs against noise and rust. Patented new design eliminates friction and rasp.
- POSITIVE LIFTING POWER—High carbon, finely tempered flat wire springs and patented new design provides positive lifting power.
- CAN BE INSTALLED WITH SASH IN FRAME—Saves time and labor. Reduces errors in installation.
- EASY TO TENSION—Only one turn of tensioning wire for each 6 to 7 inches of height, or 3 or 4 turns for average sash.
- FITS STANDARD GROOVING—Fits any standard groove, round or square, $\frac{5}{8}$″ x $\frac{5}{8}$″ or $\frac{3}{4}$″.
- PROTECTIVE CARTON—Heavy jute board carton protects Spirex from damage in transit or on the job.

HELIX... for institutional and commercial windows

This heavy duty spiral balance specifically designed and built for heavy sash.

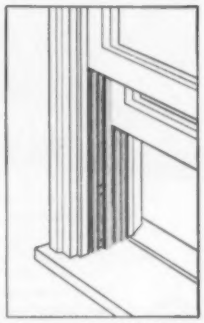

- PRETENSIONED AT FACTORY—Will handle variations up to 5 lbs. without adjusting. Adjustment is provided, however, so that unusual variations can be easily compensated on the job.
- LOCKING PIECE FOR EASY INSTALLATION—Allows lower portion of spring to extend out of tube so that attaching arm can be connected quickly and easily.
- SEAMLESS, RUSTPROOF ALUMINUM TUBE—Positively eliminates dust, dirt and other foreign matter from reaching balance interior.
- DURABLE TORSION-SUSPENSION SPRING—Oil tempered, high carbon spring is both tension and torsion spring. Efficient and durable.
- SEPARATE ATTACHING ARM—Drastically cuts costly installation time by permitting attachment after balance has been fastened in place.
- GRADUATED TORQUE ROD—Cadmium plated spiral torque rod has graduated twist to assure smooth, even, effortless operation throughout travel of sash.

COMBINATION BALANCE—WEATHERSTRIP

SPIRAFLEX... the NEW 1-piece weatherstrip with spiral balances

The new SPIRAFLEX is the only combination weatherstrip-sash balance that offers *all* these features . . .

- SPIREX SPIRAL BALANCES—Prevent creeping; assure smooth, easy operation.
- ENCLOSED BALANCES—Provides protection from moisture, and gives neat appearance.
- 1-PIECE ALUMINUM STRIP—Assures long lasting, efficient pressure seal.
- OUTSIDE PRESSURE FLANGE—Prevents sash from becoming paint sealed.
- DOUBLE-RIBBED LOWER SECTION—Provides additional weather tightness and rigidity.
- FAST, EASY INSTALLATION—Makes possible a better window at reasonable cost.
- NOISELESS OPERATION—Assured by silent Spirex balances.
- FULLY ADJUSTABLE—Easily adjusted, if necessary, even after installation.

Spiraflex units are made in sizes to fit any window up to 6′6″ in height ($1\frac{3}{8}$″ sash, $\frac{1}{2}$″ or $\frac{3}{8}$″ parting bead).

THE CALDWELL GUARANTEE: All Caldwell balances are guaranteed to provide positive lifting power for the lifetime of the building. Caldwell is the nation's oldest sash balance manufacturer, and this guarantee is backed by a 68-year reputation for making quality products and standing behind them.

Our engineering department will welcome any opportunity to assist you with difficult window balancing problems. Additional information will be gladly furnished by the factory or your Caldwell representative.

RAYNOR

THE COMPANY AND THE PRODUCT

KNOW THIS MARK OF QUALITY

A company of but ten years age has risen to a position of acknowledged leadership in the overhead door industry.

This is not accomplished in present day marketing complexities by chance circumstance.

Such achievements must evolve from efficient manufacture of a quality product, distributed and sustained in a manner to command respectful attention and win continuing confidence among the consuming public. The avowed purpose of Raynor Manufacturing Co. is SERVICE . . . service in its broadest interpretation and keynote of the Company philosophy.

COMPLETE MANUFACTURE OF A COMPLETE LINE

Raynor overhead doors are designed, engineered and manufactured under one management. Such controlled production means controlled quality—a prime requisite for guaranteed merchandise.

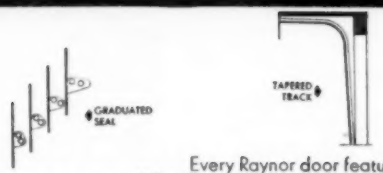

Raynor doors are made in an unusually wide range of sizes, styles and mechanical adaptations, able to cope with peculiar structural situations, never losing dimensional precision or architectural finesse.

RAYNOR MANUFACTURING CO.

Dept. 1 **Dixon, Illinois**

SEE OUR CATALOG IN SWEET'S

Check your telephone directory for the name of your nearest representative or write direct.

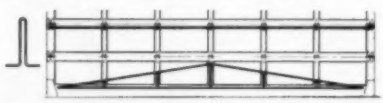

Every Raynor door features "Graduated Seal" which holds the door tightly against the jamb when the door is closed, yet assures easy rolling, finger tip control when in operation.

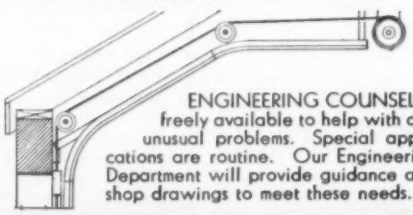

Every Raynor Door features zinc plating of hardware which applies to the sections. Tracks, springs, etc. are rust-proofed and painted aluminum.

Every Raynor torsion spring model has continuous "live shaft" mounting of springs, assuring united and uniform lift on both sides of the door. No cocking or wedging of sections in the opening.

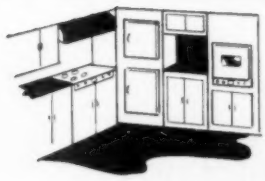

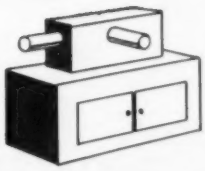

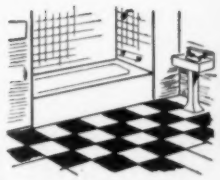

Every Raynor door is equipped with proper reinforcements to overcome the stress and strain found in large doors; U-bar stiffeners, center support tracks, special bottom truss and center lift cable, as required to counter horizontal and vertical sag.

ENGINEERING COUNSEL is freely available to help with any unusual problems. Special applications are routine. Our Engineering Department will provide guidance and shop drawings to meet these needs.

ATTIC & EXHAUST FAN INSTALLATION

GENERAL INSTALLATION RULES

Where fans are installed to discharge directly to outside they should be located with prevailing winds.

Fans discharging directly into attic should be centrally located if possible.

Flat roofed buildings without adequate attic space should be provided with a penthouse for fan location. Either vertical or horizontal units may be used.

Provide adequate protection against fire in all installations. Various devices are available to insure fan cut-off and closing of intake louvres.

MINIMUM AREAS FOR DISCHARGE OPENING

TYPE OF OPENING	SQUARE FEET PER 1000 CFM FREE AIR FAN DELIVERY
Wood louvres backed with ½" hardware cloth. 40% minimum free area	2.27 Sq. Ft. per 1000 CFM
Metal louvres backed with ½" hardware cloth. 50% minimum free area	1.82 Sq. Ft. per 1000 CFM
Plain opening covered with ½" hardware cloth. 80% minimum free area	1.14 Sq. Ft. per 1000 CFM
Automatic or manual shutters, 90% minimum free area	1.01 Sq. Ft. per 1000 CFM

ESTIMATING FAN REQUIREMENTS

The following formula will aid in determining the size of the fan required to adequately ventilate a given area:

$$\frac{\text{*Cu. Ft. Volume of Area}}{\text{**Rate of Air Change}} = \text{CFM (Fan Capacity)}$$

*When estimating cubic feet contents, closets, and other unoccupied areas may be deducted.

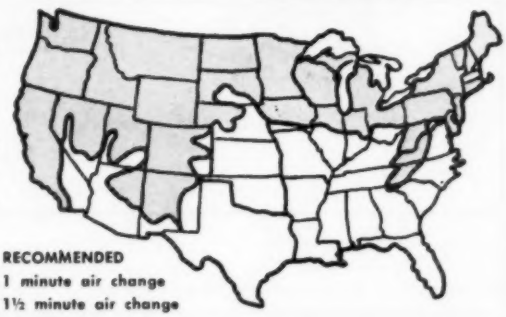

**Select rate of air change according to locality from map at the right.

Example:

Volume = 15,000 Cu. Ft.

Desirable air change = 1½ Minutes

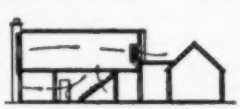

$$\frac{15{,}000}{1.5} = 10{,}000 \text{ CFM (Fan Capacity)}$$

FAN LOCATIONS

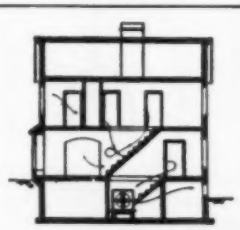

SUCTION BOX

ATTIC STAIRWAY

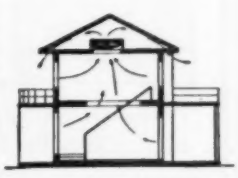

GABLE INSTALLATION

ATTIC WALL

PENT HOUSE

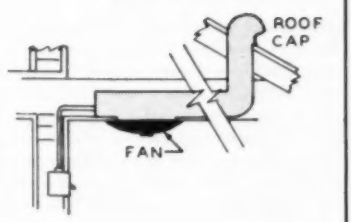

BASEMENT

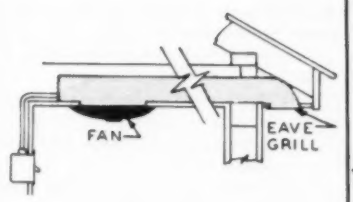

The installation of attic fans generally follows the three methods shown at top of page. In homes with basements it is sometimes practical, and equally effective, to install the fan in a compartment beneath the basement stairs allowing the discharge to exhaust directly into the basement proper. Intake and discharge louvers should follow the same rules that apply to attic installation. The same precautions should be taken against fire.

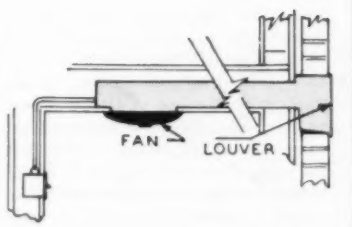

VERTICAL DISCHARGE

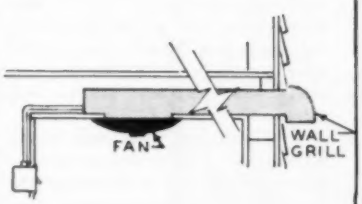

KITCHEN & BATHROOM VENTILATING FAN INSTALLATION

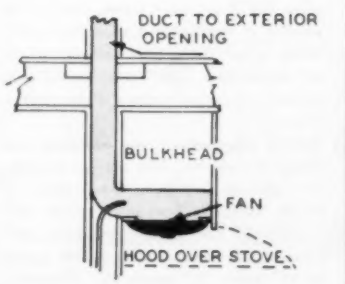

CEILING

GENERAL INSTALLATION RULES

Kitchen ventilating fans should be installed as close to the range as possible. Ceiling fans directly over the appliance; wall fans should be located 12 to 18 in. above the top of the range.

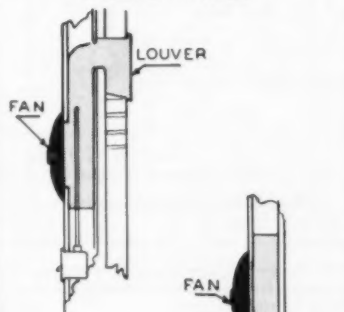

Where discharge ductwork is necessary ducts should be as large as the fan outlet opening throughout. For best results limit ducts length to 10 ft.

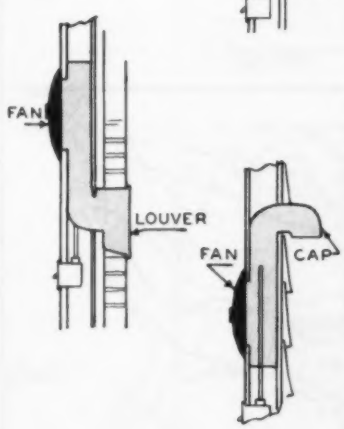

Elbows tend to restrict air flow Keep runs as direct if practical.

For best results install fan that will change air in the room every two or three minutes. The following formula aids in estimating fan size needed.

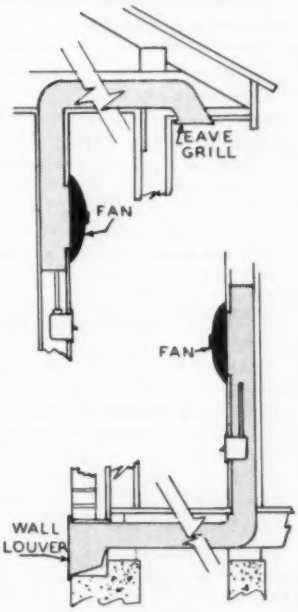

$$\frac{\text{Cu. Ft. of Room}}{\text{Minutes Air Change}} = \text{CFM Fan Capacity}$$

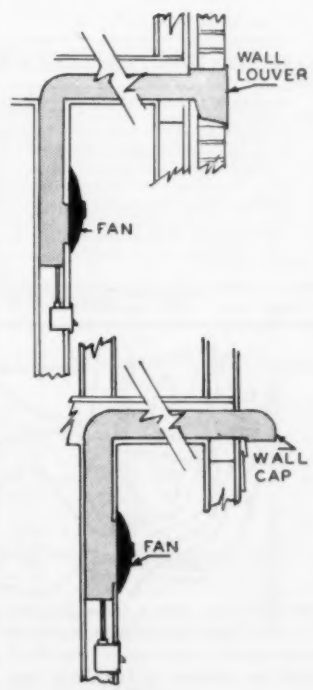

INSIDE WALL

OUTSIDE WALL

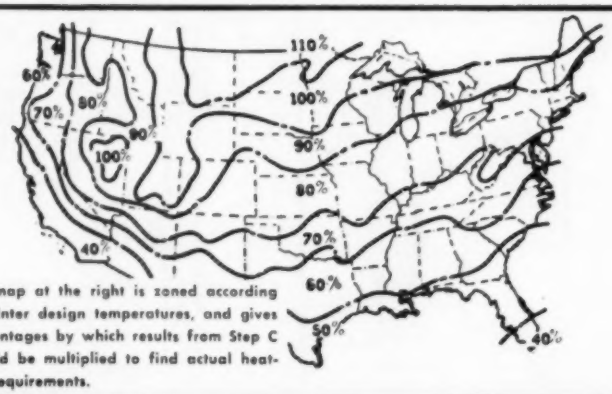

CONDENSED METHOD OF ESTIMATING HEATING REQUIREMENTS

"CONDENSED METHOD" HEAT LOSS FACTORS*

		Multiply sq. ft. by:
1. WINDOWS & DOORS		
a.	Without storm sash	113
b.	With storm sash	75
2. OUTSIDE WALLS (NET)		Multiply sq. ft. by:
a.	SOLID MASONRY—(Brick, stone, etc.) with plaster applied direct to inside surface of masonry wall.	45
b.	AVG. FRAME—Brick Veneer—Wood Siding—Shingles or Stucco—with sheathing, bldg. paper, studs, lath and plaster	30
c.	FURRED MASONRY—(Same as 2a with air space between plaster and masonry wall)	
d.	INSULATED FRAME—Same as 2b—with 1" or less insulation board or blanket	20
e.	HEAVILY INSULATED—Same as 2b with 2" or more insulation	10
3. CEILINGS & INSIDE WALLS		Multiply sq. ft. by:
a.	CEILING—Plaster on lath or wall-board. No floor above—Attic not vented	34
b.	Same as 3a—with 2" or more insulation	12
c.	CEILING of first floor room below unheated room on second floor	17
d.	INSIDE WALL adjacent unheated room	
4. FLOORS		Multiply sq. ft. by:
a.	Double wood floor—over cool basement or other enclosed space	15
b.	Same as 4a—but open space below floor exposed to outside	32
5. INFILTRATION (AIR LEAKAGE)		Multiply each sq. ft. of window and door area by:
a.	WINDOWS AND DOORS. Average fit—Not weatherstripped	50
b.	Average fit—weatherstripped (or equipped with storm sash)	30
c.	Poor fit—not weatherstripped	140
d.	Poor fit—Weatherstripped (or equipped with storm sash)	43
e.	EXTRA FOR EACH OUTSIDE DOOR	1000
f.	EXTRA for air lost up fireplace flue	3000

*Above factors are approximate heat loss through each sq. ft. of surface with 70° inside and —30° outside.

The map at the right is zoned according to winter design temperatures, and gives percentages by which results from Step C should be multiplied to find actual heating requirements.

HOW TO USE THE CONDENSED METHOD HEAT LOSS FACTORS

Quantities of heat are measured in units called British Thermal Units (abbreviated BTU).

Heat is lost from a warm building through all of its surfaces exposed to lower temperature. This is called "transmission losses." Heat is also lost due to wind blowing through cracks around windows and doors. This is called "infiltration losses." Total heat loss of a building is the sum of transmission losses plus infiltration losses.

A The first step is to find how much heat is lost by transmission. Calculate the areas in square feet of all exposed surfaces of the room or building including:

1. Window and outside door area (combined).
2. Net outside wall (gross wall area minus item 1).
3. Ceiling area (below unheated room or attic space). Inside walls adjacent unheated rooms.
4. Floor area (if space below floor is not heated).

Each of the above areas should then be multiplied by the proper factor from one of the Condensed Method tables.

B Next, estimate infiltration losses. This depends on the amount of cold air blown into the house, which is in turn dependent on the size of the window or door and the width of the crack around it. Simply multiply the area of windows and doors already calculated in Step A by the infiltration factor selected from Table 5. Also, since there is more air leakage through door cracks than through window cracks, allow an additional 1000 BTU for each outside door. Add 3000 BTU for each fireplace.

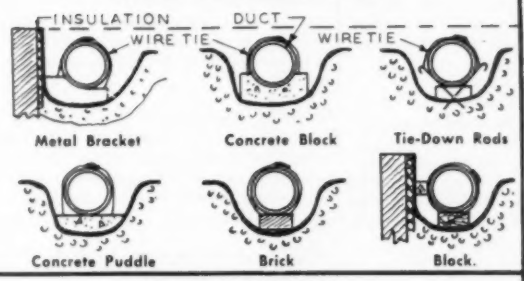

C Add the infiltration losses (Step B) and the transmission losses through the windows, walls, etc. (Step A) all together. The sum is the heat that would be lost from the room or building—if the temperature difference between inside and outside were 100°. In other words, this is the amount of heat it takes to maintain 70° inside when the outside temperature is 30° below zero, which would occur only in the very coldest sections of the United States.

D Heating requirements are naturally less where the weather does not get so cold. The average minimum temperature in Dallas, Texas, for example, is only 10° above zero. The "design temperature difference" between inside and outside would be 70° minus 10° equals 60°. Therefore, the heating requirement is only 60/100 or 60% of the amount based on 100° TD.

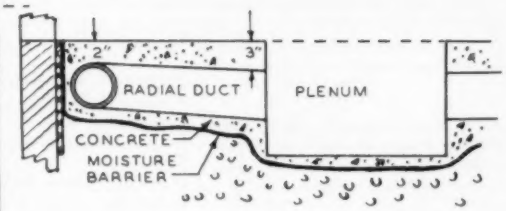

Section 4 Plumbing-Heating-Ventilating-Electrical & Appliances

GLOSSARY OF LIGHTING TERMS

ABSORPTION — When light strikes an object, some of the light is reflected and some is absorbed. The darker the object, the more light it absorbs. Dark colors absorb large amounts of light, much as a blotter soaks up ink.

AMPERE — Unit of measure of electric current; indicates rate of flow of electricity as gallons per minute indicates rate of flow of water. A milliampere (ma) is one-thousandth of an ampere.

BALLAST — A current-regulating auxiliary device required to operate a fluorescent tube.

BLACK LIGHT — Another name for that portion of invisible ultraviolet radiation which has the ability to cause certain minerals to fluoresce or glow visibly.

BOBECHE — A saucer-shaped element at the base of or below the candle socket in a candle-type fixture. In some modern fixtures of traditional styling the bobeche is often used to conceal light sources.

BRIGHTNESS — The degree of apparent lightness of any surface emitting or reflecting light. Everything that is visible has some brightness. See Footlambert.

CANDELABRA — A branched ornamental candlestick or lampstand.

CATHODE — A fluorescent lamp part which serves to conduct the electricity from the wires into the gas. Fluorescent lamps are of two types, depending on whether they have "hot" cathodes or "cold" cathodes. The hot cathode is a coiled coil tungsten filament, operating at a higher temperature than the cold cathode. The latter is an iron cylinder resembling a large thimble. The electrical characteristics of the two are somewhat different, and each has certain advantages.

CERTIFIED — Term applied to portable lamps and fixtures made to meet certain specifications for quantity of light, quality of lighting, sturdy construction, and safety. Fluorescent ballasts and starters meeting certain performance requirements are also "certified." Such products usually carry a certification tag or label.

CHANNEL — A common term for the enclosure containing the ballast, starter, lampholders, and wiring for a fluorescent lamp.

CORNICE — The crown molding used both to cover and to embellish the intersection between side walls and ceiling. In modern lighting practice it is a horizontal member of wood or plaster attached to the ceiling approximately 6 to 8 inches from the wall, with lighting incorporated between it and the wall.

COVE — In modern lighting practice an element of design mounted on an upper wall to conceal light sources and provide indirect lighting.

CURRENT — *Alternating Current* (AC) Electric current which reverses its direction of flow periodically. *Direct Current* (DC) Electric current which flows continuously in one direction.

CUT-OFF — The angle up from the vertical at which the reflector or shielding medium cuts off the view of the light source.

DIFFUSION — The scattering of light rays, so that the light is emitted or reflected from all directions. Objects in a room in which the light is completely diffused from the walls, ceiling, and floor would cast no shadows.

DIRECT LIGHTING — A lighting system in which all or nearly all of the light is distributed downward by the luminaire. Fixtures that send somewhat more light upward but are still predominantly of the direct type are called *semi-direct*.

LIGHT DISTRIBUTION OF LUMINAIRES — Lighting fixtures are classified according to the manner in which they control or distribute the light, as *direct*, *semi-direct*, *direct-indirect*, *semi-indirect*, and *indirect*.

EFFICIENCY — The efficiency of a lighting fixture is the ratio of the light it emits to the total light produced by the bare bulb or tube.

FLUORESCENT TUBE (F) — A light source in which light is produced by a fluorescent powder (phosphor) coated on the inner surface of a glass tube. A mercury vapor arc between electrodes (see cathode) sealed into each end of the tube generates ultraviolet radiation which is changed by the phosphor into visible light.

FOOTCANDLE (ft-c) — A quantitative unit for measuring illumination. It is approximately the illumination produced by a plumber's candle at a distance of one foot.

FOOTLAMBERT (ft-L) — A quantitative unit for measuring brightness (apparent lightness). The footcandles striking a reflecting surface, times the reflectance of the surface, equals the brightness of the surface in footlamberts. If a surface placed one foot from a candle is perfectly white and diffuse, the brightness of that surface is approximately one foot-lambert.

GIRANDOLE — A Traditional wall bracket, sconce, or a table lamp intricately designed with several candle-arms each holding multiple candle branches.

GLARE — Light or brightness in the field of view which causes visual discomfort and/or interferes with seeing.

INCANDESCENT BULB (Inc) — (Also called *filament* bulb.) A light source in which light is produced by a tungsten wire (filament) heated to incandescence by passing an electric current through it.

INDIRECT LIGHTING — A type of lighting system in which all or nearly all of the light is distributed upward to the ceiling. Fixtures that send somewhat more light downward but are still predominantly of the indirect type are called *semi-indirect*.

LOUVER — A strip or strips, either flat or circular, used as a shield to restrict the view of the light source to certain angles.

LUMEN — A quantitative unit for measuring light output.

LUMILINE — A tubular incandescent light source which has a filament extending the length of the tube and connected at each end to a disc base.

LUMINAIRE — A complete lighting unit: ceiling fixture, wall bracket, portable lamp, or built-in or applied units.

MATTE SURFACE — A non-glossy dull surface, as opposed to a shiny surface. Light reflected from a matte surface is diffuse.

PARABOLIC REFLECTOR — A reflector shaped to control the light in a narrow beam.

REFLECTANCE (Reflection Factor) — The ratio of the light reflected by a surface to the light falling upon it.

SHIELDING — An arrangement of light-controlling material to prevent the direct view of the light source.

SHIELDING ANGLE — The angle down from the horizontal at which the shelding medium conceals the light source.

SPECULAR SURFACE — Shiny or glossy surfaces, including mirrors and polished metals. Light reflected from them is not diffuse.

TRANSMISSION — The passage of light through a material. The *transmittance* (transmission factor) of an object is the ratio of the light transmitted by the object to the light falling upon it.

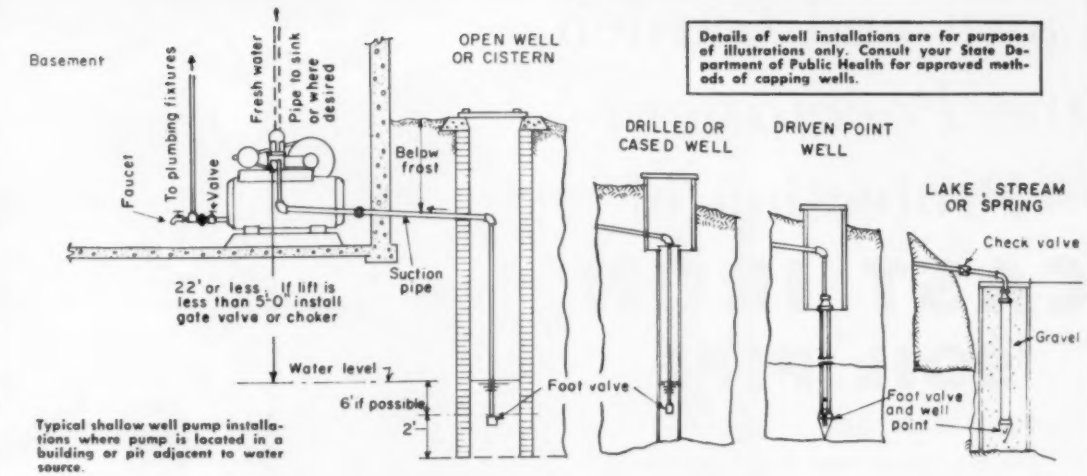

VALANCE — In lighting parlance, a horizontal member mounted across the top of a window to conceal light sources. It may be made of wood, metal or other materials, and painted or covered with paper, fabric, glass or mirror.

VOLT (v) — Unit of measure of electrical pressure; analogous to water pressure in a pipe. Most residential circuits in the United States are supplied with voltages between 110 and 120 volts.

WATT (w) — Unit of measure of electrical power — the rate of work done.

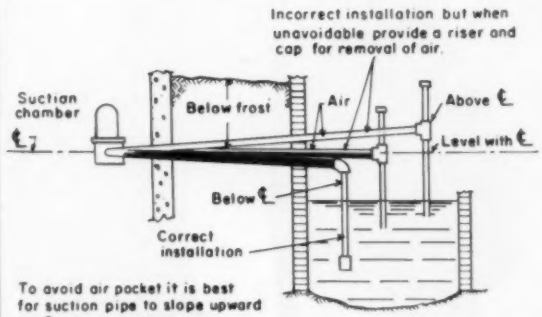

Section 4 Plumbing-Heating-Ventilating-Electrical & Appliances

SHALLOW WELL PUMP INSTALLATION

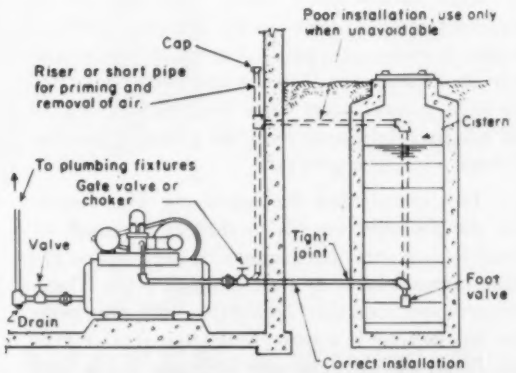

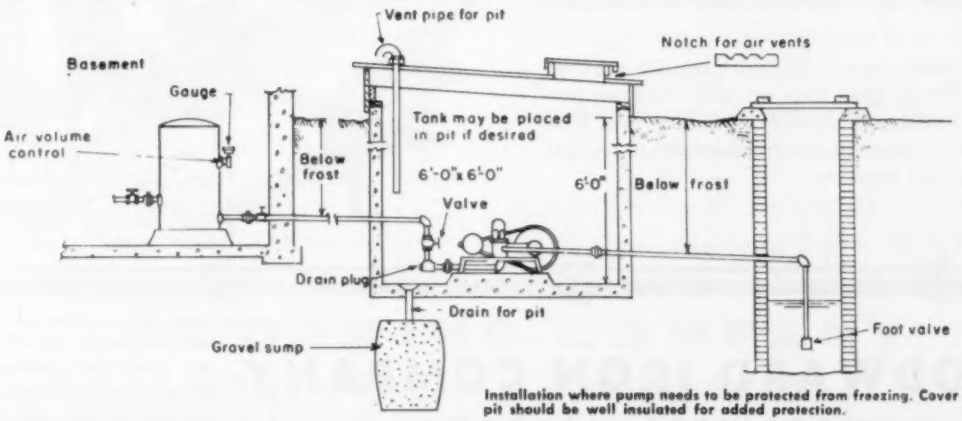

Details of well installations are for purposes of illustrations only. Consult your State Department of Public Health for approved methods of capping wells.

Typical shallow well pump installations where pump is located in a building or pit adjacent to water source.

To avoid air pocket it is best for suction pipe to slope upward from water supply to pump. Min amount 1" every 5'-0"

Installation where pump needs to be protected from freezing. Cover of pit should be well insulated for added protection.

Give their Lovely Lawn and Garden the *Permanent* Protection of

CAST IRON SOIL PIPE

The big reason why this happy couple built this charming home was to have a large yard and garden. They yearned to grow things . . . trees, shrubs and flowers! They wanted an outdoor terrace to enjoy in the evenings and entertain friends . . . and a barbecue pit where they could cook juicy steaks on a charcoal fire. It's been several years since they moved in . . . and are they delighted with the growing beauty of their attractive grounds!

This couple has the satisfying knowledge that the grounds, on which they've lavished so much loving care, need never be torn up to replace impermanent or root clogged pipe. Their architect specified *Cast Iron Pipe*—the *only* pipe that has behind it a truly long-time service record. Roots cannot penetrate it, heavy loads will not crush it. It is made and laid to outlast the home.

If your clients—like this couple—cherish outdoor living, give their property the same permanent protection. Specify Cast Iron Soil Pipe from street to roof for freedom from trouble and long run economy.

WOODWARD IRON COMPANY

WOODWARD, ALABAMA

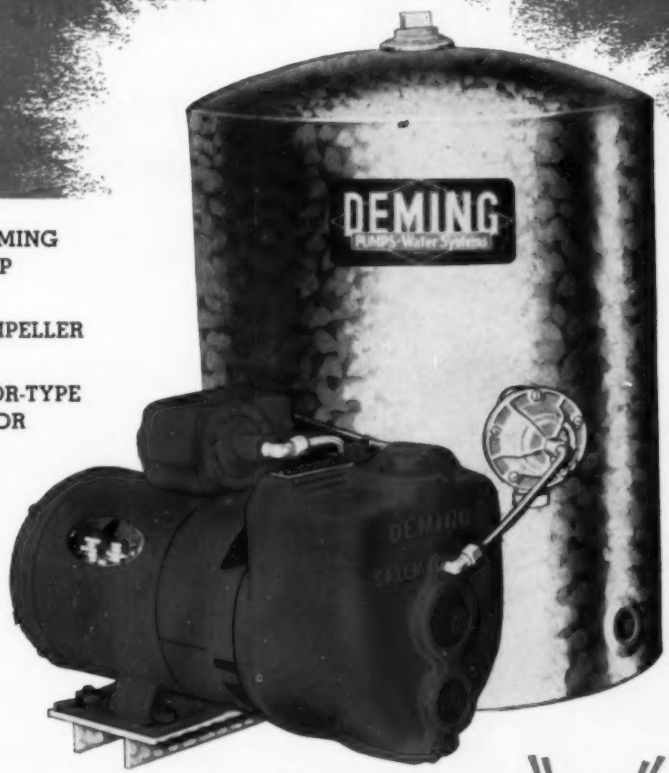

Our Company does not manufacture pipe, but produces quality pig iron from which pipe is made by many of the nation's leading manufacturers.

THEY HAVE TO BE MODERN!

The Venetian Isle Motel, Miami, Florida has Ingersoll Plumbing Fixtures installed in each of its 100 units. Quick completion and long term durability and attractiveness meant that the fixtures specified had to meet exacting requirements. No matter whether you are building or supplying a hotel, motel, housing project or individual home, the *modern* line of plumbing fixtures means the same . . .

Architect . . . McKay-Gibbs
Builder . . . Chaves Const. Co.
Plumbing . . . Dade Plumbing Inc.

Ingersoll
PLUMBING PRODUCTS

means

lower cost!
faster installation!
easier maintenance!

Your turnover directly reflects your use of up-to-date materials

perfect for practical economy

No longer is it necessary to accept inferior materials and workmanship in plumbing fixtures in order to achieve economy. Ingersoll's bathtub Model T-103 with wide, integral seat is an excellent example of luxury coupled with economy. For even greater savings, Ingersoll has recently introduced a straight front tub, Model T-106. Both tubs are available in white and a choice of lovely colors.

INGERSOLL cuts your costs . . . increases your sales

Lower Cost is achieved through the use of modern materials coupled with modern manufacturing methods. The basic material is steel . . . strong, durable, lighter weight. Only steel can be manufactured in volume for lower costs. And, the lighter weight of steel means freight and handling charges are less.

Faster Installation of INGERSOLL fixtures is accomplished in two ways: light weight—exact, die-formed dimensions. Now only one man is required instead of two. Carpentry, plumbing rough-ins and tile setting can be counted on to fit exactly without expensive changes.

Easier Maintenance is a prerequisite for modern fixtures in public or private use. The stainproof, acid-resisting porcelain used on INGERSOLL Plumbing Products makes cleaning simplicity itself . . . means that medicines, soaps, bleaches and disinfectants will not effect the finish.

AIRTEMP YEAROUND AIR CONDITIONING

Sells Homes Faster!

Complete air conditioning makes homes more attractive to buyers, as every builder knows, and Airtemp offers you 21 years of specialized experience—a complete builders' line of equipment—years-ahead engineering by Chrysler.

FREE MERCHANDISING KIT FOR HOME BUILDERS

The Airtemp builders' merchandising program gives you powerful, individualized selling help to produce the fastest home sales ever.

To get prospects to your model home, use these helps:

Colorful printed folders tailored to your specific homes.

Advertising materials—newspaper mats, billboard design, radio scripts, TV film, publicity guide, printed invitations, theatre-style tickets, direction signs, door signs.

To sell new-home prospects, use these helps:

Model home preview promotion

Air conditioning benefit cards • Movie in sound and color
Product picture cards • Coronet 8-page reprint
Air conditioning benefit list • Model home favors, prizes

Most materials are free. The others are priced below actual cost. For full details, phone your Airtemp dealer—he's in the Yellow Pages—or write: Airtemp Division, Chrysler Corporation, Dept. AB-4-56, Dayton 1, Ohio.

4 newly designed, lower cost yearound airconditioning systems

help builders close more sales

Builders can now choose from four compact WILLIAMSON Wethermatic Yearound Airconditioning systems . . . the cooling equipment requires *no floor space*. Williamson Wethermatics are low cost, quickly installed and premerchandised with an all-round national consumer promotion in major shelter magazines.

Hi-Boy Heating
with Plenum Type Cooling

Lo-Boy Heating
with Duct Evaporator Cooling

Counterflow Heating and Cooling

Suspended Horizontal Cooling

WILLIAMSON

"WETHERMATIC" SYSTEMS CONSIST OF:

The "SPECIAL" Line—A Builders Type Warm Air Furnace

New lower prices reflecting mass production savings

- 20 gas-fired, 12 oil-fired models
- 60,000 to 145,000 B.T.U. Range
- Hi-Boy, Lo-Boy, Counterflow, Gravity and Horizontal Units
- Pre-Wired, pre-Assembled, factory test-fired.

New color choice . . . Gray Metalescent or Gleaming White

AIRefrigeration Waterless Cooling—

- No floor space installations
- No costly sewer or water connections
- Internally factory wired, easily installed.
- 2, 3, 4, 5 or 7½ ton size models
- Console and suspended models where desired.

Prefabricated Duct Pipe & Fittings—For Heating and Cooling

- Die Cut, prefabricated, each fitting interchangeable with others
- Fittings shipped packed per house plan
- Tailor-made look, designed to fit within the joists
- Designed for minimum air resistance—maximum air flow efficiency.

Builders Know Famous Brands Make Quicker Sales

• New-home prospects have confidence in trusted brand-names like Orangeburg Root-Proof Pipe. Its reputation for high quality has helped many a builder "close the sale."

How Orangeburg Pipe saves trouble, cuts costs and builds profits for builders is a story of modern construction practice. It takes modern materials and time-cutting methods to reduce costs today. That's why home builders and general builders everywhere are turning to Orangeburg Root-Proof Pipe.

Orangeburg's long 8-foot lengths are easy to install—so strong and resilient that lines in service 50 years operate like new. Famous Taperweld Joints seal root-proof with a few hammer taps—no cement, no compounds. Orangeburg is readily cut with a coarse tooth saw and, where necessary, quickly tapered on the job with a lightweight tapering tool.

Orangeburg Root-Proof Pipe is made in 2", 3", 4", 5" and 6" sizes. Use it for house-to-sewer and septic tank connections, downspout run-offs, storm drains and other outside non-pressure underground lines. Orangeburg also comes Perforated *in 4" size for foundation drains, septic tank filter fields, draining wet spots everywhere. Look for the Orangeburg trademark. Be sure you get the* genuine. *For more facts write Dept. AB-46.*

So you think you've seen

BATHROOM VANITIES?

You've never seen anything like NATIONAL VANITY's stunning new REGENCY line. So elegantly designed and fashioned, they look like expensive custom-built pieces. Actually they're mass-produced to save you money and to make money for you. They've taken builders by storm. For the first time, here are brand new decorator-styled vanities surfaced with genuine Formica ... with matching, sliding mirror-front, Formica medicine cabinets.

The vanities are cleverly sloped to allow plenty of leg room. The sliding doors are crafted of sparkling LUSTERITE ®* that slide easily with the touch of a finger. One or two sink cut-outs. Even wonderfully convenient cosmetic boxes.

Could you ask for anything more? Of course! NATIONAL VANITY's colorful new brochure. Write for it Now!

See the complete REGENCY line, the popular MODERN line, the enticing CLASSIC. Never before has *one* producer offered so much to builders—so economically.

Send for your color brochure today.

Sanitary drainage systems installed FASTER with less effort

Copper tube roughing-in layout for sanitary drainage system of two-story house—two complete baths and kitchen sink. Circled areas are sections which can be preassembled.

Lightweight Copper Tubes and Fittings permit use of time-saving prefabrication methods

In the copper tube sanitary drainage system at the left, four sections (circled) can be prefabricated in the shop while waiting for construction to reach the roughing-in stage. The work is done easier and faster and helps eliminate costly delays to building schedules.

Preassembled units are easy to handle. Using ANACONDA Type M Copper Tube and Anaconda Fittings, the approximate weights are:

Section 1 — 9½ lb.
Section 2 — 13 lb.
Section 3 — 9¼ lb.
Section 4 — 39¾ lb.

When the lighter weight Copper Tube, Type DWV, is used, the total weight will be 10 lb. less.

Compare these weights with similar sections made with ferrous pipe and fittings.

Copper tubes offer other advantages:

Save space. A 3" copper tube stack with fittings can be installed within a standard 4" stud partition.

20′ standard lengths eliminate many joints in long runs.

Cutting copper tube to exact dimension is fast and easy with hacksaw or wheel cutter.

Solder joints can be made easily in tight places and the compact fittings reduce cutting of studs and joists.

A correct fitting for every part of every job

There is a full line of ANACONDA Cast Bronze Solder-joint Fittings. They are available in nominal sizes from 1¼" to 8", range from elbows, tees, couplings, adapters, regular and long-turn tees, Y-branches, traps, closet bends and flanges.

Write today for booklet, "Copper Tubes for Sanitary Drainage Systems," and see why more and more builders and plumbing contractors are changing to copper. Address: The American Brass Company, Waterbury 20, Conn. In Canada: Anaconda American Brass Ltd., New Toronto, Ont.

Heating

Cooling

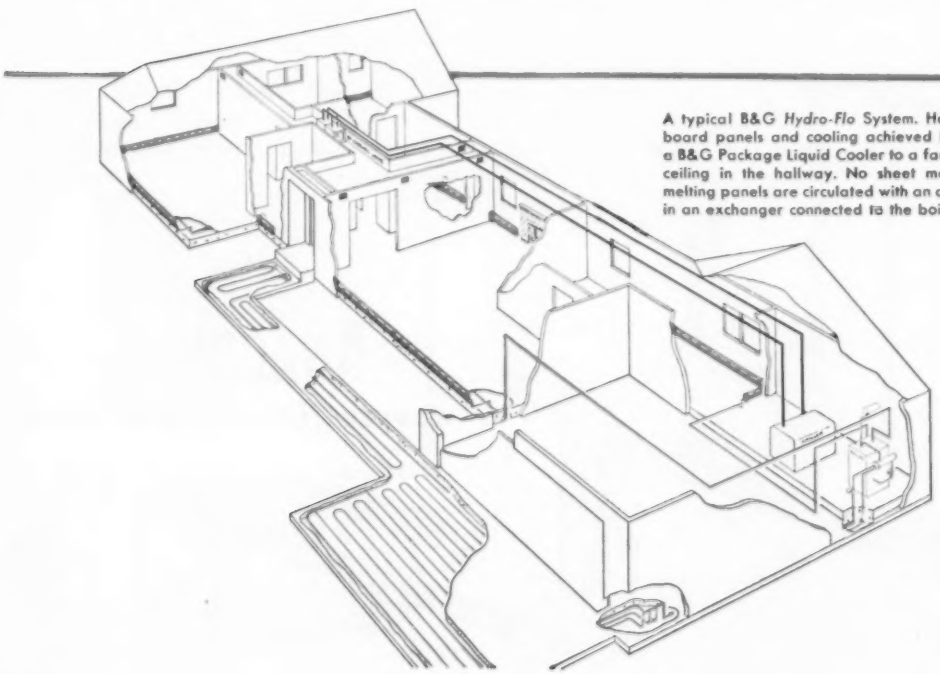

Snow Melting

The Swing is to Water... because only

To builders in every income bracket, the B&G *Hydro-Flo* System offers the comfort, convenience and economy benefits obtainable only with mechanically circulated water. Money can't buy finer... yet even the small home builder can afford it, because the B&G *Hydro-Flo* System is *amazingly flexible* in application. *The builder can start with better heating and add other Hydro-Flo features as his budget permits.*

The basic *Hydro-Flo* Forced Hot Water System provides radiant, sunny warmth—assures warm floors—draftless rooms. Automatic modulation of the heat supply keeps indoor temperature constantly at the comfort level—prevents wasteful overheating. A limitless supply of *low cost* hot faucet water is always ready, heated by the same boiler that heats the house... no space-wasting, separately fired water heater needed.

Summer cooling—*with water as the cooling medium*—can be added at any time in a choice of several ways. Snow melting equipment, too, for relief from back-breaking labor. And don't forget that the B&G *Hydro-Flo* System is virtually a lifetime installation—no frequent repairs and replacements.

A typical B&G *Hydro-Flo* System. Heat is provided by baseboard panels and cooling achieved by circulating water from a B&G Package Liquid Cooler to a fan-coil unit over a dropped ceiling in the hallway. No sheet metal ducts needed. Snow melting panels are circulated with an anti-freeze solution heated in an exchanger connected to the boiler.

Hot Faucet Water

Zoning

water offers **All Five!**

THE B&G BOOSTER

...key unit of the B&G *Hydro-Flo* System

Engineered for compactness, *silent* operation and years of service, this electric pump circulates water for heating the house in winter, cooling it in summer and for snow melting panels. It is built with precision manufacturing methods which translate good design into superior product... permit mass production with custom-built quality.

The B&G Booster has a solid reputation for *quiet*, dependable and long-lived operation. *That's why over two million units* have been sold to date!

PREWAY Bilt-Ins... gas or electric make your dollar more productive

Patents Pending

Choose PREWAY gas and electric Wallchef ovens in "302" Satin Stainless Steel, Antique Copper, White, Sunshine Yellow or Vintage Green Porcelain Enamel.

Approvals:

Acceptable to: F.H.A. — V.A.

As every home builder knows, the one best way to beat today's profit squeeze—and tomorrow's—is to make each unit of area, each man-hour of labor, each dollar of investment more productive. Whip-cracking won't do it, but careful planning will . . . planning based on accurate up-to-the-minute knowledge.

For example, if you have the facts on PREWAY, you know you can readily trim a hundred dollars or more from the cost of a modern kitchen by using Wallchef and Counterchef Bilt-Ins. These fully approved units, with patented features and all automatic controls, are the easiest to install. You gain time, save on labor! And because they are judged the world's most beautiful built-ins, available in a wide range of finishes, they add a special note of luster to the appearance of your kitchen.

Investigate the potential Wallchef and Counterchef units offer you. Plan to see them at the distributor's display room in your area . . . and write today for product bulletins on the type that interests you — gas or electric.

Illustrated is PREWAY'S four-element electric Counterchef in "302" Satin Stainless Steel. Available, too, in two-element units. PREWAY gas Counterchefs also designed in two or four-burner units, in "302" Satin Stainless Steel or White Porcelain Enamel.

The Most Complete Line of Built-In Cooking Equipment for the Home.

...why you've got

What will happen when Mrs. New Homeowner plugs in all these electrical appliances? Will she suddenly find her modern home *not* as up to date as she thought?

Throughout the country, millions of homeowners are discovering an important fact—*home wiring must be able to handle the multitude of appliances they use today*. What's more, provisions must be made for the many *more* appliances they plan to install tomorrow!

No doubt about it – the *wiring* in a home should be planned as carefully as the rest of the house! A 3-wire service entrance of *at least* 100 amperes capacity, wires large enough to carry full, healthy loads of electricity, plenty of circuits and an abundance of outlets – all these are vital

REASONS

to plan for power!

to the homes of today.

Plan *your* homes with power in mind – with emphasis on sound, adequate wiring all through the house. You'll make your homes easier to sell; you'll add to your reputation as a designer of *quality* homes!

Free Home Wiring Wall Chart! Send today for Kennecott's handy wall chart showing typical home circuit loads. Use it as a check list when planning home electrical systems. For your copy, write Kennecott Copper Corporation, Dept. AB-46, 161 East 42nd St., New York 17, N. Y.

Mix-or-Match Modular Kitchens

—A NEW CONCEPT IN KITCHEN-LAUNDRY DESIGN

It's General Electric. It's here today!

Here are new G-E "Mix-or-match" Modular Kitchens, offering the *complete flexibility* every builder desires.

Flexibility in *choice*, for all component appliances are the newest G-E models . . . now built *in standard measurement* . . . to "stack-on" in any arrangement you want.

Flexibility in color, for all components are in G.E.'s 5 Mix-or-Match colors.

Flexibility in design, for this dramatic concept fits any and every kitchen-laundry plan.

THEY'RE READY TODAY!—NOW!

These versatile appliance components are already in full production. They're ready for delivery *right now* . . . to give you all the room you need to create individual, appealing kitchen-laundries.

GET THE FULL STORY!

Write NOW to Home Bureau, General Electric Co., Appliance Park, Louisville 1, Kentucky. You'll receive the complete and detailed *Modular Kitchen-Laundry Design* booklet, Pub. #B24-1415, showing you how this G-E concept fits into your house-building profit picture.

7 pages of new G-E "built-in" kitchen-laundries!

Progress Is Our Most Important Product

GENERAL ELECTRIC

Here's the new exciting G-E KITCHEN CENTER

4 appliances in 1 unit . . . under long-lasting stainless steel.
Internal water distribution and wiring systems cuts installation costs.

The flexibility you want in a package kitchen! This 1956 General Electric package kitchen comes in two sizes—8½ or 9½ feet long. And, there are *8 basic variations* of this dramatic unit to choose from. It's available with or without a combination washer-dryer, the low oven or waist-high oven. Special under-counter cabinets can be substituted for these appliances.

And, of course, in any of General Electric's five Mix-or-Match decorator colors.

The choice is YOURS—to suit your customers' needs, the price of your houses, the design of your kitchens.

And you'll save, no matter which variation you choose—for this internally plumbed and wired unit is easy to install!

Look to General Electric for Your Kitchen Planning! *Let us help you design a merchandising kitchen.* The General Electric Company will supply you with their booklet on *Kitchen Design Ideas*, the Kitchen Center *Specification Sheet*, and the *Builder Handbook*, a detailed pre-installation guide. You receive free, for the writing, pages of ideas showing how this modern General Electric appliance saves you money *and* helps you sell homes faster, easier, and with more opportunity for profit.

Remember, 55 out of every 100 women asked said they thought General Electric made the best home appliances! WRITE NOW TO: General Electric, Department KC-109, Appliance Park, Louisville 1, Kentucky.

Progress Is Our Most Important Product

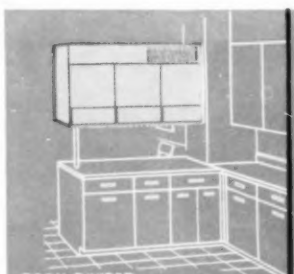

GENERAL ELECTRIC

New "Eye-Level" General Electric Wall Refrigerator-Freezer

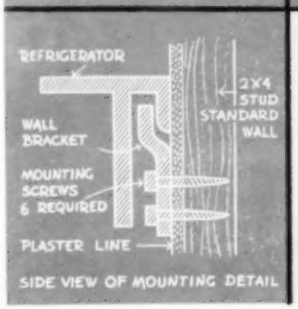

OFFERS YOUR HOUSE BUYERS THE "CUSTOM-BUILT" STYLING THEY WANT!

Available in Mix-or-Match colors: Canary Yellow, Turquoise Green, Petal Pink, Cadet Blue, Woodtone Brown—or White. General Electric Alnico Magnetic Doors close silently and with a more efficient seal.

YOU HANG IT ON THE WALL LIKE A PICTURE!

Installation is simple. Unit is 64 inches long, 39½ inches high and 17⅞ inches deep. Mounted securely on the wall with special "picture hook" bracket anchored to the wall studs. The main illustration shows a typical installation. Can also be recessed into the wall or placed in a room divider arrangement.

BIG 11-CUBIC-FOOT CAPACITY!

No matter what price house you're building, this exciting new concept in refrigerator design gives your homes greater sales appeal . . . provides the touch of quality that adds to their value.

Here, in a beautiful compact unit, is a big 11-cubic-foot refrigerator-freezer that *hangs on the wall just like a cabinet*. And because it can be hung at any height to suit your home buyer, it puts all foods at eye level. By placing this luxurious G-E Wall Refrigerator-Freezer on the wall, you free floor space for extra counter area and floor cabinets.

Call your G-E distributor for price and information. General Electric Company, Appliance Park, Louisville 1, Kentucky.

Progress Is Our Most Important Product

GENERAL ELECTRIC

Six reasons why G-E built-in

5 Mix-or-Match colors

California builder sold 132 homes in 22 days. He writes "G-E built-ins and color did it." The response to these $13,500 to $17,500 homes at West Covina is one of dozens of examples of how colorful General Electric ranges help close the sale for builders.

"General Electric appliances are selling our homes" comes the enthusiastic report from 7 builders in the Chicago area. Here is a canary yellow General Electric built-in range in a Brynhaven Happiness Home. It styles up the kitchen, makes selling the rest of the house easy.

"Out of 36 homes, 30 ordered built-in ranges" wired salesmanager of Currey—a successful Denver, Colorado development. "And," he adds, "only one specified white." Home builders coast to coast agree G-E built-in ranges are selling homes almost on the strength of the kitchen alone.

ranges belong in your kitchens

Mix-or-Match colors give the range and its surroundings an expensive "decorator" look that helps attract prospects. Ovens and surface units are also made in satin chrome and stainless steel.

Easily installed. Surface unit assembly fastens with a few thumb screws.

Spacesaving G-E built-ins don't take space for separate broiler. So they allow more storage room.

Twin oven–venting system keeps cabinets and walls from streaking.

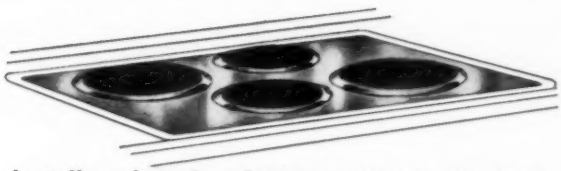

Popular with women. 55 out of 100 questioned said they believe General Electric makes the best appliances.

More features. Pushbuttons, big wide-opening ovens. "Focused Heat" broilers. Four widely spaced top units. For details write to General Electric Company, Appliance Park, Louisville 1, Kentucky.

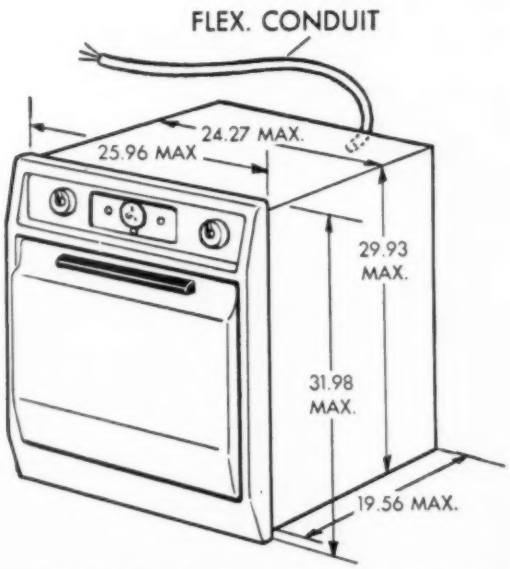

NO OTHER BUILT-IN RANGE HAS ALL THESE FEATURES

Easiest built-in ranges to install!

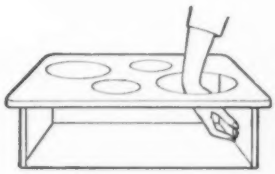

Oven installs easily with only one rough-in opening in a 27-inch cabinet or is made to fit (and made to match) General Electric Cabinets. Put oven at any height, practically anywhere in the kitchen. And you can build luxury sales appeal into your homes by installing a pair of General Electric built-in ovens, above each other or side by side.

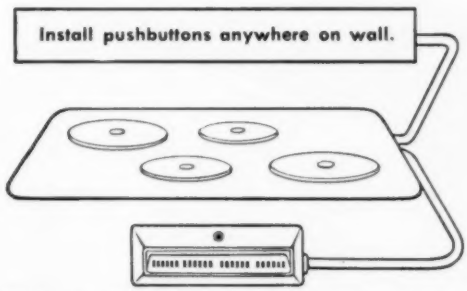

Install cooktop in minutes. Sealed-tight, sink-rims installation in a 36-inch base cabinet lets you mount cooking surface flush with countertop. The whole surface unit assembly drops neatly and quickly into place.

Same wide 21-inch oven as General Electric uses for all its ranges. Holds a huge meal. Lined with eye-catching "starlight" grey enamel. Calrod® bake units and "Focused Heat" broiler are enclosed. No old-fashioned open coils.

Simply reach through to fasten. Counter gripper thumb screws give easy, "stand up" installation —cut installing time in half.

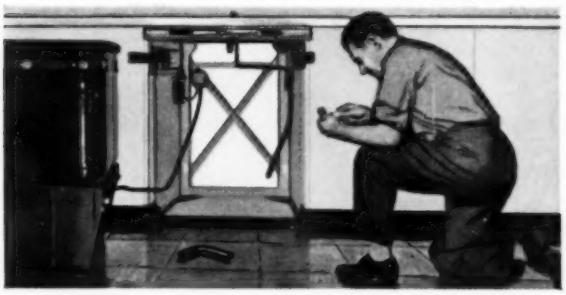

Multiple-position pushbuttons can be mounted in front of cooktop cabinet, or in any back wall position. Switch box fits between studs on 16-inch centers. Special plug permits installation in the wall without disconnecting surface units.

GENERAL ELECTRIC

Designed with the builder in mind . . .

New G-E Dishwashers are

Here's why:

No reaching around unit to install! Entire tub can be removed from cabinet to make plumbing and electrical connections readily accessible! Knockouts on each side of cabinet permit easy installation of right or left drain.

Simplified internal plumbing lets you connect a G-E Dishwasher directly to the drain or through a waste air gap. It may also be connected to a disposer as illustrated.

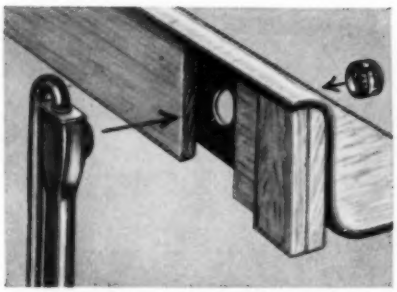

We don't claim that kitchens like this will actually sell your houses for you—but it is a well-known fact that when kitchens are equipped with G-E Dishwashers and Disposalls,® those houses are easier to sell! And no wonder—for General Electric appliances are *first* in consumer preference!

This kitchen is also equipped with General Electric Cabinets.

The dishwasher and cabinets are available in five beautiful Mix-or-Match colors, offering unlimited possibilities for personalized decorator schemes. Why don't you contact your G-E distributor right away and ask about the new low, low prices available to accredited builders? General Electric Company, Appliance Park, Louisville 1, Kentucky.

easiest to install!

New low-cost waste air gap method of installation provides maximum sanitation, eliminates need for prior roughing in. Trap is used for both sink bowl and dishwasher.

G-E Dishwashers are also available in this free-standing model with work surface of Textolite® or baked enamel. Front panels of free-standing and built-in models available in choice of four natural woods as well as five Mix-or-Match colors.

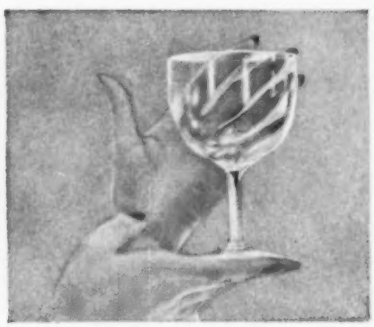

For a modern, garbage-free kitchen install a G-E Disposall that flushes away all food waste before it can become garbage! Available in deluxe Twistop and Continuous feed models.

G-E Dishwashers are unmatched in convenience—performance!

Giant-size capacity . . . tub has been especially designed to take all the assorted shapes and sizes found in bowls, pans and platters, in addition to regular dinnerware! Washes complete service for eight—or all the dishes the average family would use in a day!

G-E Dishwashers offer finest performance because they *power-pre-rinse*—double-wash and *triple rinse*—leave dishes sparkling clean —sanitized! Fan-driven warm air, supplied by a Calrod® heating unit, dries dishes thoroughly!

LOCATION? FINANCING? DESIGN? PLAN?

YES... plus the *Lift to Living* extras that make a house a home

These extras are the brand name accessories your customers know and want. Sueh things as Frigidaire full-home air conditioning . . . summer and winter for year 'round comfort.

Air Conditioning? We'll agree air conditioning alone may not sell a house. But it can help you sell more homes in 1956 more quickly, more easily! What's more, this valuable experience will guarantee you the ability and local reputation to *keep pace* with residential air conditioning, which conservative estimates indicate will be included in most new homes in five years.

That's why Frigidaire is adding to its 1956 line many newly-designed and field-tested air conditioning units. With these, Frigidaire offers you a complete, nationally advertised line with a name consumers know and trust.

Your Frigidaire air conditioning dealer will be glad to work with you in planning heating and air conditioning for your new homes . . . in promoting and selling them . . . and in providing a factory-trained service organization that will assure homeowners the unequaled satisfaction these Frigidaire products provide. See the Frigidaire dealer or distributor nearest you or write FRIGIDAIRE DIVISION, *General Motors Corporation,* Dayton 1, Ohio.

FRIGIDAIRE CONDITIONERS
adaptable to variety of installations

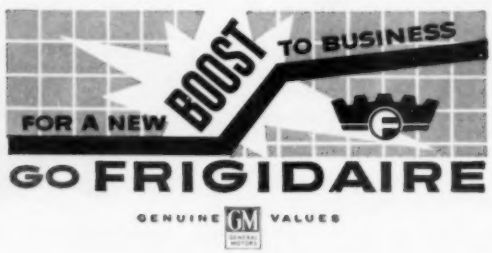

REMOTE

YEAR 'ROUND

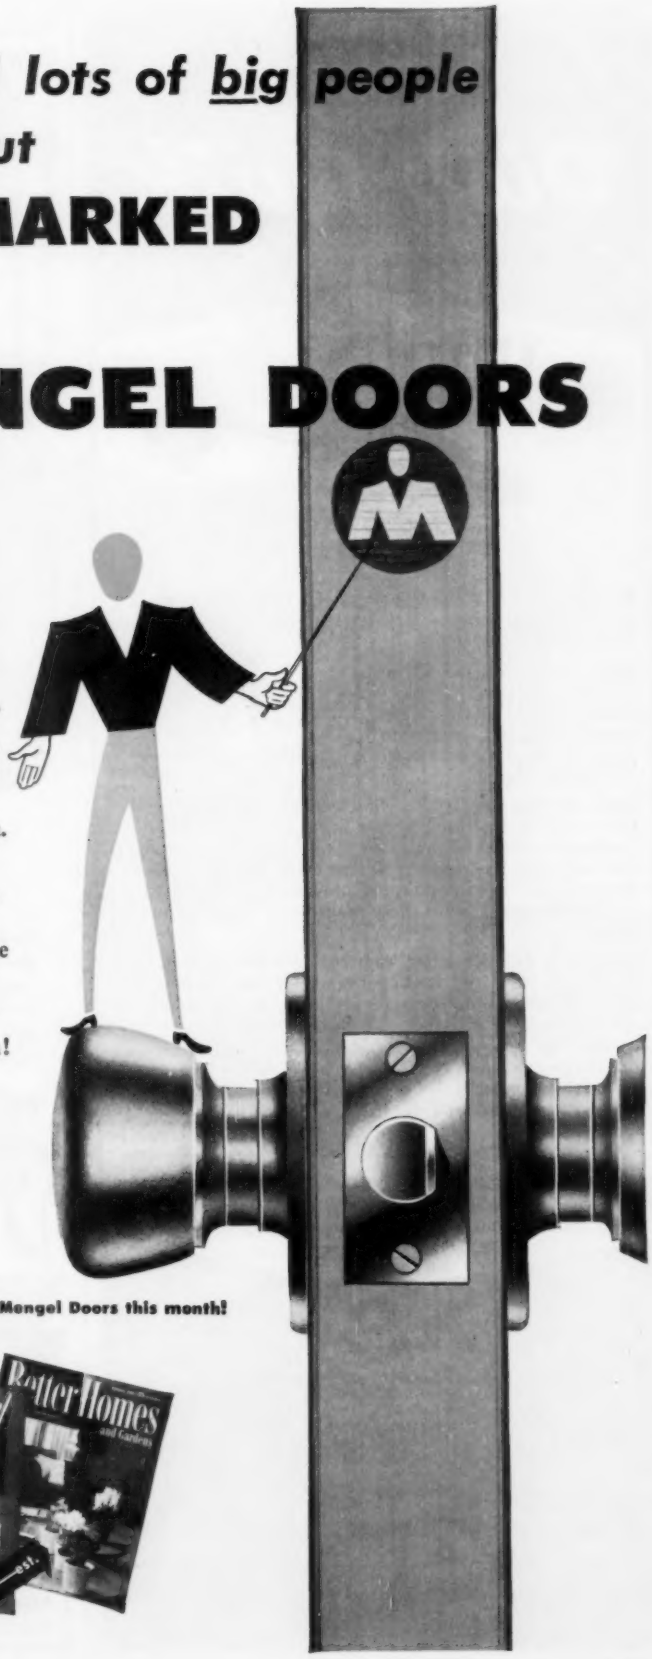

Frigidaire has a complete line of air-cooled and water-cooled residential units for add-on, combination, self-contained and remote-type installations.

Lots of little ads tell lots of big people about

TRADE-MARKED

MENGEL DOORS

ARCHITECT, builder or dealer—who are the biggest people in *your* work?

There's only one final answer. They're the people who buy, build and remodel houses . . . *consumers.*

You know the value of the new permanent, doweled-in-the-stile Mengel Door trade-mark. We think it's important that your customers be told this distinctive mark is a symbol of pride and protection. A guarantee of quality. A proof of fulfillment.

So, beginning with current issues of the magazines you see here, we're telling them. In a continuing campaign of small-space "eye-catcher" ads, they'll be reminded to look for the 'Mengel-Man' trade-mark long associated with Mengel *Permanized* Furniture.

You watch for these ads too. Hope you'll like them! Door Department, The Mengel Company, Louisville 1, Ky.

Mengel Doors equal or exceed the requirements of Bureau of Standards specifications CS200-55

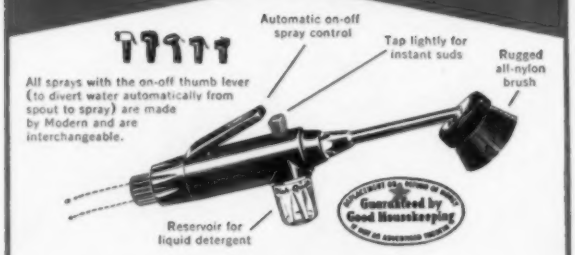

Over 54 million consumer readers exposed to Mengel Doors this month!

WHAT EVERY BUILDER SHOULD KNOW ABOUT

Dish-Quik®

The ALL-IN-ONE faucet dishwasher

Now you can add the selling punch of a complete dishwashing faucet to every kitchen—*and still specify a favorite, name-brand sink fitting!*

Here's how: Choose spray sink fittings made by any of the 40 leading manufacturers listed below—*and specify that these fittings be equipped with Dish-Quik!*

Here's why this is possible: These 40 manufacturers make 98% of all spray-equipped sink fittings. They *all* use built-in diverter valves and automatic plain-water sprays, created and supplied by Modern Faucet Mfg. Co. Dish-Quik, Modern's new automatic spray and dishwasher combined, is interchangeable with these plain-water sprays—*on the same hose.*

Dish-Quik is available either way: 1) *Attached* as standard equipment on many leading brands of sink fittings. 2) *Separately* as a replacement for automatic plain-water sprays—*on new or old fittings.* With Dish-Quik, you add a powerful, nationally-advertised sales feature to every new home or remodeling project...for a cost you will measure in fractions!

Fair Trade List $9.95 For separate unit, less hose.

you're the EXPERT!

As a builder, don't you find that your customers turn to you as the expert on heating equipment?

When it comes to heating, recommend Temco, built by America's Gas Heating Specialists.

And if it's one of the modern trim and compact single floor homes with crawl space underneath, recommend Temco's Automatic Gas Floor Furnace.

WHEN THEY ASK "WHY?"...
HERE'S THE ANSWER!

- Quickly, easily installed; fits right into the floor.
- Requires no basement, no costly excavation.
- Engineered to operate with equal efficiency on natural, manufactured, or L. P. Gas.
- Carries Temco's 20-year written warranty on Porcelain Enamel Heat Chamber.
- Approved by A.G.A., Guaranteed by Good Housekeeping.

NEW IDEA FOR AIR CONDITIONED HOMES

Texas builder uses attic exhaust fan to save on air conditioning

SHIRLEY WHITE OF AUSTIN, TEXAS, REPORTS ON TEST MADE IN OWN HOME WITH OUTSIDE TEMPERATURES OVER 100° FOR 30 DAYS

In June, 1955, Shirley White installed a Hunter Automatic Exhaust Fan in his own home to determine its value in reducing operating cost of air conditioning equipment. After a full season of operation, he is convinced this installation not only reduces electrical bills, but also improves air conditioning efficiency.

Builder White reports: "We went through one hot spell where the outside temperature exceeded 100° every day for 30 days. The Hunter Exhaust Fan, operating from a thermostat, would start between 9 and 10 in the morning and work continuously until sundown. The air conditioning system would respond to temperature drop on the outside within an hour or so after sundown. I attribute this to rapid relief of heat load in attic space, and estimate that the attic exhaust fan saved 1½ to 2 hours of air conditioner operation every day."

Builder White used soffit openings to provide fresh air intake and exhaust

The Hunter Exhaust Fan was located to discharge air into enclosed attic space above garage, with soffit vents to release it to the outside. Air intake was through soffit vents in the roof overhang of air conditioned area. In most applications the fan is installed in a gable and discharges to the outside, with air intake through louvers at opposite end of attic. (See drawing in next column.) Fan can be installed horizontally in the ceiling of carport or garage, or in a soffit. Such applications do not require use of the automatic shutter.

NEW HUNTER AUTOMATIC EXHAUST FAN REMOVES HEAT LOAD FROM ATTIC . . . makes air conditioning less expensive, more efficient

The Hunter Exhaust Fan has been specifically developed to remove the terrific buildup of summer heat in attics. This heat frequently reaches a temperature of 135° in hot weather, and even goes as high as 175° in some areas of the country.

This fan is equipped with a thermostat which starts the fan operation as soon as temperature in the attic reaches 95°. The fan will run continuously through the heat of the day until the outside air temperature has cooled to a point that will bring the attic temperature down to 90°. The thermostat then shuts off the motor and the fan louvers close automatically. A weatherstripped seal along the tip of each louver blade keeps out the elements.

The entire cost of the complete unit (which includes fan, mounting flange, shutter and thermostat) is only $78.00 retail list. Fan equipped with thermostat only, $64.00.

COOLS UP TO 8500 CUBIC FEET

The 16" Hunter Automatic Exhaust fan has a certified air delivery rating of 1750 c.f.m., which produces a complete air change every 4 to 5 minutes in an 8500 cubic foot area. The motor is single speed, totally enclosed capacitor type, with built-in thermal overload protector. It is fully guaranteed for one year by Hunter, builder of highest quality ventilating fans for 70 years.

Exclusive Selling Features of the *Thermostyled* *Classic* by DETROIT CONTROLS

CA-412

BEAUTIFUL STYLING . . . EYE-LEVEL READING

As new as tomorrow . . . that's what furnace manufacturers and dealers said when they first saw the Classic . . . and you'll agree with them the first time you install one of these smartly designed thermostats on your next job.

The satin-gold case and black dial with its easy-to-read numerals complements the color scheme of any room.

But enough about its beauty . . . that's obvious . . . what you want to know is how much does it cost and how easily it can be installed.

Yes, it looks like more money but it costs no more than other makes . . . and that's important to you, but equally as important is the fact that the Classic's wiring system is standard 2-wire low voltage—and it will practically replace any thermostat without wiring changes!

Now, add up these exclusive selling features of the Classic and compare them with other thermostats of any shape, size or style and we're sure you'll want to find out more about it by calling one of the Detroit Controls representatives in your district or writing us today for full information.

TIMED CYCLING Ends "HOT" and "COLD" Periods

Here is another Detroit Controls exclusive selling feature . . . Timed Cycling . . . the device that actually anticipates the heating needs of the home . . . controls room temperature within a fraction of a degree . . . provides the ultimate in heating comfort by eliminating over and under heating. Find out more about Classic, the "self-governing" thermostat, by writing for descriptive folder Form 1687 today.

The feature that helps sell homes

saves money for the builder

on labor and piping cost... and saves space, too.

It's the ELECTRIC Water Heater!

Thousands of builders all over the country keep down construction costs and save space in the homes they build. The method used is very simple. It's one you'll want to use. They install automatic storage type *Electric* Water Heaters.

They install this appliance near where the hot water is needed. They avoid long pipe runs, which saves on piping, time and labor. Because this type of water heater can be installed anywhere, they save space. You see, there's no flue or vent to provide for. All of which means lower installation cost.

Home buyers like the *Electric* Water Heater, too. The complete insulation—top, bottom and sides—(holds heat like a giant vacuum bottle) keeps water hot. Heat loss through piping is reduced to a minimum. Operating cost is kept low. Operation is completely automatic and trouble-free for years. So you have a real selling feature, as well as a saving. You have it, that is, if the water heaters are *electric* in the homes you build!

Complete Bathroom
FITS IN 5 X 6 FOOT SPACE

ECONOMY ANSWER FOR THE SECOND BATHROOM

An extra bathroom is a demand item these days—whether it be in new home construction or in remodeling. The corner design FIAT Shower holds the key to this economy as the diagram clearly indicates.

Only 30 square feet will provide an attractive, convenient and *complete* bathroom! You'll save not only on area, but on expensive materials as well. With a FIAT "packaged" Shower there's no need for costly tiling or other special wall covering. It is a self-contained plumbing fixture that requires no special room or construction preparation, yet is designed to give a "built-in" appearance.

The CORNER CADET model shown here has the quality look home owners are seeking, and it comes in a choice of colors to match other fixtures. Its shape and styling is modern and appealing . . . its finish is sparkling, sanitary and long-lasting of highest quality, acid-resistant baked-on enamel . . . its floor is the finest—solid, sparkling *terrazzo* precast to assure proper drainage and leakproof permanence. This FIAT floor affords a warm, foot-gripping surface that's easy to keep clean.

Find out how little more the finest shower bathroom will add to any plan. Send coupon today—no obligation of course.

How to get a home sale cooking fast

Here's a unique home feature with a double benefit for builders.

It's the built-in Frigidaire Wall Oven. Easily and quickly installed, it's a cost-cutter in construction, a spacesaver too.

But it also has an astounding feature that captivates every woman who sees it. For the "Wonder Oven"—actually two ovens in one—*bakes and roasts or broils at the same time.*

Instantly it can be made into two compartments for the purpose, each with a separate control of the different temperatures—or used as a single huge oven for *any* cooking purpose.

Frigidaire advances like these are convincing proof of a builder's high standards—an assurance that carries its selling influence into every room the prospect inspects.

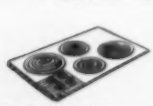

And behind the appeal of Frigidaire equipment is the largest, best-organized service force in the field. It assumes full responsibility for the continuing satisfaction of your buyers.

You'd do well to have Frigidaire products and prestige on your side in today's highly competitive market.

FRIGIDAIRE

Built and backed by General Motors

Frigidaire offers ALL "Heart of the Home" Appliances:

DROP-IN SURFACE UNITS

FOLD-BACK SURFACE UNITS

FREESTANDING RANGES

REFRIGERATORS

DISHWASHERS

Vornado's® GREAT NEW

Pre-Engineered – Pre-Packaged – Ready for the Job

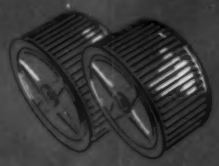

LOOK AT THESE AMAZING VORNADO UNIT FEATURES

EXCLUSIVE DIFFUSERS
Can be located any place in the ceiling area without affecting cooling efficiency. Unique fin arrangement allows direction of air any place desired.

TWIN COMPRESSORS
Two hermetically sealed, heavy duty compressor units. One compressor operates continuously . . . maintains a cold evaporator at all times . . . constantly removes humidity from the air. For economy of operation, second compressor "cycles" on and off as needed.

TWO HIGH CAPACITY EVAPORATOR BLOWERS
Each with twin air inlets . . . balanced to the large coil area of the evaporator for quiet movement of a large volume of cool air.

COMPLETELY AIR COOLED UNIT
Requires no water connections . . . completely eliminates expense of water systems and maintenance.

NO TROUBLESOME VALVES
Hermetically sealed unit eliminates costly "on the job" adjustments . . . seasonal maintenance calls.

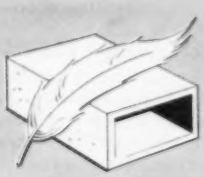

NO EXPENSIVE OLD FASHIONED PLUMBING
Eliminates complicated water controls, pumps, towers . . . Stops water system maintenance expense.

ELECTRICAL CONTROL BOX
Is pre-wired for quick connection of manual 3-position switch or for automatic cooling with a thermostat.

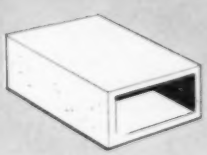

CONDENSER FAN AND SLINGER RING ASSEMBLY
Pulls huge volumes of fresh outside air over condenser. One piece fan blade is perfectly balanced and tracked for vibrationless operation.

TWIN RUN CAPACITOR
Reduces amperage draw . . . makes possible the "cycling" on and off of the second compressor for Vornado Twin System cooling.

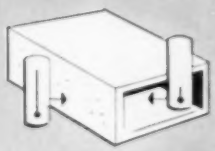

VORNADO *Prefabricated* DUCT EASILY INSTALLED

IT'S FEATHER QUIET
Ductwork . . . especially balanced to the unit . . . completely eliminates any air "whistle". Millions of intertwining glass fibers form microscopic air pockets to absorb noises.

IT'S AIR TIGHT
Vornadoduct is a full three-quarters of an inch thick, presenting a barrier to entry of hot, outside air keeping inside air cool longer.

IT WILL NOT SWEAT
Reinforced aluminum foil vapor barrier around the outside prevents "sweating" (condensation of air-borne moisture) which can ruin ceilings and walls.

IT'S FLAME RESISTANT
The hard finish, flame resistant coating of all Fiberglas ducting gives you vital protection while assuring the efficiency of maximum air velocity.

- **COMPLETELY SELF CONTAINED**
  Vornado puts residential air conditioning in a "package" . . . eliminates any extra plumbing . . . piping . . . water connections . . . or outside accessories. Everything is housed in the one small . . . compact . . . sturdy package.
- **PRE-FABRICATED DUCTWORK**
  Vornado engineers successfully developed this low cost, prefabricated, insulated ductwork that drastically reduces your installation costs. Assembled by merely taping pre-scored sheets together . . . it is one of the most amazing new developments in the air conditioning field.
- **SIMPLIFIED CONTROLS**
  One simple switch . . . plus a thermostat if desired . . . completely controls Vornado's powerful cooling operation. Can be set on "Hi" for extra hot days . . . or reduced to "Lo" for mild days and more economical operation. During winter months just turn unit "Off" . . . no start-up or pump-down problems.
- **LOW PRICE TAG**
  Vornado is the first truly low cost . . . high quality air conditioner any builder can sell with confidence. You'll be amazed at the very few dollars Vornado adds to your construction costs.

Dramatic Sales Promotion Aids

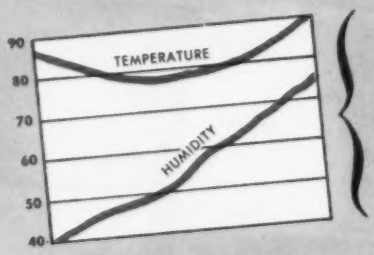

Vornado helps you sell air conditioned homes with dramatic . . . well planned . . . attention getting . . . merchandising sales aids. Handout pieces, exterior signs, interior mobiles, decals, publicity stories, ad layouts . . . and many other promotional programs . . . all designed to give your air conditioned homes . . . excitement . . . attention . . . and extra sales appeal.

CENTRAL AIR CONDITIONERS

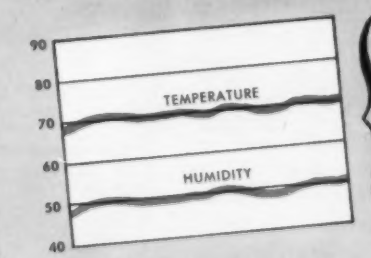

- Low Cost - Easily Installed - High Performance!

Here's Proof of Vornado's Tremendous BALANCED COOLING CAPACITY

Here are the results of tests conducted in St. Louis by Dr. E. M. Brooks, Professor of Geophysics and Geophysical Engineering. They prove without a doubt that Vornado does an effective job of cooling regardless of outside conditions. Notice how inside temperatures remained at an even 70 degrees and how humidity never exceeded 50%. These tests were conducted under normal living conditions . . . families with children . . . doors being opened and closed.

Outside temperatures reached as high as 92 degrees with humidity reaching the 75% point during test period.

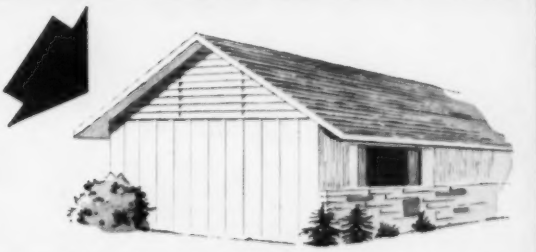

Here's the chart showing Vornado's performance while outside conditions shown above existed. Notice how the temperature remained at an even 70 degrees and humidity never exceeded 50%. Children were running in and out during this extensive test too.

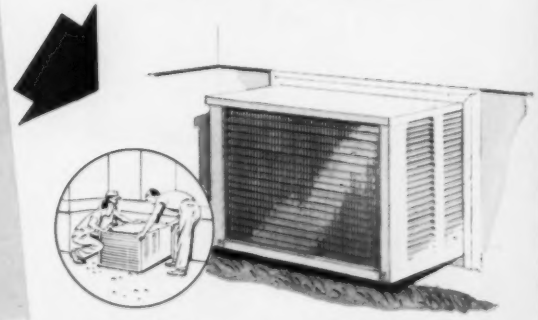

YES! Vornado Just Cools Better!

Houses of hip-roof design require only inclusion of an inconspicuous dormer to accomodate the unit.

This simple, gable installation allows installation with a minimum amount of effort. Prefabricated grille is available that can be painted with the house. Architectural treatments are limited only by the imagination of the designer.

Many builders have successfully tied the unit into existing furnace ductwork by installation through the basement wall. This particular type installation offers reduced cost in duct runs.

Built-In REFRIGERATOR-FREEZERS—Just provide a wall opening slightly wider and higher than the refrigerator itself—and the rest is almost as simple as plugging in a conventional, free-standing model.

Install standard electrical outlet, plug in Refrigerator-Freezer, and position it in opening. Merely fasten chrome trim around top and sides.

For Fast, MINIMUM-COST Installation...

Hotpoint Built-In "Living-Room" Kitchens Sell Homes!

In the tighter 1956 home market, your Hotpoint Built-In "Living-Room" Kitchen will be the **sales** feature that prospects want the most—the **quality** feature that makes prospects choose **your** home over those of competitors!

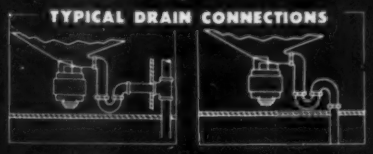

Built-In 24" AUTOMATIC DISHWASHERS—Both drain and hot water connections can be made from front with gravity or pump-drain dishwasher in place.

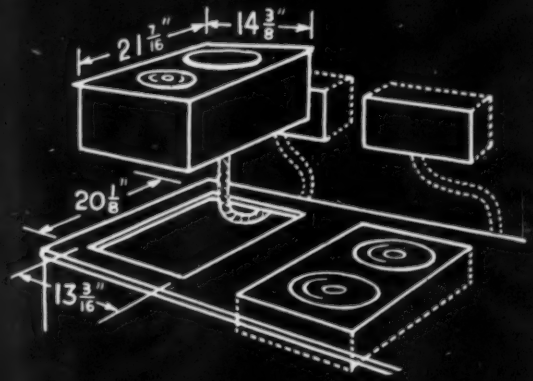

To install gravity-drain model in new homes, with or without basements, add "T" in drain line, run nipple through wall, and connect to Dishwasher with a "P" trap.

In some homes with basements, it is easier to connect drain line to stack in basement, extend it through floor, and connect to Dishwasher with "S" trap. (Located above or below floor.)

For remodeling work, a full line of pump-drain models is available.

TYPICAL DRAIN CONNECTIONS

Built-In SURFACE UNITS—In 2-unit (illustrated) and 4-unit sections.

For 2-unit sections, make cut-out in counter top slightly larger than rough-in box—when in place, top flange of box rests on counter top. Then insert Remote Control Box into adjacent wall and connect with separate 3-wire branch circuit. Drop section into cut-out, connect to Remote Control Box, raise four clamps up against bottom of counter top, tighten screws—and section is ready to operate.

4-unit section is installed in same manner, but controls are built into section and do not require separate installation.

Hotpoint

The Builder's Line of Built-Ins!

Here are built-in appliances designed **for** the builder—engineered for the unsurpassed speed and simplicity of installation that mean **more profits** for you!

Only the usual skills . . . standard tools . . . and familiar materials . . . are needed to install Hotpoint Built-Ins. No special construction is involved—all you do is provide "recesses" of the right dimensions.

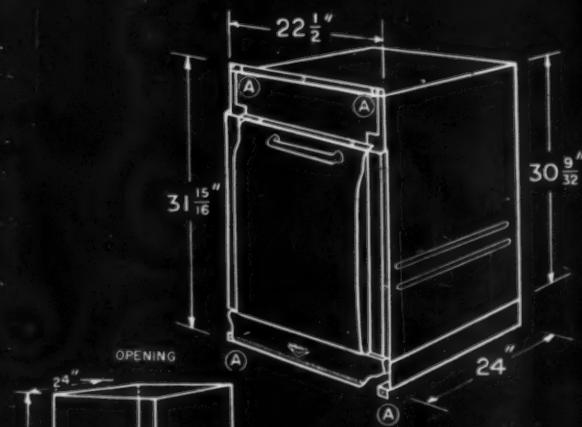

There are three **more** big reasons why the Hotpoint Line is recognized as "The Builders' Line of Built-Ins."

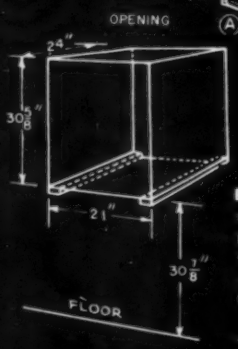

1. Only Hotpoint offers such a wide variety of models, prices and finishes! You'll find the "right" Hotpoint Built-ins for luxury homes or modest homes—in 5 beautiful Colortones, Copper-tone, and Stainless finish.

2. Hotpoint's Built-Ins add tremendous sales-appeal to your homes—because home-buyers immediately recognize Hotpoint's superiority—**superiority built on performance!**

3. Hotpoint Built-Ins help finance your homes. Financing agencies are ready to give you maximum evaluation and a higher mortgage when you include Hotpoint **Built-Ins!**

FOR COMPLETE INFORMATION ON HOTPOINT BUILT-INS, CONTACT YOUR HOTPOINT DISTRIBUTOR'S BUILDER SPECIALIST.

Built-In OVENS—Provide two guides at bottom of opening for firm, level support—no insulation or extra materials needed. Run 3-wire branch circuit to standard connection box and connect oven.

Then—insert oven into opening. Remove screws holding upper and lower trim panels. Fasten oven body to top and bottom of opening with four screws and replace trim panels.

look to **Hotpoint** for the finest... first!

Good Water System Vital to Customer Satisfaction in Suburbs

Customer satisfaction of a home in the suburbs depends to a great extent upon the water system. That is the opinion of more and more top-ranking builders. This is the way they see the situation:

Modern suburban living requires plenty of water in many places and under adequate pressure. And since dependable, day-and-night water service is so vital to suburban living, it is good business for building contractors themselves to carefully specify the water systems which are to be installed in the homes they build.

Foremost among the new water systems on the market today which will provide all the water necessary for truly modern living are the Rapidayton Twin* Champion and the Rapidayton Dolphin* submersible.

The Rapidayton Twin is a 2-impeller jet pump, available with either 13- or 30-gallon horizontal tanks or 42- or 52-gallon vertical tanks. (The latter meet FHA requirements.) The Twin pumps FULL CAPACITY AT 40 LBS. PRESSURE, compared to a loss of 50% to 80% in single-impeller pumps. It is convertible for shallow or deep wells and goes down to 150 feet.

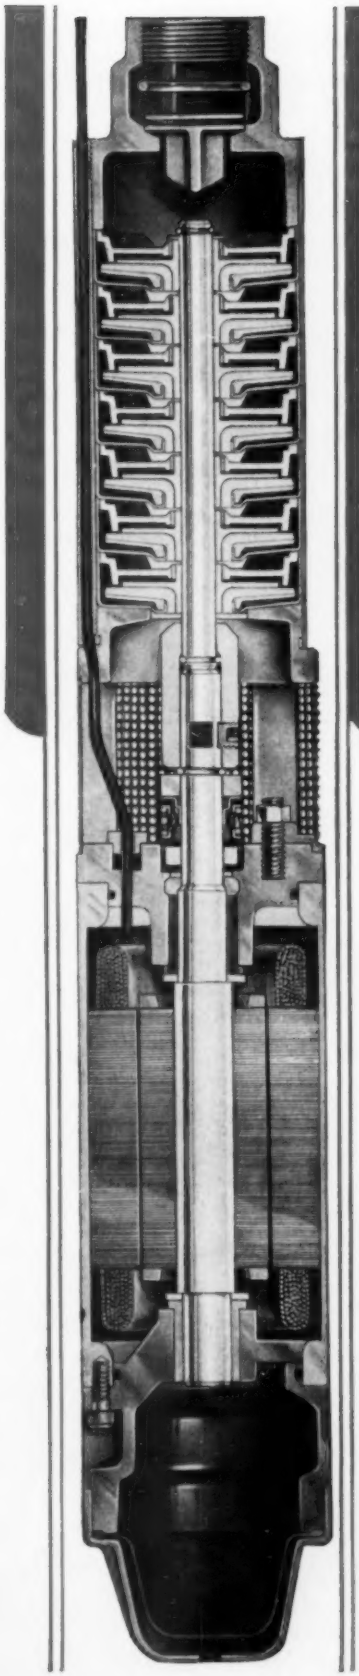

The new Rapidayton Dolphin (see opposite page) is believed to be the greatest submersible pump ever built for depths to 500 feet. The exclusive design of its stages and the use of new and better high-quality materials insure maximum efficiency and highest abrasion resistance. The impeller is made of tough nylon and the stage case is micro-smooth corrosion-proof stainless steel. The impeller is hydraulically balanced and its design completely eliminates thrust on the motor. The heavy-duty dielectric fluid-filled motor has that "power in reserve" so necessary for long motor life and peak efficiency.

The Dolphin is easy to install. It goes down into the 4" well casing, where it cannot be seen or heard. There is no need for a frost-free pump house or pit.

Get complete details on the Twin, the Dolphin submersible, and other fine, dependable Rapidayton water appliances. Mail coupon on opposite page to The Tait Manufacturing Co., Dayton 1, Ohio.

NOW... The Greatest Submersible Pump ever built

THE ALL NEW Rapidayton DOLPHIN

Advanced design, superior engineering, exceptionally fine craftsmanship—plus the ingenious use of new and better high-quality materials—combine to make this new Rapidayton Dolphin the standout among all submersibles.

BETTER ABRASION RESISTANCE

The Dolphin's entirely different design and construction provide a new high standard of performance and wear resistance. The Dolphin has more exclusive and "worth more" features than any other pump, regardless of type. For 4" wells to depths of 500 feet. Capacities to 1000 g.p.h. Pressures up to 80 lbs. Stages vary from 7 to 21. Motor sizes ½, ¾, 1, 1½, and 2 h.p. models. Get complete catalog showing Dolphin and other Rapidayton products today.

STAGE DESIGN

Tough nylon no-thrust impeller, "Double-Quad" diffuser, and stainless steel case.

New General Electric Thinline gives

Only 16½ inches thin

The General Electric *Thinline* unquestionably adds tremendous sales appeal to the homes you build. You can air condition as few or as many rooms as your buyer wishes, and assure him that he can add to his air conditioning over the years at little cost.

Further, you can give him the most modern and compact of air conditioners, the versatility and economy of operation and the guarantee of the General Electric name. The entire unit is covered by a written one-year guarantee and the sealed-in unit for an additional four-year period.

you low-cost, built-in air conditioning

The new General Electric *Thinline* Room Air Conditioner can be built right through the wall during construction to give your homes the sales appeal of permanent, area-by-area air conditioning. There's no ductwork or plumbing needed, and you can air condition just one area or the entire home. *And . . .*

It's compact—the General Electric *Thinline* is only 16½" from front to back, so there's no unsightly overhang to mar the appearance of the homes you build.

It takes up ⅓ less space than previous corresponding models, so you don't have to design rooms around it. And it's available in ½, ¾ and one horsepower models—all in the same size cabinet.

It gives high-capacity cooling at low cost because it has low current input (only 7.5 amperes on the ½ hp model) and General Electric's high power factor and efficient design.

Also, your buyers will be attracted because this is area-by-area air conditioning—units in unoccupied rooms can be turned off so there's no waste. And, of course, this means flexibility of control—allowing different temperatures to be maintained in different parts of the house.

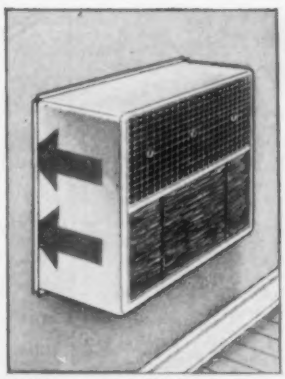

It's pre-sold to your buyers through General Electric's national advertising and through General Electric's long-standing reputation for products that are ahead of the field, soundly engineered and backed by expert service.

It meets FHA specifications for room air conditioners. All you have to do is to follow the procedures outlined by the FHA when you apply for FHA financing. General Electric Company, Appliance Park, Louisville 1, Kentucky.

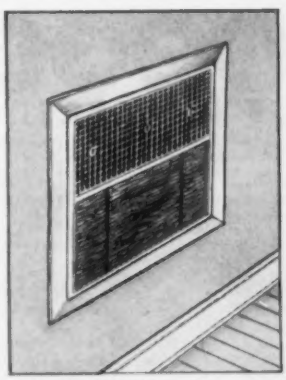

Look how easy it is to install the G-E Thinline through the wall:

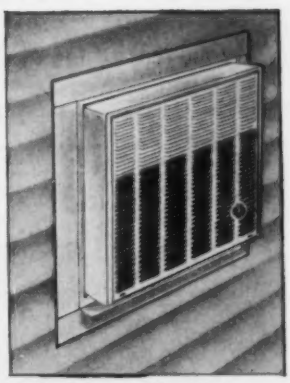

Build the sleeve and frame into wall during construction. Opening is about 23" high by 27" wide. This is easy to do in modernizing present homes, too.

Slide the G-E *Thinline* into the sleeve. Four screws hold the General Electric *Thinline* in place and provide a quick and weather-tight installation.

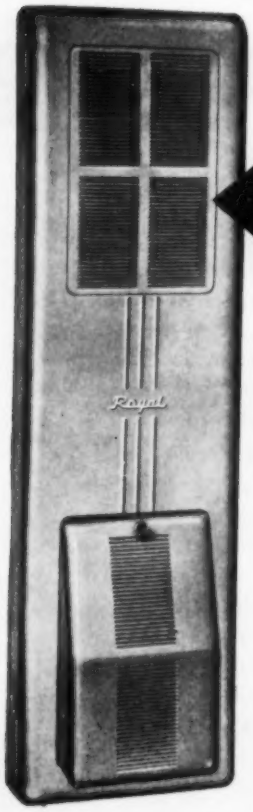

Simple but decorative wood trim frame adds a final touch. Notice that this 16½" unit does not project into the room—unlike most other units.

Aluminum grille of the new General Electric *Thinline* is designed to hold upkeep costs down and to prevent condensation from staining the outer wall.

Assure Customer Satisfaction with LUCKE Leakproof TUB HANGERS!

The most expensive room in the house per square foot can easily become a nuisance unless tub to wall and tub to floor junctions are permanently waterproofed. It's so easy to take care of a minor detail (that could become a major error) when LUCKE Leakproof Tub Hangers are specified. Take a quick look at the other satisfying advantages of LUCKE Tub Hangers. All the new Statler Hotel bathtub installations are being safeguarded with LUCKE Leakproof Tub Hangers.

1. Seals rim *permanently* against water seepage. No unsightly cracks!
2. Tub is easily levelled with LUCKE Tub Hangers at wall and base line.
3. Equal distribution of weight *between* studs prevents strains and sagging.
4. Perforations on hanger form perfect base for plaster or drywall.
5. Low-cost insurance against costly 'call backs.'

LUCKE means profit and pride in your remodeling jobs, too.

Write for complete information.

A whole New Market is waiting for the

Built-in Look without the Built-in Cost

With Philco's Elevator Oven, You Just *Press a Button* to move it up or down.

Philco Dishwasher-Sink, Sectional Refrigerator, Surface Cooking Units, Elevator Oven and Freezer.

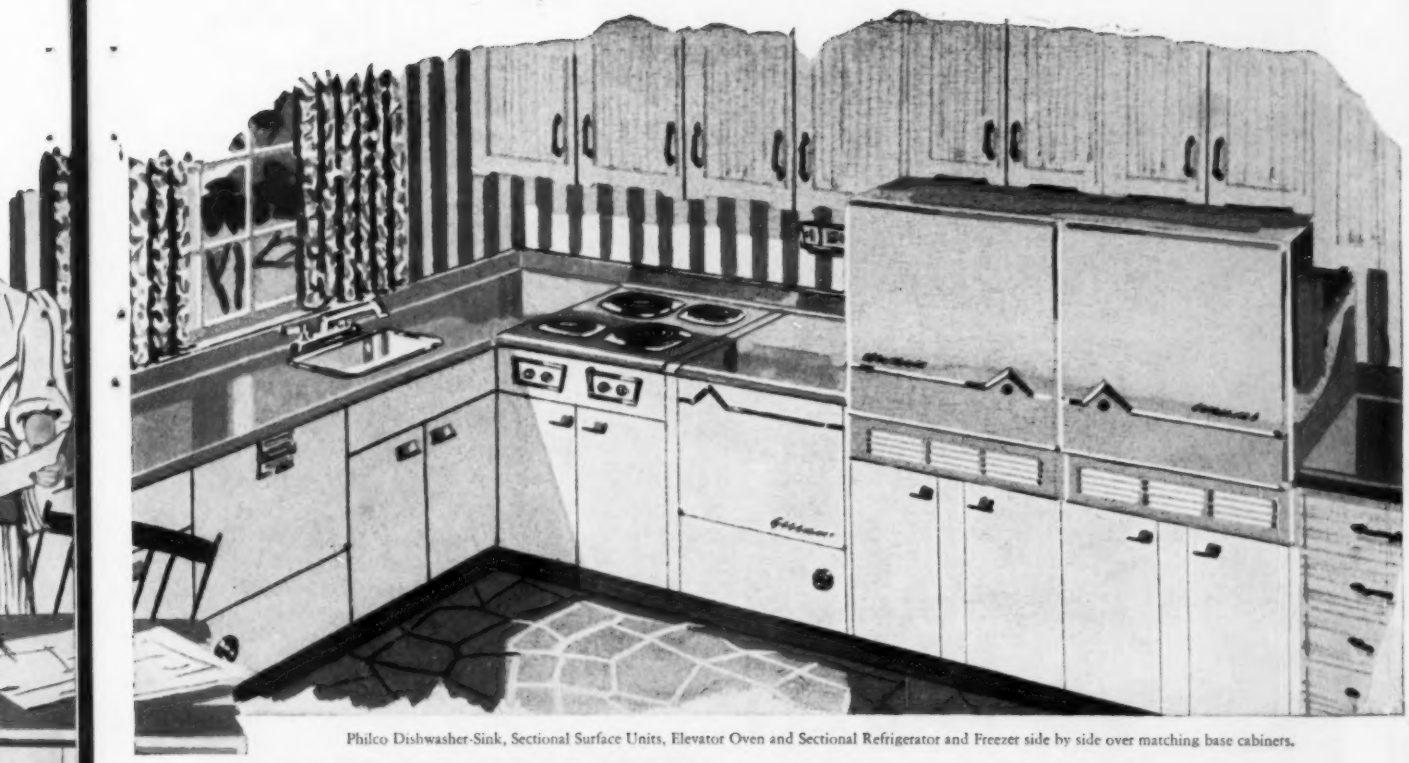

Only PHILCO Offers it to You!

You'll be hearing a lot about the "Built-in LOOK Without The Built-in COST" in the months and years to come. It's a completely new idea in appliance buying and kitchen planning . . . an idea that was pioneered by Philco to meet a real need of home-owners.

You know as well as we do that the vast majority of home-owners shy away from a *permanent* built-in kitchen installation. They do so for many reasons—cost of remodeling . . . dislike of "tearing up the kitchen" . . . the *fixed* design and lack of flexibility of permanent installations . . . the possibility of change of location or living arrangements.

It is exactly for this vast group of home-owners that Philco Custom Sectional Appliances were created. They can be placed in a kitchen *without* remodeling. They can be added to, from time to time . . . switched from one side of the kitchen to another, made to accommodate changing family ideas. They can even be moved out of one house and fitted snugly into the kitchen of another.

Thousands of home-owners who might *never* install built-in equipment of a *permanent* type will be prospects for Philco *Custom Sectional* Appliances . . . particularly because of Philco's heavy advertising and promotion.

Philco Dishwasher-Sink, Sectional Surface Units, Elevator Oven and Sectional Refrigerator and Freezer side by side over matching base cabiners.

PHILCO *means Business in the Kitchen Business!*

How Philco helps its Dealers Sell . . .

These appliances are built to Philco top standards and they are *properly proportioned* for greatest efficiency and flexibility; not over 34¾" high to fit under the counter when desired; not over 33½" wide to prevent the door from becoming unwieldy, and of a depth to allow it to be used with standard cabinets and counter tops.

National Magazine Advertising

Starting this month, Philco is launching a national advertising program in leading magazines to bring Philco Custom Sectional Appliances to the attention of millions of homeowners all over the country right at the time when modernization is a subject of high interest.

Sales-getting Promotional Help

Along with its national advertising, Philco makes available point-of-sale materials that can be used effectively with both *groups* and *individual* home-owners to demonstrate the flexibility and versatility of Philco Custom Sectional Appliances, and the *big savings* made possible by the use of this equipment.

If you would like more detailed information about Philco Custom Sectional Appliances, write to Builder's Div., Ext. 473, Philco Corporation, Phila. 34, Pa., or get in touch with the Philco Distributor in your locality.

The key rooms in selling today's new house are the bathroom and the kitchen. Builders have discovered that *nothing* adds bathroom sales-appeal like a beautiful, practical Permalume shower enclosure, unconditionally guaranteed for 17 years.

No other line in America is as complete as Permalume, offers as much to the builder to help him sell his homes and Permalume is better — easier to buy, easier to install, easier to sell.

Shower Door Company of America has developed a complete builder-tested, builder-directed merchandising package to help you sell your own specific houses — personalized to your own project or development. *Permalume is the* ONLY line that offers you this personalized merchandising plus . . .

Permalume's
Personalized Builder-Merchandising Package

- A specially prepared and designed brochure on *Your own Particular Development or Project*—photos, floor plans, location maps and features of *YOUR* houses. Supplied free in large quantity, with complete directions for their most effective use.
- A complete free newspaper advertising mat service—and ad layouts—to help you advertise your development.
- Cost-sharing plan on newspaper, radio, TV, direct mail or outdoor advertising, with professional design assistance.

Here's why the New Heatmaster System is the simplest...most economical way to heat and air condition a home!

- It's pre-engineered! The new C-E Heatmaster is a ready-to-install year 'round comfort system.
- It's packaged! Only standard piping and wiring materials and practices are used for installation. No special equipment is required.
- It's compact! Unit installs in 4-square feet of floor space. It provides economical air conditioning with the luxury of hot water heat; individual room control.
- It's easy to sell! It offers builders and plumbers features that simplify installation, cut costs, save time. Its benefits appeal strongly to home buyers.
- It's priced right for the market you serve.

Here's the complete, compact C-E Heatmaster Home Heating and Air Conditioning System:

Efficient, gas-fired boiler unit, completely assembled with burners, circulator, controls, relays and all operating parts in place; a matching hermetically sealed water chiller, completely assembled with compressor, evaporator, condenser and refrigeration controls in place (unit factory-charged with refrigerant); space-saving individual room convectors for heating and air conditioning through one compact convector in each room.

Simple to lay out — easy to install.

PERFORMANCE PROOF:

Here's what the owner-builder and plumber say about a typical C-E Heatmaster installation:

THE OWNER-BUILDER, ANDREW YEDYNAK, SAYS, "FAR SUPERIOR."

"We investigated about 10 different air-conditioning-heating methods before we built our 'dream home'. We finally decided on the C-E Heatmaster System. It's far superior to any forced air system we know of, both in cost and in efficiency of operation. I know. We've lived in four different houses since 1945. Our experience with forced air and 'heat circulating' systems convinced us the C-E Heatmaster 'wet' system was the best buy."

Mr. Yedynak's wife, Violet, had this to say: "The C-E system is so simple even our six year old daughter can operate it. And I like the installation . . . no contraptions sticking out of windows, no ducts, nothing like that."

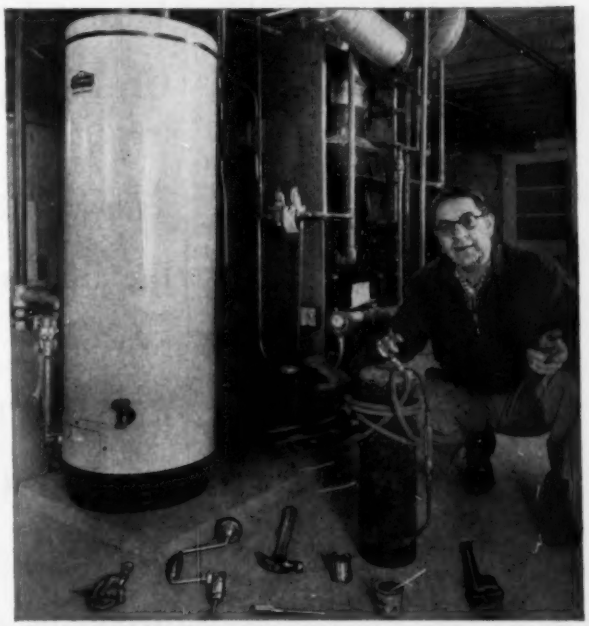

Extremes of climate (hundred-plus in summer, ten-minus in winter) helped the owner-builder decide to equip this Hickman Mills, Missouri home with the C-E Heatmaster System.

THE PLUMBER, MARTIN MOLOTSKY, SAYS, "SIMPLE AS COULD BE."

"The C-E Heatmaster was the first 'wet' air conditioning and heating combination I've ever installed. We didn't run into any complications at all. In fact, we used fewer man-hours (48) to install this system than we would have needed for a comparable hot water radiator installation. It adds up to quite a saving. I'm convinced that this 'wet' system is the future standby for heating and air conditioning homes."

Mr. Molotsky has been a plumber for fifteen years and heads his own business. He later commented, "I only wish I had this C-E Heatmaster combination in my own home." The C-E Heatmaster System, which Mr. Molotsky installed, is the first of its kind in the Kansas City, Missouri area.

Mr. Molotsky points out how little equipment is necessary to install a C-E system. The pre-engineered, packaged C-E system required only the simple tools shown in the picture for installation. (This picture was made before piping was insulated.) Mr. Molotsky also installed the 40-gallon Heatmaster glass-lined water heater shown in foreground.

Take advantage of the many benefits C-E Heatmaster Home Heating and Air Conditioning offers by sending for more information now. Ask about the ABC Plan for builders.

C-E HEATMASTER

HOME HEATING AND AIR CONDITIONING

the simplest way to heat and cool a home

COMBUSTION ENGINEERING INC., Home Equipment Division
971 West Main Street, Chattanooga 1, Tennessee

BUILDERS . . . this lady says
"My Music & Sound Unit saves Me a
MILE OF STEPS EVERY WEEK!"

We asked a Music & Sound homemaker to estimate the number of steps she saved in a week by monitoring, from another room in her small home, her nursery, her front door and her living room. She told us *she saved over 1700 steps during the week!* And she had a wonderful companion all week long — the world's finest music! To sell homemakers like her, put Music & Sound in your next home project. 3 basic units.

"TWINETTE" MS-300

Sturdy, handsome unit has AM broadcast and two-way intercommunication from master unit to all speaker stations, installation in 6 rooms, front door answering service from master unit, volume control for all speakers, Phono-Jack for record player, new "Keep Clean" speaker grills. $89.50 complete.

"SUPER TWINETTE" MS-300A

Big, new, 5 watt unit is most powerful system in its price class. AM broadcast radio and two-way intercom from master to all room stations, automatic clock control with 110-volt appliance outlet, Phono-Jack for record player, 6 room coverage, volume control on all speakers, push-button selector controls, "Keep Clean" speaker grills. $104.50 complete.

"MUZIKAL" MS-400A

Our largest, finest unit. AM radio with 6 tubes (3 dual purpose) and selenium rectifier exceeds 9 tube performance. 5 watts, automatic clock control, 110 volt appliance outlet, 6 room coverage, baby speaker to monitor nursery from any room, two-way front door answering service, cross-call intercom from any room to all rooms, Phono-Jack for record player, "Keep Clean" speaker grill. Hi-Fi music speakers and Hi-Fi record changer can be installed at slightly higher cost. "Muzikal" gives you 1. Music with intercom; 2. Intercom only; 3. Complete silence. $139.50 complete.

BETTER JOB!

CHASE copper tube for soil, waste and vent lines at little or no extra cost!

Consider *installation* costs, and you'll see why a Chase quality drainage system will cost little or *no more* than an ordinary system. Actual comparisons *prove* this!

Chase 3" Copper Drainage Tube fits *within* standard partitions, eliminates costly furring-out construction required with ordinary systems.

The *inside* of a Chase Drainage System is also worth talking about – Chase Copper Tube and Solder-Joint Fittings have no internal projections to trap waste – they provide fast, even drainage and make a neater, more compact job all around.

When planning, be sure to specify the best in copper drainage tube and fittings – be sure to specify *Chase!*

THRUSH
radiant hot water

The Sales Clincher!

COMPLETE THRUSH SYSTEM

THRUSH WATER CIRCULATOR

HOMESEEKERS know the importance of good heating. When you tell them your homes are heated with Thrush Radiant Hot Water Heat, the sale is easier. New Thrush equipment places radiant hot water heat within the budget of the small home as well as the larger residence. It's quiet, clean, completely automatic. There are no noisy fans or drafts. The home is maintained at an even temperature, never varying more than a fraction of a degree, regardless of outside weather. It's very economical of fuel, too.

If you haven't been specifying hot water, investigate the new, low cost Thrush System now.

See our catalog in Sweet's or write Department G-4 for more information.

H. A. THRUSH & COMPANY
PERU • INDIANA

1. IT ALL STARTED IN CHICAGO at the NAHB show. Thousands of builders heard Perfection's *extra profit* story for the first time and the verdict was unanimous. "Here's a way to buy heating and cooling equipment that makes real sense!"

2. PERFECTION'S "BIG BOOK" TOLD THE STORY (the lady in white helped, too). The response to this new way to buy heating was so overwhelming that we're repeating it in *these* pictures.

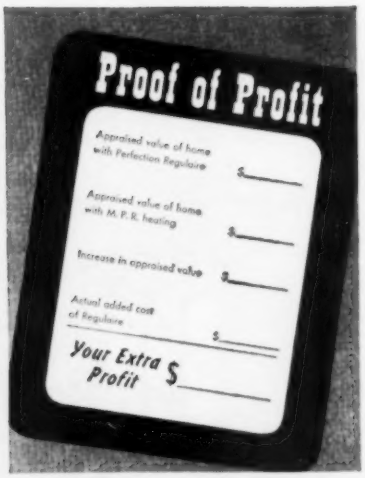

BUILDERS GUARANTEE THEMSELVES AN EXTRA PROFIT ON EVERY HOUSE!

3. STOP trying to save a couple of bucks on buying furnaces. Start making a healthy profit on them instead. That's what Perfection says and here's the sure way to do it...

4. PUT IN THE FURNACE *YOU* CAN MAKE MONEY ON in more ways than one! That's a Perfection with Regulaire Modulated Heat . . . the only way to insure full-time comfort clear to the floor.

5. THERE'S NO MYSTERY about how builders can make extra profit with Regulaire. Houses equipped with Perfection furnaces bring a *higher* loan appraisal. You can figure out the profit for yourself.

6. BUILDERS CAN CASH IN ON THE SUMMER COOLING TREND, TOO. It's a big "plus"... a good tie-in sale. And besides, Perfection gives more cooling per kilowatt. Unique new method drastically cuts installation time and costs.

7. GREAT NEW HOME SELLING IDEA helps sell homes faster. "GUARANTEED COMFORT" assures prospects that *their* welfare is a prime consideration. Builders automatically qualify for this "hot" new promotion by using Perfection Regulaire equipment . . . engineered, figured, installed and serviced by local Perfection *guaranteed* dealers.

8. FEATURING A BETTER FURNACE *can help you sell the house.* It's happening every day with Perfection with Regulaire. And you get an extra selling push when you use the unique "Guaranteed Comfort" home-selling aids offered only through your Perfection dealer-contractor.

9. FIFTY PERCENT OFF. Perfection Regulaire furnaces and cooling units are furnished for model homes at exactly *half* the regular cost. (How many model homes will you have?)

10. WELCOME IS A GREAT WORD . . . and every prospective buyer that enters a "Guaranteed Comfort" home gets a warm welcome the minute the front door is opened. Even the red sheathing paper that protects the floors says "welcome". It's all a part of Perfection's home merchandising program for builders.

Simple story, isn't it? But a sweet one for every builder! What it adds up to is EXTRA PROFIT in your pocket on every Perfection Regulaire furnace you put in...

• A NEW HOME • A MODERNIZATION JOB

Start *making* money on the furnaces in *your* homes. See your Perfection dealer or write to Perfection Industries, Division of Hupp Corporation, 7707-A Platt Ave., Cleveland 4, Ohio.

Now...you can feature

high-quality central air conditioning

in low-cost homes!

NEW LENNOX

Whole-house cooling for about the cost of heating

Think of the impact on your sales of low-cost homes when you offer prospects the most wanted feature of modern living — *central* air conditioning. Lennox — world leader in home comfort—now makes it possible with the new Stowaway air conditioner.

Ever since the demand for air conditioning, builders have wished for a unit like this. For in its advance design lies the secret of its low cost; in its superb engineering, the secret to its quality performance.

Installation is simplicity itself. There's no cooling tower, no plumbing, no drain pan, no complex wiring; no charging, testing, adjusting. The compact Lennox Stowaway air conditioner is self-contained, 100% hermetically-sealed, ready to install in any home of any size or architectural style.

Operation is amazingly efficient. An exclusive, super-quiet Power Prop delivers 25% more condenser air at 10% less cost; extra-large condenser provides air-cooling for less than the cost of water-cooling! Ask your Lennox dealer-expert for complete information on the many practical applications of the new Stowaway air conditioner.

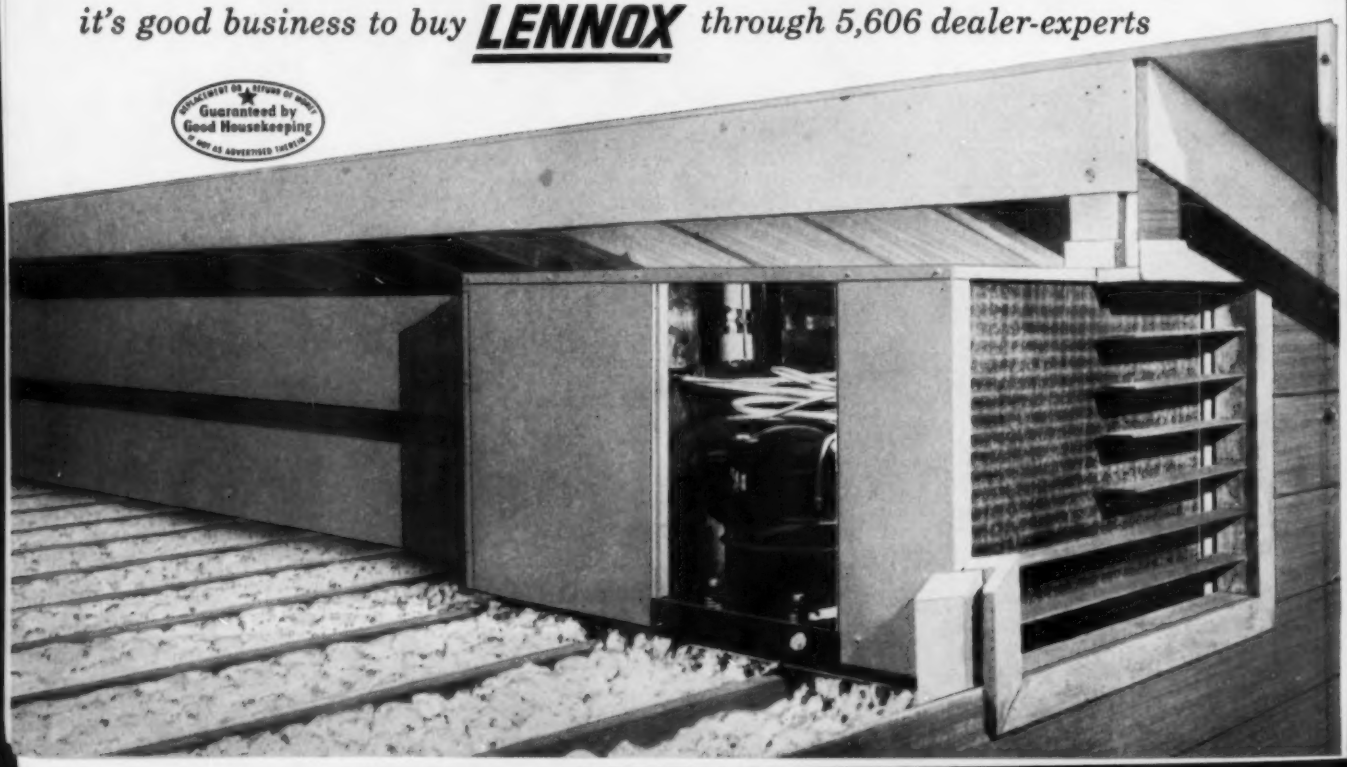

Look to Lennox for all your heating and air conditioning needs

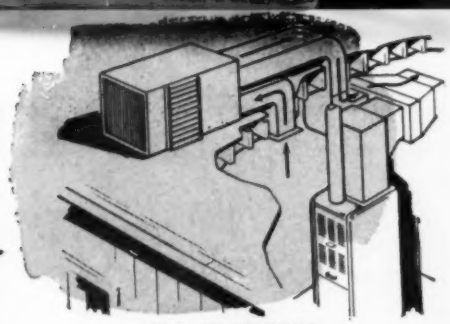

Lennox manufactures the most complete line of warm air heating and *central* air conditioning equipment in the world. All sizes and types for all fuels, for all locations. More than 5,600 trained dealer-experts are ready to take over your heating and air conditioning problems. And Lennox offers you a complete model home promotion kit, proved in use by top builders from Coast to Coast. It's the most important collection of merchandising aids ever made available to builders. Includes a selection of tailor-made model home brochures, devoted exclusively to the selling features of your homes, your development. Write or call your nearest Lennox factory for complete details.

Flip the switch to more home sales with

LIGHT FOR LIVING

LIGHT for Living in your model home is a traffic builder that goes to work with the flip of a switch. It's a "sales clincher" for any home.

Light for Living brings out the beauty of furnishings. It adds color and warmth. It makes the entire home more useful for all the family.

Right lighting, so vital to comfortable living, depends on your careful planning of *wall lighting* . . . and your selection of the correct *lighting fixtures* for your model home. The technique is "light-conditioning". . . and here are two useful books to help light-condition your homes. These are just two of the many ways General Electric is working to help the building industry make the most profitable use of Light for Living.

WALL LIGHTING GUIDE—a colorful new book, with specific installation instructions, shows how to build more sales appeal into model homes by the effective use of lighted valances, cornices and wall brackets. Here is truly the decorative, the eye-catching phase of Light for Living.

LIGHTING FIXTURE GUIDE—40 easy-reading pages, designed to make the selection of fixtures as easy as possible. Builders who use it can put more sales value into their homes, and provide buyers with a visible guide to light-conditioning the home they select.

Send for your two books today! See how Light for Living can help you sell more homes, quicker, for better profits.

The wall-to-wall lighted valance illuminates draperies and ceiling; and a lighted wall bracket dramatizes the buffet area. The hanging fixture combines pleasant upward light with spotlight sparkle for the table. This flexible lighting plan provides a mellow atmosphere for relaxed dining—and a strong sales plus for the builder's model home.

Solve her problem...to your profit...

BLOWING HER TOP OVER OLD-FASHIONED WATER?

Unsoftened water is a troublemaker. Excess minerals in hard water leave dull film on hair. Rings on bathtubs. Streaks on dishes. Hard water carries trouble to every corner of the house—clogging plumbing with scale. But any water can be made soft as a cloud—with a modern water-softening appliance. Home owners save work, soap, repairs. Their homes have *greater value!*

DOW

GIVE HER SOFT WATER and clinch the sale!

OPERATION SOFT WATER MONTH—this two-page ad in *The Saturday Evening Post* will help you make sales. Other two-page ads in *Life*, *Better Homes and Gardens* and *Ladies' Home Journal* will bring the total to almost 37 million readers. This year-long campaign pinpoints your opportunity.

Your customer wants every labor-saving device possible. A house that's geared for soft water means plenty to her!

With soft water, she won't blow her top over hair that is sticky when shampooed. She won't get the jitters over gray laundry. She won't be slave to unclean dishwashing. And bathtub ring won't drive her to tears.

She knows hard water is the cause of all these troubles. And if she doesn't she soon will. A powerful advertising program will remind her to get rid of old-fashioned, unsoftened water.

HERE'S ALL YOU NEED DO—

1. ***Allow space for a water softener in every home you build.***
2. ***Arrange your plumbing so a water softener can be easily installed.***
3. ***Check the Yellow Pages of your phone book for complete details on water softeners. Look under "Soft Water" or "Water Softeners" or call your plumber.***

DOW THIS WATER SOFTENER CONTAINS DOWEX The High Capacity Water Softening Resin

DOWEX®, high-capacity water-softening resin, is used by many leading manufacturers of water-softening equipment. This DOWEX label identifies water-softening appliances of the finest quality—worthy of the homes you build. DOWEX is distributed by National Aluminate Corporation. THE DOW CHEMICAL COMPANY, Midland, Michigan.

Transite Pipe gives you greater freedom of design

also provides economy, long trouble-free service and installation ease!

You'll like working with Transite® Pipe ... because it offers you the wide variety of shapes, sizes and fittings needed for almost limitless freedom of design. *Contractors like it* ... because it is easy to assemble and install. *Homeowners like it* ... because of its reputation for long, trouble-free performance!

For further information on Transite Pipe for the home, write to Johns-Manville, Box 60, New York 16, N. Y. In Canada, Port Credit, Ontario. Why not write, today?

DOING ALL 4 JOBS WELL!

1. Transite Building Sewer Pipe with the Ring-Tite® Coupling, for conveying sewage to street sewer or septic tank.

2. Transite Gas Vent Pipe in round and oval shapes for efficiently and economically venting domestic gas appliances.

3. Transite Plumbing Vent Pipe for venting soil and waste pipes in building plumbing systems.

4. Transite Warm Air Duct for use in concrete slabs in perimeter-type heating and air-conditioning systems.

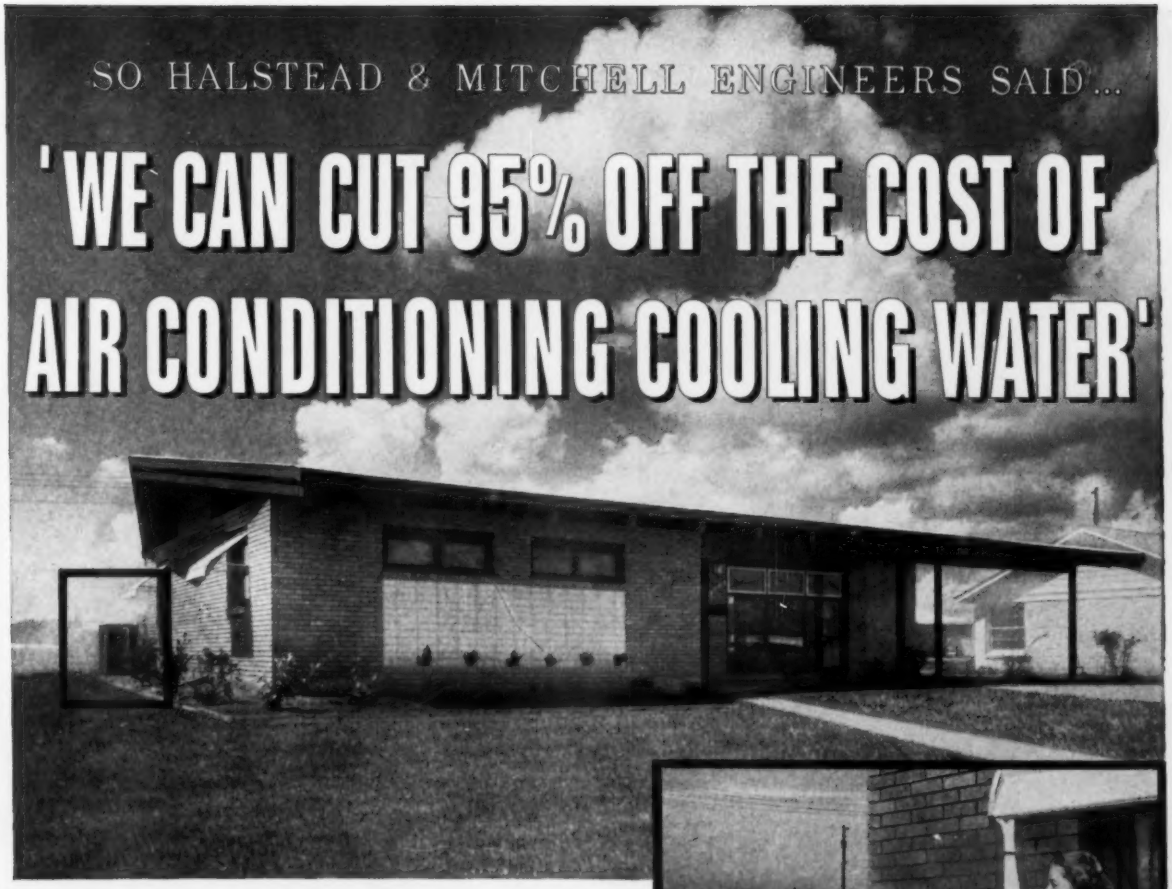

Johns-Manville TRANSITE

PIPES FOR THE HOME

Made of Asbestos-Cement

SO HALSTEAD & MITCHELL ENGINEERS SAID...

'WE CAN CUT 95% OFF THE COST OF AIR CONDITIONING COOLING WATER'

Halstead & Mitchell Residential Cooling Towers are engineered to cut 95% from the cost of air conditioning cooling water. This they do by re-using the precious—and expensive—water which without cooling towers would be wasted to the sewer.

So efficient are they that in a recent research project *in Texas* water costs with cooling towers for the five-month summer season were as low as $2.00 *for the entire summer.* That low cost opens the doors wide to water-cooled air conditioning, still the lowest cost system devised. It also means compliance with municipal ordinances aimed at avoiding waste of water.

There's nothing experimental about these units. You are protected by Halstead & Mitchell's exclusive 20-Year Guarantee on the wetted deck surface against rotting or fungus attack . . . and you gain by the many other features which have made Halstead & Mitchell industrial and commercial cooling towers nationally known and respected.

Small in size, and thus easy to hide by proper landscaping, H & M Residential Cooling Towers are built in a complete size range from 2 through 7½ tons. Extra-quiet centrifugal fan units are available for inside installation. You will find them at your nearest leading refrigeration or heating wholesaler.

Sell 'em faster—

Moduflow, with indoor and outdoor thermostats, glamorizes your heating-cooling systems, gives you a wonderful new selling story.

MODUFLOW brings the *selling* promise and glamour of electronics to your homes in a way your customers clearly see and understand.

First they notice the Weathercaster outside. Then, inside the house, they see the handsome Honeywell Electronic Golden Circle Thermostat. Both these features plus the unusual clock control, help you dramatically convince your prospects that Moduflow gives the ultimate in advanced home comfort.

You high light your heating-cooling system and give your salesmen new comfort to sell.

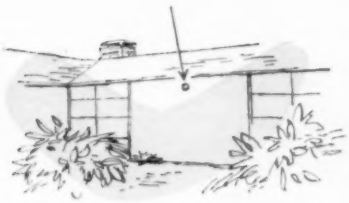

Let Moduflow start helping *you* sell more homes. See your Honeywell salesman or dealer, or write Honeywell, Dept. AB-4-55, Minneapolis 8, Minn.

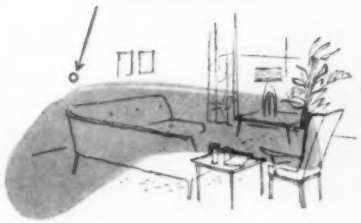

Honeywell Electronic Moduflow varies the temperature inside as the weather changes.

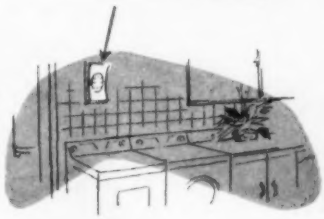

1. Electronics

New outdoor Weathercaster is *eight times* more sensitive than ordinary thermostats; continually adjusts indoor thermostat to compensate for changes in outdoor temperature.

2. Temperature

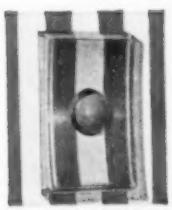

With this beautiful Golden Circle Thermostat, day and night indoor temperatures are set *once*. Thereafter, the outside thermostat raises or lowers settings automatically.

3. Time

This handsome electronic wall-clock automatically lowers night temperature for comfortable sleeping, fuel savings. Available in chrome, copper or ebony black.

with Electronic Moduflow

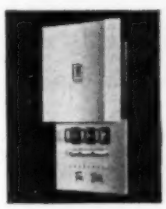

Add these other Honeywell features to your homes

Tap-Lite Wall Switch

Completely new. Tap—it's on! Tap—it's off! Transparent wall plate makes it easy to decorate with wallpaper, drapery material, or the colored inserts supplied with each switch. Adds a low cost feature to every room.

Fire-Belle Alarm

Attractive fire alarm panel is wired to fire-detector elements in attic, basement, closets, etc. Should fire start, bell rings and a light goes on, locating the fire instantly. An impressive home safety feature.

Electronic Moduflow by MINNEAPOLIS **Honeywell**

no other home equipment is used so much!

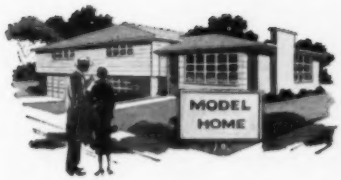

be sure
your homes use
the glass-lined water heater
that has 17 years of
proof behind it

Permaglas®

- The ONLY water heater you don't need to hide in a closet.
- The ONLY stylized water heater—and the ONLY one in aqua-and-copper.
- The ONLY water heater with EYE-HI temperature control. No more stooping! No more squinting!
- The ONLY water heater with patented HEETWALL. More efficient—no bursts of scalding hot water.
- The ONLY glass-lined water heater with 17 years of success behind it. There's only one Permaglas, and it's made by A. O. Smith.

Are you offering your prospects this

additional inducement to buy?

Get the jump on competition!

Offer homeowners the **new concept in light control** . . . LUXTROL.

Builders are using LUXTROL to help sell their houses. And, on the profit side, their LUXTROL-equipped homes become a topic of conversation among pleased buyers and prospects.

LUXTROL makes the old-fashioned "on-off" switch a relic of the past.

Turn the dial, and LUXTROL produces **any level** of light . . . from dark to full bright. At your command, the **perfect light** for every occasion, activity, mood. The right intensities of light for the living room, dining-room, TV-room, kitchen, bedroom, or bar.

LUXTROL is **low cost.** Yet it is a quality product, of fine precision and craftsmanship, through and through . . . built by a leading maker of commercial lighting-control systems.

It is a soundly engineered, auto-transformer-type unit. **Not a rheostat.** Has both fuse and thermal-overload protection. Operates smoothly, silently, safely. Is approved by Underwriters' Laboratories.

LUXTROL controls fluorescent, incandescent and cold-cathode lighting. Which makes it ideal not only for use in homes but for non-residential applications, too.

Don't delay. Send the coupon today for the interesting details.

Curtis natural birch cabinets and Curtis Silentite awning windows.

When it comes to kitchens, women know best what women want. So Curtis turned to women designers...stylists...home economists...to create the kind of kitchen cabinets that would make a deep-down appeal to women home-hunters. Combined with Curtis experience—gained from thousands of kitchen installations—these feminine counsels produced the happiest of results: kitchens with *the 53 features that women want most!*

CURTIS

WOODWORK

Tender trap for a lady's affections...

CURTIS

woman-designed kitchens

Every builder has seen it: the possessive sparkle in a prospect's eye that means a sale is made. And Curtis has designed its wood cabinets to produce more sparkle—and more sales—in the kitchen, woman's own domain. Curtis kitchens turn longing into action!

Women want distinctive style—and they see it in the warm glow of natural birch Curtis cabinets ...the smart, simple lines...the unbroken, uncluttered cabinet door surfaces. Here is style that keeps its freshness because these cabinets are made like fine quality furniture.

Women want everything handy—and these Curtis cabinets embody the ultimate in handiness. They're designed with new respect for a woman's anatomy—built for her reach, her ideal working height. And the cabinet doors hide a host of wonders—adjustable shelves, swing shelves, slide-out bins, special cabinets for pots and pans, cutlery and appliances, to name just a few of 53 attractive features.

Women want to be house-proud—and when you show a Curtis kitchen, your prospect's pride goeth before a sale. Mrs. Housewife pictures herself displaying her Curtis kitchen to the neighbors...entertaining her guests there... proudly demonstrating the extra convenience and utility which a Curtis kitchen gives her.

A word to you menfolk: Curtis natural birch kitchen cabinets fit any size or shape of kitchen. They are sold by leading lumber and building materials dealers in most parts of the country. If you cannot find a Curtis Woodwork dealer readily, just write us. You'll also want complete literature for Curtis kitchens—mail the coupon!

Bathrooms to Make Your

Here's a combination of fixtures that makes the perfect Master bathroom arrangement for your homes.

The Marquette tub, graceful in contour, offers such important features as safety bottom, wide seat rim and safety hand grip. The Carlton closet provides attractive elongated bowl, syphon-jet design, dependable and quiet operation. Twin Lowell Lavatories, of Hi-Style vitreous china, are the smartest thing in counter-top installation.

All are featured in Beautyware Tropical Coral, one of the most inviting of fixture colors, blending perfectly with a variety of delightful decorating themes.

Specify

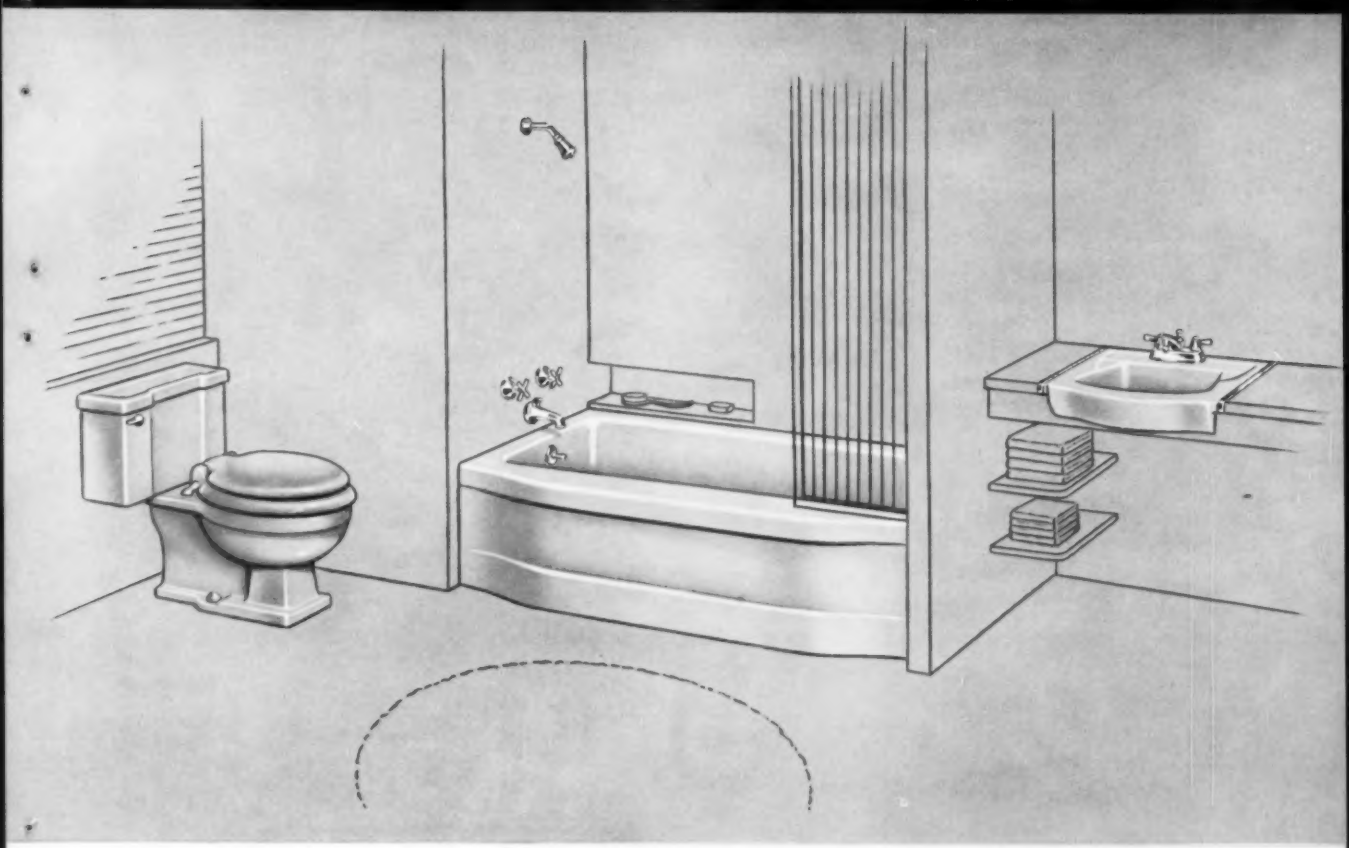

B-300	Marquette right outlet tub
T-8115	Bath and shower fitting
T-8400	Trip-lever drain
B-6402	Carlton elongated syphon-jet closet
No. 54	Olsonite seat and cover
B-3500-HS	(2) Lowell vitreous china lavatories (with fittings mounted)
B-3085	(2) Mouldings

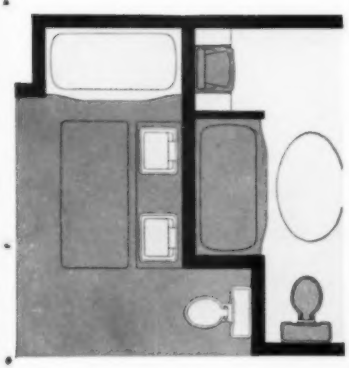

And Providing a Most Practical "Back-to-Back" 2-Bath Installation

BRIGGS MANUFACTURING COMPANY
300 Buhl Building, Detroit 26, Michigan

BRIGGS

Homes More Salable

Make your homes extra desirable by equipping them with a second bathroom like this—in Beautyware Pearl Gray.

The Marquette tub is full sized, functional in design, and built for luxurious bathing in every respect. The Prince closet, one of the most popular styles, features close-coupled, reverse-trap design and time-saving two-bolt installation. The new Lindsay open front lavatory, has a deep bowl, wide ledge and builds into an economical 16 inch counter top.

This second Beautyware bathroom is carefully laid out for back-to-back installation with the Master bathroom—requiring a minimum of plumbing.

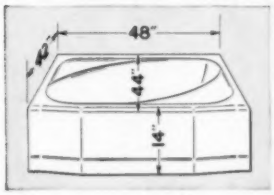

Specify

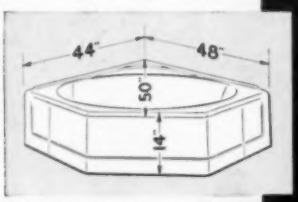

B-301	Marquette left outlet tub
T-8115	Bath and shower fitting
T-8400	Trip lever drain
B-6420	Prince reverse trap closet
No. 50	Olsonite seat and cover
B-3570	Lindsay vitreous china lavatory
B-3070	Union strips
T-8820-S	Centerset fitting

BEAUTYWARE

(At the right) COSMOPOLITAN, recess. Sizes 4½′, 5′ and 5½′.

PREFABRICATED HOMES

"The Story of Manor Homes" is attractive kit containing features of firm's line; floor plans and descriptions of models; freight rate tables; cost estimate sheets; prices and lists of extra equipment.—Manor Homes of America Inc.

Circle No. 232 on reply card Section 6

PREFABRICATED HOMES

Three and 4-bedroom models, interiors and exteriors, described in a 6-page folder. Large glass areas, stone fireplace use of 30 kinds of wall panels in models.—Modular Homes.

Circle No. 233 on reply card Section 6

PREFABRICATED HOMES

Full details on builder-dealer franchise and brochure of home designs and floor plans are available.—Precision Homes.

Circle No. 234 on reply card Section 6

PREFABRICATED HOMES

Illustrated brochures give design details and features of leading models. Include variety of exterior styles and sizes. Show floor plans, front elevations.—Richmond Homes Inc.

Circle No. 235 on reply card Section 6

PREFABRICATED HOMES

Offers information on California contemporary, ranch styles in 8 basic models ranging from $10,000 to $50,000.—Scholz Homes.

Circle No. 236 on reply card Section 6

PLAN SERVICES

Better Homes & Gardens' catalog lists 56 varied "Handy Plans" available to builders. Some examples: home bars, sliding door cabinets, garden chairs, Christmas assortment. — Meredith Publishing Co.

Circle No. 237 on reply card Section 6

WOOD WINDOWS

Well-illustrated 24-page booklet, "Light Up Your Living," contains essential data on "Silentite" window line. Includes sizes, dimensions on double-hung units, bays, panel windows, picture and awning windows, casements.—Curtis Cos. Inc.

Circle No. 238 on reply card Section 6

WHITE OR COPPERTONE BAKED ENAMEL
List Price — 42" Size or Less . . . 39.95
(Larger Sizes Slightly Higher)

Never before so much hood quality for so little money! The Model UC-50 is an undercabinet hood with toggle switches, recessed light under frosted glass, and blade-type fan that removes greasy fumes at the rate of approximately 300 CFM. Exhaust unit hinges down for easy cleaning.

IT'S NEW... MR. BUILDER!
MAKES THE KITCHEN THE COMMUNICATIONS CENTER OF THE HOME.

The *Brand New*
KICH-N-VENT* COMMUN-A-HOOD
Trademark
*Pat. pend.

- **SIZES:** 36" to 42" wide.
- **COLORS:** Copper, Aluminum, and White, baked enamel.
- **INCLUDES** five room-to-room speakers plus one for front door.
- **ONE** compact kitchen unit contains range hood, and music and intercom system.
- **BUILT** by the leader and originator of **built-in-the-wall** home music and intercom systems.
- **DISTRIBUTORS** located in principal cities — a few select territories still open.

Here's a wonderful new home-building idea to make Mrs. Home Buyer's eyes really sparkle. A beautiful range hood with blower, light, and vent pipe . . . plus a COMPLETE ROOM-TO-ROOM MUSIC AND INTERCOM SYSTEM. All built into *one compact unit*. Comes in choice of copper, aluminum, or white, baked enamel. Famous C & H custom unit — at a price comparable to some range hoods ALONE!

NOW America's Finest Protection Devices

PROTECTUB *Covers are 3 Ways Better*

for preventing damage after installations.

1. PROTECTUB Deluxe
NEW IMPROVED COVERS are made of specially tough corrugated boxboard with exclusively processed top liner that is water repellent and damage resistant. Comes in a 2 piece unit. Tailored to fit for overall protection. Installs and removes in minutes.

Order by name. Accept no substitutes.
Specify make model when ordering PROTECTUB.

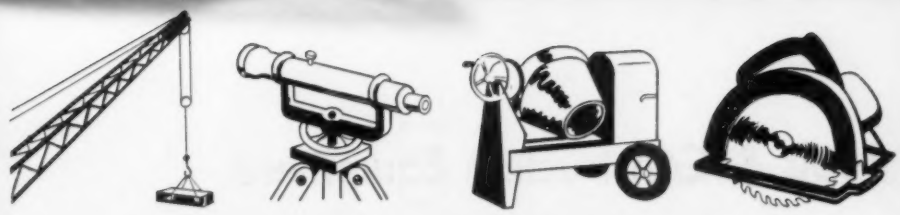

2. COATATUB Liquid Vinyl Plastic Coating
NEWEST form of application for low, low cost protection at its best. Applied with ordinary white wash brush. Dries to strong, flexible film — peels off. Comes in 1 and 5 gal. cans. 55 gal. drums. 1 gal. covers 4 to 5 tubs.

3. ALUM-A-COAT, THE NEW BLUE PLASTIC COATING For the Protection of ALUMINUM PRIME WINDOWS—GLASS and smooth Ceramic surfaces, also Stainless Steel. Made to dry to a tough flexible film when applied either by brushing or spraying on. Peels off readily at completion of construction work. Comes in one and 5 gal. cans & 55 gal. drums.

Plus:
REPAIR TOUCH-UP KIT.
A packaged Do-It-Yourself service for repairing chips on porcelain enamel that's a permanent repair above or below waterline. Anyone can use it. Colors to match all manufacturers' products. TRADE PRICE $2.50 NET.

TABLE SAW CUTTING ANGLES

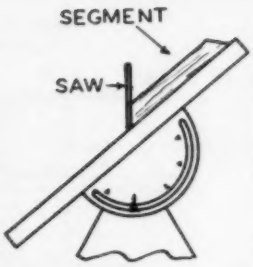

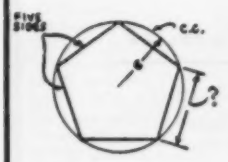

MITERED SEGMENTS are cut with the use of miter gage. Angle setting is made according to table below as required for the figure being cut.

BEVELED SEGMENTS are cut by tilting the saw table to the required angle.

TO DETERMINE SIZE FACTORS

GIVEN: Radius of circumscribing circle (CC) and number of sides.

FIND: Length of side

RULE: Multiply radius of C.C. circle by C.C. factor

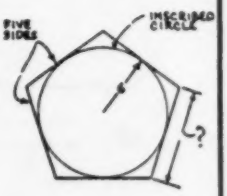

EXAMPLE: Five sides, 6" radius
1.176 x 6" = 7.056
7.056" = 7"
Length of side

GIVEN: Radius of inscribed circle and number of sides.

FIND: Length of side

RULE: Divide the radius of inscribed circle by the I.C. factor

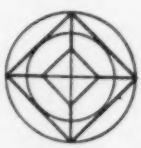

EXAMPLE: Five sides, 6" radius
6" divided by .688 = 8.72
Length of side

USE OF THE TRANSIT

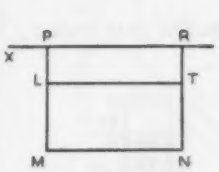

FIG. 1

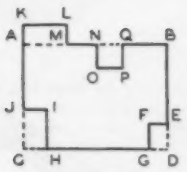

FIG. 2

FIG. 3

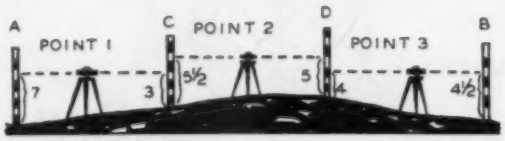

FIG. 4

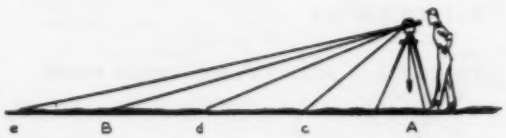

FIG. 5

HOW TO USE A TRANSIT

HOW TO LAY OUT A BUILDING (Fig. 1): Using the plumb bob, suspended from the hook under the spindle, locate the station mark or corner of the lot or building to be laid out. Center the instrument directly over this point by shifting the legs of the tripod so that the plumb bob hangs directly over the station point. To bring plumb bob to this position, loosen leveling screws and shift instrument until the plumb bob points to center. Level up the instrument by tightening the leveling screws.

Street line in the illustration is XX. The corner of the proposed building is L, distance from the street line PL. Then a distance RT should be measured from the street, equal to PL, at a point determining the length of the proposed building. Now the line LT is parallel with the street. And LT represents the two front corners of the building.

To get the line at right angles to LT, leave the sights on the stake at T and turn the eyepiece end of the telescope to the left until the vernier has turned a right angle, or 90°. A sight along this new position will give the line LM, on which the necessary distance is measured off to determine the corner M. Now move level to T, and go through same operation to determine corner N.

To prove the correctness of the survey, check the distance MN, to see that it is the same as the distance LT.

WHEN A BUILDING IS NOT A RECTANGLE (Fig. 2): In such a case, proceed as previously explained. However, additional points must be arranged for, and in that respect small errors are likely to creep in. In all cases, first lay out a large rectangle, along the outside extremities of the proposed building. This is represented by ABCD. These points established, the remaining portion of the layout will consist of small rectangles. Each of these can be laid out and proved separately. In the illustration (Fig. 2) these other rectangles are represented by EFGD, HIJC, KLMA and NOPQ.

ESTABLISHING LEVELS WITH A TRANSIT: Set up the instrument where points may be seen through the telescope. Level up the transit and take a reading where cross-hair cuts on the measuring rod. The rod is then moved to the second point to be established. Then rod is raised or lowered until the original reading is located. The bottom of the rod is then on the same level with the original point.

MEASURING DIFFERENCE IN ELEVATION (Figs. 3 and 4): If the instrument has been properly leveled and is not out of adjustment, the line of sight set up by the telescope when locked in the level position is horizontal in any direction. To obtain the difference in elevation between two points, such as points A and B, Fig. 3, set up and level the instrument at an intermediate point, adjusting the tripod to any convenient height. Sight on a rod held over point A, note the reading where the horizontal cross-hair of the telescope cuts the graduation on the rod. Then, with the rod held on point B, rotate the telescope in a horizontal plane, again sight on the rod and note where the horizontal cross-hair cuts the graduation on the rod. The difference between the reading at A (6 ft.) and the reading at B (6½ ft.) will give the difference in elevation between the two points. Point B is ½ ft. lower than point A. In making these readings, the telescope must be carefully focused on the rod or other object on which it is sighted.

When, for any reason such as irregularity of the ground or a large difference in elevation, the two points whose difference in elevation is to be determined cannot be sighted from a single point, "intermediate points" must be used, as shown in Fig. 4.

ESTABLISHING POINTS ON A LINE (Fig. 5): The transit may be used to establishd points on a line as when a number of stakes in line—but at different heights—are to be located. Swing the two locking levers out of the way and loosen the vertical-motion clamp screw so that the telescope is free to rotate in the vertical plane. Level the instrument and center it accurately by means of the plumb bob and shifting center over the first point. Then release the two locking levers and the vertical circle clamp screw and sight the telescope on the most distant visible known point of the line. Lock the horizontal-motion clamp screw to prevent the telescope from moving out of the vertical plane in which the stakes are to be set, and place the vertical cross-hair exactly on the point with the tangent screw. Then, by rotating the telescope in the vertical plane, the exact location of any number of stakes on that line may be instantly determined, Fig. 5.

POWER TOOL WIRE SIZES

10000	86.91	..	..	..	..	30	50	80

*Above figures represent a one-way distance in feet for a 2 wire run. If a 4% voltage drop is permissable, double the distance listed.

If only 1% voltage drop is allowable, divide the distance listed by 2.
SINGLE PHASE 115 Volt A.C. — Use 115 Volt table above.
SINGLE PHASE 115/230 Volt A. C., 3 Wire — Use 115 Volt table above for each 115 Volt circuit.
SINGLE PHASE 230 Volt A.C. — In table above, use *Watts* column, multiply distances by 4, or use *Amperes* column, multiply distances by 2.
SINGLE PHASE 440 Volt circuit — In table above, use *Watts* column, multiply distances by 16, or use *Amperes* column, multiply distances by 4.
115 Volt D.C. — Use 115 Volt table above.
230 Volt D.C. — In table above, use *Watts* column, multiply distances by 4, or use *Amperes* column, multiply distances by 2.

THREE PHASE SYSTEMS
1. Three phase 230 volt circuit.—Multiply the distances in the 115 volt table No. 6A by 2¼ for the same load. *Use the Amps column.*
2. Three phase 440 volt circuit.—Multiply the distances in the 115 volt table No. 6A by 4½ for the same load. *Use the Amps column.*
3. Single phase 120 volt circuit.—Use the distances in the 115 volt table No. 6A. *Use the Amps column.*

FORMULA FOR DETERMINING WIRE SIZE UNDER ANY CONDITION

Direct Current and Single Phase Systems

$$CM = \frac{D \times I \times 22}{Ed}$$

Three Phase Three Wire Systems

$$CM = \frac{D \times I \times 19}{Ed}$$

CM = Circular Mills — Wire Size (See Table 1)
I = Current in Amperes — (In the case of three phase, it is the current in each wire.)
D = Single distance on one way length of the circuit in feet.
Ed = Allowable voltage drop *in volts*. (2% of 115 V. is 2.3 V.) (2% of 230 V. is 4.6 V. etc.)

NO. 14 NO. 12 NO. 10 NO. 8 NO. 6 NO. 4 NO. 2 NO. 0

THIS SHOWS THE ACTUAL DIAMETERS OF DIFFERENT SIZES OF WIRE, WITHOUT THE INSULATION.

TYPICAL RUNNING CURRENT REQUIREMENTS OF MOTORS

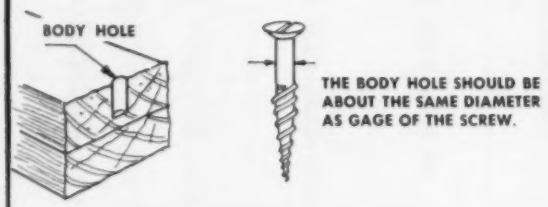

HORSE POWER	115 V 1 Phase A.C.		230 V 1 Phase A.C.		230 V 3 Phase A.C.		115 V D.C.		230 V D.C.	
	C	W	C	W	C	W	C	W	C	W
1/8	2.6	14	1.3	14

PARTNERS WANTED!

by World's Leading Producer of Concrete Forms

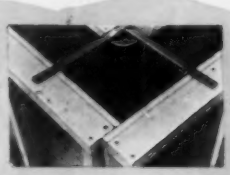

Yes, we mean partners. Under our unique licensing agreement, we work hand in hand with our customers, providing the kind of teamwork which means more profits to you. Our concept of teamwork means that our Training Representatives will instruct your crews thoroughly in the use of ROCFORM SYSTEMS so that you can begin operating efficiently immediately. It means that our representatives will call on you month in and month out, helping you to solve any problems that might arise, and continually improving your operation.

Look around you. In all probability, there is a set of ROCFORMS now operating in your neighborhood. Notice the speed with which ROCFORMS are "stripped" from one job and set up on the next, whether it be on the next lot or 20 miles away. ROCFORM's engineered panels are so easily handled that stripping, moving and setting up can be accomplished in only a few hours, enabling the contractor to pour a job every day with each set of forms.

Inquire. Ask your nearby ROCFORM contractors for their opinion. Our customers are the biggest boosters for the famous ROCFORM SYSTEM. They will confirm the fact that this is the fastest method of concrete forming, and, best of all, will demonstrate to you the unsurpassed quality of work it produces . . . straight . . . smooth . . . clean walls, job after job after job. With reasonable panel care (no crowbars . . . only a carpenter's hammer to strip the forms) a set of ROCFORMS will still produce top-quality work after as many as 300 jobs.

Lowest depreciation. This means an extremely low depreciation per job, only about half as much depreciation as other methods of concrete forming, far overcoming the slightly higher initial cost. And, even after the panels are worn out, you still retain 50% of your original investment. *All walers, tie rods, tie rod pins and clamps are guaranteed and will be replaced without charge.*

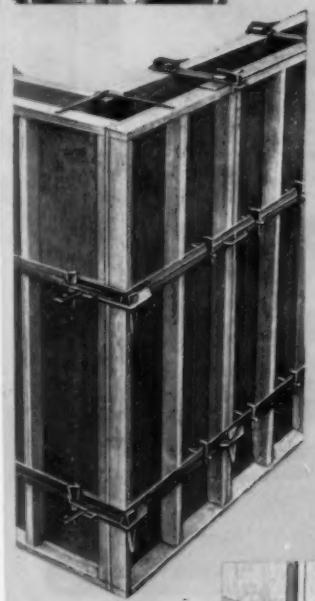

Financing arranged. Our teamwork concept goes even one step further. If you need financing, you can purchase ROCFORMS for a small down payment and pay off the rest in small monthly installments. The better and additional jobs you pour with the faster, better, cheaper ROCFORM SYSTEM will more than meet the monthly payments.

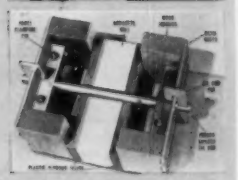

Round corner form eliminates filler strips and results in strong, attractive, rounded basement corners.

Patented wall aligners automatically give wall of uniform desired thickness and line up tops of panels.

Tapered steel tie rods with special pins hold forms rigidly in place. Can be re-used continuously.

ROCFORM metal walers are permanently built into forms. Sections lock together with patented clamps.

Adjustable outside corner clamps allow for a 3-inch variable without necessity of corner fillers.

NEW SKIL SUPER-DUTY

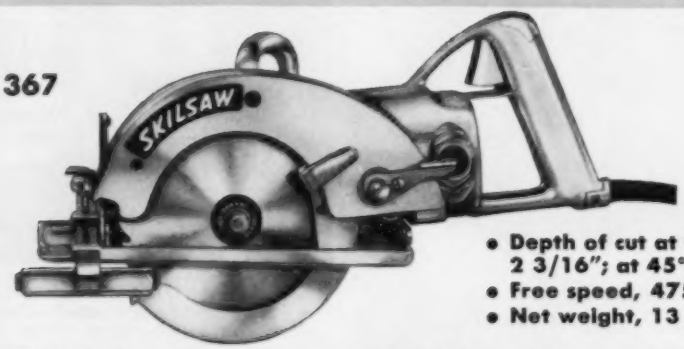

makes every residential rafter cut!
New light weight for easy handling . . .
high blade speed and power to spare
. . . all for only $95.00!

With power and speed to spare, new SKIL Model 367 Saw keeps cutting where others slow down or stall out! Here's amazing cutting performance . . . on extended rip cuts . . . on bevel miters for rafter cutting . . . in green or wet lumber . . . in metal and many other highly resistant materials.

Now there's no need to sacrifice power, speed and long trouble-free service for low price! At only $95.00, the new SKIL Super Duty 367 compares in price with *ordinary* saws. Yet SKIL offers reserve power and speed for all construction cutting. And brand-new features give easier, safer handling . . . greater accuracy and control!

SKIL Model 367 is easily the greatest saw value on the market! Let this rugged and ready tool slash important time and costs. *Before you buy any saw, be sure to "test cut" the new 367! Contact your SKIL Distributor for free trial today!*

Model 367

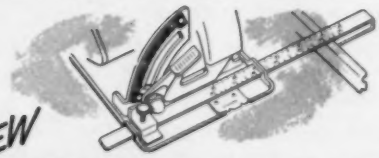

- **Depth of cut at 90°, 2 3/16"; at 45°, 1¾"**
- **Free speed, 4750 r.p.m.**
- **Net weight, 13 lbs.**

New SKIL Features Improve Cutting Ease, Accuracy, Safety!

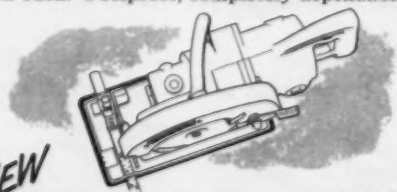

NEW

VARIABLE-TORQUE CLUTCH—A clutch that *really works!* Protection against saw damage and kick-back. Foolproof, completely dependable!

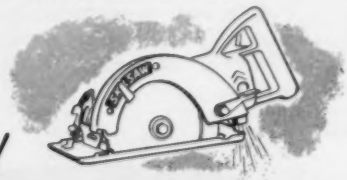

NEW

ADJUSTABLE BEVEL SCALE—Assures miter-box accuracy throughout life-time of saw. Helps produce the finest professional work.

NEW

ALUMINUM ALLOY FOOT—40% STRONGER! Remains true and accurate under hardest use. Reduces weight two-thirds!

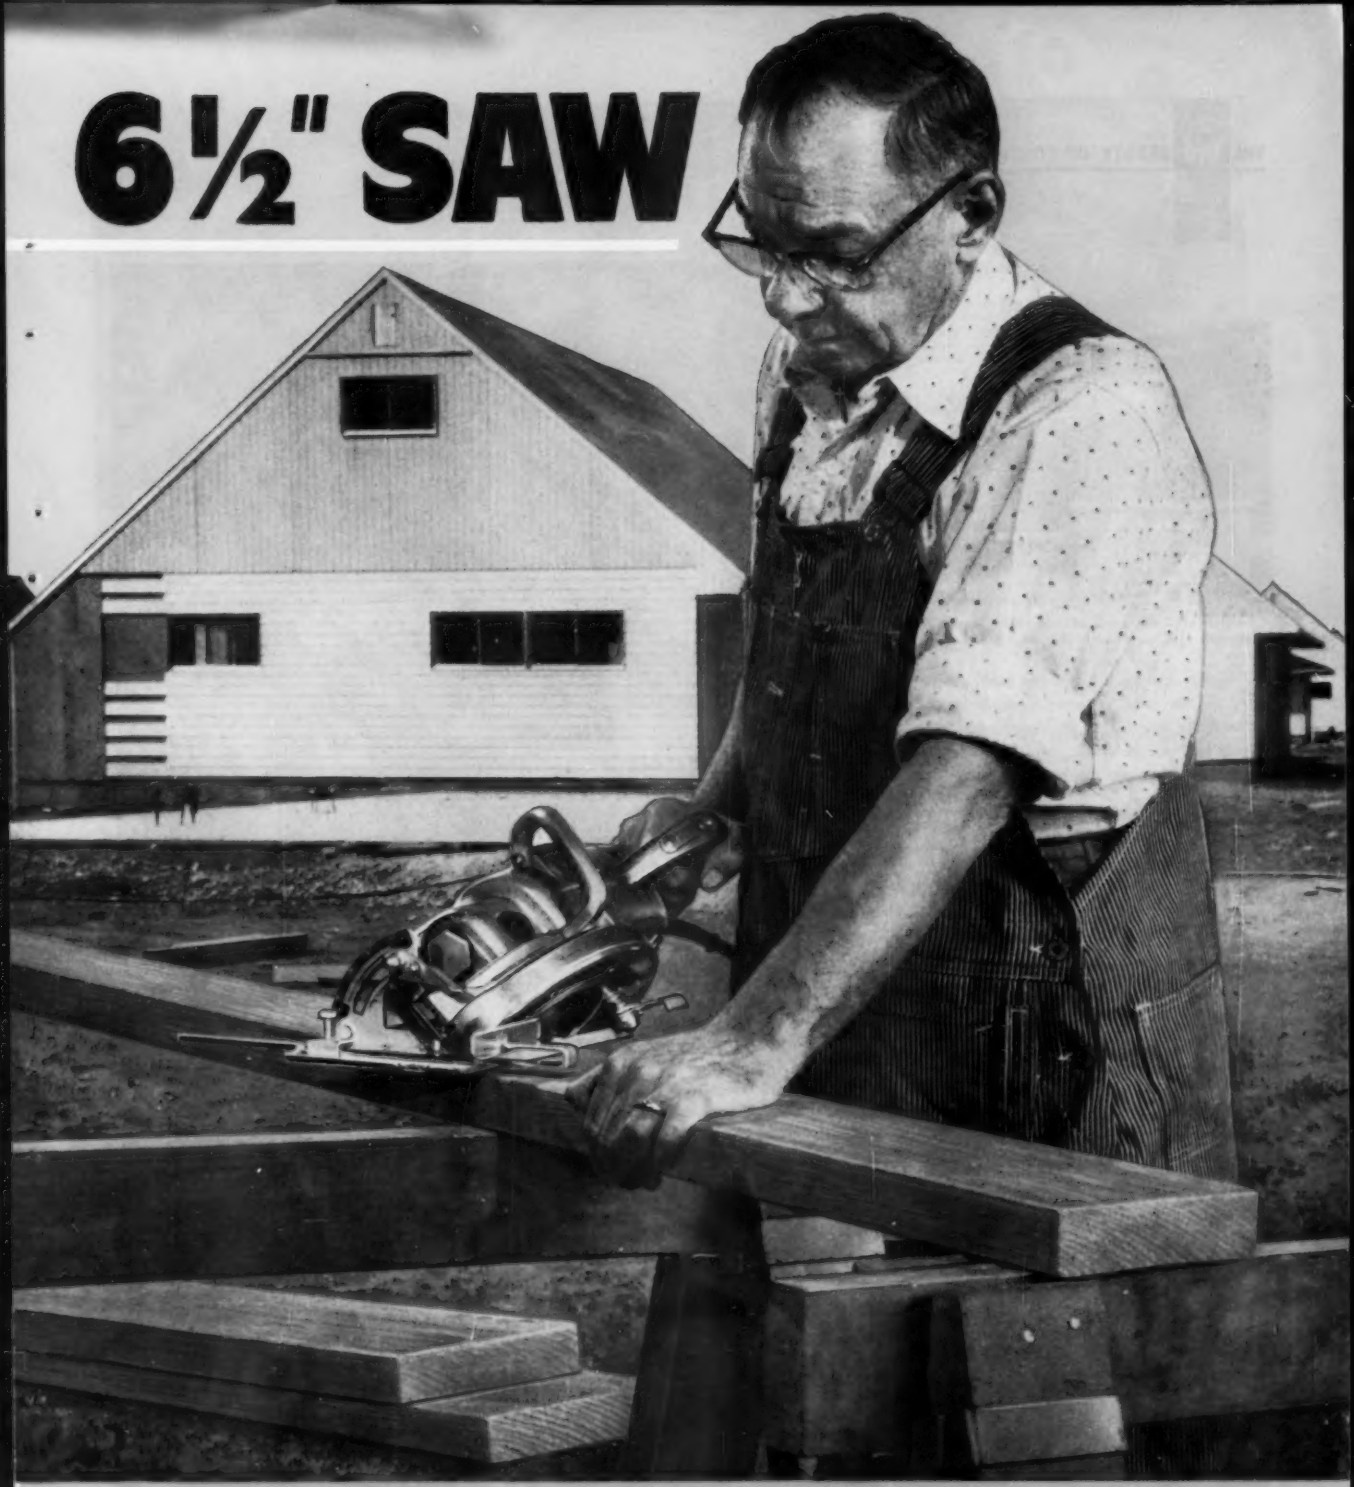

NEW

IMPROVED SAWDUST EJECTOR—Blows dust away from operator. Gives clear sighting for greater accuracy.

Plus these advantages of SKIL Super-Duty Design:

• Worm Drive for plenty of reserve power • Telescoping Guard for safety • All Ball-Bearing to reduce friction • Calibrated Built-In Rip Fence, usable from either side • Blade visible at cut for accuracy

Concrete brick with extruded mortar joints and long low split units combined in this ranch type home.

(Right) Exposed masonry wall in living room of palatial residence. 8" stacked units alternately protruding to obtain pleasing shadow effects.

Unusual effects in concrete block construction bring new opportunities to designers and builders . . .

The many new applications of concrete masonry in new construction appear to be one of the more interesting developments of the current building boom. In fact, the upsurging popularity of concrete masonry as evidenced by the tremendous demand for standard and split block, seems to be the consequence of not only construction economy but of constructive thinking as well.

Certainly the many novel and interesting concrete block effects now noticeable in new home designs are far from the ordinary.

Horizontally stacked 8" x 8" x 16" units enhance the natural beauty of this "all block" office building.

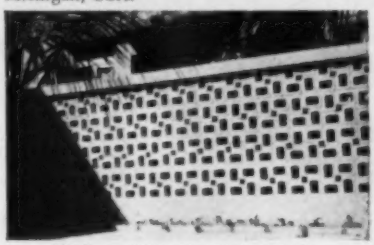

These effects range all the way from major structural innovations such as the use of chimney block on edge, to create a 3D effect, to striking entrance designs. Block stacked horizontally or vertically may also be seen in many new applications.

Of course, it is in the wide variety of design that Vibrapac block has long offered outstanding opportunities. And it is in this respect that its use has increased enormously. New patterns, textures, colors and sizes of Vibrapac block now available, bring designer and builder virtually an artist's palette for creation of new structural beauty. Endless variations of rooms, corridors, stairways, basements, fireplaces, etc., are possible by simply varying the selection and laying of Vibrapac block.

Similar variety may be achieved outdoors. Patios, terraces, steps, planters, retaining walls, etc., all can receive original treatments. Even inexpensive housing can be given the added artistry . . . and sale-ability . . . of unique Vibrapac block effects. Here again, the economy and dependability of Vibrapac block enable the builder to achieve selling appeal of distinctive design without losing the advantage of competitive pricing. Vibrapac block has much to offer as one of the most versatile and useful of modern building materials. Complete literature on request. Write, BESSER COMPANY, Box 183, Alpena, Michigan, USA.

Apartment building entrance employing stacked steel sash block to achieve this interesting effect.

This fence of 8" x 6" x 8" block, laid in a square pattern, provides semi-privacy.

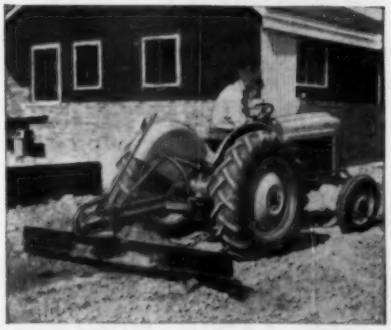

Stacked split units of any height make an eye-appealing fireplace. Shown are 4"x16" split block in stacked bond.

How Ford Tractor workability speeds construction, cuts costs for residential builders...

Builders in a hurry use Ford Tractor power because it helps them get more jobs done faster, and at lower costs!

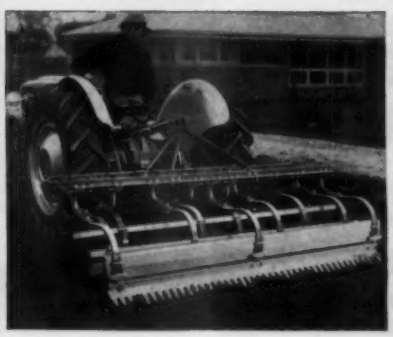

For example, a Ford Tractor equipped with backhoe is a fast, efficient rig for digging service line trenches and foundation footings. *And you can use the same tractor* with front-mounted hydraulic angle dozer to backfill, doze, rough grade. Or, take a Ford Tractor equipped with new Ford "Step-On" Loader. You can lift and load up to 1000 pounds at the touch of a lever. *And you can use the same tractor* with quick-attached rear blade for finish grading, road maintenance, oil mixing and ditching . . . with a rear rake that scarifies, levels, rakes and leaves new lawns ready for seeding . . . with a reversible scoop for hauling fill on small yardage jobs.

This Ford concept of 4-wheel tractor workability means that your equipment dollars work harder on more jobs, more days in the year. So, look around your own current project and consider how many jobs a low-cost Ford Tractor could handle more economically. Then ask your Ford Tractor and Equipment dealer to demonstrate the power size you need—Ford's 600 series with 29 drawbar h.p., the fuel-thrifty Fordson Major Diesel with 36.3 drawbar h.p., or an 800 series Ford Tractor with over 40 horsepower at the drawbar! See your dealer soon, or write direct to:

GATES HAS THE SYSTEM FOR SAVINGS ON EVERY JOB!

Each GATES FORMING SYSTEM has been job-tested for speedier construction, increased efficiency, lower overall costs.

GATES 2 x 4 PANEL SYSTEM
A high wall forming method that minimizes walering and bracing. Creates lightweight, strong form.

GATES HORIZONTAL ROD HIGH WALL SYSTEM
Eliminates sheathing. Excluding ties, ONLY investment is 2'x 8'x ¾" plywood sheet, rods, hinging hardware.

GATES SHEATHING SYSTEM
One of the most economical methods using Gates 2 x 4 Form Ties. No hardware required.

GATES SHEATHING SYSTEM
Using Gates Rod Type Form Ties for leak-proof forming. Practical for small projects.

GATES HORIZONTAL ROD LOW WALL SYSTEM
No backing required; no hinges except at corners.

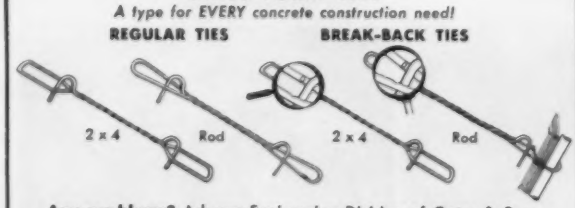

GATES VERTICAL ROD LOW WALL SYSTEM
ONLY hardware used are hinge straps and bolts.

GATES LOW WALL STRAP TIE SYSTEM
For faster, more efficient low wall forming. Gates Strap Tie has built-in spreader, pre-punched nail holes.

GATES FORM TIES
A type for EVERY concrete construction need!

Save Time and Trouble with "HIP POCKET" Plaster and Mortar Mixing

Upstairs, around corners, through doorways, haul it in your car's luggage compartment. It's **portable.**

One-minute assembly. No screws, bolts, fasteners of any kind, Slip three parts together, **plug in cord.**

Mix different coat or color in extra tub, using same motor and base. Mixing keeps up with workmen easily.

Here's a new electric *power tool* . . . for masons, plasterers, terrazo and tile men. It mixes mortar right by your hip pocket—no matter where you work. Man! Does that save time and trouble!

It saves the time, mess and effort of hauling wet mortar or plaster; cuts down waiting time; turns out a smooth, even mix without screening or waiting overnight. One man and the Handy Mixer deliver more mix, faster, than a whole mixing crew with a regular mixer.

It's completely portable . . . no part is heavier than a bag of pre-mixed plaster. It has a capacity of 5 bags of pre-mixed aggregate, but costs no more than an ordinary mixer of half its capacity.

It makes work easier, all the way around.

If you mix mortar, plaster or terrazo, be sure you have all the information, including the low cost "f.o.b. hip pocket" of this speedy new portable multi-bag mixer.

Just mail the coupon below. There's no obligation.

"I'm burning these ten-spots," said Hodge,
Burning bills in his big truck garage,
"To show how we lose,
When a new truck we choose,
Without first having checked on Dodge!"

QUICK QUIZ FOR TRUCK BUYERS

Try this quick quiz before you buy your next truck—and you'll get a better truck for your money:

Q. **What truck line offers you *today's lowest prices* on such popular models as the ½-ton panel, the 1-ton express, and the 1½- and 2-ton stakes?**

Q. **Which truck line has the largest cabs?**

Q. **Which has the greatest driver visibility?**

Q. **Which has the shortest turning radius?**

The answer is "Dodge"—leader for the last 39 years. And this year "Dodge" is the answer to virtually every question you can ask that has to do with lower cost haulage or delivery.

You'll find Dodge trucks are the best answer, too, on price. For Dodge trucks are priced so competitively that no one can beat your Dodge dealer's deal.

When time comes to buy your next truck—get the answers that will lead you straight to today's best truck value—Dodge.

Champs with a new power punch!

These new Task-Force light- and medium-duty jobs pack the biggest power punch in Chevrolet truck history with a modern V8 for every model and an automatic drive for every series!

High-powered V8's and 6's!

V8's are standard in medium-duty L.C.F. models, available at extra cost in any other lightweight or middleweight model you choose. Here's modern short-stroke power for increased engine life and lower operating costs! New Task-Force valve-in-head sixes, rated tops for economy, are more powerful than ever!

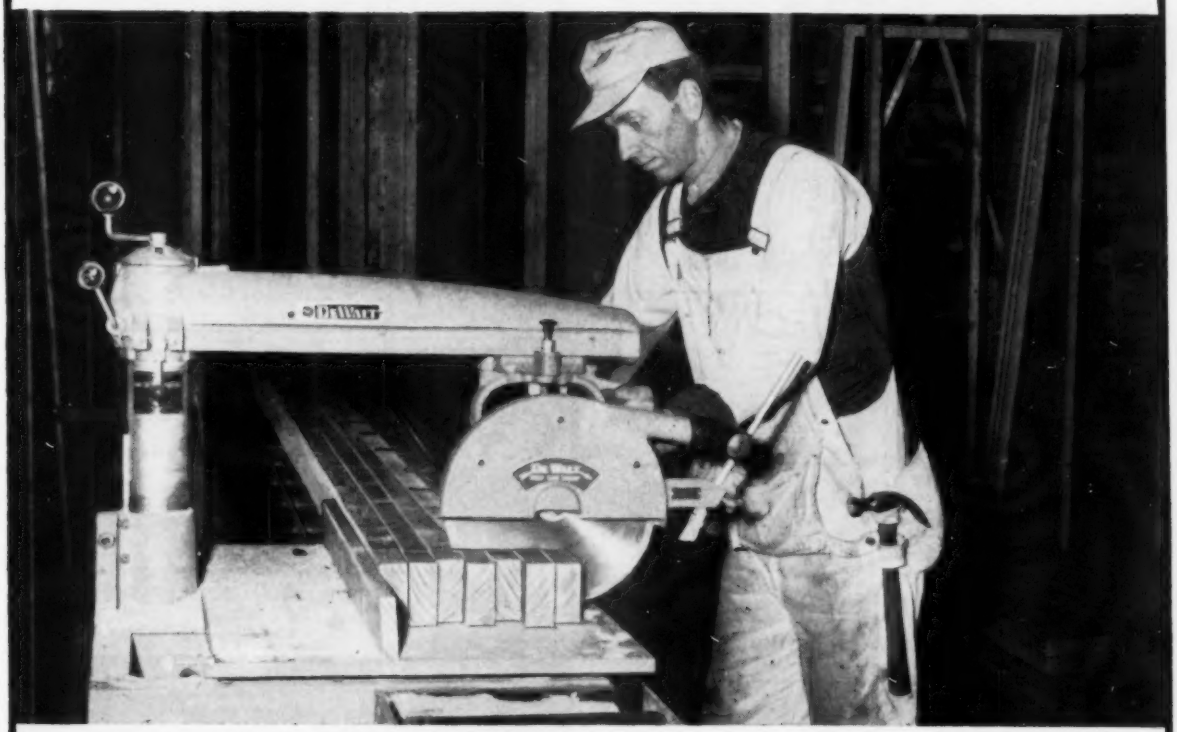

Two work-saving automatic drives!

Revolutionary new Powermatic, with 6 fully automatic forward speeds, available for most middleweight truck models! And you can get Hydra-Matic in all truck models rated up through 1½ tons! Both extra-cost options. See your Chevrolet dealer for details. . . . Chevrolet Division of General Motors, Detroit 2, Michigan.

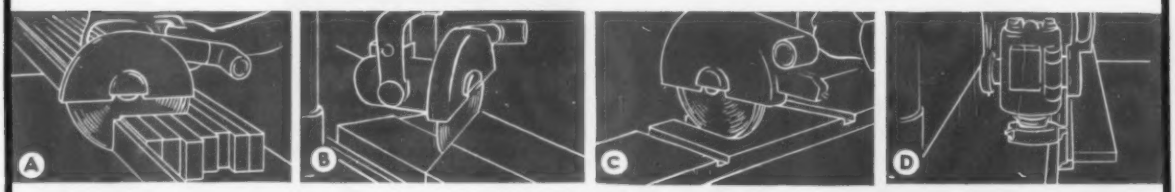

CHEVROLET **NEW CHEVROLET TASK·FORCE TRUCKS**

Anything less is an old-fashioned truck!

Cuts 7-10 times faster than power hand saws!

Portable De Walt® pays for itself on one job

A—De Walt's mechanical arm gang-cuts studs, braces, cripples, and headers... quickly, easily, accurately. B—Arm swings to miter position for mass cutting of common rafters from one marking—with straight-line materials handling. C—De Walt carries inside for finishing work, special built-ins—minimizes scrap. D—Converts mill-run lumber to perfect moldings, for added savings.

De Walt *saves* on practically *every* cutting job inside or outside. Arm raises, lowers, swings 360°. Powerful De Walt-built direct-drive motor rides on arm, rotates 360°, tilts down past 90°, accommodates any circular tool. Join the hundreds of builders who have learned a De Walt *pays for itself on the very first job*—in faster, more accurate work, reduced tool maintenance, greater operator efficiency—in dollar savings by the hundreds!

Job-size GW-I illus.—1½ hp motor, 10" saw blade cuts 3" deep, rips 26" wide... $395. Smaller MB-F, with ¾ hp motor, 9" blade, cuts 2½" deep, rips 24" wide... just $239.

As little as 70c a day in monthly payments after 10% down puts a GW-I on your job. Use De Walt's Easi-Budget Payment Plan.

See your supplier or send for FREE BOOKLET.

Yates-American
10" Tilting-Arbor Circular Saw

From base to blade, a much better saw — for less money!

MORE CAPACITY!

Does the work of a 12" saw! Rips 3⅛" stock with blade at 90°. Saws to center of a 50⅛" panel. Has as much as 25⅝" of table in front of blade, with miter gauge extended.

MORE POWER!

Outperforms all others in its class — on the job-site or in the shop!

Uses any *standard* NEMA frame motor, up to 3 HP, 3 phase — without special lugs or castings. You save on cost of motor.

MORE "BEEF"!

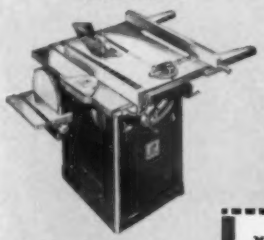

Rugged, heavy, single-trunnion construction. Massive arbor transmits maximum power to the blade — without loss — without vibration!

MORE FOR YOUR MONEY ALL AROUND!

Miter gauge that can't drop off table . . . exclusive feather-touch rip fence . . . accurately ground table surface . . . convenient controls positioned for safety.

Many, many other Yates-American features are described in Catalog PT107 just off the press. Send coupon for free copy.

New Saw-Jointer-Sander Combination

A completely new design concept — safer, easier to use. 8" tilting-arbor saw—4" jointer—10" disc sander. Pays its way on the first job you use it to finish interiors faster, more accurately.

How Bostitch stapling slashes building costs and does the job better in less time

In these days of rising costs and stiff competition, Bostitch stapling cuts building costs in a dozen different ways. STAPLING SAVES PRECIOUS TIME AND ENERGY. No mouthing or fishing for nails. No helper needed to position the work. More area can be covered from one perch or ladder position. *One* squeeze of the tacker or *one* swing of the stapling hammer feeds and drives the staple.

BOSTITCH T5-8 TACKER is the handiest fastening tool a builder can own. Gets into tight places. Drives ¼″ staples for screening, ⅜″ staples for fastening insulation, ½″ or 9/16″ staples for flanged ceiling tile.

Besides flanged ceiling tile, flashing paper, insulation and metal lath, Bostitch T5-8 fastens screening much faster than other methods. Free hand holds fabric taut for perfect tension control.

Fill out business reply card and mail today for complete details.

Fasten it better and faster with

First Class Permit No. 34, Sec. 34.9 P. L. & R., Westerly, R. I.

BOSTITCH
824 Mechanic Street
Westerly, Rhode Island

Bostitch stapling helps you meet or beat deadlines

BOSTITCH H2B HAMMER speeds jobs with one-hand, one-blow operation. Scientifically balanced to lessen fatigue. Built for long, rust-free, trouble-free operation. Three rugged models. Three staple lengths. ¼″ and ⅜″ for H2B, ½″ for H2B ½. H2BR uses wider, flatter staples for maximum holding on soft materials like paper and underfelt.

As on many jobs, Bostitch H2B fastens batt and reflective insulation two or three times faster than hammer and tacks. Also perfect for cornerite, flashing paper, underfelt, undercourse shingling.

BOSTITCH H4 HAMMER drives a rugged ¾″ galvanized staple which spreads inside the wood for an anchor grip. Thus *one* blow with *one* hand drives the equivalent of *two* ¾″ nails of 1/16″ wire.

Bostitch H4 saves one-fourth the time in laying asphalt shingles. One hand is free to position the shingle or to maintain balance on steep roofs. Also speeds application of metal lath to studding, plywood underflooring, built-up roofing, etc.

Conditions for local F. H. A. acceptance are outlined in Bostitch Good Practice Roofing Manual No. 100

BOSTITCH, 824 Mechanic St., Westerly, R. I.

Fasten it better and faster with

BOSTITCH®

STAPLERS AND STAPLES

Do it faster with a Jaeger

Jaeger's faster cycle boosts your daily yardage: Look how this mixer puts out stiffest concrete as fast as men can take it. You charge in only 5 to 7 seconds with Jaeger's "Skip Shaker" loader. You mix and re-mix more thoroughly with Jaeger's criss-cross mix action. You discharge in another 5 to 7 seconds with Jaeger's extra big bucket and flight blades and "catch-all" spoon.

Rugged, too—machined steel drum tracks, Timken bearing rollers, over-size engines, automotive transmission mean long life, low upkeep, no break-downs.

Same wages . . . 12 to 15 yards more concrete: Fastest half-bag mixer built —the 3½S Auto-Loader. You load while you mix, then charge in a flash with automatic shaker hopper. Has equally fast discharging action and same rugged construction as Jaeger 6S, 11S and 16S power loaders. Ask for Catalog.

Self-raising "Hoister" tower handles loads up to 2000 lbs: You can have it with either material cage or 14 ft. concrete bucket, and in 10 ft. sections for heights to 67 ft. Self-raising up to 37 ft. Moves around on skid base. Positive automatic safety device prevents falling even if cable breaks.

Small pumps have big capacity: This 50 lb. "Bantam" pumps 5100 gph., yet can be carried in one hand. Jaeger 2-inch Model 2PN delivers 10,000 gph., yet weighs only 160 lbs. on base mounting or 190 lbs. on pneumatic tired truck. Jaeger "Sure Prime" pumps prime automatically. Get Catalog P4.

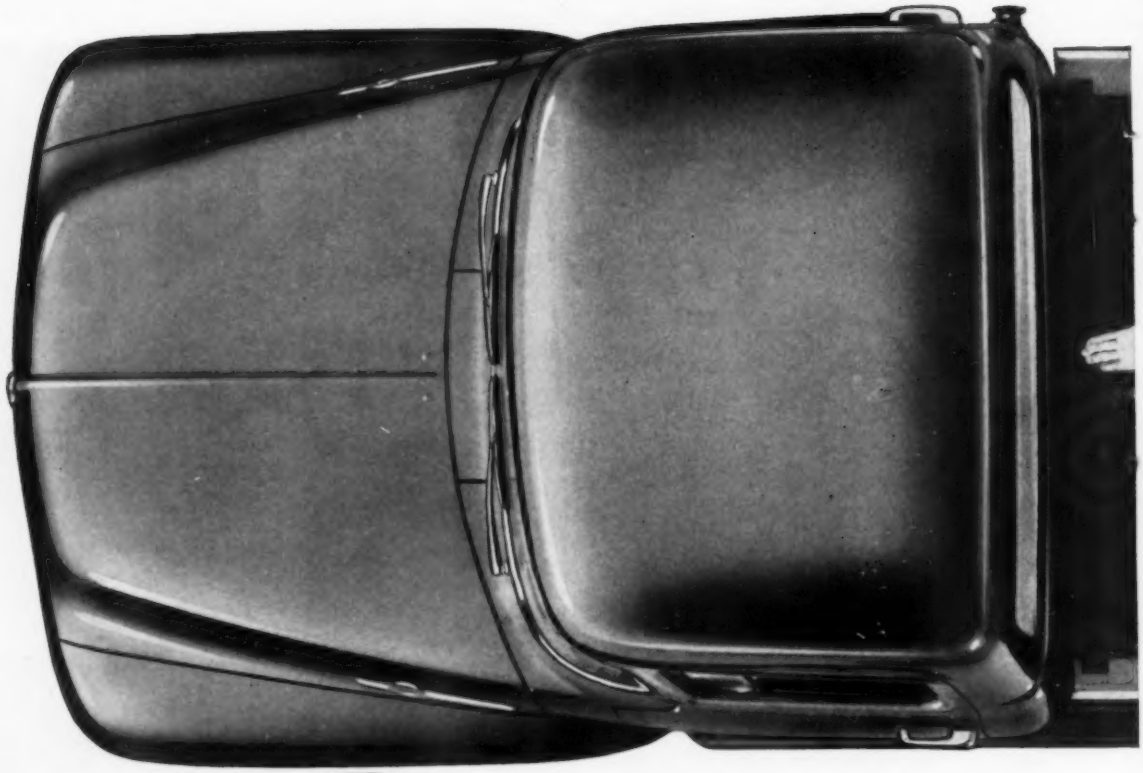

Jaeger compressors do many jobs: A Jaeger rotary "125", or smaller, reciprocating type "75", supplies portable power to run air saws, wrenches and hammers, concrete breakers, backfill tampers, sump pumps and many other builder's tools. Noted for low fuel consumption and full output at slower engine speeds. Catalog JCR5.

NEW FORD PICKUP WITH AN "8-foot

CHOOSE YOUR ENGINE. 133-h.p. *Cost Cutter* Six or 167-h.p. *Power King* V-8. Each offers the economy and long life of *proven* Short Stroke design. Only Ford gives you a choice of Short Stroke power in either a Six or V-8. (Work-saving *Fordomatic* Drive optional at extra cost.)

MOST SAFETY FEATURES, TOO. Only in a '56 Ford will you find the new Lifeguard steering wheel that helps protect driver from steering post, in case of accident; Lifeguard latches that reduce the possibility of doors jarring open in a collision. Biggest brakes in ½-ton field.

Bird's-eye view shows special 8-ft. box available on Ford half-tonners. (Up to 19 cu. ft. more space than other pickups.) *Compare and see . . . why Ford gives the most Pickup for the money in '56.* *TEST DRIVE IT TODAY* at your Ford Dealer's

reach"

Ford now offers BIGGEST box in ½-ton field

MAX. GVW: 5000 LBS. 8-foot (65.4 cu. ft.) body on 118-inch wheelbase gives biggest loadspace of any half-tonner. Even Standard 6½-foot body on a 110-inch wheelbase has more capacity than most other pickups. Tubeless tires on *every* model, at no extra cost.

New F-100 Special 8-ft. Pickup (at slightly higher cost than Standard 6½-ft. Pickup) offers up to 19 cu. ft. more body capacity than any other half-ton pickup made today. That means more load on every trip . . . more money-making capacity *every day*. Other superior cargo features: slanting flareboards for extra load-space; easy operating toggle-type latches for a tight, quiet tailgate; reinforced cornerposts for a stronger, longer-lasting body. *For the most Pickup for the money Test Drive a 1956 Ford!*

FORD TRUCKS LAST LONGER

Certified by independent insurance actuaries for the ninth consecutive year! Studies of over 10,068,600 current license registrations show that Ford Trucks last up to 9.9% longer than any of the other 4 leading truck makes!

Now...for less money

Put more cost-cutting, portable electric power on your jobs!

That power-packed Onan Model 205AJ on the construction site above, delivers 2,500 watts of A.C. power, enough to operate several electrical tools or floodlights simultaneously. Powered by an Onan 4-cycle gasoline engine, it has all the 4-cycle advantages of quick starting, long life and easy maintenance, *yet it weighs only 139 pounds*, and costs less per watt of output than any electric plant in its size range.

This model and others in the new Onan line, ranging from 500 to 10,000 watts, are all lighter in weight, more compact, and lower in cost than previous models. They are completely Onan built . . . powered by new, modern, short-stroke gasoline engines, direct-connected to Onan drip-proof all-climate generators.

Equipped with carrying frame, two-wheel rubber-tired dolly or trailer, these new electric plants can be taken anywhere . . . moved around easily on the job. Get all the facts on these new electric plants from your Onan distributor.

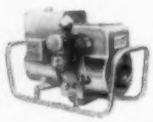

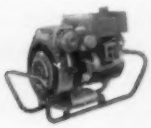

AK SERIES

500, 750, 1,500 watts A.C. 115 volts. 1-cyl. gasoline engine. 1,500-watt model weighs 132 lbs.

New! Just $99.50!

World's only orbital-action bayonet saw!

Now—the first *real* improvement since portable jig saws were invented! It's Porter-Cable's revolutionary new Model 148—designed around a wholly new principle, *guaranteed to outperform any other portable jig saw at any price.*

Orbital action makes the difference. Blade teeth are in contact *only* on the cutting stroke—*back away* on the relief stroke. Harmful "drag" is completely gone—and performance reaches a new high.

By actual test, the Model 148 cuts up to 4 times faster than the best conventional up-and-down saws. It has a full 2" capacity in wood—¾" in aluminum, ¼" in steel. Its cool, comfortable grip and perfect balance make easy work of any job. Get the whole amazing story from your Porter-Cable dealer—or write today for full information.

If your dealer can't give you immediate delivery on this sensational new saw, please be patient. We're meeting the tremendous demand as fast as we possibly can!

NEW Black & HEAVY-DUTY POWER

Only $64.50

MORE SAW FOR YOUR MONEY —AND WE CAN PROVE IT!

1. *Extra* capacity! Comes with 6½" combination rip-crosscut blade. B & D KRO-BIDE blades available for every possible job requirement!
2. *Extra* power! Custom-built motor for heavy-duty sawing — runs cool, without stalling, with no faltering in those "tough" spots!
3. *Extra* safety! Telescoping guard; larger lift-lever; instant release trigger switch with guard; open-end handle; grounding wire in cable!
4. *Extra* adjustment features! Larger wing nuts are out-of-the-way, give fingertip depth and bevel adjustments—safe, easy, positive!
5. *Extra* convenience! Clear view operation; sawdust blown away from operator *and* work!

Decker® 6½" SAW . . . PRICED LOW!

Races through a 2x4, even at 45° angle, with blade to spare—lots of blade for repeated sharpening!

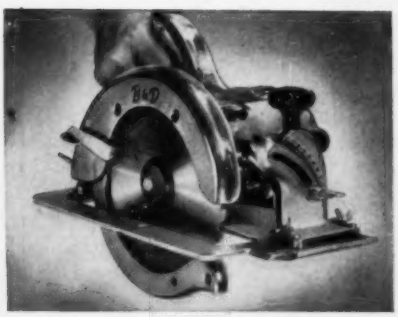

B&D power-built motor gives extra "bite"...for toughest jobs!

A rugged, power-balanced addition to the famous B&D saw line! Remember, we don't buy motors, we *build* them! Each Black & Decker motor is specially built for the job it must do—and the motor in this new 6½" heavy-duty saw is custom-built to give you *more* stamina, *more* sawing "guts" than you'll need! Priced so low that no real pro should ever be without it!

Performs on the job like famous B&D 7", 8", 9" H. D. models!

Extra capacity—makes all cuts in 2 x 10 and smaller lumber; cuts 2⅛" depth at 90° . . . cuts 1⅞" at 45° . . . handles practically any building material: hardwoods, Transite, ceramics, tile, etc. Unsurpassed for depth and bevel cutting—quadrant calibrated for precision adjustment; larger wing nuts; larger steel shoe and cutting guide permits safe sawing from either side!

Address: THE BLACK & DECKER MFG. CO., Dept. H-104, Towson 4, Md.

Power-built to take rough usage. Runs cool, even when cutting intricate patterns in 2x4 stock, practically any building material. Full 1" stroke. Armature and gear shafts mounted on ball bearings. Minimum vibration, *extra* smooth performance. Cuts to 45° angle . . . either side. *Lowest price in the field.*

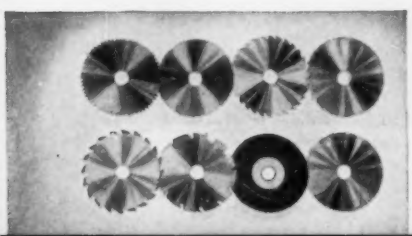

Only **$120.00**

A B&D Heavy-Duty Saw for every job!

Black & Decker offers the most complete builders' saw line in the world—with a *power-built* tool for every professional need! Ask your dealer about the famous 7", 8" and 9" Heavy-Duty models, too!

A Saw Blade for every job!

Rip, crosscut, combination, planer, flooring blades—you'll find a full selection of B&D KRO-BIDE blades (for every cutting job and longer blade life) at your dealer's!

Exclusive! Fully adjustable shoe for cuts 0° to 45° —cuts up to 1¾" at 45° on either side of shoe! Full line of wood and metal cutting blades available!

New HOMELITE EZ

...the Direct-Drive CHAIN SAW with ALL of the features YOU want

Only 19 pounds

Full 5 Horsepower

New Low Cost

Faster Cutting Speeds

AND WITH THE NEW HOMELITE FLOATING POWER, you'll find handling ease you never knew before. The all-angle, any-position carburetor gives you full power cutting — whether you're felling, bucking, notching, limbing or under-cutting.

Floating Power lets you cut with less effort, less fatigue than any other chain saw. Because the Homelite EZ weighs only 19 pounds you can carry it anywhere. Its full 5 horsepower cuts through 8″ Oak in 5 seconds and 18″ Pine in 14 seconds. And the three bar sizes — 17″, 21″ and 25″ will handle trees up to 3 feet in diameter.

The EZ brings you Homelite dependability at a new low cost — not just a low initial cost, but also lower maintenance and operating costs than any other direct-drive chain saw.

See this new floating power now! Try it and you'll know why the Homelite EZ offers easier cutting, faster cutting, more profitable cutting for your dollar.

Ask your Homelite dealer for a free demonstration. Also ask about the convenient time payment plan.

FREE!

Win a Homelite

24 Homelite EZ chain saws being given away each month. Nothing to buy. Nothing to write. No obligation. Just ask your dealer how you can win. See him today!

NEW TRESTLES WITH 9 HEIGHT ADJUSTMENTS

FOR FAST MASONRY CONSTRUCTION, mason contractor L. Hubbard of Euclid, Ohio, uses new "Trouble Saver" Putlog Trestles on a project for Joe Miller Homes Co. The new Putlog Trestles are 5'-long and provide nine height adjustments, ranging from 4' to 6'. Masons set each Putlog on the top course, then brick is laid over them. Putlogs are pulled out of the wall and adjusted to new height as the job progresses. When a pin is removed, the new Putlog Trestle swings down flat for easy storage or shipping.

"CHAMP" Forms with cross members on 24" centers, being erected for house foundation in Skokie, Illinois. Contractor, Harding Bros., Northbrook, Illinois

New Design Lowers Form Costs

It's SYMONS New "Champ" Form

"CHAMP" Form Panel
Cross members on 12" centers

Rail Plates

JUST 3 PIECES

Connecting Bolt

2-Way Form Tie

Tightening Wedge

The new Symons "CHAMP" Form brings to the builder an efficient and accurate form at a cost approximately 20% less than Symons Standard Panel Form. Although designed for light, commercial and residential construction, contractors report the "CHAMP" is equally satisfactory for use on high pours.

CONSTRUCTION FEATURES—The panel has a 2x4 frame with 2x4 cross members that lay flat against ¾" plywood face. The cross members are placed on 12" or 24" centers depending on whether forms are to be used for residential or commercial construction. Pressure against form is transmitted directly to tie through rail plates which are located at each end of cross members and attached to frame.

INTERCHANGEABLE FEATURE—"CHAMP" Forms are made in the same sizes as Symons Standard Panel Forms—2 ft. wide, and 4', 6' or 8' long. Special sizes will be made to order. The hardware and ties used on Symons Standard Panel Form are also used on the "CHAMP" form. This makes it possible to use Symons Standard and "CHAMP" Forms interchangeably.

"CHAMP" Forms may be rented with purchase option—all rentals to apply on purchase price.

Symons

SYMONS CLAMP & MFG. CO. Dept. D-6
4261 Diversey Avenue, Chicago 39, Illinois

To Reach the Buyers of BUILDING PRODUCTS and EQUIPMENT put your selling message before them in AMERICAN BUILDER

If it takes POWER *Plus... it takes a* HENRY

Equipped with the Henry Hydraulic Backhoe and the Henry Industrial Shovel, you have power in reserve for those extra tough digging and shoveling jobs.

The Henry Backhoe, with hydraulically operated outrigger, levels up both backhoe and tractor in seconds, to give straight-down digging on sloping terrain.

This and other exclusive Henry features—the telescopic boom, the self-anchoring main frame, the 160 degree swing arc, the parallel circuit control valve, the down pressure regulator valve—give the Henry far more mobile power than you'll find in any other backhoe.

The Henry Hydraulic Tractor Shovel, with its five attachments — utility bucket, manure fork, hoisting crane, dozer blade and fork lift—has no equal for versatility. At the same time its solid steel lift arms and rugged construction enable it to meet the heaviest of demands.

These Henrys offer you a team that is unbeaten and untied for power—performance—versatility.

See your dealer or write today for full information.

how to cut costs on concrete finishing

Powerful, new STOW lightweight roto-trowel gives faster, smoother finishes!

Here is a new, rugged, lightweight rotary trowel that works fast, leaves surfaces really smooth!

The G-24 Roto-Trowel weighs only 69 lbs. and because it is only 24 inches wide, can be easily carried anywhere, through doorways or down stairs . . . finishes so smoothly that hand work is no longer required. And it's so easy to use . . . you can be an expert in 15 minutes. Floats and finishes driveways, terraces, cellar floors, sidewalks, and porches. Trowel blade tilt can be controlled by the knob on the handle *while the machine is running.* A safety clutch control on the handle stops the trowels from rotating the instant the handle is released. A sturdy guard ring lets you work right up to walls and around pipes.

The Stow G-24 Roto-Trowel is low in cost, too, compared to large models. It has a 2.2 HP engine, making it the most powerful trowel in the low-priced field. As one contractor said about the G-24, "This is one of the best buys I have ever made."

Stow also makes a 29 inch, 34 inch and 46 inch trowel concrete vibrators and screeds. Send in this coupon, if you'd like more information. We'll send you our Catalog 560. Write Today.

MANUFACTURING COMPANY • Harrisburg, Pa.

New "foot-a-minute" Simplex Forms slash basement costs!

Speed erection and stripping--16-24 manhours for stripping, transporting, setting, and pouring of walls, plus layout and pouring of footing for next day's job.

Inner and outer panels set simultaneously. On delivery to job panels are spotted, avoiding "backtracking."

Minimum bracing required. Cam action of locking levers secures forms in place. Flared line-up rail slips over top of panels for positive alignment. Brackets provide 2x6" scaffold for men, plus helping in alignment.

Unusual new precision--steel butts against steel, maintaining positive dimensions.

No loose hardware--hardware mounted to panels--no pickup operations--no loss. With hardware mounted, Simplex panels weigh only 65 lbs.

Remarkable strength--tie wires withstand 3600 psi. Bolts, bars, bushings, screws, and case-hardened levers guaranteed to withstand high-pressure concrete. An 8", 128' wall can be poured safely in less than two hours. 1⅛" plywood has normal life of 100 pours.

Minimum storage space--all equipment for average home basement stacks on 12-foot bed truck. One trip!

Poured walls now cost less than block in many areas, due to Simplex efficiency.

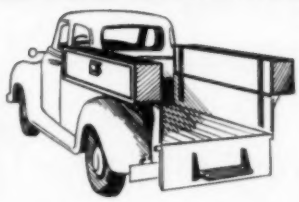

See a demonstration--sets now in operation throughout Midwest. Write for literature, or send prints for quotation.

ONLY WINCO® Portable Electric Power Gives You the Exclusive New CONSERV-ator

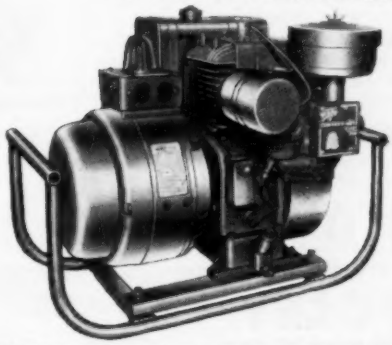

IDLING CONTROL
✓ Extends Engine Life
✓ Reduces Fuel Consumption
✓ Lowers Maintenance Cost

Standard Equipment at No Extra Cost on Model Shown

Conserv-ator Idling Control—A flick of the switch reduces engine to idling speed, easily, quickly and positively, when power is not needed. Conserves fuel, extends engine life—cuts service and operating costs.

205B14S2D-1M2—New 2500 watt Direct Drive contractor model, 115 volts, 60 cycles, A.C. Control box with receptacles standard equipment.

Light weight
Only 158 pounds! Shock-mounted on convenient carrying cradle

Retractable Starter
Optional equipment at extra cost.

Super Power
King-size generator gives you close, steady, voltage regulation.

A complete line of Winco Engine Generators available for your individual power needs.

Easy to Start
4-cycle Briggs & Stratton engine gives you quick, easy, dependable starting.

Easy to Service
Engine parts & service stations readily available.

Easy to Use
Speedy-shift dolly for quick portability. Easily attached or removed. Optional at extra cost.

Wincharger Corporation
Sioux City, Iowa

CMC Hoe-Boy Mixers are the *Sure Way* to Cut Job Costs

You can't beat a low cost Hoe-Boy for mixing easier, better, faster. Adjustable Triple Action Steel or Rubber Mixing Hoes do a REALLY THOROUGH JOB of mixing. It's only 29" wide to go through narrow doorways. And then there are Leak Proof Seals, Anti-Friction Tapered Roller Shaft Bearings, Heavy-Duty Electric Welded Frame, Machine-Cut Sprockets, Roller Chain Drive.

There's a complete range of CMC Hoe Type Mixers from the 3½ to 4½ foot Hoe-Boy through two 6-foot models, an 8 and 12-foot Mechanical Hoeman.

SUPER "6"

MECHANICAL HOEMAN

CONSTRUCTION MACHINERY COMPANY, Waterloo, Iowa

earn $3 to $5 an hour

in spare time with new

FOLEY GRINDER

SHARPENS:

- All rip, cross-cut and combination circular saws 5" to 44" in diameter
- Dado heads
- Rotary mower blades
- Ice Skates
- Planer knives
- Scissors, shears
- Plane blades, chisels
- Other sharp edged tools
- Sands, buffs, polishes

START YOUR OWN sharpening business in basement or garage—make up to $3 or $5 an hour in spare time. The new, low-cost Foley 314 Grinder accurately sharpens all circular saws—and just 2 saws a day can bring you up to $60 a month extra income. The average circular saw takes only 15 or 20 minutes to sharpen—and prices run $1.50, $2.00 or more. 95c out of every dollar you take in stays in your pocket. Easy to operate—no experience needed. Send coupon today—no salesman will call.

SIMPLIFIED CARPENTRY ESTIMATING

HERE IS EVERYTHING YOU NEED to know to "take off" a bill of materials from set of plans and specifications for a frame house. Saves you time figuring jobs, protects you against oversights or mistakes that waste materials and cost money. Nothing complicated—just use simple arithmetic to do house carpentry estimating with this easy-to-use ready reference handbook.

CONTENTS: Estimating Fundamentals. Foundation Material. Framing. Exterior Finish. Hardware. Building Information. Estimating Short Cuts. Labor Hours per Unit of Work. Carpentry Mensuration. Mathematical Reference Tables. Stair Estimating. How to Plan a House.

1950. 5th Ed. 304 p. 123 illus. 60 tables. 5x8. $3.75

FREE EXAMINATION COUPON

"Building line squeeze a breeze for my Berger convertible"

says A. E. Freed, Homestead Construction Co., White Plains, New York

"We constructed this one-family house on a particularly narrow lot and zoning regulations left no margin for error on the side yards. But my new Berger Convertible hit it 'on the button'—just as it has on all our jobs. We use our Berger to stake out the foundation, check the footing level, set up grade lines, check grade levels for septic tank systems and many other jobs. I find the Berger particularly easy to set up. It's a fact that our accuracy in measuring and our savings on labor have long since paid for its cost."

That's because the Berger Convertible is built for *builders*. The new, ultra-sharp 22 power 10½" erecting internal focusing telescope gives you a crisp, clear image over long sights as well as at distances as close as three feet. Rugged brass and bronze construction—dust protected leveling, clamp and tangent screws—it takes the bumps in the field and stays on the job without time lost for repair.

Why the new Berger Convertible with 3-ft. short focus is the best buy... *Compare*

TELESCOPE:	Short focus 3 feet; bronze; erect image; power 22 diameters; diameter of objective 35 mm.
OPTICS:	Coated—brilliant, clear image
FOOT PLATE:	Forged brass; trivet integral
YOKE FRAME:	Cast bronze
HORIZONTAL CIRCLE:	Forged brass, with double vernier reading to five minutes
VERTICAL ARC:	With double vernier reading to five minutes
LEVELING BASE:	Four screws; nickel silver leveling screws with cold and heat-resistant heads
SPINDLE:	Forged steel
SHIFTING PIECE:	Forged brass; to shift instrument without resetting tripod
POSITIVE LOCKING MECHANISM:	Converts instrument from transit to level with ease and speed and stays in adjustment at all positions
PLATE LEVEL:	In addition to telescope vial; for easier, better leveling control
CASE:	Mahogany transit case
TRIPOD:	Straight grained, kiln dried white ash

Instruction manual for layout and instrument use.

Instrument, complete with mahogany transit case, tripod, plumb bob, sun shade... $219*.

Write for literature on the Berger Convertible, our 12" Dumpy Level, Service Transit-Level and Duplex Level. And ask about our Engineers' Transits and Levels.

C. L. Berger & Sons, Inc., 47 Williams St., Boston 19, Mass.

ESTIMATING

2. SIMPLIFIED CARPENTRY ESTIMATING*

By J. W. Wilson and C. M. Rogers

Everything needed to take-off a bill of materials from a set of plans and specifications for a frame house. Many helpful tables and short cuts that simplify the work. $3.75

3. BUILDING ESTIMATOR'S REFERENCE BOOK VEST POCKET ESTIMATOR

By Frank R. Walker

Two companion books containing latest estimating and cost data on everything that goes into a house. Most complete available. $12.00

4. CONTRACTOR'S MATERIAL LIST

A 10-column take-off form for complete listing of materials and labor costs. $1.00

5. SPECIFICATIONS

Full set of detailed house specifications (and item index) with spaces for inserting pertinent descriptive data. $.50

BRICKWORK & MASONRY

6. ART OF BRICKLAYING

By J. E. Ray

Basic bricklaying rob instruction. Many illustrations, glossary, special scaffolding and cement block chapters. $4.00

7. MASONRY SIMPLIFIED VOL. I
(Tools-Materials-Practice)

8. MASONRY SIMPLIFIED VOL. II
(Practical Construction)

By Dalzell and Townsend

Practical masonry procedures in the various phases of construction from concrete forms to fireplaces and septic tanks. Includes discussions of new products such as glass blocks, waterproofing mixtures and insulating blocks. Each vol. $5.00; $10.00 for both.

HEATING & PLUMBING

9. HEATING, COOLING AND AIR CONDITIONING HANDBOOK

Handy reference manual and practical instruction book. 706 pages; 351 illustrations. $4.00

10. HOW TO DESIGN AND INSTALL PLUMBING

By A. J. Matthias, Jr.

Every step in the design and installation of the plumbing system to fulfill blueprint requirements and specifications. $4.25

ELECTRIC WIRING

11. INTERIOR ELECTRIC WIRING AND ESTIMATING

By Uhl, Nelson & Dunlap

How-to-do-it book of wiring and estimating. $4.25

12. WESTINGHOUSE HOME WIRING HANDBOOK

By A. C. Bredahl

Guide for planning wiring of moderate-priced homes. With emphasis on safety, effectiveness and efficiency. $1.00

1. RICHEY'S REFERENCE HANDBOOK*

By H. G. Richey

For construction engineers, architects and builders. Here, in one handy volume, is a whole library of information covering all the building trades. Twenty-three chapters, over 400 tables, 544 drawings and a 20-page index. A completely new kind of handbook stressing actual building practice and what-to-use and how-to-do-it instructions. An *American Builder* publication sold on a ten-day inspection privilege (see coupon).

1600 pages—$9.95

PLAN BOOKS

13. HOMES FOR LIVING*

By Samuel Paul, Architect

While designed for prospective homeowners in the "dreaming" stage, builders find this book useful as a source of ideas and suggestions to customers. Sketches and detailed floor plans for 80 houses in a wide variety of popular styles, divided into three general price brackets according to family income. Complete plans and specifications for these houses are also available. $3.95

14. SUNSET WESTERN RANCH HOUSES

Authoritative book on the California ranch house, with thorough pictorial descriptions, ground floor and site drawings. $3.00

15. DUPLEX AND APARTMENT HOUSES

By J. W. Lindstrom

Floor plan sketches and brief descriptions of 35 duplexes, 11 four-apartment buildings, and five larger ones ranging from six to twelve apartments. $1.50

MISCELLANEOUS

22. PRACTICAL ACCOUNTING AND COST KEEPING FOR CONTRACTORS

By Frank R. Walker

Complete instructions and examples showing proper methods of keeping time and compiling costs on all classes of construction work. $3.00

CARPENTRY & BUILDING

16. HOUSE CONSTRUCTION DETAILS*

By Nelson L. Burbank

Exact working guide for every detail of house construction from foundation to finish. Tells dimensions, materials, processes and step-by-step working methods. $4.95

17. HOUSE CARPENTRY AND JOINERY*

By Nelson L. Burbank

Every step in carpentry in and around the house, clearly explained and illustrated. Covers every job from foundation to interior trim. $4.75

18. HOW TO BUILD CABINETS FOR THE MODERN KITCHEN*

By R. P. Stevenson

New book gives step-by-step directions, material lists, building pointers and includes detailed working drawings for making every type of cabinet. $4.95

19. FUNDAMENTALS OF CARPENTRY

By W. E. Durbahn

Complete house carpentry in two volumes. An outstanding value. $8.00

20. THE STEEL SQUARE

By Gilbert Townsend

Instructions in fundamentals plus step-by-step house construction problems solved by proper steel square use. $2.50

21. STAIR BUILDING

By Gilbert Townsend

Fully-illustrated explanation of every problem in design and construction of stairs. $2.95

23. PAINTING AND DECORATING CRAFTSMAN'S MANUAL

Sponsored by the Painting and Decorating Contractors of America. $2.00

24. ARCHITECTURAL DRAWING FOR THE BUILDING TRADES

By Kenny & McGrail

Practical drawing instruction for builders, contractors, students and draftsmen. Excellent show-how illustrations. $4.80

FREE with orders of $5.00 or more

25. *Modern Methods of Home Heating**—J. L. Shank**

Standard heating systems illustrated with 17 floor plans with heating outlets. 40 photos of equipment and installations; 25 boiler and piping diagrams; 11 heat loss calculating tables. $.25

***Starred books are our publications sold with 10-day inspection privilege with full refund.**

1 kilometer.....⅝ of mile
1 hectare.....2½ acres
1 stere. or cu. meter....¼ of a cord
1 liter....1.06 qt. liq. or 0.9 qt. dry
1 hektoliter.....2.8 bushels
1 kilogram.....2.2 pounds
1 metric ton.....2,200 pounds

METRIC EQUIVALENTS—LINEAR MEASURE

1 centimeter.....0.3937 in.
1 decimeter.....3.937 in. or 0.328 ft.
1 meter....39.37 in. or 1.0936 yards
1 dekameter.....1.9884 rods
1 kilometer.....0.62137 mile
1 inch.....2.54 centimeters
1 foot.....3.048 decimeters
1 yard.....0.9144 meter
1 rod.....0.5028 dekameter
1 mile.....1.6093 kilometers

ACREAGE AND AREAS

ACRES	ONE SIDE SQUARE TRACT	AREA
1/10	66.0 lin. ft.	4,356 sq. ft.
⅛	73.8 "	5,445 "

2	295.2 "	87,120 "
2½	330.0 "	108,900 "
3	361.5 "	130,680 "
5	466.7 "	217,800 "

WEIGHTS

1 gram.....0.03527 ounce
1 kilogram.....2.204622 lbs.
1 metric ton.....0.9842 English ton
1 ounce.....28.35 grams
1 pound.....0.4536 kilogram
1 English ton.....1.0160 metric tons

AVOIDRUPOIS WEIGHT

27 11/32 grains.....1 dram
16 drams.....1 ounce
16 ounces.....1 pound
25 pounds.....1 quarter
4 quarters.....1 cwt.
2,000 lbs.....1 short ton
2,240 lbs.....1 long ton

DRY MEASURE

2 pints.....1 quart
8 quarts.....1 peck
4 pecks.....1 bushel
36 bushels.....1 chaldron

LIQUID MEASURE

4 gills.....1 pint
2 pints.....1 quart
4 quarts.....1 gallon
31½ gallons.....1 barrel
2 barrels.....1 hogshead

MENSURATION

Area of a square = length x breadth or height.

Area of a rectangle = length x breadth or height.

Area of a triangle = base x ½ altitude.

Area of parallelogram = base x altitude.

Area of trapezoid = altitude x ½ the sum of parallel sides.

Area of trapezium = divide into two triangles, total their areas.

Circumference of circle = diameter x 3.1416.

Circumference of circle = radius x 6.283185.

Diameter of circle = circumference x .3183.

Diameter of circle = square root of area x 1.12838.

Radius of a circle = circumference x .0159155.

Area of a circle = half diameter x half circumference.

Area of a circle = square of diameter x .7854.

Area of a circle = square of circumference x .07958.

Area of a sector of circle = length of arc x ½ radius.

Area of a segment of circle = area of sector of equal radius—area of triangle, when the segment is less, and plus area of triangle, when segment is greater than the semi-circle.

Area of circular ring = sum of the diameter of the two circles x difference of the diameter of the two circles and that product x .7854.

Side of square that shall equal area of circle = diameter x .8862.

Side of square that shall equal area of circle = circumference x .2821.

Diameter of circle that shall contain area of a given square = side of square x 1.1284.

Side of inscribed equilateral triangle = diameter x .86.

Side of inscribed square = diameter x .7071.

Side of inscribed square = circumference x .225.

Area of ellipse = product of the two diameters x .7854

Area of a parabola = base x 2/3 of altitude.

Area of a regular polygon = sum of its sides x perpendicular from its center to one of its sides divided by 2.

Surface of cylinder or prism = area of both ends plus length and x circumference.

Surface of sphere = diameter x circumference.

Solidity of sphere = surface x 1/6 diameter.

Solidity of sphere = cube of diameter x .5236.

Solidity of sphere = cube of radius x 4.1888.

Solidity of sphere = cube of circumference x .016887.

Diameter of sphere = cube root of solidity x 1.2407.

Diameter of sphere = square root of surface x .56419.

Circumference of sphere = square root of surface x 1.772454.

Circumference of sphere = cube root of solidity x 3.8978.

Contents of segment of sphere = (height squared plus three times the square of radius of base) x (height x .5236)

Contents of a sphere = diameter x .5236.

Side of inscribed cube of sphere = radius x 1.1547.

Side of inscribed cube of sphere = square root of diameter.

Surface of pyramid or cone = circumference of base x ½ of the slant height plus area of base.

Contents of pyramid or cone = area of base x 1/3 altitude.

Contents of frustum of pyramid or cone = sum of circumference at both ends x ½ slant height plus area of both ends.

Content of frustum of pyramid or cone = multiply areas of two ends together and extract square root. Add to this root the two areas and x 1/3 altitude.

Contents of a wedge = area of base x ½ altitude.

Section 6 Management & Buying Reference

Section 6 Management & Buying Reference

BUILDING TERMINOLOGY

ALCOVE—A large recess in a room, generally separated by an arch.

APRON—A piece of finish below stool of window to cover plastic edge.

ARCH—Arrangement of building materials in a curved form and designed to carry weight.

AXIS—An imaginary line through the center of a sphere.

BALLOON FRAMING—A system of framing in which corner posts and studs are in one piece from sill to roof plate, intermediate joists being carried by girts spiked to the studs.

BALUSTER—A column supporting a rail, used in balustrades.

BALUSTRADE—A number of balusters, or columns supporting a rail.

BATTEN—Small strips of boards, used over joints of sheathing for weatherstripping.

BAY—The space within a building between two adjacent rows of columns.

BAY WINDOW—a window projecting outward from wall of a building.

BEAM—A horizontal member supporting a load over an opening, or from column to column.

BEARING—The portion of a beam that rests on supports.

BEARING WALL OR PARTITION—A wall supporting any load other than its own weight.

BED—The horizontal surfaces in masonry on which stones or bricks lie in courses.

BELT—A course of stones or brick projecting from wall, generally placed in line with window sills.

BEVEL—An instrument for taking angles.

BOND—The connection between bricks or stones formed by lapping them upon one another, forming an inseparable mass.

BORDER—A piece around the edge of anything.

BRACE—A piece used in framing to form a triangle, thereby stiffening the structure.

BREAK—A projection from the building surface.

BRIDGING—Method of stiffening floor joists and studs, by inserting members in between.

BUTT-JOINT—Where two ends butt together.

CASEMENT—A glass frame hinged on its vertical edges.

COFFER—A deep panel in a ceiling.

COLLAR BEAM—A beam above the lower ends of the rafters and spiked to them.

COLONNADE—A row of columns.

COLUMN—A round pillar.

COPING—The capping or covering of a wall.

CORBEL—A piece of stone or timber jutting out of a wall to carry weight.

CORBEL OUT—To build out courses of masonry from the face of wall.

CORNICE—The projection at top of a wall finished by a blocking course.

COURSE—A continued layer of brick, stone, slate, shingles, etc.

COVE CEILING—A ceiling curving from the walls.

CURB ROOF, OR MANSARD ROOF—A roof formed of four continuous planes, each two having an external inclination.

CURTAIN WALL—A non-bearing wall between columns, and not supported by beams or girders.

DOOR FRAME—The frame into which the door fits; it consists of two upright members called jambs, and a head.

DORMER WINDOW—A window in a sloping roof, forming a gutter on each side.

DOVETAILING—Fastening boards together, by letting one piece into another as the expanded tail of a dove.

DOWEL—A pin for fastening wood or stone. A piece of wood driven into wall, so other members may be fastened to it.

DWARF WALL—Low wall.

EAVES—The lower part of slanting overhanging wall, to throw water off wall structure.

FACADE—The principal front of a building.

FLASHINGS—Metal strips let into joints of wall or any rising part so as to lap over gutters to prevent leaking.

FOOTINGS—The foundation on which bearing walls or columns rest.

FOUNDATION—That part of the building below grade.

FRAMING—The rough house frame — floors, walls, roofing.

FURRINGS—Material used to create an even surface from irregular framing.

GIRDER—A large beam for supporting joists or walls over an opening.

GROUNDS—Pieces of wood embedded in plastered walls to which skirting or other work is attached. Also used as a plaster stop round doors and windows.

GROUT—Thinned mortar that will fill joints in masonry.

HEADERS—Stones or brick extending over thickness of wall. Wood beams into which joists are framed, such as for framing openings around stairs.

HEAD-WAY—Clear space under arch, over stairway.

HIP-ROOF—A roof rising by equally inclined planes from all four sides of the building.

JAMB—Side post of openings.

JOIST—Timbers to which floor boards are nailed or ceiling lath fastened. Joists rest on wall or girders.

LATH—A strip used in slanting, tiling and plastering.

LATTICE—A network of strips of material generally used as a screen.

LEDGE—A projection from a plane.

LINTEL—A horizontal member covering the opening of a door or window.

LOUVER—An opening with slats for ventilation.

MANSARD ROOF—See curb roof.

MULLION—The members between lights of windows or screen-work.

MUNTIN—A small mullion in light framing, such as a middle stile of a door.

NEWELL POST—Post at the lowest step, receiving start of handrail.

NOSINGS—Projecting edges of treads of stair, or the edge of a landing.

PARAPET—A dwarf wall along edge of roof, or around a terrace walk.

PARGING—Thin coat of plastering to smooth off rough brick or stone walls.

PARTY WALLS—Partitions of brick or stone between buildings on two adjoining properties.

PENT-ROOF—A roof wtih a slope on one side only.

PITCH OF ROOF—Proportion obtained by dividing the height by the span.

PURLINS—Members which support the rafters to prevent them from sinking.

RAFTERS—Joists to which roof-boarding is nailed.

REVEAL—The two vertical sides of an aperture between the front of a wall and the window or door frame.

RIDGE—The top of a roof which rises to an acute angle.

RIDGE-POLE—The highest horizontal timber in the roof for supporting heads of rafters.

RISER—The vertical board under the tread in a stair.

SASH—The framework which holds glass in the window.

SCRATCH COAT—The first coat of plaster, which is scratched to afford a bond for the second coat.

SCRIBING—Fitted woodwork to an irregular surface.

SHED ROOF OR LEAN-TO—A roof with only one set of rafters, falling from a higher to a lower wall.

SILLS—The timbers on the ground which support superstructure. Most frequently applied to member at bottom of doors or windows.

SLEEPER—Wood member laid on ground to receive floor joists.

SOFFIT—The lower horizontal face of anything, such as under face of a beam.

SPAN—Distance between supports of a beam, girder, etc.

SPANDREL—The space between any arch and the level beams over same.

STILE—The upright piece in framing or paneling.

STUDS—The wooden members used in partitions and exterior walls, to which laths or boards are applied.

SURBASE—A moulding above the base.

TREAD—The horizontal part of a step of a stair.

TRIM—The finishing materials, like the lock, knobs and hinges on a door.

TRIMMER—The beam or floor joist into which a header is framed.

VALLEY—The internal angle formed by two inclined sides of a roof.

WAINSCOT—The wall lining—may be of wood, glass, tile, etc.

"...the precious ingredient which can assure perpetual youth to new construction."

"We builders have long recognized the fact that antique electrical standards contribute most to the obsolescence and depreciation of the home.

"Technological improvements in the home are fundamentally powered by electricity . . . and where inadequate wiring cannot convey sufficient power, the house must sicken and die. The difference in cost at the time of building a new house, between a substantial wiring system and one which just provides the minimum essentials, only amounts to a few cents a day over a period of the average mortgage.

"Electricity is the precious ingredient which can assure perpetual youth to new construction."

How builders can make the most of LIVE BETTER...

Better living . . . electrically! That's what over one million new home buyers in 1956 will be looking for. The national and local LIVE BETTER . . . *Electrically* campaign is making customers more conscious of the many ways electricity can add comfort to a home . . . lighten household chores.

Builders can turn this public demand into profits. You can plan your homes for better electrical living, with adequate wiring, colorful appliances that end drudgery, and lighting that displays every built-in feature.

Such homes sell faster and at greater profit. And the folks

Joseph B. Haverstick
President, National Association of Home Builders

Electrically

who buy them will appreciate the thought and foresight of the builder. They'll talk about it. This kind of talk sells more houses for you.

A new book entitled "How to help home owners LIVE BETTER . . . *Electrically*" has been produced to help you make the most of the LIVE BETTER . . . *Electrically* campaign. This 64-page digest-size book contains complete plans for "load-matched" residential wiring systems. For your copy, call or write your local electric utility company or mail coupon below with 10 cents to cover cost of handling.

LIVE BETTER . . . *Electrically*
P.O. Box 505
Great Neck, New York

Please send me a copy of book entitled "How to help home owners LIVE BETTER . . . *Electrically*." I enclose 10 cents to cover cost of handling.

BUILD THIS COMPLETE SWIMMING POOL IN SEVEN DAYS AT HALF THE COST!

NATIONAL

Pre-Stressed, Pre-Cast, Concrete Unit

POOL

Complete "Package" Delivered Direct To Pool Site In Trailer Truck!

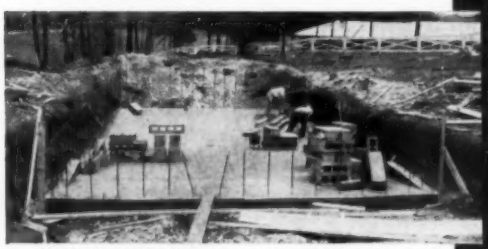

The NATIONAL POOL "package" is delivered to your pool site in a trailer truck and includes all fittings and a filtration system which purifies and keeps water safe for healthful swimming at all times. Construction requires no special equipment and can be done with common labor. Specially designed pre-cast concrete wall sections grooved to fit into each other solves cost problem. Pool walls are scientifically pre-stressed to prevent cracking. New method puts swimming pools in reach of all budgets.

Prices start at $1,300.00 for 16′ x 34′ Private Pool complete with Filter System, Pump, Motor and Fittings.

SAME BUILDING PROCEDURE APPLIES TO LARGEST TYPE POOLS AS WELL AS SMALL FAMILY TYPE PRIVATE POOLS

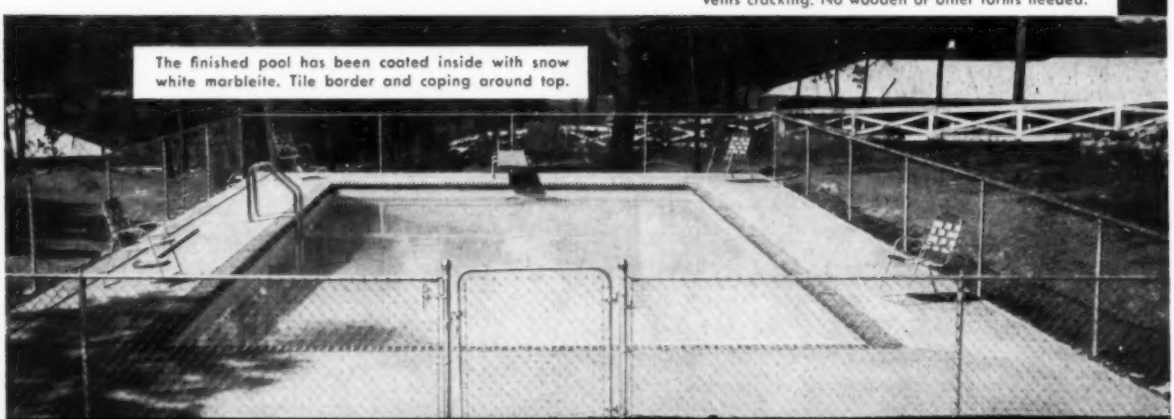

Excavation for pool showing steel reinforcement for floor and inside pool walls.

Vertical pre-stressing steel rods are ready for specially grooved pre-cast wall sections to be placed over them. No heavy construction equipment needed. All work can be done with common labor.

Walls being pre-stressed by tightening nuts above plates of sheet steel, after concrete mixture has been poured inside pre-cast concrete sections. Prevents cracking. No wooden or other forms needed.

The finished pool has been coated inside with snow white marbleite. Tile border and coping around top.

Classified Directory

Prefabricated Home Manufacturers

This section comprises a comprehensive directory of companies engaged in the manufacturing of Prefabricated Homes. Every effort has been made to include all manufacturers who distribute through builders or other qualified dealers.

Information on each company has been compiled from the latest available at the time this issue went to press and any omission is unintentional. Every attempt has been made to standardize the data on each manufacturer giving only that information which is of interest to the builder, or prospective buyer, of prefabricated homes. Manufacturers are listed alphabetically by States to make it easier for the reader to find the plant in his locality. Those companies who have plants in other States are also listed with a cross reference since in most cases the shipping radius given is from manufacturing plants or warehouses.

For further information and literature direct all inquiries to the contact given at the address of the main plant.

This symbol indicates the manufacturer is a member of the Prefabricated Home Manufacturers' Institute, an association whose purpose is to establish high quality standards for the industry. For general information on the subject of prefabrication write: Prefabricated Home Manufacturers' Institute, 908 20th St., N. W., Washington 6, D. C.

100,000 NATIONAL HOMES . . . this alone is proof that National Homes Corporation has fulfilled the needs and desires of thousands of families for better homes at prices within their means. It is a mark of customer satisfaction and success never before achieved in the home building industry. It is your assurance of the competitive advantages National Homes offers you as one of its franchised builder-dealers. To make certain your own future, join now the most successful organization in home building in the world today.

Here are just a few of the many competitive advantages:

TRAINED ORGANIZATION to assist with land acquisition, site planning, and the dealer's entire building program.

HOUSE PACKAGE that represents two-thirds of the building job. This is delivered to the site on schedule for the most economical use of local labor. There is no need for warehousing or inventory.

FASTER COMPLETION TIME that means a more rapid turnover of capital and a higher dollar volume of profit.

FAVORABLE FINANCING OF VA OR FHA-APPROVED MORTGAGES by the National Homes Acceptance Corporation and more than 600 leading financial institutions.

ADVERTISING AND SALES PROMOTION, on national and local levels, of our brand-name National homes.

HOMES PROFESSIONALLY DESIGNED by Charles M. Goodman, AIA, and color-styled by Beatrice West, both well known authorities in the home field.

DOZENS OF FLOOR PLANS and hundreds of exterior variations to suit every need and desire.

HOMES PRODUCED BETTER and more economically . . . by the assembly-line methods of modern manufacturing . . . which means a lower selling price.

MASS PURCHASING of brand-name materials results in higher quality and in important savings that are passed on to the home-buyer.

ALL THE ADVANTAGES of a 25,000-house-a-year builder regardless of the size or location of the community.

For more information on how you may join the most successful home building team in the country with a National Homes builder-dealer franchise, contact me personally. JAMES R. PRICE, President, National Homes Corporation, Lafayette, Indiana.

ONE OUT OF EVERY 48 HOMES BEING BUILT IN AMERICA TODAY IS PRODUCED BY . . . National HOMES

(*Continued on page F21*)

THE "SOUTHLAND"

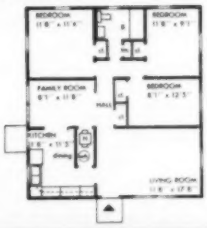

offers four family-size bedrooms, spacious living room, and attractive exterior styling. It is designed for easy selling in the Southern states.

THE "PIONEER"

immensely popular contemporary plan, giving 3 bedrooms and versatile "family room" for a budget price. Several variations to eliminate monotonous look.

THE "PILGRIM"

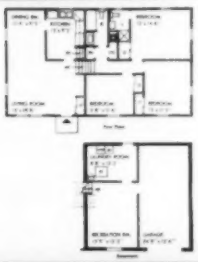

gives you the option of building a 4-bedroom, 2-bathroom home, or a 2-bedroom home with a spacious expansion attic. Delightful traditional design, modest price.

THE "HIGHLANDS"

built on the outstandingly popular split-level plan, offers three family-size bedrooms, two complete baths, and an attractive recreation room —all at a very popular price.

QUALITY is the Difference

Your competitors can imitate any floor-plan you use—and come close to matching the price you ask. But they can't equal the quality you offer in an American House!

They can't equal the well-seasoned lumber . . . the precision cutting and fitting . . . the rock-solid engineering. A partially-finished American House is your best sales story, because customers can see the important quality differences.

You get extra value, too: more use from your capital, a longer building season, and the kind of advertising, promotional, and decorating help that assures fast sales.

PROJECT BUILDERS—American Houses is America's leading prefabricator of large housing developments. Write for details today.

If you build east of the Mississippi, write today for more complete details on the American Way to bigger sales, better profits, and fewer building headaches!

You can make BIG Profits Building and Selling

DOUGLAS Million Dollar Bonded HOMES

...revolutionary new type Dealer Franchise gives you *Exclusive* right to sell

"AMERICA'S ONLY MILLION DOLLAR BONDED HOMES"

Here's why as a DOUGLAS HOMES DEALER you'll make more money than ever before

- **TREMENDOUS SAVINGS IN CONSTRUCTION COSTS—Fastest and easiest to erect... with least carpenter hours required, of *any* homes ever designed. Walls go up easily in sections... under roof by night.**
- **PRICED BELOW COMPETITION—yet the most complete line of superior constructed, *custom-crafted* 3-bedroom homes ever offered. Individually styled—with 18 basic floor plans... 26 elevations... over *150 variations* for your customers to choose from.**

For 10 times faster capital turnover than with conventional construction, build-sell DOUGLAS HOMES . . . with such outstanding features as: all Western woods . . . all framing 2 x 4's or larger; 16″ centers . . . (exclusive) self-supporting hip-roof trusses, min. 2 x 6's . . . (exclusive) all window and door headers two 2 x 12's back-to-back . . . (exclusive) 4 ft. roof overhang available. All these and other exclusive features, backed by our MILLION DOLLAR BOND direct from bonding company to your customer gives him the confidence in you that makes for easy sales.

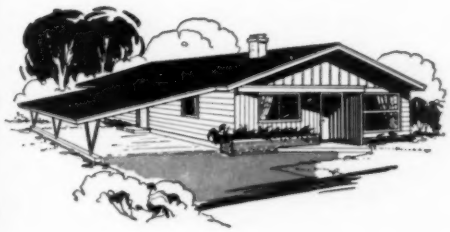

DOUGLAS HOMES *exceed FHA and VA requirements* . . . present no code problems . . . are immediately available from modern million dollar plant. AND you're backed by a 25 year established firm staffed to aid you with plans, specifications, financing counsel, sales help . . . in fact any problem that may arise. You'll be *proud* to build-sell DOUGLAS HOMES BACKED BY THE MILLION DOLLAR BOND that guarantees those hidden values your customers can't see.

SEE 30 MILLION DOLLARS

VISIT ANY U. S. STEEL HOMES DEALER AND WATCH HIM INTRODUCE

THE bride's

WANT TO SEE HOW TO MAKE MONEY FAST? Just go out and watch any U. S. Steel Homes Dealer promote the Bride's House of 1956.

Yes, we're repeating the Bride's House Promotion again this year. Only we're doing it bigger. Why? Because it was such a resounding success last year. Over 2,000 happy homemakers spent $30,000,000 for Bride's Houses in 1955.

LOTS OF MONEY TO BE MADE

National advertising in magazines like *Life*, April 16; House Beautiful's *Guide for the Bride*, Summer Issue; *Small Homes Guide*, Summer-Fall issue; *Living for Young Homemakers*, May; and *Parents'*, April . . . commercials on the United States Steel Hour . . . and full-color ads in local newspapers help cut dealer sales costs. Cooperation from suppliers, banks, utilities, stores, and shops helps too.

YOU COULD BE PART OF IT

Some dealers, with the help of these promotions, are able to cut their sales cost to less than 1%. And, compared to what they were doing before joining U. S. Steel Homes, many have *doubled or tripled* the value of their businesses. Just because they can build faster, sell faster, and turn their money over faster as U. S. Steel Homes Dealers. We can help you do the same. Let us prove it. Write United States Steel Homes, Inc., Market Development Division, New Albany, Indiana.

And be sure to see the Bride's House Promotion in your area. See how we can help *you* to sell more homes.

WATCH FOR IT
APRIL 22

IN THE MAKING!

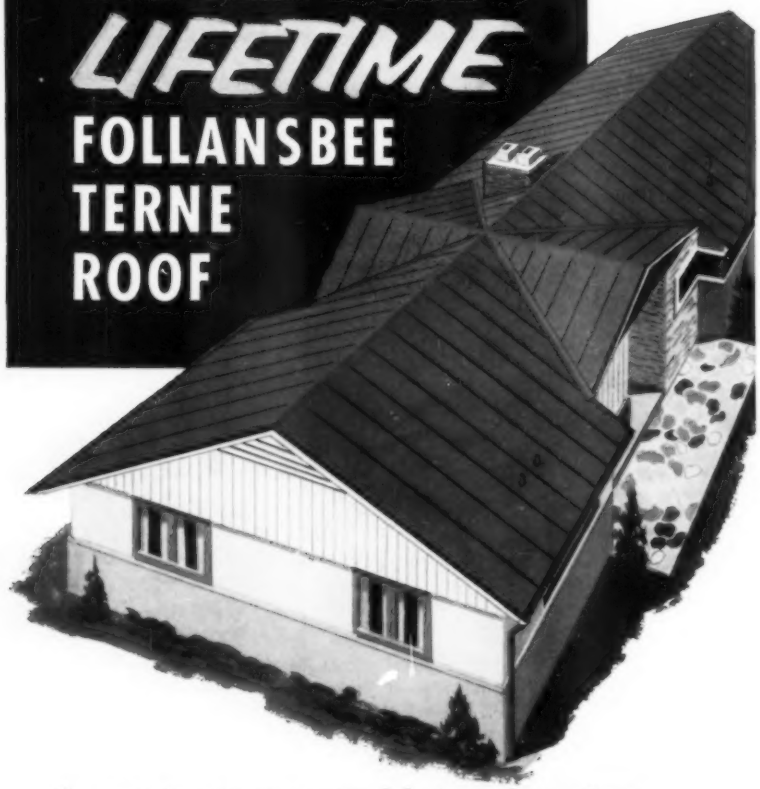

house OF 1956

United States Steel Homes, Inc., now manufactures not only a complete line of quality wood homes, but now can also furnish attractive, prefabricated wood churches.

Offer your buyers a

LIFETIME FOLLANSBEE TERNE ROOF

The most important structural feature of your homes . . .
is the roof—because it's the roof that provides shelter which is the primary function of a house.

You can make the roof the most important SALES FEATURE of your homes too if you point this fact out to your buyers and provide a lifetime FOLLANSBEE TERNE roof

And in addition to its permanence, a terne roof offers them modern design features, greater reflectivity, color and safety from fire and, properly grounded, from lightning.

Remember too, a terne roof weighs only about 70 pounds per square, giving you the opportunity to save on the sub-structure.

Ask your sheet metal contractor about terne roofs. He'll tell you that a terne roof is a roof you can really sell. Terne is tops for gutter, conductor, valleys and flashing too.

Profit makers. You can get more profit per home out of the homes you're now building and increase your completions many fold by using Cooper Homes Interiors. Sales too are accelerated. Cooper Homes Interiors are finished with furniture quality Philippine Mahogany, delivered to your site in our own trucks completely assembled ready for installation.

We'll design and manufacture complete interiors, everything but the perimeter walls, for the plan you're now using. Or you may build from any of our plans without additional cost. The individual units are also available separately. Our program is completely flexible . . . easily adaptable to fit your situation. Here are a few of the units now being used by builders all over the central United States.

1. Kitchen Cabinet (Right or Left return)
2. Decorative Wall Section
3. 6′ Wardrobe Closets
4. 4′ Wardrobe Closets
5. Bed Room Door-Wall Sections
6. Heater Closet
7. Linen Closet
8. Bath Room Vanity with Mirrors
9. Tub Shower and Wall Section (one unit)

We invite you also to investigate Cooper Homes "Profit Package." This includes finished homes, neighborhood planning . . . with color coordination, too, if you want it . . . and a complete interim and mortgage financing program.

If you're building within 700 miles of Amarillo, get with us now. We've just recently expanded, and offer unlimited builder-dealer opportunities. Wire, write or call now. There's a representative near you, ready to explain the entire program.

The Harrison
3 bedrooms, 2 baths

COORDINATED DELIVERY

On the site delivery is timed to fit into working schedule. Costly delays are avoided and smooth schedule assured.

FACTORY COOPERATION

The availability of a factory representative to help in paper work, assist in obtaining financing, and in advising means more time to devote to building.

HIGHER VALUATION

The fine features of Precision Homes encourages generally higher valuations thus making it easier for the customer to buy.

LOWER INVESTMENT

With the exclusive Precision Homes Pan-L-Pac system there are no purchasing problems, no warehousing, no inventory, and less invested capital.

Franchises Available

Lucrative franchises are available in Michigan, Illinois, Indiana, Ohio and Kentucky.

If some building terms PUZZLE YOU...

BANK-RUN is not a panic.
BUS CONDUCTOR is not a fare grabber.
FISH PLATES are for beams, not breams.

... this is a book you need!

By **Herbert R. Waugh** and **Nelson L. Burbank**
Former instructors in construction and building trades, Bridgeport, Connecticut and Cincinnati, Ohio schools.

422 PAGES

OVER 12,000 TERMS

HUNDREDS OF ILLUSTRATIONS

BEING SURE of the correct meaning of any building term can often mean money to you! And with many thousands of such terms in use, not **even the** most experienced can be positive regarding the meanings of them all. The only safeguard is to turn to an accepted authority.

Such authority may be a regular dictionary, yet not even in Webster's Unabridged will you find many of the terms which are constantly cropping up in the building industry. That is why the authors, Waugh and Burbank, who knew that they and their fellow teachers needed a specialized book of definitions, decided to compile one. Then, while talking to contractors, builders and architects about the project, it was discovered that they, too, needed it just as badly. The result is **The Handbook of Building Terms and Definitions**, product of many years of painstaking research, compilation and careful cross-checking.

The **Handbook of Building Terms and Definitions** is a compact, desk-size book approximately six by nine inches. The part of speech and correct pronunciation is given for each word. At the low price of only $5.00 postpaid, this is a book which no one in the building industry can afford to be without. Order your copy today on the coupon below. Full refund will be cheerfully made if you are not completely satisfied that this book will prove useful.

AMERICAN BUILDER BOOKS AB-456
30 Church St., New York 7, N.Y.

I enclose remittance of $5.00. Please send me postpaid, one copy of HANDBOOK OF BUILDING TERMS AND DEFINITIONS. I have 10 days to examine the book and, if not satisfied, can return it within that time for full refund.

AMERICAN BUILDER

Classified Directory

Component Parts Manufacturers

There is a parallel between the prefabrication of a home and the production of component parts as both have as their purpose the reduction of job-site labor.

The purpose of this Component Parts Directory is to give the building industry a comprehensive list of these manufacturers who are engaged in producing a package which in itself becomes a structural portion, a major division or a complete integral system within the home. Thus it supplements the preceding Directory of Prefabricated Home Manufacturers as many of those also produce structural parts which are in essence a building component and are not limited to any house design.

Many more products, than those listed here, may actually be classified under this category but in the compiling of this directory an attempt has been made to limit the listings to those products which are complete packages—factory assembled—ready for installation.

In this ever changing market it is virtually impossible to assemble a completely accurate listing of this kind. Any omission is unintentional and AMERICAN BUILDER will publish a supplementary list in its regular editorial pages from time to time as conditions warrant.

AIR CONDITIONERS

General Description: Self-contained air conditioning units for individual room installation. Made to be built into exterior wall and need only electrical connections; no ductwork involved.

Join the profit parade with
modern SWIMMING POOL SUPPLIES

With more than 300 million dollars scheduled for new pool construction and supplies this year, you'll profit by opening a pool department.

Modern filter systems, pool drains and fittings, ladders, vacuums, diving boards—over 100 pool products—are designed by our engineers, built by Modern craftsmen and backed by the 20-year reputation of one of the largest, most dependable manufacturers in the pool field. Thousands of new pools will be built in 1956... millions of dollars will be spent for new equipment. Everything needed to build and maintain any size pool—including chemicals and pool paint as well as equipment, is available from a single reliable manufacturing source. Let Modern help you cash in on the booming pool business.

modern GIVES YOU SO MUCH more...

modern SWIMMING POOL CO., INC. • ONE HOLLAND AVE., WHITE PLAINS, N. Y.

LEARN TO ESTIMATE

You can estimate building construction costs quickly and accurately, and bid on profitable commercial and industrial jobs without worry about "What did I leave out?" or "Am I bidding too high, or worse yet, too low?". Become a successful building contractor by devoting some spare time to the study of our estimating course.

WHAT WE TEACH

We teach you to read plans, list and figure the cost of materials, estimate the costs of labor, and the other things that you need to know to bid on construction work with confidence. The labor cost data that we supply is not vague and theoretical—it is specific, complete, and accurate—it gives you the actual cost of labor required to do work in your locality at today's wage scales. We teach you to prepare estimates complete in every detail.

OUR GUARANTEE

Best of all you don't need to pay us one cent unless you decide that our course is what you need and want. We will send you plans, specifications, estimate sheets, cost data, and complete instructions for ten days study, so that you can see for yourself what this course can do for you. Mail the coupon today—we will do the rest.

CONSTRUCTION COST INSTITUTE
Dept. A456—Box 8788
University Station—Denver 10, Colorado

Send me your course on how to estimate building construction costs for ten days study. If I decide to keep it, I will send you $19.75 (payable in two monthly payments) as full payment. Otherwise I will return the course, and there is no further obligation.

The Homes You Build Cost Less...Look Better... Sell Quicker...if they contain BILT-WELL, nationally advertised Windows and Cabinets!

Build Well with BILT-WELL WOOD WORK

DOUBLE-HUNG AND AWNING WINDOWS, CABINET UNITS

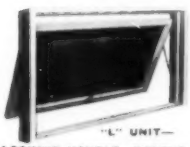

"B" UNIT—
BAR OPERATOR

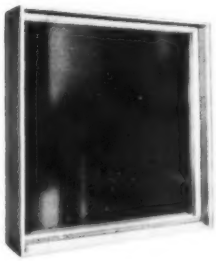

"F" UNIT—
FIXED UNIT

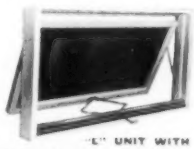

"L" UNIT—
LOCKING HANDLE—HOPPER

"L" UNIT—
LOCKING HANDLE—AWNING

PICTURE UNIT

"L" UNIT WITH
ACCESSORY GEAR OPERATOR

"L" UNIT WITH
ACCESSORY LEVER OPERATOR

NOTE: B, L, and F Awning Window units may be ordered with ½" double insulating glass installed by specifying "Glazed DG" on order.

BILT-WELL AWNING WINDOWS FOR MULTIPLE USE

Designed to offer utmost flexibility, BILT-WELL Awning Windows can be stacked vertically...joined horizontally...reversed for hopper vents...placed on end for casements...installed to flank picture windows...hopper vents under fixed sash...or in any combination of these arrangements.

"B" UNIT—BAR OPERATOR. Assembled with hardware installed. Opens out without opening screen (same unit on end makes a Bar Operated casement unit).

"L" UNIT—LOCKING HANDLE. Assembled with all hardware installed except locking handle. Opens in, with screen placed outside (This same unit, opening out, makes an awning window; placed on end, opening out, it makes a casement window.)

"L" UNIT ACCESSORY-LEVER OPERATOR. Completely assembled. Finished in statuary bronze. This is a scissors-type linkage, operated by a 5" lever arm. The arm travels 180°, from fully closed to fully open, moving from left to right. A simple arrangement allows scissor arms to be instantly detached by hand. Sill cover must be ordered separately to fit window opening.

"L" UNIT ACCESSORY-GEAR OPERATOR. A streamlined durable operator. Mechanism is set in attractive statuary bronze cover. Handle is angled to reduce projection into room. Brass bearings at points of most wear. Detach permits instant release of sash from operator.

"F" UNIT—FIXED UNIT. Unit supplied without operating hardware, with sash fixed in frame.

Wood frame or aluminum frame screens are available for all operating sash. Double Glazing Panels are available for all three awning window units—B, L and F.

PICTURE UNIT. Made in six sizes—3 widths equal to units with 36, 39 and 44" glass, and two heights equal to two units with 18" or 22" glass stacked in height. Fully assembled with frame, sash glazed with ½" double insulating glass, and vinyl gasket permitting removal of sash for installation and insertion of sash with a complete weather-tight seal.

Sizes and Specifications of BILT-WELL Awning Windows—Picture Units

MATERIAL: Units and exterior trim Ponderosa Pine, toxic water-repellent treated to NWMA Standards. Jamb width 4⅜", sash are 1⅜" thick.

GLAZING: Sash clamp glazed SS glass. Removable bead for reglazing. Double glazing panels SS glass with aluminum surrounds and hardware available for all except Picture Unit. Picture Unit (frame, sash and glass) supplied assembled, glazed with ½" double insulating glass.

SCREENS: Aluminum and toxic treated wood screens are wired with aluminum cloth. Hangers and locks included.

WEATHERSTRIP: Sash completely weatherstripped with anodized special alloy aluminum.

HARDWARE: Friction slide hinge installed on operating units. Releasable Bar Operator, statuary bronze finish, installed. Locking Handle, Lever Operator accessory and Gear Operator accessory, statuary bronze finish, packed with screws and instructions. Sill covers for accessory operators must be ordered separately to fit window opening.

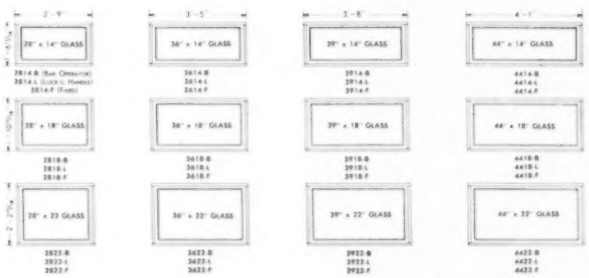

AWNING WINDOW UNITS: (set-up) Two of a size to a carton. Specify size and type (B, L or F.) Specify "Glazed DG" if ½" double insulating glass is desired.

PICTURE UNITS: Assembled, with frame, weatherstripped sash glazed with ½" double insulating glass. Packed one to a carton, specify size.

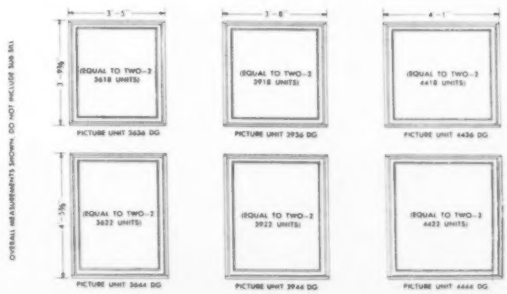

SCREENS: Twelve of a size to a carton. Specify size and type (wood or aluminum).

DOUBLE GLAZING PANELS: (for units with SS glass): Six to a carton. Specify size.

TRIM: Bundled—not carton packed. Specify size.

NOTICE: UNLESS OTHERWISE SPECIFIED, GLAZED SSB. WHEN DOUBLE INSULATING (¾") GLASS IS DESIRED, SPECIFY "GLAZED DG". UNIT NUMBERS ENDING IN "L" ARE ADAPTABLE FOR GEAR OPERATORS.

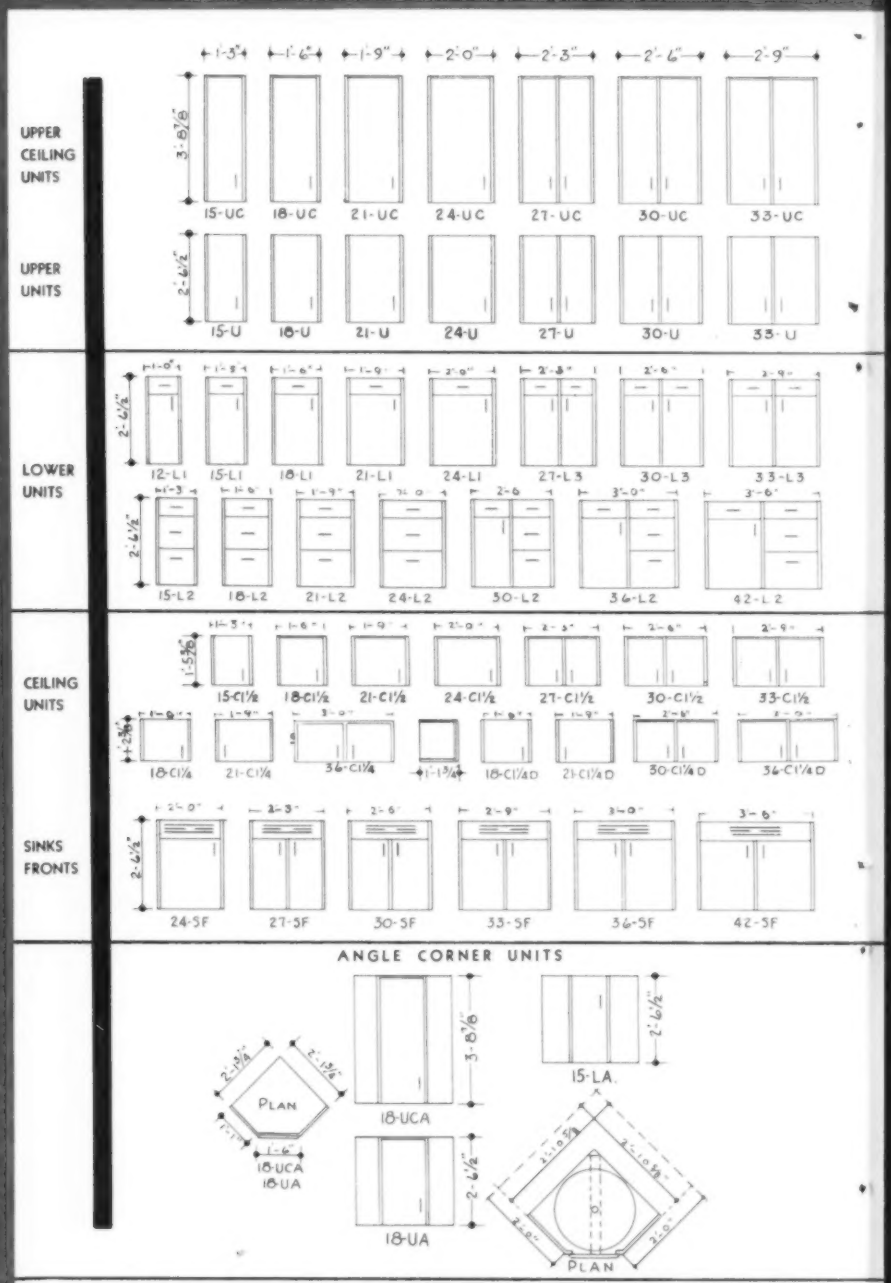

BILT-WELL CABINET UNITS for Kitchens

BILT-WELL Cabinets are standardized units, semi-assembled, offering flexibility so essential for individualized cabinet installation in kitchens, bedrooms, bathrooms and other areas where storage is required. 77 different types and sizes to fit any size or shape of room. The 25 inch counter top, adjustable toe space, easy to reach door and drawer handles and flush effect of the doors and drawers impart a functional design that meets today's requirements in modern homes.

BILT-WELL Cabinets are sectional units in 3 inch modular widths from 15 inches to 48"; all clear kiln-dried Ponderosa Pine, precisely machined, factory prefitted, semi-assembled and carton packed. Doors are vacuum water-repellent treated. And only BILT-WELL has the 45" upper cabinets that run to the ceiling, eliminating the need for building a drop ceiling or soffit.

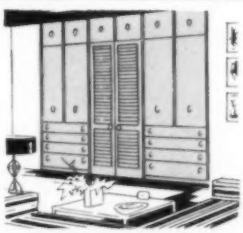

IN BEDROOMS
Spacious wardrobe and drawer units offer utmost flexibility for convenient hanging and storing!

IN BATHROOMS
Ideal for handy towel storage and lavatory supplies. Can be gaily decorated to blend with bathroom color scheme!

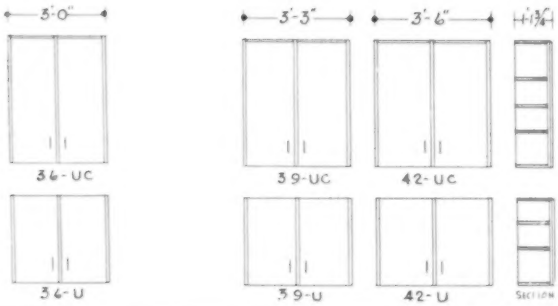

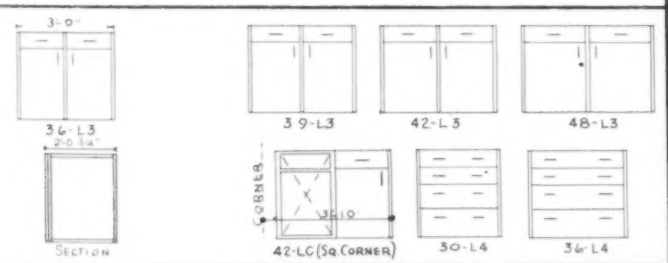

IN RUMPUS ROOM
Just the thing to store toys, games and hobbies in! Sturdily constructed for day-in and day-out family use!

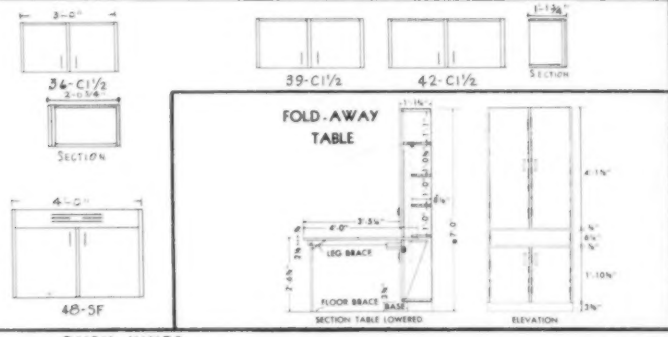

and General Storage!

Build Well with BILT-WELL WOOD WORK

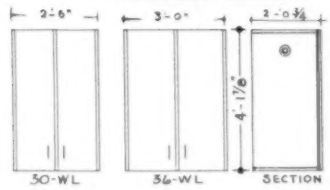

DOUBLE-HUNG AND AWNING WINDOWS, CABINET UNITS

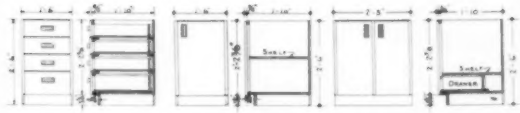

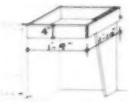

WARDROBE UNITS

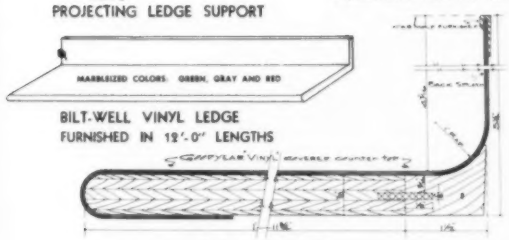

VANITY-LAVATORY UNITS

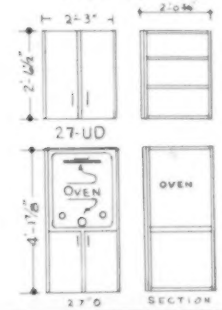

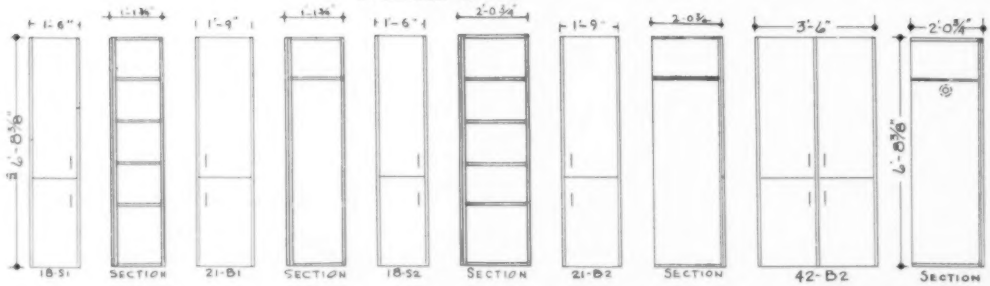

ACCESSORIES Carving Boards, Knife and Fork Trays, Lazy Susans, Half-Circle Swing out Shelves, Sliding Trays, Flour Bins, Pan and Lid Racks, Clothes Poles, Valances and shelves.

OVEN UNITS

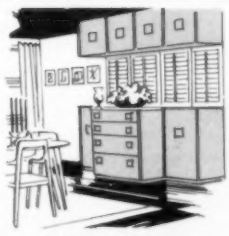

STORAGE UNITS

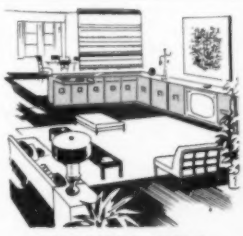

FOR STORAGE WALLS
Attractive and efficient cabinet groupings form beautiful storage walls for a multitude of uses!

IN DINING AREAS
Affords easy access to conveniently stored silverware, china and table linens!

Perfect storage units for cleaning apparatus, washing needs and everyday household items!

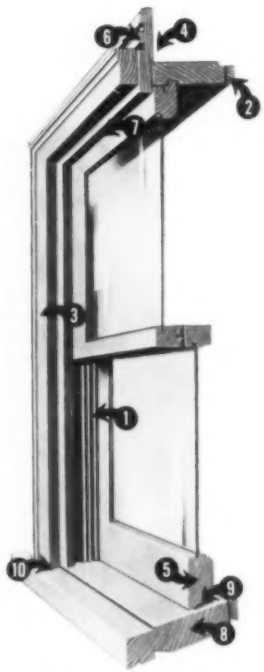

IN SEWING ROOMS
For handy storing of usually misplaced sewing articles, cabinets here will delight the housewife!

Build Well with BILT-WELL WOOD WORK

DOUBLE-HUNG AND AWNING WINDOWS, CABINET UNITS

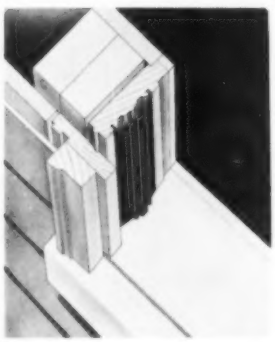

BILT-WELL DOUBLE HUNG WINDOW UNITS

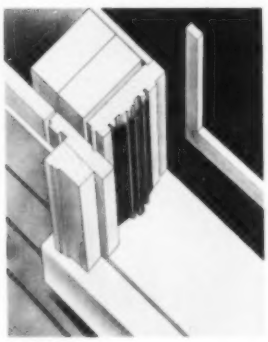

10 Points of BILT-WELL'S Superiority

1. Patented flexible jamb-liner provides weathertightness and ease of operation. Its flexibility automatically compensates for dimensional variations due to climatic changes.
2. Designed for ¾" plaster wall, yet may be easily converted for standard drywall by removing the ex-jamb.
3. Accurately machined and factory pre-fitted. Easy to assemble and simple to install in the wall.
4. Overhead spring balances provide finger-tip operation and perfect counter-balancing, allows sash to stay in any given position. Four balances to a unit, guaranteed for the life of the building.
5. Made of thoroughly seasoned kiln-dried Ponderosa Pine of uniform quality.
6. Wide overlapping one-piece blind stop for easy nailing and weathertight installation. Adaptable to ¾" or ½" sheathing.
7. Bilt-Well Windows meet rigid AWWI requirements for air-infiltration, proving to be twice as weathertight as minimum requirements.
8. Bilt-Well Windows are "water-repellent preservative treated" in strict accordance with approved NWMA standards.
9. Weathertight seals between sash and frame at head and sill, and between meeting rails of sash, make Bilt-Well Windows twice as weathertight, affording substantial fuel savings.
10. Sturdily constructed with 1⅛" jambs and 1⅜" sills. Available knocked-down with all weatherstrip applied at factory.

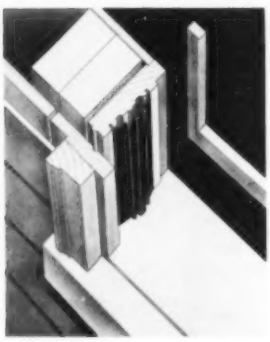

BILT-WELL Double-Hung Window units fit all walls—¾" lath and plaster, ½" or ⅜" dry wall gypsum board or plywood, and exterior sheathing ½" or 25/32" thick.

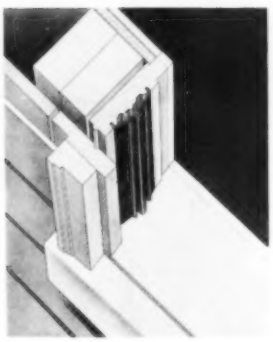

25/32" outside sheathing and ¾" lath and plaster on 2 x 4's—and full width jamb.

25/32" outside sheathing and dry-wall (⅜" or ½") inside on 2 x 4's, and minus inside strip on jamb.

½" outside sheathing and dry-wall (⅜" or ½") inside on 2 x 4's, cut-off rib on blind stop and remove inside jamb strip.

½" outside sheathing and ⅜" dry-wall applied over ½" insulation board on 2 x 4's, cut-off rib on blind stop.

Ask your dealer about the popular Bilt-Well line of Woodwork, or write:

AMERICAN BUILDER

Classified Directory

Associations and Societies of the Building Industry

The American builder is fortunate in that he has available such a large number of associations and societies exclusively devoted to the vast building industry. Their business and professional interests dictate a lively concern with the advancement of building technology and the consequent expansion of the markets for the products and services of all who are a part of this industry.

This listing can be most valuable to the builder as many problems dealing with specialized materials or methods can be overcome or diminished by contacting an authoritive source of information. For this reason the names of associations or societies have been classified alphabetically into related groups.

Care has been taken in compiling this listing so that it might be as accurate as possible. However the American Builder cannot be responsible for changes in addresses and other discrepancies. The Editors welcome suggestions for additions or revisions.

The names of Associations Who Advertise in American Builder appear in Boldface Type

AMERICAN BUILDER

Classified Directory

Brand Names of Building Products and Equipment

Brand Names used to identify principal building products and equipment of major manufacturers are listed in this directory in alphabetical order with the names and addresses of the companies to which the brand names apply.

This listing may be used to ascertain the manufacturer of any product when only the brand name is known. It can also be valuable in determining the source of repair and replacement parts on products and equipment.

Wherever possible brand names which are synonymous with the manufacturer's name have been omitted as these may be readily located in the classified Directory of Products and Equipment Manufacturers.

AMERICAN BUILDER

Classified Directory

Building Products and Equipment Manufacturers

This classified directory has been compiled to provide the industry with the names and addresses of the major producers of building products, equipment and services. It also supplements the preceding directory of Brand Names as those brand names which are synonymous with the manufacturer's name do not appear in that section but may be found here by consulting the specific product classification.

A minimum number of cross references appear in this directory. This has been done to conserve space thus allowing for more individual categories. Choice of either the noun or descriptive adjective, as the classification word, has been used on the basis of the word most acceptable in the parlance of the building industry.

Every attempt has been made to make this listing as complete as possible and to encompass all phases of the building industry. In the event the information desired cannot be found in this directory write to AMERICAN BUILDER, Directory Editor, 79 W. Monroe St., Chicago 3, Ill.

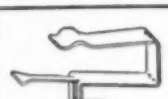

The names of Manufacturers who advertise in American Builder appear in Boldface Type

These coarse grit, hard bricks are superior for finishing and removing mould marks on concrete and stone work. Deep flutes diagonally across the cutting face of the brick provide sharp edges and a clean shearing action, while permitting chips to be freely removed from working surfaces.

RENT or BUY
these cost-reducing
forms for concrete

1. Buy EFCO "Lifetime" Steel Forms for your minimum or large form requirements where reuse of forms and simplicity of work makes purchase practical.

2. Buy SPECIAL ECONOMY Forms for unusual jobs. These are manufactured to your specifications and supplied with or without supervisory service.

3. Rent ECONOMY Steel Forms for larger and more difficult work. These are supplied with supervisory service.

THE COMPLETE THRESHOLD LINE

Superior Threshold Plate is available in bulk, fabricated to customer's requirements. However, complete Unit Packages containing all necessary hardware are recommended for most organizations as the package lends itself to better merchandising and easy handling, as well as "Do-It-Yourself" sales.
Complete line of decorative trim and special extrusions to customer's specifications. Send for latest circular.

SELL E-Z-ON-

All Metal Interlocking WEATHERSTRIP

The ideal weatherstrip to sell the do-it-yourself trade as well as to lumbermen, contractors and carpenters. Comes packaged in sets and by the linear foot. Easily installed inside or outside, without removing sash. Makes a permanent home improvement of lasting efficiency. Priced attractively low, yielding generous profits. Fits all double hung windows and standard doors. Made of zinc and copper. Nothing to wear out or deteriorate. Promotion literature available. Write for illustrated circular and wholesale prices.

SAGER

#8SS THRESHOLD

Smartly designed with a resilient vinyl tubing that actually hugs the bottom of a door. Vinyl tube has two sides; when one side becomes worn . . . reverse it. Girder construction gives maximum load bearing capability and is easy to sweep over as there are no sharp edges to trap dirt or trip on. Individually packaged in all popular lengths, complete with screws and instructions for installing.

#9VW WEATHERSTRIP

For top and sides of doors, also has a double vinyl tube that absorbs any irregularities in the door, assuring a perfect seal. Vinyl tube can be reversed when one side wears. A hammer and snips are the only tools needed to install. Sold in sets for doors and windows or in bulk. Door thresholds are packed separately.

The Month Ahead

HOUSTON HUSTLES

Builders from the Southwest, particularly Texas, who are beginning to think about their Fall Home Parades, would do well to visit Houston the week of May 20-27. This is the week of the city's annual parade, generally a howling success, and there should be a lot of good ideas running around loose.

SELL 'EM THE OUTDOORS

May is the beginning of the outdoor living season. The weather will do a lot of your selling for you, but how about giving it a hand? Patios, sliding window walls and barbecues are probably a part of your models. Play them up big in your merchandising.

SPRING—BEST SALESMAN

Make it easy for the whole family to visit your spring models. Provide "amenities"—toilet facilities for little Johnny who "forgot" before he left home; picnic tables and "basket parties welcome" signs.

AC MEANS "ALSO CLEAN"

You can help Air Conditioning help you sell homes by playing up more than simple cooling. Open windows mean dust and grime. Prospects may have decided to get along without cooling, but the "healthy, clean, dust-free and filtered home" strengthens the argument.

Spotlight on remodeling

Next month's issue of American Builder will take the first of several looks at remodeling. Our editors will make a city-by-city survey to determine what steps are being taken by various groups to further Operation Home Improvement. They'll talk to local NAHB chapters to see how they are aiding builders to get into the remodeling business; they'll talk to successful remodeling contractors to find out how they conduct operations, and what steps might further improve their business; and they'll talk to municipal officials to find out how local government is helping. In other words, May's American Builder will be an implementation handbook for remodelers. If you plan any remodeling work, don't miss it.

How about vacation cottages

May is the month when members of the family start fighting over where to go for their vacation. If you read the March issue of American Builder, you know that vacation houses are getting to be big business; why not cut yourself a slice of the pie? If your building operation is anywhere near a vacation area, why not design and put up a model cottage that you could build on a customer's lot? And if it doesn't sell, you can use it yourself.

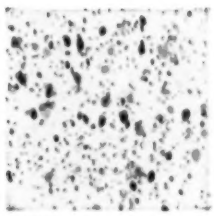

Who's for a small plunge?

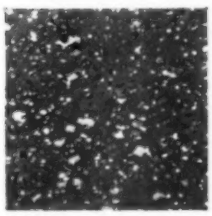

This looks like the break-through year in swimming pools. Watch for our piece on the merchandising possibilities in pools in the May issue, but right now you might well look around for a pool tie-up, either the small individual job as an extra, or a larger community-type facility. Bob Hoffman, publisher of *Swimming Pool Age*, estimates, "very conservatively, that 20,000 swimming pools were built in 1955, and that at least 30,000 will be built in '56. . . . Cabana clubs have become big business in some parts of the country, golf clubs and motels are adding pools, home builders are featuring pools as optional equipment, or including community pools with groups of 50 or 100 homes."

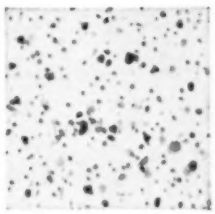

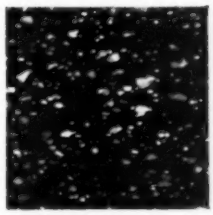

MATICO—the floor that helps you sell the home!
